(a) Includes particulars for New South Wales trolley-buses up to cessation of operation in August, 1959.

(b) Tramway vehicle miles compiled on a revised basis for New South Wales; therefore figures from 1956-57 are not comparable with those for previous years.

(c) Includes particulars for Tasmanian trams and trolley-buses.

(d) Excludes Western Australia.

(e) Excludes government grants.

(f) Includes provision of reserves for depreciation, etc., where possible.

(g) Includes accidents relating to omnibuses operated by the Adelaide Municipal Tramways Trust and the Hobart and Launceston Metropolitan Transport Trust, and excludes accidents to employees in New South Wales.

NOTE.—Minus sign (—) denotes deficit.

3. *Private Services.—Summary of Operations.* The following table shows the operations of motor omnibus services under the control of private operators in New South Wales, Victoria, South Australia and Western Australia during each of the years 1955–56 to 1959–60:—

MOTOR OMNIBUS SERVICES: PRIVATE.

Year. —	Number of Omnibuses.	Omnibus-miles. (‘000.)	Passenger-journeys. (‘000.)	Value of Plant and Equipment. (£’000.)	Gross Revenue. (£’000.)	Persons Employed.

(a) Metropolitan, Newcastle and Wollongong transport districts only. (b) Metropolitan area only. (c) Vehicles only. (d) Drivers only. (e) Partly estimated. (f) Services licensed by the Metropolitan Transport Trust and the Transport Control Board. (g) Not available. (h) Includes services operated in metropolitan and rural areas. (i) During 1958–59, five private services were taken over by the Metropolitan Transport Trust.

D. FERRY (PASSENGER) SERVICES.

1. *General.*—Ferry passenger services are operated in the following States—New South Wales, at Sydney and Newcastle; Western Australia, on the Swan River at Perth; Tasmania, on the Derwent River at Hobart, on the Mersey River at Devonport and across D’Entrecasteaux Channel to Bruny Island. Control is exercised both by governmental authorities and by private operators. In Victoria and Queensland the services operated are not extensive. There are no ferry passenger services in South Australia.

2. **Summary of Operations.**—The operations of ferry passenger services in New South Wales, Western Australia and Tasmania during the years 1955–56 to 1959–60 are summarized in the following table. Particulars of passengers carried on vehicular ferries are not included.

FERRY (PASSENGER) SERVICES.

E. MOTOR VEHICLES.

1. **Motor Industry.**—Chapter VI.—Manufacturing Industry contains summarized information on the motor industry of Australia and includes some data on the imports of motor bodies and chassis. Chapter XIII.—Trade contains further data on imports, including those of petroleum products.

2. **Registration.**—(i) *General.* The arrangements for the registration of motor vehicles and the licensing of drivers and riders are not uniform throughout Australia, since they are the function of a separate authority, or authorities, in each State and Territory. The following statement indicates the procedure followed at 30th June, 1960, in each of the States and Territories, and the fees for registration and licensing and the amount of motor tax payable where this tax is not incorporated in the registration fees. Complete or partial exemption from the payment of registration fees or motor tax is usually granted for certain vehicles, such as ambulances, fire-brigade vehicles, those owned by farmers and used solely for carting the produce of, or requisites for, their farms, Government-owned vehicles, etc.

In all States except South Australia, before a licence to drive a motor vehicle or ride a motor cycle is issued, the applicant must, by passing the prescribed test, satisfy the competent authority that he or she is capable of driving or riding the vehicle concerned. All vehicles before being registered must be tested for road-worthiness.

(ii) *New South Wales.* The registration of vehicles, licensing of drivers, and collection of various taxes, fees and charges are functions of the Commissioner for Motor Transport. By arrangement with the Commissioner for Motor Transport, the police effect the registrations and collect the taxes and fees in certain areas. The normal term of registrations and licences and renewals thereof is a year, but quarterly registrations of motor vehicles are permitted under certain conditions. A driver's licence costs £1 a year for a motor vehicle and a rider's licence 15s. a year for a motor cycle. A learner's permit, which has a currency of two months, costs 5s. Annual registration fees are as follows:—Motor cycles, 15s.; motor cars, lorries, trailers, tractors and plant, £1 10s.; taxi cabs, hire cars and motor omnibuses—metropolitan

area and cities of Greater Wollongong and Newcastle, £5; country, £3; traders' plates—motor cycles, £3 3s. 6d., other vehicles, £13 15s. An additional fee of 10s. a year is payable in respect of any vehicle used in trade or business. A motor tax is payable in addition to the registration fee. For motor cycles the tax is:—without side-car, £1 7s.; with side-car or box, £2 7s. 6d. For vehicles other than motor cycles, the tax is payable on the unladen weight of the vehicle. The taxes payable for different classes of vehicles are as follows:—

Motor cars (including taxi-cabs, etc.). The rate commences at 3s. 6d. a $\frac{1}{2}$ cwt. but decreases slightly as the weight of the vehicles increases.

Motor Lorries, Trailers and Plant. The tax payable commences at £1 15s. for a vehicle of 5 cwt. or less, and rises by a proportionately greater amount for each increase of 5 cwt., so that the average amount payable per cwt. increases with the weight of the vehicle.

Tractors. The rates of tax are the same as for motor lorries, subject to a maximum of £31 14s. 6d.

Motor Omnibuses and Tourist Vehicles. The rate commences at 5s. a $\frac{1}{2}$ cwt., but decreases slightly as the weight of the vehicle increases.

In the case of vehicles with solid rubber tyres, the rates shown above are increased by 25 per cent.

(iii) *Victoria*. The registration of motor vehicles and the licensing of drivers and riders are controlled by the Chief Commissioner of Police under the provisions of the Motor Car Act. The annual fees payable for the registration of motor vehicles and licensing of drivers and riders are as follows:—

Motor cycles (without trailer, fore-car or side-car attached)	£1 10s.
Motor cycles (with trailer, etc.) ..	£2 5s.
Motor cars (private use) ..	4s. 6d. for each power-weight unit. (The number of power-weight units equals the sum of the horsepower and the weight in cwt. of a motor car unladen and ready for use.)
Trailers attached to motor cars ..	£1 10s. to £6, according to the unladen weight and type of tyres.
Commercial Passenger Vehicles (omnibus type)—operating under specified licences	£7 10s.
Motor cars used for carrying passengers or goods for hire or in the course of trade	From 5s. 6d. to 13s. 3d. for each power-weight unit, according to the unladen weight and type of tyres.
Motor cars (constructed for the carriage of goods) owned by primary producers and used solely in connexion with their business	From 3s. 9d. to 8s. for each power-weight unit, according to the number of wheels and type of tyres. (When more than one motor car is owned, the rate shall apply to one motor car only.)
Self-propelled mobile cranes used otherwise than for lifting and towing vehicles	£10 (unless a lower fee would otherwise have been payable).
Drivers' and riders' licences (3 years)	£1 10s.

Notwithstanding anything in the foregoing paragraphs, the minimum fee payable for the registration of a motor vehicle (other than a motor cycle) shall be £4 10s.

On 16th November, 1959, the Victorian Government placed a surcharge of £1 on every Third Party Insurance Premium. As from 16th May, 1960, no registration fee shall be payable on certain vehicles incorporating agricultural implements, used within certain limits.

(iv) *Queensland*. The Main Roads Department controls the registration of motor vehicles within the State. The rates are as follows:—Annual registration fees for pneumatic-tired vehicles propelled by petrol engines are determined by adding the horsepower to the weight in cwt. of the vehicle ready for use, and charging 6s. a unit. For solid-tired vehicles propelled by petrol engines the sum of the horsepower, weight of the vehicle, and maximum permissible load (in cwt.) is charged at 5s. a unit if the maximum permissible load is not over 2 tons, and 9s. a unit if over 2 tons. Registration fees for trailers are determined at the rate

of 6s. a cwt., and for caravan trailers at the rate of 9s. a cwt. Traction engines are registered at the fixed rate of £3 3s. a year. The fees payable according to these rates on motor cars range from £3 12s. to approximately £27. On pneumatic-tyred trucks and utilities, the fees are from about £12 12s. to over £15 for a truck with a capacity of 1 ton, and up to £30 for 5-ton trucks. Fees for motor cycles are £2 5s., or £3 8s. with a side-car. With the above-mentioned fees, an annual driving fee of 15s. for a motor vehicle or motor cycle must be paid to the Main Roads Department.

The driver of any motor vehicle or the rider of any motor cycle must hold a licence from the Commissioner of Police. Licences are endorsed according to the types of vehicles in the operation of which the holder has shown proficiency and which he or she is permitted to operate. The period of currency of a licence varies according to the age of the applicant, namely:—Aged under 41 years, 10 years; 41 years and under 46 years, until 51st birthday; 46 years and under 62 years, 5 years; 62 years and under 66 years, until 67th birthday; 66 years and over, 1 year.

(v) *South Australia.* Under the provisions of the Motor Vehicles Act 1959, the Registrar of Motor Vehicles controls the registration of all motor vehicles, and the granting of licences. The same fee is prescribed for both a motor vehicle propelled by a compression ignition (diesel) engine and a vehicle of the same horsepower and weight propelled by a petrol engine. The power-weight unit is the basis for the calculation of registration fees. The period of registration is for six or twelve months commencing with the date of registration. Commercial vehicles owned by primary producers, prospectors or fishermen are registered at 50 per cent. of the ordinary fee. The ordinary fees payable for yearly registration of motor vehicles, other than motor cycles and trailers, extend from a minimum of £3 (commercial vehicles £3) for 10 power-weight units or less to £40 10s. (commercial vehicles £56) for 125 power weight units. For each additional 5 power weight units or part thereof in excess of 125, £2 (commercial vehicles £3) is charged. The ordinary fees for motor cycles are:—solo up to 1cwt., £1 10s.; over 1 cwt., £2 5s.; with sidecar attached, £3. Fees for trailers vary according to the weight of the vehicle and range from £2 5s. for 1 ton or less, to £4 10s. for 2 tons or more. An extra 50 per cent. is charged for trailers with solid rubber tyres and 100 per cent. for those with metal tyres. Fees for drivers' and riders' licences are:—for any motor vehicle, £1; for a motor cycle, 10s.

(vi) *Western Australia.* The Traffic Act 1919–1960 provides for the registration of motor vehicles by (i) the Commissioner of Police for the Metropolitan Traffic District and (ii) individual Local Government Authorities (10 Municipalities and 114 District Road Boards) throughout the remainder of the State. Ministerial supervision is exercised by the Minister for Transport. Registration fees for motor vehicles other than motor cycles are assessed on a power-weight unit basis. The power-weight of a vehicle is the weight in cwt. of the vehicle ready for use plus the rated (R.A.C. formula) horsepower. As at 30th June, 1960, annual fees for all types of vehicles were as follows:—cars, 5s. for each power-weight unit; commercial vehicles, from 6s. a unit to 9s. a unit where the number of units exceeds 100; tractors (other than prime movers), 4s. each unit; tractors (prime movers), from 5s. 3d. a unit (maximum 50 units) to 9s. a unit where the number of units exceeds 100. Trailers and caravans are assessed on the unladen weight and semi-trailers (the trailer portion of an articulated vehicle) on a load plus weight basis. Annual fees are:—trailers, from £1 10s. (10 cwt.) to £20 (30 cwt.) and £1 for each cwt. in excess of 30 cwt.; caravans, from 3s. to 5s. a cwt.; semi-trailers, from £1 10s. where the weight of the semi-trailer plus the declared maximum load does not exceed 10cwt., to £72 for the first 10 tons and £6 for each additional ton of load-weight thereafter.

Additional fees are chargeable as follows:—80 per cent. extra if fitted with metal tyres, 40 per cent. if fitted with solid rubber tyres and 10 per cent. if fitted with cushion tyres (i.e., neither solid nor pneumatic), whilst vehicles such as excavators, graders, tractors, etc., using fuel other than petrol are charged at double the assessed fee. Annual fees for motor cycles vary from 15s. (maximum 75 c.c.) to £2 10s. for over 350 c.c. capacity and, with side-car attached, £3 irrespective of the size of the motor cycle. Vehicles used in the carriage of either passengers or goods for hire or reward (other than an omnibus licenced under the State Transport Co-ordination Act 1933–1948) are subject to the additional registration fee of 15s. a wheel or pair of dual wheels (i.e. £1 10s. per axle). The issue of drivers', riders' and conductors' licences, on an annual basis, is the sole prerogative of the Commissioner of Police. The annual driver/rider licence fee is £1 whilst the additional fee to drive an omnibus or taxi (conductor's licence) is 10s. The maximum period for vehicle registration is twelve months, but half-yearly renewals may be effected. Date to date registration periods operate in the Metropolitan traffic area; elsewhere, a quarterly system of "staggering", whereby the last day of each quarter is an expiry date, is in operation.

(vii) *Tasmania*. By the Transport Act 1938 the Transport Commission assumed control of the registration and taxation of motor vehicles, the licensing of drivers and the regulation of commercial transport. Annual registration fees are as follows:—Motor vehicles other than motor cycles and trailers, £1 10s. trailers, £1; motor cycles, £1. Charges for transfer of registration of vehicles and duplicate certificates are 10s. and 2s. 6d. respectively. Charge for the transfer of trailers is 5s. A licence to drive or ride any motor vehicle costs £1 per year. Motor tax is calculated on a power-weight basis—i.e., unladen weight units and horse-power. Separate rates are provided for lorries, trailers, and other motor vehicles. For lorries and trailers, every $\frac{1}{2}$ cwt., and for other motor vehicles, every cwt., constitutes a weight unit. The rate of tax for lorries is 3s. 6d. a unit and for motor vehicles other than lorries and trailers 4s. 6d. a unit. In the case of a trailer, if the number of weight units does not exceed ten, no tax is payable, but for every unit exceeding ten the rate is 3s. 6d. For motor cycles the tax is £2 for less than 1 horse-power, and £2 15s. for 1 horse-power and over.

(viii) *Northern Territory*. The registration of motor vehicles and the licensing of drivers and riders is controlled by the Registrar of Motor Vehicles, under the provisions of the Motor Vehicles Ordinance 1949–1959. Annual registration fees for motor cars, motor lorries and tractors and motor omnibuses vary according to whether the vehicle is fitted with (a) pneumatic, semi-pneumatic rubber or super-resilient tyres or (b) non-pneumatic or solid tyres. The fees payable (for each $\frac{1}{2}$ cwt.) are as follows:—motor cars, (a) 2s. 9d., (b) 3s. 9d.; motor lorries and tractors, (a) 2s. 9d., (b) 3s. 6d.; motor omnibuses, (a) 4s. 3d., (b) 5s. 6d. For British manufactured vehicles these rates are reduced by 6d. a $\frac{1}{2}$ cwt. A concession of 50 per cent. is allowed for (a) a motor lorry or tractor owned and used by a farmer or grazier solely for transporting his own produce or requisites for his business and (b) a motor lorry owned and used by a person engaged, on his own account and not in association with more than two other persons, in mining, hunting or trapping. The maximum fee for a motor tractor is £15. Registration fees for motor cycles are as follows:—without side-car—British manufactured, £1 1s., other, £1 2s. 6d.; with side-car—British manufactured, £1 18s., other, £2. For other motor vehicles the fees are—British manufactured, 3s. a $\frac{1}{2}$ cwt., other, 3s. 6d. a $\frac{1}{2}$ cwt.

The annual fee for a licence to ride a motor cycle is 5s. and to drive any other motor vehicle 10s. Where the licence is in respect of a motor lorry with a carrying capacity of more than one ton, a motor omnibus, a hire car, or a motor vehicle licensed to carry goods or to carry workmen to and from their work, an additional 10s. is payable. The fee for the use of one trader's plate is £1.

(ix) *Australian Capital Territory*. The registration of motor vehicles and the licensing of drivers and riders in the Australian Capital Territory is controlled by the Australian Capital Territory Services Branch of the Department of the Interior under the provisions of the Motor Traffic Ordinance 1936–1960. Annual registration fees for motor cars, lorries and omnibuses are as follows (rates are for each $\frac{1}{2}$ cwt. of unladen weight):—motor cars, 3s. 6d. a $\frac{1}{2}$ cwt.; motor lorries—not over 40 cwt. unladen weight, 3s. 6d.; over 40 to 80 cwt., 4s. 3d.; over 80 to 120 cwt., 5s.; over 120 cwt., 5s. 9d.; motor omnibuses, 5s. Fees for other motor vehicles are:—motor cycles—without side-car, £1 10s., with side-car, £2 10s.; motor tractors—primary producers', £1, other, £5; other motor vehicles, £5. The rates charged for the registration of trailers are:—domestic, social or farmers' purposes only—unladen weight not over 5 cwt., 10s.; over 5 to 10 cwt., £1; over 10 cwt., £1 for every 10 cwt. or part thereof; other trailers—2s. 9d. a $\frac{1}{2}$ cwt. of the unladen weight. Concessions are available in the case of vehicles owned by primary producers, totally and permanently incapacitated ex-servicemen, clergymen and certain members of the staffs of diplomatic missions.

The annual fees for drivers' and riders' licences are:—car, lorry or motor cycle, 10s., other vehicles, 12s. 6d.

3. *Taxi-cabs and Other Hire Vehicles*.—In all the capital cities and in most of the provincial centres, taxi-cabs and other vehicles ply for hire under licence granted by either the Commissioner of Police or the local government authority concerned. As most of these vehicles are independently controlled by individuals or small companies, it has not been possible to obtain complete data in respect of their operations.

4. *Motor Omnibuses*.—In both urban and provincial centres, motor omnibus traffic has assumed considerable proportions during recent years, and in some States the railway and tramway systems run motor services complementary to their main services. There has been a considerable replacement also, during the last few years, of existing tramway services by trolley-bus and motor omnibus services. (See pp. 545–6.)

5. *Motor Vehicles on the Register, etc.—(i) Registrations and Revenue.* The following table shows particulars of the registration of motor vehicles, licences issued and revenue received for 1959–60 and a summary for Australia for each of the years 1955–56 to 1959–60. It should be noted that in Victoria registration is made on the basis of the purpose for which the vehicle is to be used; consequently, motor car registrations are overstated by the inclusion of commercial vehicles registered for private use.

A graph showing, for all motor vehicles other than motor cycles, the registrations in force at 30th June of each year from 1925 to 1960 will be found on page 550.

(a) Excludes, at 30th June, 1960, trailers (215,472), road tractors, etc. (70,451), and dealers' plates (9,715). (b) Includes taxis, hire cars and station wagons. (c) Includes utilities, panel vans, trucks and omnibuses. (d) See reference to Victoria above. (e) Not available. (f) Excludes Queensland.

NOTE.—All Commonwealth-owned vehicles are included except those belonging to the Defence Services. Prior to 1st January, 1956, Department of the Navy vehicles were also included.

(ii) *Relation to Population.* The table following shows the number of vehicles (excluding motor cycles) registered per 1,000 of population in each State and Territory at 30th June for each of the years 1956 to 1960.

MOTOR VEHICLES (EXCLUDING MOTOR CYCLES) REGISTERED PER 1,000 OF POPULATION.

6. **New Vehicles Registered.**—(i) *States and Territories, 1959–60.* The following table shows the number of new vehicles registered in each State and Territory during 1959–60. A graph showing the number of new motor vehicles (excluding motor cycles) registered during each of the years 1928–29 to 1959–60 will be found on page 550.

NEW MOTOR VEHICLES REGISTERED, 1959–60.

Vehicles.	N.S.W.	Vic.(a)	Q'land.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.

(a) See para. 5(i) on p. 557. (b) Includes taxis, hire cars and station wagons. (c) Includes utilities, panel vans, trucks and omnibuses.

(ii) *Australia.* Particulars of the number of new vehicles registered in Australia during each of the years 1955–56 to 1959–60 are shown in the following table:—

NEW MOTOR VEHICLES REGISTERED: AUSTRALIA.

Vehicles.	1955–56.	1956–57.	1957–58.	1958–59.	1959–60.
Motor cars (a)(b)	163,598	149,695	165,236	170,181	212,421
Commercial vehicles, etc.(b)(c)	69,312	58,967	67,139	74,390	84,554
Motor cycles	10,530	9,655	10,604	9,992	9,692
Total	243,440	218,317	242,979	254,563	306,667

(a) Includes taxis, hire cars and station wagons. (b) See para. 5(i) on p. 557. (c) Includes utilities, panel vans, trucks and omnibuses.

7. **World Motor Vehicle Statistics, 1960.**—At 1st January, 1960 there were 117,788,400 motor cars, trucks and omnibuses registered in various countries of the world. This is an increase of 5.0 per cent. on the figure for the previous year, 112,147,200. Of the 1960 registrations, 70,234,300 or 67.7 per cent. of the world total were in the United States of America, whilst Australian registrations amounted to 2.3 per cent. This information is largely derived from the *American Automobile*, May, 1960.

F. ROADS AND BRIDGES.

Information on the length of roads in Australia, the class of roads and the composition, together with particulars of the financial operations of the roads authorities in the several States is included in Chapter XIX.—Local Government, of this Year Book.

G. ROAD TRAFFIC ACCIDENTS.

1. **General.**—Statistics of "Total Accidents Recorded" were collected to 31st December, 1957, on a comparable basis for all States except Tasmania, where, under legislation passed on 10th August, 1954, it became no longer obligatory to report accidents involving only damage to property. However, this series was suspended from 1st January, 1958, owing to the inconsistency between States in recording "damage only" accidents.

Details are not available in respect of road traffic accidents which occur in the Northern Territory.

2. **Accidents Involving Casualties.**—(i) *States, 1959–60.* The following table gives a summary of accidents involving casualties in each State and the Australian Capital Territory for the year 1959–60.

**ROAD TRAFFIC ACCIDENTS INVOLVING CASUALTIES(a): ACCIDENTS
RECORDED AND CASUALTIES, 1959-60.**

(a) Accidents (reported to the police) which occurred in public thoroughfares and which caused death or injury to persons to an extent requiring surgical or medical treatment.

(iv) *Accidents Recorded and Casualties, classified according to Type of Vehicle, Road User, etc., Involved.* The following table shows, for the year 1959-60, the number of accidents involving casualties in which each of several classes of vehicles, road users, etc., were involved. The persons killed and injured are similarly classified. As in the table in sub-paragraph (ii) above, responsibility for cause of accident is not indicated by this classification.

ROAD TRAFFIC ACCIDENTS INVOLVING CASUALTIES(a), CLASSIFIED ACCORDING TO TYPE OF VEHICLE, ROAD USER, ETC., INVOLVED: AUSTRALIA, 1959-60.

Particulars.	Motor Vehicle.	Motor Cycle.	Pedal Cycle.	Tram.	Animal and Animal-drawn Vehicle.	Pedestrian.	Fixed Object.	Other Vehicle.
Accidents Involving ..								
Casualties ..	41,932	6,300	4,492	351	452	9,033	2,693	226
Persons Killed ..	2,341	198	143	26	10	750	167	67
Persons Injured ..	56,729	7,193	4,582	440	550	8,913	3,784	349

(a) Accidents (reported to the police) which occurred in public thoroughfares and which caused death or injury to persons to an extent requiring surgical or medical treatment.

NOTE.—As accidents and casualties classified according to one type of road user, etc., may also be classified according to another, these totals cannot be added across to obtain grand totals.

The 41,932 accidents involving casualties in which motor vehicles were involved comprised 13,829 collisions with other motor vehicles, 4,214 with motor cycles, 3,758 with pedal cycles, 134 with trams, 267 with animals and animal-drawn vehicles, 8,367 with pedestrians, 2,384 with fixed objects, 189 with vehicles other than those mentioned, 8,316 instances of overturning or leaving the roadway, and 474 accidents to passengers only.

3. Road Traffic Accidents Involving Casualties, and Persons Killed or Injured.—The following table shows the number of road traffic accidents involving casualties and persons killed or injured in road traffic accidents in each State and the Australian Capital Territory during each of the years 1955–56 to 1959–60:—

**ROAD TRAFFIC ACCIDENTS INVOLVING CASUALTIES(a) AND PERSONS

(a) Accidents (reported to the police) which occurred in public thoroughfares and which caused death or injury to persons to an extent requiring surgical or medical treatment.

4. Road Safety Organizations.—Chapter XXX.—Miscellaneous of this Year Book contains a description of the objects and work performed in the interests of road safety by the National Safety Council of Australia and the Australian Road Safety Council.

H. CIVIL AVIATION.

1. **Historical.**—A short review of the progress of civil aviation in Australia up to the date of foundation of a Civil Aviation Administration was published in Official Year Book No. 16, pages 334–5, and a brief account of the foundation and objects of this Administration was published in Official Year Book No. 19, page 299. Official Year Book No. 38 and earlier issues contain information on the control of civil aviation by the Board (1936) and later (1939) by the Department of that name. The Acts defining the broad principles of operation of the administration of civil aviation and the Regulations amplifying them, and the principal functions of the administration are also described.

The Department of Civil Aviation is divided in twelve Divisions as follows:—Air Transport; International Relations; Administration, Personnel and Establishments; Finance and Stores; Airport Engineering; Aviation Buildings and Property; Flying Operations; Airworthiness; Airways Operations; Airways Engineering; Aviation Medicine; Accident Investigation and Analysis.

2. **International Activity.**—(i) *International Organizations.* A full report of the formation of the International Civil Aviation Organization, the Commonwealth Air Transport Council and the South Pacific Air Transport Council appeared in Official Year Book No. 37 and particulars of subsequent activity in the international field were included in issue No. 38. The International Civil Aviation Organization had a membership of 80 nations at the end of June, 1960. Australia has continued her representation on the Council, a position which she has held since I.C.A.O. was established in 1947. The fourteenth meeting of the South Pacific Air Transport Council was held in Melbourne in November, 1960. Further details will be found in Official Year Book No. 40 and earlier issues.

(ii) *International Air Services.* Qantas Empire Airways have introduced into service seven Boeing 707 jet aircraft and four Lockheed Electra aircraft. The Boeing 707 operates to North America and on to the United Kingdom, and also to the United Kingdom via the Middle East. Lockheed Electra aircraft are in service to Japan via Manila and Hong Kong; Super Constellation aircraft provide services to South Africa across the Indian Ocean and a cargo service to United Kingdom via the Middle East; and DC4 aircraft fly to Norfolk Island. Qantas was operating aircraft over 73,463 route-miles on international services at 30th November, 1960. A summary of the operations of overseas services wholly or partly Australian-owned appears on page 565.

Three Lockheed Electra aircraft operated by Tasman Empire Airways Ltd., link Sydney with Auckland, Christchurch and Wellington; Melbourne with Auckland and Christchurch; and Brisbane with Auckland.

3. **Australian National Airlines Commission.**—The Commonwealth Australian National Airlines Act 1945 constituted the Australian National Airlines Commission for the purpose of establishing, maintaining and operating airline services for the transport of passengers and goods between Australian States and/or Territories and within Australian Territories. The Commission may, with the approval of the Minister, undertake services between Australia and places outside Australia, and, in certain circumstances, may engage in intra-state operations.

The operating organization set up to give effect to the Act is Trans-Australia Airlines.

4. **Regular Air Services within Australia.**—Details of the Government's rationalization scheme and the 1957 amendment to the Civil Aviation Agreement Act consequent upon Ansett Transport Industries Ltd. purchasing Australian National Airways Pty. Ltd. will be found in Official Year Book No. 44, pages 420 and 421.

The Airlines Equipment Act, assented to in October, 1958, gave effect to financial arrangements whereby re-equipment programmes would be assisted. An important example of this re-equipment programme was the introduction of Fokker Friendship and Lockheed Electra aircraft into regular air services within Australia.

A summary of the operations of regular air services within Australia appears on page 565 and a map showing air routes on pages 567–8.

5. **Air Ambulance Services.**—A brief statement on the foundation and objects of the Air Ambulance Services will be found in Official Year Book No. 32, pages 145 and 146.

During the year 1959-60, the Air Ambulance and Royal Flying Doctor Services continued to provide medical aid for the outback regions of Australia. The Royal Flying Doctor Service of Australia, operating from Broken Hill, New South Wales, Cloncurry, Queensland, Alice Springs, Northern Territory (operated in conjunction with the Department of Health), covers a wide area of inland Australia. The Bush Church Aid Society for Australia and Tasmania, supported by funds from the Church of England, operates from Ceduna in South Australia. The Federal Methodist Inland Mission operates services from Meekatharra, Western Australia, and the Queensland Ambulance Transport Brigade operates a service from Cairns in Queensland. Recently a Flying Surgeon Service came into operation in Queensland.

6. Training of Air Pilots.—A brief statement of the pre-war policy of the Commonwealth Government regarding assistance to Aero Clubs was given in Official Year Book No. 32, page 146, and details of further assistance granted are given in subsequent Year Books. Year Book No. 44, page 421, contains particulars of the existing system of maintenance grants for hours flown and bonus payments for licences obtained.

During the year 1959-60, the flying training organizations (non-profit aero clubs and commercial flying schools) earned bonuses in respect of 351 private pilot licences, 65 commercial pilot licences and 33 initial instructor ratings. Subsidized hours flown by aero clubs and flying schools numbered 83,899, and the total earnings of all organizations amounted to £183,495. An overall limit placed on the subsidy restricted the total payments to £145,000. There were 34 aero clubs and 7 commercial flying training schools in operation during the year, and, in addition to subsidized civil flying, some 17,320 unsubsidized civil hours and 4,441 service training hours were flown; in all, a total of 105,660 hours.

7. Gliding Clubs.—For the year 1959-60, a total subsidy of £3,000 was distributed to member clubs of the Gliding Federation of Australia, on the basis of £1,500 for membership and £1,500 for gliding certificates issued. In addition, the Federation received a grant of £1,000 towards the cost of operation of its school for instructors and engineers.

8. Airways Engineering.—In the field of airways engineering, which includes the provision of radio navigational facilities, radiocommunication systems, and airport lighting systems, steady progress has continued through 1959-60. A five year plan has been developed for extension of radiocommunication networks to cater for increases in traffic, number of aircraft and increased speed of aircraft. During 1959-60, the main portions of the plan completed included—(a) Darwin to Perth radio teletype network; (b) Port Moresby remote receiving station; (c) Cairns remote receiving station; (d) Mount Canobolas V.H.F. repeater station; (e) V.H.F. point to point network linking Sydney Airways Operations Centre to Mount Canobolas, Sydney remote transmitter station, Sydney remote receiving station, Katoomba and Kings Tableland repeater stations. Mount Canobolas is the main V.H.F. repeater station for Air/Ground/Air communications west of the Blue Mountains and provides direct speech from Sydney to aircraft as far away as Hay, Benalla and Tamworth.

In the field of radio navigational aids the following additional facilities were installed:—3 distance measuring devices, 4 non-directional beacons, 1 visual aural range and 1 visual omni range.

In the field of air traffic control engineering new control towers have been commissioned at Adelaide and Brisbane airports.

9. Meteorological Services.—The Department of Civil Aviation is the greatest user of meteorological services in the Australian Commonwealth and its territories, and therefore the requirements for civil aviation purposes have played a big part in determining the form of meteorological organization that exists at the present time. The Department and the Commonwealth Bureau of Meteorology have completed working arrangements designed to meet the very precise requirements of modern civil aviation in Australia, which specify the standards of service, times and places of operation and facilities required for the provision of meteorological services for civil aviation.

10. Search and Rescue.—On 1st November, 1958, the Department of Civil Aviation assumed full responsibility for co-ordination of search and rescue activity throughout all Australian flight information regions except Darwin, where by arrangement with the Royal

Australian Air Force, search and rescue is co-ordinated by the Officer Commanding. However, in this region, too, the Department will soon be taking on full search and rescue co-ordination responsibilities. The Department also arranges for the availability of search and rescue facilities.

Particulars of system and methods of operation are given in previous issues of the Year Book.

11. *Statistical Summaries.*—(i) *Registrations, Licences, etc.* The following table provides a summary of the civil aviation registrations and licences in force in Australia at 30th June in each of the years 1956 to 1960.

CIVIL AVIATION: REGISTRATIONS, LICENCES, ETC., AUSTRALIA.(a)

Particulars.	At 30th June—				
	1956.	1957.	1958.	1959.	1960.
Registered aircraft owners ..	437	485	570	642	745
Registered aircraft ..	934	1,054	1,180	1,246	1,360
Pilots' Licences—					
Private ..	2,453	2,592	2,628	2,801	3,001
Commercial ..	578	709	845	910	948
Senior Commercial ..	76	99	100	130	132
Helicopter (Commercial) ..	11	21	18	17	30
Student ..	3,272	3,397	3,493	3,465	3,710
1st Class Airline Transport	600	606	656	652	618
2nd " " "	9	7	(b) 389	389	418
3rd " " "	394	414			
Navigators' Licences—					
Flight Navigator ..	177	187	176	177	168
Radio Operators' Licences—					
1st Class Flight Radio-Telegraphy Operator ..	75	69	63	56	55
Flight Radio-Telephone Operator ..	1,386	1,574	1,823	2,203	2,651
Flight Engineers' Licences ..	94	116	176	189	193
Aircraft Maintenance Engineers' Licences ..	1,818	1,915	2,016	2,266	2,382
Aerodromes, Australia—					
Government(c) ..	188	169	168	168	149
Licensed(d) ..	301	313	311	304	323
Flying Boat Bases(e) ..	13	13	13	13	13

(a) Except for aerodromes and flying-boat bases, includes the Territory of Papua and New Guinea.
 (b) 3rd class abolished, and existing licences became 2nd class. (c) Under the control and management of the Department of Civil Aviation. (d) Aerodromes under the control and management of a municipality, shire, station owner, private individual, etc. Includes emergency aerodromes. (e) Includes alighting areas.

(ii) *Types of Aircraft on the Australian Register.* At 31st December, 1960, there were 1,439 aircraft on the Australian register, including aircraft based in New Guinea and Papua. Of these, 168 were engaged in regular public transport, and included 7 Boeing 707, 3 Bristol Freighter, 5 Convair 440, 59 Douglas DC3, 8 Douglas DC4 (Skymaster), 4 Douglas DC6B, 17 Fokker Friendship, 10 Lockheed Electra, 10 Lockheed Super Constellation, and 21 Vickers Viscount. At the same date there were 304 aircraft available for charter, including 47 Auster, 106 Cessna, 44 de Havilland and 39 Piper. Aircraft used for private purposes numbered 576, of which Auster (137), Cessna (117), and de Havilland (123) were the most numerous. Aircraft used for purposes such as flying school training, aerial agricultural work, etc., numbered 391, of which de Havilland (272) were the most numerous, including 199 DH82 Tiger Moth.

(iii) *Operations of Regular Internal Services.* The next table summarizes the flying activities of regular internal services operating within Australia during each of the years 1955–56 to 1959–60.

**CIVIL AVIATION: OPERATIONS OF REGULAR INTERNAL SERVICES,
AUSTRALIA.(a)**

of short tons (2,000 lb.).

(b) In terms

(iv) *Operations of Oversea Services wholly or partly Australian-owned.* The following table furnishes a summary of oversea services, wholly or partly owned by Australian interests, during the years 1955-56 to 1959-60. This table incorporates aggregate particulars of all traffic originating on oversea services of Qantas Empire Airways Limited and Tasman Empire Airways Limited, which, in the case of Qantas, includes considerable traffic which does not enter Australia. The table also includes traffic between Australia and New Guinea and Australia and Norfolk Island.

CIVIL AVIATION: OPERATIONS OF OVERSEA SERVICES.(a)

Particulars.	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.
Route miles (unduplicated) at 30th June ..	58,618	62,675	71,729	74,704	76,125

(a) Airlines wholly or partly owned by Australian interests.

(b) In terms of short tons (2,000 lb.).

(v) *Accidents and Casualties.* The number of accidents involving aircraft on the Australian register, in which persons were killed or injured, is shown in the following table for the years 1955-56 to 1959-60.

CIVIL AVIATION: ACCIDENTS INVOLVING AUSTRALIAN AIRCRAFT.(a)

Particulars.	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.
Number(b)	31	37	35	39	43
Persons killed	22	24	28	21	44
Persons injured	27	36	31	30	42

(a) Includes accidents and casualties in the Territory of Papua and New Guinea.
all accidents irrespective of whether they involved death or injury.

(b) Includes

12. Territory of Papua and New Guinea.—For brief particulars of civil aviation in Papua and New Guinea see Chapter V.—The Territories of Australia, pages 144 and 151.

I. POSTS; TELEGRAPHS; TELEPHONES; OVERSEA TELECOMMUNICATION SERVICES.

NOTE.—In this Division particulars for the Australian Capital Territory are included with those for New South Wales, while the South Australian figures include particulars for the Northern Territory unless otherwise indicated.

§ 1. General.

1. **The Postmaster-General's Department.**—Under the provisions of the Post and Telegraph Act 1901, the Department was placed under the control of the Postmaster-General. The Director-General of Posts and Telegraphs controls the Department under the Postmaster-General, whilst the principal officer in each State is the Director of Posts and Telegraphs.

The Postmaster-General's Department is responsible for the control and operation of postal, telegraphic and telephonic services throughout Australia, and for the provision and operation of the transmitters and technical facilities required for broadcasting and television services by the Australian Broadcasting Commission (*see* pages 578–83). It also co-operates with the Overseas Telecommunications Commission (*see* page 575) in providing facilities for communication with overseas countries. Subsidiary to its major activities, the Postmaster-General's Department performs a number of important functions for other Commonwealth and State departments, including the payment of pensions, child endowment, military allotments, etc., the provision of banking facilities on behalf of the Commonwealth Savings Bank, the sale of tax and duty stamps, the collection of land tax, and other services.

2. **Postal Facilities.**—(i) *Relation to Area and Population.* The following statement shows the number of post offices, the area in square miles and the number of inhabitants to each post office (including non-official offices), and the number of inhabitants to each 100 square miles in each State and in Australia at 30th June, 1960.

POSTAL FACILITIES: RELATION TO AREA AND POPULATION AT 30th JUNE, 1960.

Particulars.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	Aust.
Number of post offices(a)	2,540	2,257	1,263	913	634	511	8,118
Number of square miles of territory per office	122	39	528	990	1,539	51	366
Number of inhabitants per office ..	1,528	1,281	1,159	1,059	1,152	680	1,266
Number of inhabitants per 100 square miles	1,250	3,290	219	107	75	1,325	346

(a) "Official", "semi-official", and "non-official" offices.

The foregoing table does not include "telephone" offices at which no postal business is transacted.

(ii) *Number of Offices.* The following table shows the number of post offices (exclusive of telephone offices) in each State at 30th June, 1960.

NUMBER OF POST OFFICES AT 30th JUNE, 1960.

Type of Office.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
Official and Semi-official ..	513	320	225	169	148	52	1,427
Non-official	2,027	1,937	1,038	744	486	459	6,691
Total	2,540	2,257	1,263	913	634	511	8,118

(iii) *Employees and Mail Contractors.* The number of employees and mail contractors in the Central Office and in each of the States at 30th June, 1960 is given in the following table:—

**NUMBER OF POSTAL EMPLOYEES AND MAIL CONTRACTORS AT
30th JUNE, 1960.**

Particulars.	Central Office.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	Aust.
Employees ..	1,305	35,803	26,739	14,119	9,500	6,737	3,751	97,954
Mail Contractors	2,057	1,164	1,218	370	295	244	5,348

3. *Gross Revenue, Branches—Postmaster-General's Department.*—(i) *States, 1959–60.* The gross revenue (actual collections) in respect of each branch of the Department during the year 1959–60 is shown in the following table:—

**POSTMASTER-GENERAL'S DEPARTMENT: GROSS REVENUE, 1959-60.(a)
(£'000.)**

Source.	Central Office.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
Postage ..	b 1,313	15,413	11,140	4,743	3,295	2,338	925	39,167
Telegraphs ..	100	2,201	1,689	1,278	743	590	203	6,804

Profit or Loss after charging Interest ..	728	129	— 429	(b) 428	6,043

(a) Interest on all capital. Prior to 1959–60, interest was payable on loan capital only.
note (a).

(b) See

NOTE.—Minus sign (—) denotes loss.

6. **Fixed Assets.**—The following table shows particulars of the fixed assets of the Postmaster-General's Department from 1st July, 1959 to 30th June, 1960:—

POSTMASTER-GENERAL'S DEPARTMENT: FIXED ASSETS.
(£'000.)

Particulars.	Net Value 1st July, 1959.	Capital Expendi- ture, 1959–60.	Gross Value, 30th June, 1960.	Assets Dis- mantled or Written Off 1959–60.	Net Value, 30th June, 1960.
Telephone and telegraph plant ..	367,806	48,074	415,880	7,955	407,925
Mail-handling plant	720	299	1,019	44	975
Buildings	42,132	4,372	46,504	110	46,394
Motor vehicles	9,225	2,069	11,294	1,211	10,083
Assets subject to direct depreciation(a)	5,305	1,049	6,354	404	5,950
Other fixed assets	18,423	2,203	20,626	332	20,294
Total	443,611	58,066	501,677	10,056	491,621

(a) Includes postal service plant, miscellaneous plant, furniture and office equipment.

The net value of the fixed assets of the Postmaster-General's Department has increased by nearly 54 per cent. from £319,691,000 at 30th June, 1956 to £491,621,000 at 30th June, 1960.

§ 2. Posts.

1. **Postal Matter Dealt With.**—(i) *States, 1959–60.* The following table shows a summary of the postal matter dealt with in each State during the year 1959–60. Mail matter posted in Australia for delivery therein is necessarily handled at least twice, but only the number of distinct articles handled is included in the following table.

POSTAL MATTER DEALT WITH(a), 1959–60.

(a) Number of distinct articles handled.

(b) Includes letters, cards and other postal articles enclosed in envelopes and sorted with letters.

(c) Includes newspapers and postal articles not included in letter mail.

(d) Includes registered, cash on delivery and duty parcels.

(e) Includes registered articles other than parcels.

(ii) *Australia.* The next table shows the total postal matter dealt with in Australia during each of the years 1955–56 to 1959–60.

TOTAL POSTAL MATTER DEALT WITH: AUSTRALIA.

Year.	Letters, Postcards and Letter-cards.		Newspapers and Packets.		Parcels.(a)		Registered Articles other than Parcels.	
	Total ('000.)	Per 1,000 of Mean Population.	Total ('000.)	Per 1,000 of Mean Population.	Total ('000.)	Per 1,000 of Mean Population.	Total ('000.)	Per 1,000 of Mean Population.
1955–56 ..	1,414,222	151,811	291,048	31,243	17,334	1,861	18,376	1,973
1956–57 ..	1,443,337	151,372	306,417	32,136	16,998	1,783	17,007	1,784
1957–58 ..	1,538,509	157,865	323,684	33,213	17,726	1,819	15,566	1,597
1958–59 ..	1,599,400	160,702	317,633	31,914	18,903	1,899	15,156	1,523
1959–60 ..	1,602,830	157,619	319,831	31,452	16,433	1,616	13,671	1,344

(a) Includes registered, cash on delivery and duty parcels.

During 1959–60, the total amounts paid for the carriage of mails, as disclosed by the Profit and Loss Account of the Postal Branch, were as follows:—road £3,842,000; railway £1,351,000; sea £211,000; air—internal £1,091,000, oversea £4,522,000; Grand Total £11,017,000.

2. **Cash on Delivery Parcels Post.**—The Postmaster-General's Department undertakes, upon prepayment of a prescribed commission, to deliver registered articles sent by parcels post within Australia, or between Australia and Lord Howe Island, Norfolk Island, Nauru, the Territory of Papua and New Guinea, or Fiji, to recover from the addressee on delivery a sum of money specified by the sender, and to remit the sum to the sender. The object of the system is to meet the requirements of persons who wish to pay at the time of receipt for articles sent to them, and of traders and others who do not wish their goods to be delivered except on payment.

There were 505,000 such parcels posted in Australia during 1959–60, valued at £1,992,000, and the revenue derived from commission and postage thereon amounted to £197,000. Both number and value of these parcels have decreased substantially and with little interruption in trend since the peak reached in 1950–51 (1,155,000 parcels valued at £2,933,000).

3. **Money Orders and Postal Notes.**—The issue of money orders and postal notes is regulated by sections 74–79 of the Post and Telegraph Act 1901–1950. The maximum amount for which a single money order payable within Australia may be obtained is £40, but additional orders will be issued upon request when larger amounts are to be remitted. The maximum amount permitted to be sent to any person in the dollar area is £A.5 a month and for remittances to countries outside the dollar area, £A.10 a week. A postal note is not available for a sum larger than twenty shillings.

The following table shows the number and value of money orders and postal notes issued and paid in Australia in each of the years 1955–56 to 1959–60.

MONEY ORDERS AND POSTAL NOTES: TRANSACTIONS, AUSTRALIA.

Year.	Money Orders.			Postal Notes.		
	Issued.		Net Commission Received.	Issued.		Poundage Received.
	Number.	Value.	Value.	Number.	Value.	Value.
	'000.	£'000.	£'000.	'000.	£'000.	£'000.
1955–56.. ..	7,638	70,220	495	23,128	10,450	421
1956–57.. ..	8,127	74,542	551	20,332	9,493	377
1957–58.. ..	8,668	78,411	581	18,937	9,155	340
1958–59.. ..	9,420	87,034	643	18,012	8,845	347
1959–60.. ..	9,535	94,335	805	16,492	8,380	324

Of the total money orders issued in Australia during 1959–60, 9,120,000 valued at £92,997,000 were payable in Australia, and 415,000 valued at £1,339,000 were payable overseas. Of the total money orders paid in Australia during 1959–60, 9,136,000 (£92,964,000) were issued in Australia, and 148,000 (£874,000) were issued overseas.

Of the total postal notes paid in Australia during 1959–60, 16,425,000 valued at £8,345,000, 11,807,000 (£6,248,000) were paid in the State in which issued, and 4,618,000 (£2,097,000) were paid in States other than in which issued.

§ 3. Telegraphs.

1. **General.**—A review of the development of telegraph services in Australia up to 1921 appeared in Official Year Book No. 15, page 625, and subsequent developments of importance have been dealt with in later issues. During the past few years substantial improvements in both the speed and grade of telegraph services throughout Australia have been effected, the entire system being subjected to intensive re-organization, and these matters have been dealt with in some detail in recent issues of this Year Book.

2. **Telegraph and Telephone Mileage.**—At 30th June, 1960, the combined single-wire mileages for both telegraph and telephone purposes were:—aerial, underground and submarine cables, 8,393,000 miles; trunk telephone and telegraph cables, 290,000 miles; aerial wires, 1,350,000 miles. There were 121,000 miles of pole routes. Joint use is made of poles for power and telephone reticulation.

3. **Telegraph Offices.**—The numbers of telegraph offices, including railway telegraph offices, in the various States at 30th June, 1960 were:—New South Wales, 3,001; Victoria, 2,303; Queensland, 1,739; South Australia, 983; Western Australia, 970; Tasmania, 570; total, 9,566.

4. **Telegrams Dispatched within Australia.**—The following table shows the number of telegrams dispatched to places within the Commonwealth and to adjacent islands and to ships at sea, according to the class of message transmitted:—

TELEGRAMS DISPATCHED, 1959-60.
(‘000.)

State.	Paid and Collect.							Unpaid (Depart- mental).	Total Tele- grams.
	Ordin- ary.	Meteor- ological.	Urgent.	Radio- grams.	Press.	Letter- grams.	Total.		
New South Wales	6,212	210	289	62	48	24	6,845	250	7,095
Victoria ..	3,911	141	159	6	22	13	4,252	145	4,397
Queensland ..	3,273	208	124	49	28	13	3,695	139	3,834
South Australia	1,499	96	42	17	26	17	1,697	48	1,745
Western Australia	1,428	143	38	80	16	20	1,725	43	1,768
Tasmania ..	439	45	13	1	4	6	508	29	537
Australia ..	16,762	843	665	215	144	93	18,722	654	19,376

The number of telegrams dispatched to places within the Commonwealth and to adjacent islands and to ships at sea has decreased with few interruptions of trend since the peak of 35,970,000 in 1945-46.

5. **International Telegrams.**—For particulars of telegrams received from, and dispatched to, other countries, see § 5, para. 2, p. 576.

§ 4. Telephones.

1. **General.**—Particulars of the total mileage of lines used exclusively for telephone purposes are not available, but are combined with all other line mileage. Particulars of the total single wire mileage used for telephone, trunk and/or telegraph purposes are shown in § 3, para. 2, above. Developments in the telephone system in recent years have been dealt with in previous issues of this Year Book.

In June, 1959, work was commenced on a coaxial cable link between Sydney, Canberra and Melbourne. The undertaking is expected to take three years to complete at a capital outlay of approximately £5 million. Channels will be made available progressively as the work proceeds.

As well as providing the necessary telephone, telegraph, sound broadcasting and television relay channels between Sydney, Canberra and Melbourne, the scheme will enable all telecommunications services along the route to be improved.

2. **Summary.**—Particulars relating to the telephone services in each State at 30th June, 1960 are shown in the following table:—

TELEPHONE SERVICES: SUMMARY, 30th JUNE, 1960.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
Exchanges	2,218	1,783	1,364	727	763	391	7,246
Lines connected	577	470	198	136	87	46	1,514
Instruments connected	846	678	263	193	121	63	2,164
(i) Subscribers' instruments	827	663	256	187	118	61	2,112
(ii) Public telephones	8.9	6.1	3.5	2.0	1.6	1.0	23.1
(iii) Other local instruments	9.4	8.3	4.3	3.4	2.4	1.5	29.3
Instruments per 100 of population	21.8	23.4	18.0	19.9	16.6	18.2	21.1

Of the total telephones (2,163,962) in service at 30th June, 1960, 778,423 or 36 per cent. were connected to exchanges situated beyond the limits of the metropolitan telephone networks.

3. **Trunk Line and Local Calls.**—Because of the introduction of a scheme of extended local service areas on 18th May, 1960, whereby many telephone calls which would previously have been short distance trunk calls became local calls, precise statistics distinguishing between local calls and trunk line calls are no longer available. However, estimates of the local and trunk line traffic during 1959–60, on the basis of the system existing prior to the introduction of the new scheme, are as follows:—effective paid local calls, 1,478,000,000; trunk line calls, 134,000,000, representing averages of 994 local calls and 90 trunk calls per line respectively.

4. **Oversea Telephone Services.**—These services are provided by the Overseas Telecommunications Commission (*see* § 5, para. 1) for operation by the Postmaster-General's Department. During the year 1959–60 a new direct service was opened to Wilkes Base in the Antarctic, and a service was also made available to South Korea, via Hong Kong. At 30th June, 1960, telephone calls could be made from Australia direct to 100 oversea countries. International telephone calls to and from Australia numbered 109,791, an increase of 17,805 or 19 per cent. on 1958–59.

5. **World Telephone Statistics, 1960.**—The following table shows the number of telephones in use in various countries with 2 million or more telephones at 1st January, 1960, together with the number per 100 of population and the proportion in each country to the world total.

WORLD TELEPHONE STATISTICS(a) AT 1st JANUARY, 1960.

Country.	Number of Telephones. '000.	Telephones per 100 of Population.	Proportion of Total. (Per cent.)
United States of America(b)	70,597	40	52.8
United Kingdom(c)	7,848	15	5.9
Canada	5,439	31	4.1
Germany, Federal Republic of	5,516	10	4.1
Japan(c)	4,865	5	3.6
France	4,085	9	3.1
U.S.S.R.	4,023	2	3.0
Italy	3,518	7	2.6
Sweden	2,637	35	2.0
Australia	2,122	21	1.6
Other	22,950	(d)	17.2
Total	133,600	(d)	100.0

(a) Partly estimated. Information derived, in the main, from the "World's Telephones" compiled by the American Telephone and Telegraph Company. (b) Excludes Hawaii. (c) At 31st March, 1960. (d) Not available.

§ 5. Oversea Telecommunication Services; Radiocommunication Stations Authorized.

1. **General.**—The establishment, maintenance and operation of radio and cable communication services between Australia and oversea countries is the function of the Overseas Telecommunications Commission (Australia), which was established by the Commonwealth Overseas Telecommunications Act 1946 as Australia's part in a plan for the development of telecommunication services throughout the British Commonwealth. The Act, in order to give effect to this plan, authorized the Commission to acquire for public ownership assets formerly privately owned. Details of the systems of oversea communication in operation in Australia from the early years of the century onward, and of subsequent developments which led eventually to the establishment of the Overseas Telecommunications Commission, were published in Official Year Book No. 37, pages 220–4.

2. *International Telegrams.*—(i) *Number of Telegrams.* The number of telegrams received from and dispatched overseas in each State during 1959–60 is shown hereunder:—

INTERNATIONAL TELEGRAMS, 1959-60.
(’000.)

Particulars.	N.S.W.	Vic.	Q’land.	S. Aust.	W. Aust.	Tas.	Australia.
Received	720	427	(a) 80	71	73	(a) 22	1,393
Dispatched	694	499	91	90	77	21	1,472
Total	1,414	926	171	161	150	43	2,865

(a) Estimated.

The traffic in international telegrams to and from Australia has not varied greatly in recent years.

(ii) *Number of Words.* Particulars of the international business, originating and terminating in Australia, transacted over the cable and radio services during 1959–60 are shown in the following table:—

INTERNATIONAL TELEGRAMS: NUMBER OF WORDS, AUSTRALIA, 1959-60.
(’000 Words.)

Class of Telegram.	Words Transmitted to—			Words Received from—		
	United Kingdom.	Other Places.	Total.	United Kingdom.	Other Places.	Total.
Ordinary	4,863	9,636	14,499	4,036	7,717	11,753
Letter	4,645	11,128	15,773	4,608	9,281	13,889
Press	2,319	1,005	3,324	7,824	2,955	10,779
Government	172	1,015	1,187	733	1,236	1,969
Greetings	705	648	1,353	594	819	1,413
Other	11	11	..	137	137
Total	12,704	23,443	36,147	17,795	22,145	39,940

Words transmitted to “Other places” included 4,602,753 to the United States of America and 4,615,363 to New Zealand and the Pacific Islands. Words received from “Other places” included 4,146,139 from the United States of America and 5,446,280 from New Zealand and the Pacific Islands.

3. *Oversea Telephone Services.*—See § 4, para. 4, page 575 for particulars of these services.

4. *Coast Stations.*—At 30th June, 1960, there were 82 radio stations established at points around the Australian coast and 14 about the coast of Papua and New Guinea and other External Territories. During the year ended 31st March, 1960, these stations handled 690,429 messages (570,847 paying, 22,492 free traffic and 97,090 meteorological) with a total of 15,417,282 words.

5. Radiocommunication Stations Authorized.—The following table shows particulars of the different classes of radiocommunication stations authorized in Australia and the External Territories at 30th June, 1960. Figures relate to radiocommunication (radio telegraph and radio telephone) stations only; particulars of broadcasting stations and of broadcast listeners' licences are shown on pages 581 and 583.

The number of radiocommunication stations has increased considerably in recent years, having nearly doubled since June, 1956. While the increase is fairly generally distributed, it is perhaps most noticeable in the mobile services stations.

RADIOCOMMUNICATION STATIONS AUTHORIZED, 30th JUNE, 1960.

(a) Stations established at fixed locations for communication with other stations similarly established.
 (b) Stations established in out-back areas for communication with control stations such as those of the Royal Flying Doctor Service.
 (c) Stations established at fixed locations for communication with mobile stations.
 (d) Land stations for communication with ocean-going vessels.
 (e) Equipment installed in aircraft (aeronautical), motor vehicles (land mobile services), harbour vessels (harbour mobile services) and ocean-going vessels (ships), and mobile equipment of organizations such as the Royal Flying Doctor Service.
 (f) Stations which cannot be classified according to States, etc.
 (g) Includes 3,782 mobile transmitting and receiving stations, which cannot be classified according to States, etc.

J. BROADCASTING AND TELEVISION.

§ 1. General.

Broadcasting and television services in Australia operate under the Broadcasting and Television Act 1942–1960 and comprise the National Broadcasting Service, the National Television Service, the Commercial Broadcasting Service and the Commercial Television Service. General control of these services is a function of the Australian Broadcasting Control Board (*see below*). Details of each service will be found on pages 578–83. Licence fees for commercial broadcasting and television stations are payable under the Broadcasting and Television Stations Licence Fees Act 1956.

The Australian Broadcasting Control Board, which was constituted on 15th March, 1949, consists of five members (including two part-time), and operates under the Ministerial jurisdiction of the Postmaster-General. Its principal functions, as set out in section 16 of the Broadcasting and Television Act 1942–1960, are to ensure:—(a) that services by broadcasting stations and television stations are provided in accordance with plans prepared from time to time by the Board and approved by the Minister; (b) that the technical equipment and operation of such stations are in accordance with such standards and practices as the Board considers to be appropriate; (c) that adequate and comprehensive programmes are provided by the stations to serve the best interests of the general public; and (d) that sources of interference to the transmission and reception of broadcast and televised programmes be detected and that assistance be given in the detection and prevention of such interference. In addition, the Board may exercise such other functions as are prescribed in relation to broadcasting stations and television stations. For information as to the powers granted to the Board in order to perform its functions *see* Official Year Book No. 46 and earlier issues.

The Australian Broadcasting Commission, which consists of seven members, at least one of whom must be a woman, controls the activities of the National Broadcasting Service and the National Television Service.

§ 2. Broadcasting.

1. **The National Broadcasting Service.**—(i) *General.* In sound broadcasting, the programmes of the National Broadcasting Service are provided by the Australian Broadcasting Commission and the provision and operation of transmitters and technical facilities in the studios are the responsibility of the Postmaster-General's Department.

(ii) *Technical Facilities.* At 30th June, 1960, the National Broadcasting Service comprised 66 transmitting stations, as follows:—

*Medium-frequency Stations—**New South Wales—*

2BL and 2FC Sydney, 2BA Bega, 2CO Albury, 2CR Orange, 2GL Glen Innes, 2KP Kempsey, 2LG Lithgow, 2ML Murwillumbah, 2NA and 2NC Newcastle, 2NB Broken Hill, 2NR Grafton, 2NU Tamworth, 2TR Taree, 2WN Wollongong.

Victoria—

3AR and 3LO Melbourne, 3Gi Sale, 3WL Warrnambool, 3WV Horsham.

Queensland—

4QG and 4QR Brisbane, 4AT Atherton, 4GM Gympie, 4QA Mackay, 4QB Maryborough, 4QL Longreach, 4QN Townsville, 4QS Toowoomba, 4QY Cairns, 4RK Rockhampton, 4SO Southport.

South Australia—

5AN and 5CL Adelaide, 5CK Port Pirie, 5LN Port Lincoln, 5MG Mt. Gambier, 5MV Renmark, 5PA Penola, 5WM Woomera.

Western Australia—

6WF and 6WN Perth, 6AL Albany, 6GF Kalgoorlie, 6GN Geraldton,
6NM Northam, 6WA Wagin.

Tasmania—

7ZL and 7ZR Hobart, 7NT Launceston, 7QN Queenstown.

Northern Territory—

8AL Alice Springs, 8DR Darwin.

Australian Capital Territory—

2CN and 2CY Canberra.

Papua—

9PA Port Moresby.

High-frequency Stations—

VLI Sydney, New South Wales, VLG, V LH and VLR Lyndhurst, Victoria,
VLM and VLQ Brisbane, Queensland, VLW and VLX Perth, Western
Australia, VLT Port Moresby, Papua.

In addition to the services shown above, there are four experimental frequency modulation services operating in Sydney, Melbourne, Brisbane and Adelaide.

The medium-frequency transmitters operate in the broadcast band 555 to 1,605 kilocycles per second. The high-frequency stations, using frequencies within the band 3 to 30 megacycles per second, provide service to listeners in sparsely populated parts of Australia such as the north-west of Western Australia, the Northern Territory, and northern and central Queensland, and in Papua and New Guinea and adjacent islands.

Many of the programmes provided by country stations are relayed from the capital cities, high-quality programme transmission lines being used for the purpose. A number of programme channels are utilized to link national broadcasting stations in the capital cities of Australia, and, when necessary, this system is extended to connect both the national and commercial broadcasting stations.

In June, 1960, 44 of the medium-frequency stations were situated outside the six State capital cities. Additional country stations are to be established, and, when these additions are complete, the medium-frequency and high-frequency stations together will provide for clear reception of the programmes of the National Broadcasting Service in practically every part of Australia.

(iii) *Programme Facilities.* (a) *General.* The programmes of the Australian Broadcasting Commission cover a wide range of activities, which are indicated briefly in the following paragraphs. The proportion of broadcasting time allocated to the various types of programme during 1959–60 was as follows:—Classical Music, 24.8 per cent.; Light Music, 11.8 per cent.; Variety, 19.5 per cent.; News, 7.2 per cent.; Talks, 6.8 per cent.; Sporting, 4.7 per cent.; Parliament, 4.2 per cent.; Youth Education, 3.9 per cent.; Drama and Features, 3.7 per cent.; Religious, 3.7 per cent.; Children's Session, 2.8 per cent.; Rural, 1.7 per cent.; Non-departmental, 5.2 per cent.

(b) *Music.* The A.B.C., in addition to its extensive activities in the field of musical broadcasting, is one of the largest concert-giving organizations in the world. Its regular broadcasts command a large listening audience, and a total of 954,015 people attended A.B.C. concerts during 1959–60. There are symphony orchestras in Sydney, Melbourne, Brisbane, Adelaide, Perth and Hobart, which have developed from the studio broadcasting orchestras set up in 1936.

In 1959–60, the A.B.C. organized 525 public orchestral concerts (including 154 free concerts for school children and 34 free concerts for adults) and 198 public recitals by famous artists throughout the Commonwealth. In 1959, the Czech Philharmonic Orchestra became the first overseas orchestra to visit Australia. It was followed in 1960 by the Boston Symphony Orchestra.

(c) *Drama and Features.* Drama programmes are designed to give listeners opportunities, which they might not otherwise have, of hearing the world's great plays as well as adaptations of the best modern stage plays and also those written specially for broadcasting. The main regular radio drama programmes are broadcast on Sunday afternoons

and Sunday and Monday evenings, and special series of longer plays are also given at various times. In recent years the technique of the feature programme has also been developed. The feature is a form of entertainment which is unique to radio, consisting of specially written programmes designed to present information in an interesting way.

(d) *Youth Education.* The A.B.C. provides a regular series of broadcasts to schools as an addition to normal class-room education. The total number of listening schools at the end of June, 1960 was 9,408 or about 93 per cent. of all schools, State and private, throughout the Commonwealth. (*See also* Chapter XV.—Education, on this subject.)

(e) *Talks.* The aim of the Talks Department is to provide programmes which will keep the listener well informed on current affairs and on general topics. Many of the talks in the first category are now presented in a magazine type of session consisting of a number of short items linked by a narrator. An extension of this type of programme is the documentary. Major controversial topics are covered in sessions such as the "Nation's Forum of the Air" and "I Put it to You". Another session in this type of programme is "News Review", containing comments on the news of the day recorded over landline from all States of the Commonwealth and, in the case of significant world events, from overseas by radio-telephone.

(f) *Rural Broadcasts.* The Rural Broadcasts Department devotes its programmes to weather and market reports and talks, interviews, etc., designed to provide useful information for the man on the land. These programmes are presented on a regional, State and national basis, many being directed to particular districts, because of the diversity of climate and conditions. Separate rural programmes originate at 19 regional stations and are relayed to all other regionals. Other programmes are broadcast throughout each State or on a national relay, depending on whether the information they contain is of general interest or refers only to the rural industries of one State.

During 1959–60, 7,486 talks and interviews on rural topics were broadcast by the A.B.C., as well as 8,684 weather reports and 6,968 interstate and local market reports. In times of emergency, the regular weather reports are supplemented by special services giving flood or fire warnings.

(g) *News.* The Commission collects all its Australian (including Papua and New Guinea) news through its own staff journalists and part-time correspondents. It also maintains a news room in London for the selection and transmission of news obtained from major overseas agencies and has special representatives in South-East Asia. Regional bulletins are broadcast from country centres and also from capital cities to cover near-city districts. Radio Australia (the Overseas Service of the A.B.C.) broadcasts Australian and overseas news daily in English, French, Mandarin, Indonesian, Japanese, Cantonese and Thai, with special attention to Asia and the Pacific. Each day the A.B.C. re-broadcasts two news bulletins from the British Broadcasting Corporation. The A.B.C. broadcasts 160 news bulletins each day, including those given over Radio Australia.

(h) *Other Activities.* The proceedings of the Federal Parliament are broadcast regularly on one of the two national transmitters in each capital city, one in Newcastle and one domestic short-wave station (VLR).

The National Children's Hour, presented seven days a week, is composed of over 40 programme items, including stories, music, games, art, literature, natural history and sport.

In co-operation with the various religious denominations, the A.B.C. broadcasts several religious sessions each week-day in addition to those given on Sundays. These religious broadcasts include relays of normal church services and a variety of special programmes of talks and sacred music. The modern trend towards the use of religious drama is also followed.

The variety and sporting programmes of the A.B.C. provide the lighter side of the service. With its variety session the policy of the A.B.C. is to assist local artists in order to increase the amount of first-class talent in this country, and encouragement is also given to Australian composers of light music.

A comprehensive coverage of sport at home and abroad is provided by the A.B.C. On Saturday afternoons the sporting panel provides listeners with progress results, scores and descriptions from several fields of sport. Events of international interest such as Test matches, the Davis Cup, etc., are covered by simultaneous descriptions from A.B.C. commentators.

2. **The Commercial Broadcasting Service.**—Commercial broadcasting stations are operated under licences granted and renewed by the Postmaster-General after taking into consideration any recommendations which have been made by the Broadcasting Control Board. The initial period of a licence is five years and renewals are granted for a period of one year. The fee payable for a licence is £25 on the grant of the licence, and thereafter £25 a year plus one per cent. of the gross earnings of the station from the broadcasting of advertisements or other matter during the preceding financial year. Licensees of these stations rely for their income on the broadcasting of advertisements and other publicity.

3. **Oversea Broadcasting Service.**—There are three high-frequency stations at Shepparton, Victoria (VLA, VLB, VLC) which provide the overseas service known as "Radio Australia". As in the case of the National Broadcasting Service, these stations are maintained and operated by the Postmaster-General's Department and their programmes are arranged by the A.B.C. During certain periods, station VLG Lyndhurst is also used for the purpose of overseas transmission. The programmes, which give news and information about Australia presented objectively, as well as entertainment, are directed mainly to South-East Asia and the Pacific. The overseas audience has grown very substantially in recent years, as evidenced by a large and increasing number of letters from listeners abroad.

4. **Broadcasting Stations.**—The following table shows the number of broadcasting stations in operation at 30th June, 1960:—

BROADCASTING STATIONS, 30th JUNE, 1960.

Type of Station.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Papua and New Guinea.	Total.
National—										
Medium Frequency ..	16	5	12	8	7	4	2	2	1	57
High Frequency—										
Amplitude Modulation ..	1	3	2	..	2	1	9
Frequency Modulation ..	1	1	1	1	4
Commercial ..	37	20	20	8	14	8	..	1	..	108

A table showing the call sign, location, frequency and aerial power of broadcasting stations licensed at 30th June, 1960, is shown in *Transport and Communication*, Bulletin No. 51.

§ 3. Television.

1. **General.**—Television services in Australia operate under the Broadcasting and Television Act 1942–1960 and comprise the National Television Service and the Commercial Television Service.

2. **The National Television Service.**—(i) *General.* The A.B.C. provides the programmes for the National Television Service from stations provided and operated by the Postmaster-General. Six stations have been established—ABN Sydney, commenced operation, 5th November, 1956; ABV Melbourne, commenced operation, 18th November, 1956; ABQ Brisbane, commenced operation, 2nd November, 1959; ABS Adelaide, commenced operation,

11th March, 1960; ABW Perth, commenced operation, 7th May, 1960; and ABT Hobart, commenced operation, 4th June, 1960—each of which operates on Channel 2. Each station operates on a frequency of 64.25 megacycles a second for vision and 69.75 megacycles a second for sound.

(ii) *Programme Facilities.* (a) *General.* The television programmes provided by the A.B.C. cover a wide range of activities. The proportion of television time allocated among the A.B.C.'s various departments to 30th June, 1960 was as follows:—Drama and Features, 21.9 per cent.; Talks Department, 18.8 per cent.; Sport, 11.4 per cent.; Children's Session, 10.0 per cent.; News, 8.5 per cent.; Variety, 7.8 per cent.; Youth Education, 4.3 per cent.; Rural Services, 2.4 per cent.; Religion, 2.3 per cent.; Classical Music, 2.0 per cent.; Light Music, 0.3 per cent.; Non-departmental (including trade demonstration films), 10.3 per cent. A summary of the activities of the departments in the field of television is given in the following paragraphs. Transmission hours in Sydney, Melbourne, Brisbane, Adelaide, Perth and Hobart, for the 12 months ended 30th June, 1960, totalled 9,243.

(b) *Talks.* In television, talks cover a very wide field, ranging from commentaries on international affairs to panel games and outside telecasts of public events. Discussions, topical interviews, magazine programmes, women's programmes, demonstrations and film and studio documentaries are all part of the regular output.

(c) *Drama and Features.* A considerable proportion of television time is devoted to drama and features, and "live" television plays featuring Australian artists may usually be seen fortnightly in all State capitals. During 1959, a Television Writers' Workshop was formed to give writers practical advice on television writing. Of 23 live plays produced during the year, 12 were by Australian authors and, in addition, seven half-hour episodes of a locally written serial, "Stormy Petrel"—based on the life of Governor Bligh—were telecast.

(d) *Music.* During 1957, the A.B.C.'s musical activities extended to the field of television. A number of public concerts and studio performances were successfully telecast and there is reason to believe that the new medium will contribute to the further development of musical appreciation in Australia.

(e) *Rural Services.* The emphasis has been on providing information for consumers and on giving city viewers, by means of films, demonstrations, etc., a picture of Australia's rural industries. Regular programmes featuring many facets of Australian agriculture and livestock activities have already been given, and this work will be developed as further facilities become available. Weather reports and forecasts are also telecast on six evenings a week.

(f) *Youth Education.* The A.B.C. provides a television programme for very young children each week-day, under the title "Kindergarten Playtime". Experimental television programmes for schools are being presented.

(g) *News.* Television news bulletins and newsreels have been included in the programmes presented in both Sydney and Melbourne since the television services began in November, 1956. The A.B.C. is a member of the British Commonwealth International Newsfilm Agency (B.C.I.N.A.), through which it receives world-wide television newsfilm and provides newsfilm of Australian origin for international distribution.

(h) *Other Activities.* Special television programmes are presented for children, including filmed material obtained on an exchange basis from overseas television organizations. Special religious services and programmes have also been televised. Outside television cameras have covered a number of sporting events, including the Olympic Games, Davis Cup tennis, Test and Sheffield Shield cricket and swimming championships.

3. *The Commercial Television Service.*—Commercial television stations are operated under licences granted by the Postmaster-General. Licences for commercial television stations have been granted as follows:—Sydney—ATN (Channel 7), TCN (Channel 9); Melbourne—HSV (Channel 7), GTV (Channel 9); Brisbane—BTQ (Channel 7), QTQ (Channel 9); Adelaide—ADS (Channel 7), NWS (Channel 9); Perth—TVW (Channel 7) and Hobart—TVT (Channel 6). The stations commenced operations on the following dates:—ATN, 2nd December, 1956; TCN, 16th September, 1956; HSV, 4th November, 1956; GTV, 19th January, 1957; QTQ, 16th August, 1959; NWS, 5th September, 1959; TVW, 16th October, 1959; ADS, 24th October, 1959; BTQ, 1st November, 1959, and TTV, 23rd May, 1960.

The initial grant of a licence is for a period of five years, and thereafter the licence is renewable annually. The fee payable is £100 for the first year, and thereafter £100 a year plus one per cent. of the station's gross earnings from the televising of advertisements or other matter during the preceding financial year.

4. **Extension of Television Services.**—The Government has approved the establishment of a national and a commercial television station in each of the following provincial and country areas:—

New South Wales—

Newcastle-Hunter River, Illawarra, Richmond-Tweed Heads, Central Tablelands.

Victoria—

Ballarat, Bendigo, Latrobe Valley, Goulburn Valley.

Queensland—

Darling Downs, Rockhampton, Townsville.

Tasmania—

North Eastern Tasmania.

Australian Capital Territory—

Canberra.

When the stations commence operation, it is estimated that 75 per cent. of the Australian people will be able to receive a television service.

§ 4. Licences, etc.

1. **Broadcast Listeners' and Television Viewers' Licences.**—(i) *General.* Broadcast listeners' and television viewers' licences are issued at post offices in accordance with the provisions of the Broadcasting and Television Act 1942–1960, which stipulates that, except as prescribed, a person shall not use, maintain or have in his possession a broadcast or television receiver unless there is in force a licence which applies to that receiver. A broadcast listener's licence authorizes the operation of any broadcast receiver, and a television viewer's licence any television receiver, which is:—(a) in the possession of the holder of a licence, or of a member of his family, at the address specified in the licence and/or ordinarily kept at that address; (b) installed in a vehicle which is ordinarily in the possession of the holder, or of a member of his family, and is ordinarily kept at that address while not in use.

The fee for a broadcast listener's licence or a renewal thereof is:—Zone 1, £2 15s.; Zone 2, £1 8s. Zone 1 is the area within approximately 250 miles of specified broadcasting stations and Zone 2 is the remainder of the Commonwealth. A television viewer's licence costs £5.

A licence may be granted at reduced rates to persons who are in receipt of certain types of pension and are otherwise qualified to receive this concession.

A licence may be granted free of charge to a blind person over 16 years of age or to a person or authority conducting a school. Inmates of a hospital or charitable institution are covered by the licence held by the institution.

(ii) *Licences in Force.* (a) *Broadcast Listeners'.* The following table shows the number of broadcast listeners' licences in force at five year intervals from 1925 to 1960.

BROADCAST LISTENERS' LICENCES IN FORCE.

At 30th June—	N.S.W.(a)	Vic.	Qld.	S.A.(b)	W.A.	Tas.	Aust.
1925	34,857	20,290	1,267	3,331	3,562	567	63,874
1930	111,253	140,072	23,335	25,729	5,755	6,048	312,192
1935	279,166	237,247	67,546	76,515	41,257	20,121	721,852
1940	438,256	348,264	151,152	124,928	87,790	42,191	1,212,581
1945(c) ..	548,074	394,315	180,089	146,611	98,210	47,930	1,415,229
1950(c) ..	683,271	505,078	260,033	195,261	133,199	64,369	1,841,211
1955	746,050	549,690	293,542	223,593	150,199	71,602	2,034,676
1960	832,659	606,587	344,198	249,148	171,693	78,900	2,283,185

(a) Includes the Australian Capital Territory. (b) Includes the Northern Territory. (c) Excludes licences for receivers in excess of one. These licences were introduced in July, 1942, and were abolished on 31st December, 1951.

Of the 2,283,185 broadcast listeners' licences in force at 30th June, 1960, 1,343,741 or 59 per cent. were held by persons living in metropolitan areas and 939,444 or 41 per cent. by persons in country areas.

(b) *Television Viewers*'. The following table shows the number of television viewers' licences in force each year at 30th June and 31st December, 1957 to 1960.

TELEVISION VIEWERS' LICENCES IN FORCE.

Date.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	Aust.
30th June, 1957 ..	28,912	44,986	{ 11	73,909
31st December, 1957 ..	74,627	91,922	{ 27	166,576
30th June, 1958 ..	143,422	147,721	{ 43	291,186
31st December, 1958 ..	232,473	222,172	{ 51	454,696
30th June, 1959 ..	300,871	270,073	360	6,124	..	{ 74	577,502
31st December, 1959 ..	358,544	307,950	27,590	34,060	9,621	{ 90	737,855
30th June, 1960 ..	409,334	353,091	67,337	84,967	35,604	{ 4,662	954,995
31st December, 1960 ..	456,989	384,375	96,644	110,658	57,792	{ 14,362	1,120,820

(a) These licences were for television sets in the north coast area of Tasmania which were able to receive programmes from Victoria.

Of the 954,995 television viewers' licences in force at 30th June, 1960, 834,909 or 87.4 per cent. were held by persons living in metropolitan areas.

CHAPTER XV.

EDUCATION.

§ 1. Introduction.

An account of the development of the Australian school system up to 1929 may be found in Official Year Books Nos. 1, 2, 17 and 22. In Official Year Book No. 40, a reasonably complete review of changes which occurred up to 1951 and of the practices then current was presented from material furnished in the main by the Commonwealth Office of Education.

In the sections which follow, the information relating to the educational programme applies mainly to the year 1960. The statistics given in the tables relate to 1959.

§ 2. Education in Australian Schools.

1. *Administration.*—Primary and secondary education in Australia is provided by both government and non-government schools. Education in government schools is mainly the responsibility of the State Governments, but the Commonwealth Government provides financial assistance to students and meets the full cost of such education in Commonwealth Territories (see Chapter V.). Non-government schools are mainly conducted by religious denominations, subject to certain government controls (see para. 4, p. 587). In general, non-government schools charge fees and are not usually assisted financially by State or Commonwealth Governments.

Although there is a tendency towards regional administration, State educational administration is centralized. The permanent head of the Education Department in each State is responsible to the Minister for Education. Contact with the schools is maintained principally through Inspectors or Superintendents. Departments are usually divided into primary, secondary and technical divisions. Some technical colleges are in a large measure autonomous. Universities are independent foundations, although much of their income is derived from State and Commonwealth grants.

Examination Boards, which represent universities, Education Departments and non-government schools, control public examinations and syllabuses, and curriculum committees prepare primary and secondary curricula. State Ministers for Education meet periodically as the Australian Education Council, and Directors of Education meet annually to discuss matters of common interest.

2. *The School System.*—(i) *Compulsory.* In all States, there is legislation for compulsory school attendance. The original Victorian Education Act was passed in 1872, followed by similar Acts in Queensland (1875), South Australia (1875), New South Wales (1880), and Tasmania and Western Australia (1893).

In 1960, the ages between which children were required by law to attend school were as follows:—New South Wales, 6 to 15 years; Victoria, 6 to 14 years; Queensland, 6 to 14 years; South Australia, 6 to 14 years (children may not leave school until the end of the term during which they reach the age of 14 years); Western Australia, 6 to 14 years; and Tasmania, 6 to 16 years. The employment of children of school age is prohibited by law.

In Victoria, South Australia, and Western Australia, amendments to the Acts have provided for the raising of the school leaving age to 15 years, but to date this legislation has not been proclaimed.

(ii) *Non-Compulsory.* Modern development has demanded a diversity of skills and a general raising of the educational level of the population. The trend towards raising of the school leaving age and the tendency everywhere for children to stay longer at school have been expressions of public realization of this. In recent years, less than half of all children left school when they reached the age limit for compulsory attendance. Indeed, a substantial proportion now proceeds to some form of further education beyond secondary school, either as full-time students, as part-time apprentices or trainees released during the day by their employers, or as part-time evening students.

In the early years of government provision of education, the main emphasis was on the primary school, which catered for children receiving compulsory education and offered a

course largely confined to the "tool" subjects, reading, writing and arithmetic. However, a process of extension and differentiation both at the bottom—infants' schools and kindergartens—and at the top—secondary schools—was well under way during the early years of this century.

3. **The Educational Ladder.**—(i) *Infants' Schools.* It is now customary, although not compulsory, for children to begin school when they are five years old. In larger primary schools they enter the infants' school, and in smaller schools infants' classes, which occupy two or three years, the first year in some States being called "Kindergarten" or "Preparatory". The emphasis in the infants' classes is very much on general development, on play activities and on the informal aspects of the educational processes. Whether in a separate establishment or as a part of a primary school, there is a gradual move towards formal instruction in infants' departments. At the end of the period, most children are able to read with some fluency, carry out simple arithmetical operations founded on the basic number facts, and can write in pencil. In addition, they have acquired skills with art materials and the like. A good deal of the instruction is carried on through activity methods, involving, for example, dramatic work, puppetry, and school "shops". Children then pass at about the age of 8 or 9 to the more formal primary school, in which they normally spend four or five years.

(ii) *Primary Schools.* The main emphasis in the primary school as distinct from the infants' school still lies on the "tool" subjects (reading, writing and arithmetic) and, in more recent years, on oral language, but the methods of teaching have undergone considerable changes. Changes in the purpose and outlook of educationists, and the raising of the professional standards of teachers, have made for greater freedom for pupils and teachers, some departure from the methods of mass instruction, and the closer linking of the curriculum with the child's social environment.

In general, there is now less emphasis on results than formerly, and basic skills are taught at a somewhat later stage. At the same time, the curriculum has been broadened. More individual instruction has led to a reduction in minimum standards of achievement for the less able, and a stress on curriculum enrichment for the bright. Retardation, i.e., the repeating of grades, has been considerably reduced, the aim being for each child to remain with his age group. In all States, opportunity classes exist for backward children, and in one State opportunity classes are provided for the especially bright.

(iii) *Secondary Schools.* At the age of 12 or 13 (in Queensland, 14), children transfer to a secondary school course. In the cities and larger country centres, this is provided in a separate school, but in less densely populated areas secondary classes share the same buildings as primary classes. In rural areas, secondary pupils may share teachers or classrooms with primary pupils, and in one-teacher schools a few secondary students may carry out correspondence assignments under the supervision of the primary teacher-in-charge.

Secondary curricula have developed from the matriculation requirements of the universities. Formerly English grammar and literature, and mathematics, including algebra, geometry and trigonometry, were the core. Languages, chiefly Latin and French, or science, chiefly physics and chemistry, and history had an important place. Geography and drawing were often taken in the first two or three years.

As a result of changes in the academic course for matriculation, greater emphasis has been placed on oral and written expression in the English course and on language generally (English or foreign languages); in two universities, new matriculation regulations require a pass in either mathematics or a foreign language (not necessarily Latin, which in recent years has been less popular than previously). A general science course has been introduced in some States, and social studies, a synthesis of history, geography and civics, is a subject to matriculation level in two States. More emphasis has been placed on art, music and physical education.

In recent years, the provision of a secondary education for all has gained ground rapidly, although the entrance requirements of tertiary institutions are still provided for. Consequently, alongside the academic course other courses have grown up. In country areas, they may be offered in the same school, or the academic course may even be largely abandoned. In the city, it is usual to offer non-academic courses in separate schools, although there is a trend towards comprehensive high schools offering several types of courses and catering for all the pupils from the district. Schools providing academic courses are usually known as High Schools, while the other types are generally distinguished by such names as Junior Technical Schools and Home Science Schools.

Particular mention should be made of the recent development of the all-stage consolidated school, sometimes with an agricultural bias, found under various names in different States. Tasmania and South Australia adapted the idea of the English village area schools to Australian conditions and established "Area Schools", some of which have farms attached.

The courses followed in the non-academic schools are, in general, broader than in the academic schools. There is less concentration on establishing an academic discipline and method peculiar to each subject, but more attention to correlation between fields of knowledge, sometimes expressed by projects involving them all. Generally, less time is devoted to mathematics and the formal sciences, and more time to practical work and to art and musical appreciation. In English, oral language is emphasized rather more and grammar much less than in the academic schools.

(iv) *State Details.* Very brief particulars of the position in each of the States are given on pages 432-3 of Official Year Book No. 40.

4. Public Authority and the Non-Government Schools.—In all States, it is compulsory for all children between certain ages to receive education in a government school, unless the child is under "regular and efficient" instruction elsewhere. This may be at home, or in a non-government school. The provision for control over the regularity and efficiency of instruction in the non-government schools varies considerably from State to State. In New South Wales and Western Australia, provision is made for an initial inspection when a new school starts, and for inspections thereafter as the Minister requires, to ensure efficiency. In Victoria and Tasmania, registers are kept of teachers and schools, and both teachers and schools must satisfy the administering authority that they are efficient before registration is granted. Without such registration, neither a teacher nor a school can operate. Provision is made, too, for inspections at any time by the registering authority.

In Queensland, eight grammar schools, which exist by statutory authority and are subsidized by the State, are subject to annual inspection. These are the only non-government schools in Australia for which an annual inspection is prescribed by statute. Other non-government schools in Queensland may be inspected at their own request, but it is possible for these schools—and also those in South Australia—to exist without inspection.

Public authority over schools or institutions having scholars above the compulsory ages is generally less direct. It is effected directly by the registration procedures in Victoria and Tasmania, and in all States there is a measure of indirect control through provisions governing the award of State scholarships, bursaries or other forms of financial assistance to secondary scholars, which are available only in government or approved non-government schools. In New South Wales, also, the Intermediate and Leaving Certificates are awarded only to pupils of schools whose courses of study are approved by the Department of Education.

In all States, non-government schools are required, under the authority of either the Education Acts or Statistics Acts, to furnish certain statistical returns. The form of these returns may be prescribed in the Acts or may be subject to alteration with the Minister's consent.

5. The Organization of Roman Catholic Schools.—There is, in each State capital, an official who acts under the Archbishop as a Director of Catholic Education for the area. Each diocese within the area is, however, autonomous and manages its own educational affairs subject to the local episcopal authority. The State Director has, in addition to possible inspectorial functions within his own diocese, the duty of co-ordination of educational matters within his area, and of liaison with other educational authorities, particularly the State Education Department.

The system includes kindergartens, sub-primary, primary, academic secondary, home science, commercial, agricultural and technical schools, juniorates and seminaries, schools for the mentally and physically handicapped, orphanages and a variety of special schools of a charitable nature for under-privileged or socially handicapped children.

With the exception of a small number of permanent lay teachers and a number of visiting teachers, usually specialists in such matters as physical education, sport, and speech, teaching is done by members of religious orders.

6. The Organization of Other Non-Government Schools.—(i) *General.* Practically all non-government schools, except a limited number under private ownership, are governed by a controlling body known variously as a School Council or Board of Trustees or Governors.

Within each State, although the other non-government schools may be organized into loose forms of association for purposes such as sports, conferences, and uniform conditions, there is no system corresponding in size, detail or organization with the Roman Catholic schools.

The Headmasters' Conference of Australia and the Headmistresses' Association of Australia are composed of headmasters and headmistresses respectively of a number of the larger non-government schools, including some Roman Catholic schools. Neither body has executive powers. One of the chief considerations for the admission of new members is the degree of independence enjoyed by the governing body and principal of the school concerned.

(ii) *Church of England Schools.* The various types of Church of England schools include small schools associated with a local parish; schools under direct ownership of a diocese; schools established by Acts of the Church Synod, in which the majority of the members of the council are church representatives but which, otherwise, have almost complete independence; and schools conducted by religious orders of the church.

The proportion of members of a school council nominated by the church varies. In some schools, members may also be nominated by parents, by former students, and by the council itself.

In general, schools incorporating the words "Church of England" in their title follow a diocesan syllabus of religious education.

(iii) *Other Denominational Schools.* In general, control of Presbyterian schools is exercised through School Councils appointed by the General Assembly of the Presbyterian Church in the State concerned. Councils vary considerably in size and in the bodies represented on them. Similarly, appointments to councils of Methodist schools are made by the annual Conference of each State. In Queensland, five schools are operated under the joint auspices of the Presbyterian and Methodist churches.

A limited number of schools are conducted by other denominations, such as the Baptist, Congregational and Lutheran churches and by the Seventh-day Adventists. The Society of Friends conducts one school in Australia, the Friends' School, Hobart.

Jewish schools are conducted in several capital cities.

(iv) *Undenominational Schools.* There are a number of undenominational schools in Australia. Some of the larger, although not State-operated, have Government nominees on their boards. They include Sydney Grammar School, the Hale School, Perth, and the eight Queensland grammar schools. Other undenominational schools operate under the auspices of corporate bodies, usually in the form of a limited liability company, while others are privately owned. The majority of schools in this last category are small kindergartens, preparatory and primary schools.

7. *Examinations and Accrediting.*—(i) *Examinations.* The various public examinations which were formerly held at different stages of education were described in previous Year Books, in particular in No. 40 (1954). There are no public examinations in primary school, but each school normally holds internal examinations yearly or half-yearly. In most States, there is no public examination barrier at the end of primary school, and pupils proceed to high schools of various types. The trend is towards greater use of internal examinations and headmasters' recommendations. In Queensland, a Scholarship Examination is held at the end of primary school, and pupils passing this examination qualify for free secondary education; this makes secondary education free for the great majority of children in Queensland. In all other States, secondary education is quite free. The length of the secondary schooling now varies from four years in Queensland to six years in Victoria.

There are two important examinations in secondary school—one about half-way through the course, and one at the end. The first examination is usually called the Intermediate or Junior, and pupils sit for this after 2, 3 or 4 years of secondary study at the age of 15 or 16. Many pupils leave school at this stage and enter technical and agricultural colleges, or undertake commerce, insurance, banking certificate, or nursing and secretarial courses. The remaining pupils, after one or two years further study, sit for the Leaving or Matriculation examination and qualify for entry to universities, teachers' colleges, technical college diploma courses or the clerical division of the public service. There are, of course, many variations from State to State, and details of these are given below. Most of the examinations are public ones, set and marked by an external authority and conducted on a state-wide scale, but some examinations are done internally, or a compromise between these two forms may be arranged to meet special circumstances.

(ii) *State Details. New South Wales.* The Intermediate Certificate Examination is taken after three years, either internally or externally, at an average age of 15, and the Leaving Certificate Examination (Matriculation), is taken after five years, at an average age of 17. Following a comprehensive report to the Minister, there are plans to make the secondary school course a six-year one, with a School Certificate after four years and a Higher School Certificate after six years.

Victoria. The Proficiency Certificate is taken internally after three years at school, at an average age of 14½; the Intermediate is taken at the end of the fourth year, the School Leaving at the end of the fifth year, and the Matriculation at the end of the sixth year. Pupils at approved schools may be accredited for the Intermediate and Leaving—i.e., the Certificate is awarded by the Education Department on the recommendation of the school principal under certain conditions.

Queensland. The Junior Public Examination is taken at the end of second year; pupils are then aged about 16. The Senior Public Examination (Matriculation) is held at the end of fourth year.

South Australia. The Intermediate Examination is taken at the end of third year, at an average age of 15½; the Leaving Certificate (Matriculation) at the end of fourth year; and the Leaving Honours at the end of fifth year.

Western Australia. The Junior Certificate Examination is taken at the end of third year by pupils aged about 15½; the Leaving (Matriculation) is taken at the end of fifth year. Certain schools are approved for accrediting in a few subjects at the Junior Certificate Examination.

Tasmania. The Modern School Certificate (an internal examination) is taken at the end of third year, when pupils are aged about 15; the Schools Board Certificate is taken at the end of fourth year, and the Matriculation at the end of fifth year. Certain schools are approved for accrediting for the Schools Board Certificate.

§ 3. Numbers of Schools, Teachers and Enrolments.

1. *General.*—The government schools shown in the following tables include primary, secondary, junior technical, correspondence and subsidized schools, but exclude senior technical colleges, evening schools and continuation classes.

Particulars relating to senior technical colleges are given in § 6, page 597.

Enrolments may be measured in a number of ways:—

Gross Enrolment means the number of names entered on the school rolls during the course of a year. Some children are thus counted more than once if they transfer from school to school during the year.

Net Enrolment means the gross enrolment less transfers from school to school. This is sometimes referred to as "the number of children instructed" at any time during the year. Children transferring between government and non-government schools are still counted in both places. Net enrolment is less than gross enrolment, but greater than the number of children enrolled at one time.

Average Weekly Enrolment may mean either (1) the average of the highest enrolment in each week; or (2) the average of the average enrolments for all weeks in the year. These figures do not differ appreciably, but some States use one and some the other.

Average Weekly Enrolment, by either method, may include a few children counted twice. It may be less than net enrolment and less than the greatest number of children enrolled at one time.

Census Enrolment means the number of children enrolled on a chosen day, usually 1st August. The figures thus determined usually approximate to the average weekly enrolment. If the census is at the end of the year, the figure may be higher than average weekly enrolment for primary schools and lower for secondary schools.

Average Daily Attendance which means the average number of children present for each whole school-day. In some States, half-day absences are taken into account in computing "average daily attendance", thus lowering the figure which would be obtained if presence for half a day were counted as presence for a whole day.

2. Statistical Summary.—The numbers of schools, teachers and enrolments for 1959 are shown in the following table:—

SCHOOLS: NUMBER, TEACHERS, ENROLMENT, 1959.

(b) Includes Northern Territory.

§ 4. Other Aspects of Education in Schools.

1. **Health Services to Schools.**—Information relating to school medical and dental services is given in Chapter XVII.—Public Health.

2. **Guidance.**—Each Australian State now has a comprehensive system of educational guidance administered by trained and experienced educational psychologists and backed by a system of school record cards. In general, the functions of these services are:—selection and differentiation for secondary education, diagnosis and guidance of atypical children, preliminary vocational guidance and, in some States, research. The weight given to each of these functions varies considerably from State to State, but the aim is to provide thorough educational guidance for all children.

Throughout Australia, branches of the Commonwealth Employment Service co-operate with State Education Departments by giving post-school vocational guidance, using the data obtained and made available by the Education Departments during the school career of the children. In New South Wales, a similar service is also provided by the Youth Welfare Section of the Department of Labour and Industry.

3. **Research.**—(i) *State Education Departments.* All State Education Departments have set up research branches which function as integral parts of head offices. In several States, the officer who directs research is also responsible for the guidance service offered by his department. The research undertaken is directed towards departmental activities and the findings are examined carefully in the determination of policy and procedures; in addition, many problems of immediate importance are handled. In the majority of States, too, the Research Branch supervises the collation of statistics and also plays an important part in curriculum revision and modification of examinations.

(ii) *Australian Council for Educational Research.* The Australian Council for Educational Research, a non-governmental body, is also engaged on educational research in a wide variety of fields, ranging from tertiary to pre-school education. It conducts surveys and inquiries, makes grants to approved educational investigators, serves as a centre for disseminating educational information, provides training for research workers, and standardizes and distributes educational and psychological tests for use in Australia. Although this council is an autonomous body, the Commonwealth and State Governments contribute some financial support.

4. **Atypical Children.**—Pupils who, for one reason or another, cannot progress to their best advantage in an ordinary school are catered for by special schools or classes. Among groups given special attention are the mentally backward, the gifted, the physically handicapped, the blind, deaf and dumb, the epileptic, the cerebral palsied, the partially sighted, the hard-of-hearing and the socially maladjusted. The provision of special schools and classes has involved the appointment of departmental specialists, special training courses and close liaison with school health services. In some States, special clinics attached to hospitals, or functioning as an independent child-welfare service, handle cases of personality maladjustment and work in co-operation with the psychological services of the Education Departments.

5. **Education of Native Children in Australia.**—The Commonwealth Government is responsible for the education of full-blood native children in the Northern Territory. Each State has responsibility for the welfare and education of native children within its boundaries.

Native children are admitted to government schools in all States except in areas where separate facilities are provided. In those States where natives are more numerous, special schools are located at or near aboriginal reserves, settlements and stations. The schools are for the most part staffed by teachers from the Education Departments, and the curriculum is similar to that in ordinary government schools with a bias towards handicrafts. Numbers of native children also attend the mission schools conducted in several States by the various religious denominations. The standard of education in these schools is generally similar to that in the government schools.

6. **Provision for Rural Areas.**—(i) *General.* The population of Australia is so scattered that there is a problem in providing primary, and more especially secondary, education for all children. One method of meeting this problem has been the establishment of a wide network of one-teacher primary schools, staffed in the main with trained teachers. The practice of sending itinerant teachers to assist correspondence students in outlying areas has been introduced in the far north of Western Australia. The School of the Air, which is dealt with more fully below, is another method used for dealing with the problem.

(ii) *Subsidized Schools.* Where a group of children is too small to warrant the establishment of a one-teacher school, a "subsidized school" may be opened. The Education Department pays part of the cost, and in some States appoints a teacher. Some States also administer "provisional schools", which are completely financed by the Government but which are not large enough, or sufficiently assured of adequate continued attendance of pupils, to warrant classification as permanent schools.

(iii) *Consolidated Schools.* In some States, in districts where a number of small centres are scattered around a larger centre or country town, recent policy has been to close the one-teacher schools and transport pupils each day by bus to a "consolidated" school in the larger centre. Consolidated schools provide primary instruction and from two to four years of post-primary instruction. The post-primary curriculum adopted usually has a bias towards practical activities and training in subjects bearing on the primary industries of the locality.

(iv) *Special Assistance.* Another way of bringing children to the school has been the provision of financial assistance for children who have to live away from home in order to attend school. Most of these board in private homes, but in the several States there are a few government hostels and over 60 private hostels (excluding private boarding schools), many of which are government-subsidized. Together, these cater for almost 2,000 children of secondary school age and a small number of primary school children also. In all States, some provision is made for financial assistance towards the living and travelling expenses of children who are obliged to live away from home in order to attend school.

(v) *Correspondence.* For children who are still unable to attend school, systems of correspondence tuition have been established in every State. The Education Departments provide tuition through primary and secondary school levels and up to matriculation standard if required. In addition, the Technical Correspondence Schools conducted by the senior technical college of each State arrange for correspondence tuition at secondary level up to matriculation standard for students over the school leaving age. Further reference to the work of the Technical Correspondence Schools is made in § 6 of this chapter, which deals with technical education (*see p. 598*).

7. School Broadcasting and Television.—Over the years, an extensive school broadcasting system has been developed in Australia by the co-operative efforts of the Australian Broadcasting Commission and education authorities. The Youth Education Department of the A.B.C. is responsible for the broadcasting of the programmes, but it draws freely on the advice and services of teachers and maintains permanent liaison officers with the Education Departments. It was estimated that in 1960 over 90 per cent. of Australian schools were equipped to receive radio lessons.

School broadcasts are presented as part of the regular A.B.C. programmes without separate stations or wave lengths. Special efforts are made, however, to relate the broadcast to school work by the extensive distribution of booklets, giving details of programmes in advance, and subject notes accompanied by picture sheets, work books, and teachers' notes.

Broadcasting has proved to be a most effective way of reaching the outback children of Australia, and radio lessons have been designed to supplement correspondence lessons. The success of the first School of the Air, which has been in operation at Alice Springs in the Northern Territory since 1950 and serves correspondence pupils of the South Australian Education Department, has led to the opening of similar schools based at Ceduna and Port Augusta in South Australia, at Broken Hill in the far west of New South Wales, at Meekatharra and Derby in Western Australia, and at Cloncurry in Queensland. In all, these schools serve a total of a million square miles. By means of special two-way radio equipment, children hundreds of miles apart can participate in the same lesson and teachers and pupils can talk directly with each other.

From the beginning of 1959, the A.B.C., in co-operation with education authorities provided several types of school television programmes weekly as an experiment. These were continued in 1960.

The "Kindergarten of the Air" and the television programme, "Kindergarten Playtime" are described in § 5 of this chapter, which deals with pre-school education (*see p. 597*).

8. Teacher Training and Recruitment.—(i) *General.* The training of government school teachers is carried out by the State Education Departments, but in most States persons who wish to train for teaching in private schools may attend government training

colleges on payment of a fee. Many non-government school teachers have been drawn from the government teaching services and others have been recruited at the university graduate level. Private training institutions also provide some teachers.

An account of the early growth of teacher training systems is to be found in Official Year Book No. 22, and subsequent developments were reviewed extensively in Official Year Book No. 40. The pupil-teacher system has been abandoned as the chief method of training teachers, and teacher students are now recruited at matriculation level and given a professional course of training at colleges controlled by Education Departments or by university departments of education. The raising of standards and lengthening of training have led to a close association between the Education Departments and universities. The trend has been towards placing teacher training on the same basis as other professional training.

There is at present a shortage of teachers in Australia. Measures taken to overcome this shortage include substantial increases in teachers' salaries and liberalization of promotion systems, publicity drives to attract recruits, and increases in living allowances to departmental teachers' college students. In some States, special arrangements are in force for intensive shorter training courses, in order to meet the immediate need. In others, recruitment of teachers overseas is undertaken to reduce the shortage.

(ii) *Training Colleges.* Every State maintains at least one teachers' training college. Most students are trained at colleges in the capital cities, although there has been a movement towards the establishment of colleges in the country. At the end of 1960, there were in Australia 26 teachers' colleges conducted by Education Departments and professional training in education was being provided by seven universities.

(iii) *Training of Primary Teachers.* In most States, teachers for government primary schools are trained in co-educational teachers' training colleges controlled and administered by the State Education Departments. Departmental trainees are given a monetary allowance while in training, and are required to enter into a bond to serve for a specified period on completion of training or to repay all or portion of the cost of training.

The entrance standard is generally at the Leaving Certificate level at about the age of seventeen. In some States, intending teachers can obtain a scholarship at the Intermediate Certificate level to enable them to complete teachers' college entrance requirements. In return, they are required to enter into a bond of service additional to that normally required of departmental teachers' college trainees.

In general, the duration of courses is two years for primary teachers, including infants' teachers. The basic subjects taken in the various courses are principles, history and general methods of teaching, special methods of teaching primary school subjects and educational psychology. In addition, students undertake courses in physical education, art, music, school hygiene and handicrafts as well as lectures designed to widen their own cultural background.

In South Australia, primary teacher trainees attend certain university courses, including education, as part of their training. In Tasmania, while the majority of departmental teacher trainees receive their training at the university, there is also a government teachers' college providing courses in infant, primary and home arts teaching.

In some States, separate courses are provided for teachers in infants' schools and in small one-teacher schools. In Victoria, an extension course of one year following the primary course is designed to train teachers of home-crafts for primary schools.

(iv) *Training of Secondary Teachers.* Prospective secondary teachers are required to undertake a university degree course followed by a one-year post-graduate course leading to a degree or diploma in education, or a two or three year course at a teachers' college. Both these periods of training include lectures on subjects associated with educational theory and practice, study of methods and techniques appropriate to secondary school subjects, periods of practice teaching, and the observation of classroom techniques in the teaching of special subjects.

(v) *Training of Specialist Teachers.* Teachers of specialist subjects such as music, art, manual arts, domestic science and commercial subjects receive from two to five years' training varying according to the institution concerned and the type of secondary school in which the teacher is to teach. In several States, the shorter courses are provided wholly by the teachers' colleges. Where the specialist course is given at an institution other than the teachers' college—for example, at a university, technical college or conservatorium of

music—as is usual for teachers of specialist subjects in high schools, trainees are required to attend teachers' college or university lectures in education and in some cases the specialist course is followed by a year of professional training.

In four States, teachers of music receive their specialist training at conservatoria of music: in New South Wales and Queensland, the conservatorium is a State institution under the Minister for Education; in Victoria and South Australia, it is attached to the university.

Courses designed to train physical education teachers are offered in five States, in one at a teachers' college and in the others by the universities.

Training for teachers of agricultural subjects in secondary schools is available in five States and consists of either an agricultural college diploma or a university degree course together with professional training. In Victoria, the two-year agricultural college diploma course follows the normal two-year primary teachers' course. In New South Wales, in addition to the three-year university agricultural course followed by one year's professional training, there is a two-year teachers' college agricultural course.

(vi) *Training of Technical Teachers.* Teachers of general subjects in technical schools and colleges usually receive their training either as primary or as secondary teachers and, after some experience in either or both fields, are transferred to a technical institution.

Teachers of specialist subjects in technical schools are usually recruited from the ranks of qualified tradesmen engaged in either industry or commerce. Upon appointment, teachers of technical subjects usually receive instruction in classroom teaching techniques and procedures. A separate Technical Teachers' College has been established in Victoria.

(vii) *In-service Training.* As almost all teachers now enter the profession by way of teachers' colleges, where they receive basic professional training, in-service training in Australia is directed chiefly towards keeping teachers abreast of developments and adding to their basic training.

Such training usually takes the form of short courses held sometimes during vacations, sometimes during school-time or in the evenings. Courses consist of discussions and lectures given by senior staff members of Education Departments and university and teachers' college lecturers, on such subjects as classroom techniques and supervision, librarianship, visual aids, music, arts and crafts and physical education. In some States, there are also in-service courses for special groups of teachers, such as headmasters or teachers of one-teacher schools. In addition, district inspectors are responsible for organizing short conferences of teachers where professional topics are discussed.

Education Departments encourage teachers to pursue university courses, and in some States pay the cost of courses undertaken by selected teachers.

The official publications of the Education Departments contain articles dealing with educational theory and practice. In most States, the magazines of the teachers' organizations, which reach the majority of government teachers, also contain articles of this type.

(viii) *State Details.* The details of teacher training in the States are given on pages 442–3 of Official Year Book No. 40.

(ix) *Sex and Status of Teachers.* Although about half of the teachers in government schools in Australia are men, the ratio varies from State to State. In the infants' schools and generally in girls' departments, women teachers only are employed. Men, however, predominate in the senior positions, both because of their greater numbers amongst those with long service and because, except in infants' schools and girls' schools, the higher promotion positions are generally reserved for men.

9. *School Buildings and Grounds.*—In 1930, school building programmes were seriously cut because of the financial difficulties of the depression. The 1939–45 War intervened before school building could be resumed on a large scale. After the War, the building of schools was given a high priority, but the rapid post-war increases in school population have imposed a severe strain on available school accommodation, and such emergency measures as the use of halls, cloakrooms and weather-sheds for class instruction have been adopted in some areas.

The post-war buildings fall into two groups, portable and permanent. In primary schools in particular, some Education Departments favour the use of both kinds of classroom in conjunction, thus enabling them to cope with the changing age-composition of particular areas. Prefabricated buildings and classrooms have been imported or locally produced

in increasing quantities and include timber-frame units, aluminium and steel units, and single and multiple pre-cast concrete units. Such prefabricated buildings are used, not only in extending the facilities of existing schools and to provide multi-purpose units such as assembly hall gymnasiums, but also for erecting entire schools. Expenditure on school building has increased greatly in all States over recent years.

10. School Equipment.—(i) *Text Books and Materials.* The State Education Departments supply government schools with essential equipment free of charge, including scientific apparatus and equipment, maps, blackboards, chalk and cleaning materials, and non-consumable equipment for commercial, home science and manual training. Garden tools and physical training equipment are supplied free in most States.

Primers and writing equipment for individual pupils are usually supplied free in primary schools, and Departments, with one exception, produce monthly school magazines which are supplied free or at a small cost. Textbooks, however, are supplied to primary pupils free of charge in one State only. In other primary schools and in all secondary schools, textbooks must be purchased by students, although in several States schools own stocks of textbooks which are hired to students, and in one State secondary textbooks are sold at reduced rates.

Other equipment is supplied free by the Departments on a limited basis only. Equipment such as radios, film and filmstrip projectors, pianos, duplicators and library books are ordinarily purchased for individual schools by the parent and citizen organizations associated with them, with the assistance of subsidies from the Departments.

(ii) *Furniture.* There has been considerable development in this field. Originally most schools were equipped with long desks and benches, seating six to eight pupils, but these were later replaced by the standard dual desk with tip-up seat, and in infant classes by individual chairs and small tables. After the war, considerable research was undertaken on posture and the physical measurement of children. The dual desk is now being replaced in some States by the individual table and chair, provided in a range of sizes suitable to each class. In some States, tubular steel furniture is used. The new type of furniture is more suitable for flexible arrangements of the class in line with modern educational practice.

(iii) *Visual Aids.* In the past 20 years, there has been a remarkable growth in the use of visual aids in education. After some resourceful pioneering work had been done by individuals, the Departments of Education, between 1936 and 1939, appointed special committees and teacher demonstrators to guide the development of the new educational medium. Production units to produce film strips suitable for use in schools were set up in five States, and an Australian-produced film-strip projector was manufactured. After the war, the emphasis moved from the strip projector to the 16 mm. sound machine, and the Australian National Film Board, set up by the Commonwealth Government to promote the use of educational films, became the main producer of these films. Film companies are also designing films primarily for class-room use and several manufacturers have produced 16 mm. sound projectors. Education Departments have their own film libraries to distribute films to schools and, in addition, borrow from the Commonwealth National Library, which is the main distributing centre for non-technical films in Australia.

11. Parent and Citizen Organizations.—In Australia, where all government schools are administered by central departments, there is little opportunity for local administration of education. Public interest is expressed through parents' committees or organizations of parents and other citizens interested in supporting their local school. The Education Acts of all States provide for the formation of groups of this type, whose aims are to promote the interest of the school by bringing parents, pupils and teaching staff together, to help provide teaching aids and recreation materials not supplied by the departments, to assist in the regular attendance of children at school and to help find accommodation for teachers.

In several States, the general maintenance of school buildings, equipment and grounds is a statutory responsibility of the parent groups, costs being covered by government grants. Lunch canteen services at local schools are maintained by groups in some States.

A notable achievement of the parent groups has been the establishment of school children's insurance schemes, operated through State government insurance offices or private insurance companies. These schemes cover accidents to children which occur between the time of leaving home for school and returning home by the usual direct route.

State-wide councils of federations of parents' groups are associated in a federal body, the Australian Council of School Organizations.

12. School Banking.—Particulars of School Savings Banks are included in Chapter XX.—Private Finance.

§ 5. Pre-School Education.

1. **Types of Pre-School Centres.**—Free kindergartens were originally established in congested industrial areas and financed mainly by voluntary effort, but over the years the Commonwealth Government, the State Governments and some municipal councils have provided an increasing amount of financial assistance, and in addition themselves maintain pre-school centres in certain areas.

In 1938, the six Kindergarten Unions, the voluntary organizations which pioneered pre-school education in Australia, met to form a federal organization. Its title "Australian Association for Pre-school Child Development" was changed in 1954 to "Australian Pre-school Association". Its membership is now open to all organizations whose main objective is the care of the pre-school child, and includes bodies in the Australian Capital Territory, the Northern Territory, and the Territory of Papua and New Guinea.

The aim of the association is to promote the continuous advancement of pre-school movements throughout Australia. It sets out standards which act as a guide throughout Australia to those sponsoring pre-school centres, and is responsible for the administration of the six Lady Gowrie Child Centres. These centres are demonstration nursery schools which the Commonwealth Government established in each of the capital cities in 1940 and which are maintained by Commonwealth grants.

To-day, pre-school centres are found not only in inner city areas but also in suburban and country districts. Programmes are adapted to suit the areas in which the centres are situated. Types of pre-school centres include nursery kindergartens, crèches with full-day care for children of working mothers, play groups and play centres, occasional care centres and residential holiday homes.

There are only a limited number of State-subsidized pre-school centres and kindergartens conducted by public authorities and voluntary bodies such as the Kindergarten Unions. However, many children of pre-school age attend private non-subsidized nursery schools or kindergartens. No comprehensive statistics are available concerning the operations of pre-school centres and kindergartens.

2. **The Training of Teachers.**—Although the principle is that all types of pre-school work should be under the guidance of trained pre-school teachers, this cannot always be put into practice, owing to the shortage of teachers.

The Kindergarten Unions in all States except Tasmania have established teacher training colleges providing three-year courses. The minimum entrance age is seventeen, and the Leaving Certificate is usually required before admission. In addition, in New South Wales, the Sydney Day Nursery and Nursery Schools' Association maintains a training college, and a two-year course for nursery teachers is available at the Sydney Teachers' College.

In Tasmania, prospective teachers complete a two-year course of training at one of the Education Department's pre-school centres. Those wishing to gain a Kindergarten Training College diploma must attend a college on the mainland.

Many students-in-training receive government scholarships, and others are sponsored by government departments or voluntary organizations.

3. **Kindergarten of the Air and Kindergarten Playtime.**—The "Kindergarten of the Air" came into being in 1942 in Western Australia, where, under the stress of the war, kindergartens could not remain open. It was conducted by the Australian Broadcasting Commission and proved so successful that within a few years it was being broadcast throughout Australia and has inspired similar projects overseas. It consists of a programme of 25 minutes every weekday based on the interests of children from 3 to 5 years of age.

"Kindergarten Playtime" was first telecast in December, 1956, only a month after the Australian Broadcasting Commission had commenced televising programmes. It consists of a programme of 15 minutes every weekday, based on the interests of children from 3 to 5 years, and is now shown in all State capital cities.

§ 6. Technical Education.

1. **General.**—In this section, technical education refers to that branch of education which is concerned with the preparation for entry to skilled occupations, including trades and professions. In the main, this education is vocational and is chiefly part-time, being carried out by the student while he is engaged in his occupation. The work of technical

high schools, junior technical schools and other schools of this nature, which provide courses with a bias towards technical handwork, has been excluded, as these schools provide a form of education which is more properly regarded as secondary education.

The chief institutions for higher education other than the universities are the technical colleges, which are administered in five States by a division of the Education Department. In New South Wales, a separate Department of Technical Education has been established, and in Victoria a number of the foremost technical colleges is controlled by independent councils which, although responsible to the Minister of Education, have a large measure of autonomy.

The technical colleges offer training not only in all the major industrial skills, but also in a variety of commercial, artistic and domestic occupations. Their courses may be divided into three main types, as follows:—

- (i) Diploma courses giving advanced training in the technical professions and other fields such as accountancy and art.
- (ii) Vocational courses, usually leading to the award of a certificate, for skilled technical and semi-professional workers. Many of these courses are in fields not covered by an apprenticeship award.
- (iii) Craftsman or artisan training in the apprenticeship trades.

A brief description of the expansion in technical training since the 1939–45 War appears in Official Year Book No. 43, page 449. The following table gives some indication of the growth of technical education in the years 1955 to 1959:—

TECHNICAL EDUCATION: AUSTRALIA.

Year.				No. of Colleges.	No. of Students.	No. of Teachers.(a)	Total Expenditure.
							£
1955	151	177,081	7,632	10,058,917
1956	164	(b)	8,364	11,395,445
1957	169	204,268	8,967	12,243,824
1958	171	205,225	9,765	13,813,071
1959	181	(b)	10,601	(b)

(a) Includes both full-time and part-time teachers.

(b) Not available.

Training in certain technical aspects of agriculture such as farm mechanics, wool classing, and in related fields such as food technology is also provided by the technical colleges, while the seven State agricultural colleges (*see also* Chapter XXII), located in all States except Tasmania, provide comprehensive agricultural courses of two to three years' duration which lead to diplomas in agriculture. At some colleges, other diploma courses are offered in addition, including horticulture, dairying and dairy manufactures, food technology and oenology. The Queensland Agricultural High School and College is administered by the Department of Education; in other States, the Departments of Agriculture are responsible for administration of the colleges.

2. Correspondence Training.—Technical correspondence courses were first offered in Australia about 1910. During the period 1940 to 1944, technical correspondence schools were founded in each State in conjunction with the Commonwealth and these have become an important part of the system of technical education in the Australian States.

These schools not only offer a wide variety of correspondence courses, including trade and apprenticeship, rural, commercial and art courses, but, in addition, provide secondary courses up to matriculation or diploma entrance standard. Students who because of distance or working hours cannot attend technical college classes may enrol for these courses. In New South Wales, "mobile instructional units" consisting of rail cars equipped as self-contained workshops are used to provide practical experience for correspondence students, as well as for the instruction of apprentices and tradesmen at smaller country centres.

In 1955, the Royal Melbourne Technical College established a shortwave broadcasting station to provide further tuition for its correspondence students.

An interesting recent development in technical correspondence education, in which the Australian technical colleges are co-operating with the Commonwealth Government,

is the correspondence scholarship scheme operating under the Colombo Plan. Through this scheme, South and South-east Asian students may take correspondence courses conducted by the technical colleges and by the University of Queensland, which has a highly organized system of external tuition. Courses include commercial, rural and teacher-training, engineering and other technical courses. Where practical training is required as part of the course, it is taken by the student in his own country.

3. **Teacher Training.**—Prior to the 1939–45 War, technical colleges were staffed chiefly by men drawn from two sources. They were either trained teachers in the employment of the Education Department or technicians drawn from industry. Although some of the latter were highly qualified, the great majority had not been trained as teachers. In order to remedy this, technical schemes have been developed to train college teachers without breaking the important link provided by recruiting specialist tradesmen to teach in the colleges. In Victoria, the Technical Teacher's College provides training for students with the appropriate diploma or trade qualifications and suitable industrial experience. In New South Wales, technical college lecturers and tradesmen-instructors receive an in-service course of teacher training in both general educational theory and teaching method, and correspondence courses and visiting lecturers care for the newly appointed teacher-instructor in country colleges. Modifications of this scheme are in operation in other States. Many technical teachers, principally of academic, commercial and domestic science subjects, hold trained teachers' certificates from teachers' colleges.

4. **Colleges, Teachers and Students.**—The number of colleges, teachers and enrolments of individual students during the years 1955 to 1959 is given in the following table:—

TECHNICAL EDUCATION: COLLEGES, TEACHERS AND ENROLMENTS.

State.	Colleges.	Teachers.			Individual Students Enrolled.		
		Full-time.	Part-time.	Total.	Males.	Females.	Persons.

§ 7. Expenditure on Schools and Technical Colleges.

1. **Government Schools Expenditure.**—(i) *Maintenance—All Schools (except Senior Technical Colleges).* The net expenditure on maintenance in all grades of schools, except senior technical colleges and, in Victoria, junior technical schools, and the cost per head of average attendance for each of the years 1955 to 1959 are shown in the following table. The figures do not include expenditure on buildings, which is shown in a subsequent table. In all expenditure tables, the figures for Victoria, Queensland, Western Australia and the Northern Territory relate to the financial year ended six months earlier than the calendar year.

GOVERNMENT SCHOOLS(a): NET EXPENDITURE ON MAINTENANCE.

Year.	N.S.W. (b)	Vic. (c)(d)	Q'land. (d)	S. Aust.	W. Aust. (d)	Tas.	N.T. (d)	A.C.T.	Aust.

(a) Excludes Senior Technical Colleges. (b) Gross figures, receipts not being available.
(c) Excludes Junior Technical Schools. (d) Twelve months ended 30th June of year shown.
(e) Estimated. (f) Subject to revision.

(ii) *Maintenance—Secondary Schools.* The figures shown in the preceding table refer to expenditure on the maintenance of all government primary and secondary schools, excluding senior technical colleges. It has been the practice of the State Education Departments to give separate information in regard to the cost of secondary education. The fact, however, that both elementary and higher education are in some instances given in the same school and by the same teacher makes difficult any satisfactory allocation of expenditure between primary and secondary education. Furthermore, the term "secondary" has not the same meaning in all States. Similar difficulties arise in connexion with the apportionment amongst the various branches of expenditure on administration, inspection and the training of teachers. The figures quoted hereunder in respect of cost have been extracted mainly from the reports of the State Education Departments, and are subject to the foregoing qualifications.

GOVERNMENT SECONDARY SCHOOLS(a): EXPENDITURE ON MAINTENANCE.

(a) Excludes Senior Technical Colleges. (b) Includes Australian Capital Territory. (c) Twelve months ended 30th June of year shown.
(d) Includes High and Junior Technical Schools.
(e) Subject to revision.

STUDENTS ENROLLED (AVERAGE WEEKLY ENROLMENT)
AND TEACHERS EMPLOYED IN
GOVERNMENT AND NON-GOVERNMENT SCHOOLS
AUSTRALIA, 1948 TO 1959

The figures in all cases exclude the cost of buildings. In Queensland, the figure quoted excludes the cost of the Agricultural High School and College, which amounted to £261,254 in 1956-57, to £263,293 in 1957-58 and to £283,848 in 1958-59.

(iii) *Buildings.* Expenditure on government school buildings, excluding senior technical colleges, for the years 1955 to 1959 was as follows:—

GOVERNMENT SCHOOLS(a): EXPENDITURE ON BUILDINGS.

(Including Loan Fund Expenditure.)

(£'000.)

Year.	N.S.W.	Vic.(b)	Q'land. (b)	S. Aust.	W. Aust. (b)	Tas.	N.T.(b)	Total.
1955 ..	7,366	4,660	1,287	1,366	1,458	1,340	16	17,493
1956 ..	7,409	5,917	1,589	1,518	1,591	b c 1,200	25	19,249
1957 ..	7,707	6,266	1,608	1,992	1,827	(b) 1,078	106	20,584
1958 ..	10,918	6,875	1,933	2,865	1,923	(b) 1,153	84	25,751
1959 ..	14,074	6,861	2,341	3,548	2,006	b d 1,282	66	d 30,178

(a) Excludes Senior Technical Colleges.
(d) Subject to revision.

(b) Year ended 30th June.

(c) Estimated.

The totals for the various States in 1959 include the following amounts expended from funds other than the consolidated revenue fund:—New South Wales, £11,613,933; Victoria, £6,577,708; Queensland, £1,930,657; South Australia, £3,142,090; Western Australia, £1,699,962; and Tasmania, £1,114,050.

(iv) *Total Net Cost.* The total net cost of education in government schools, including buildings, during the years 1955 to 1959 was as follows:—

GOVERNMENT SCHOOLS(a): TOTAL NET COST.

(£'000.)

Year.	N.S.W. (b)(c)	Vic. (d)(e)	Q'land. (d)	S. Aust. (c)	W. Aust. (d)	Tas. (d)	N.T. (d)	A.C.T. (c)(f)	Aus- tralia.
1955 ..	32,268	19,114	8,265	6,847	6,601	(c) 4,007	141	309	77,552
1956 ..	34,464	23,322	9,784	7,504	7,343	4,046	174	345	86,982
1957 ..	36,566	25,705	10,706	8,573	8,134	4,464	261	417	94,826
1958 ..	42,755	28,130	11,902	10,254	8,886	4,610	281	439	107,257
1959 ..	49,398	30,799	13,714	12,372	9,265	(g) 5,140	283	547	121,518

(a) Excludes Senior Technical Colleges. (b) Gross expenditure, receipts not being available.
(c) Figures relate to 12 months ended 31st December of year shown. (d) Figures relate to 12 months ended 30th June of year shown. (e) Excludes Junior Technical Schools. (f) Excludes expenditure on buildings. (g) Subject to revision.

The figures in the preceding tables refer to all grades of government schools with the exception of senior technical colleges and, in Victoria, junior technical schools.

2. *Non-Government Schools Finance.*—Most Roman Catholic parochial schools do not charge fees, but families make a contribution if they can afford to do so. With this exception, pupils of non-government schools must ordinarily pay fees. At the majority of non-government secondary schools, privately endowed scholarships are available in varying numbers, and reductions in fees are normally made for children of clergy or for two or more members of one family attending the same school.

Certain State scholarships and bursaries are, as noted above, tenable at approved non-government secondary schools. Since the establishment of educational systems by the State Governments, official policy has been largely against the provision of direct financial assistance to non-government schools. The eight undenominational grammar schools in Queensland, however, receive a State subsidy under the Grammar Schools Acts 1860-1900. In 1956, the Commonwealth Government arranged to contribute to the interest payments on loans raised by churches in order to build denominational secondary schools in the Australian Capital Territory.

3. **Technical Education Expenditure.**—The expenditure on technical education in each State for 1959 is shown in the following table:—

TECHNICAL EDUCATION: EXPENDITURE, 1959.

(Including Loan Fund Expenditure.)

(£.)

State.	Salaries and Maintenance.	Equipment.	Buildings.	Other.	Gross Expenditure.	Receipts—Fees, etc.	Net Expenditure.
New South Wales ..	3,468,175	171,608	905,117	173,390	4,718,290	560,513	4,157,777
Victoria(a)(b) ..	4,183,322	100,000	1,201,688	986,753	6,471,763	568,479	5,903,284
Queensland ..	661,093	223,151	(c) 29,327	8,608	(e) 922,179	90,974	(e) 831,205
South Australia ..	958,835	(d)	736,695	30	1,695,560	127,786	1,567,774
Western Australia(b)	716,408	(d)	112,452	..	828,860	67,691	761,169
Tasmania(b) ..	235,401	24,434	25,099	15,258	300,192	2,976	297,216
Aust. Capital Terr.(b)	51,081	4,027	..	4,711	59,819	6,296	53,523
Australia ..	10,274,315	523,220	e3,010,378	1,188,750	e14,996,663	1,424,715	e13,571,948

(a) Includes expenditure on Junior Technical Schools. In other States, this type of expenditure is included with expenditure on Government schools. (b) Year ended June, 1959. (c) Excludes loan expenditure. (d) Included with salaries and maintenance. (e) See note (c).

Fees and other receipts are paid into Consolidated Revenue in all States except Victoria, where they are retained and spent by the Technical School Councils. The expenditure on buildings is financed largely from loan moneys, the sums provided from this source in 1959 being: New South Wales, £746,989; Victoria, £1,903,896; Queensland, not available; South Australia, £708,400; Western Australia, £25,569; Tasmania, £19,523.

§ 8. Commonwealth Activities.

Although the primary responsibility for education rests with the States, the Commonwealth Government is committed to a number of educational activities related to its other functions. For example, it maintains officer training colleges and education services for each of its defence services, a School of Pacific Administration for the training of administrative and other officers for service in Commonwealth Territories, and a School of Forestry. In each of the Australian Territories, the educational programme provides for both the native and European children who live there. References to these programmes appear in Chapter V.—The Territories of Australia.

The Australian Broadcasting Commission features school broadcasts and other educational broadcasts as part of its daily programmes. The Commonwealth Scientific and Industrial Research Organization undertakes research, the results of which are made available to educational institutions. Under the Commonwealth Reconstruction Training Scheme, many ex-servicemen and women have received training which has enabled them to enter a variety of trades and professions.

The Commonwealth Office of Education, established under the Education Act 1945, acts as the Commonwealth's educational adviser, undertakes research work as Commonwealth activities require, and is the channel for liaison between Commonwealth and State educational authorities. Some of its major commitments are those related to international relations in education, including the association of Australia with the aims and activities of the United Nations Educational, Scientific and Cultural Organization (UNESCO), the teaching of English as a second language and the provision of scholarships and fellowships for selected students under the Technical Co-operation Scheme (Colombo Plan) and under the scheme known as Australian International Awards. The office also acts as a co-ordinating body in the administration of the British Commonwealth Scholarship and Fellowship Plan.

The activities of the Commonwealth Scholarships Board, which was formerly known as the Universities Commission, are described in § 10, para. 5 of this chapter.

The Commonwealth assists a number of other bodies concerned with education. Besides grants to organizations such as the Australian Council for Educational Research, grants are made to the States, on the recommendation of the Australian Universities Commission, for payment to universities.

Further details of Commonwealth assistance to students (including the Commonwealth Scholarship Scheme) and of grants for universities are given in § 10, para. 5 of this chapter.

§ 9. Australia and International Relations in Education.

Australia has always been responsive to educational developments in overseas countries, particularly those in the United Kingdom, but it is only recently that it has begun to make any considerable impact on educational thought overseas.

In this connexion, there have been important developments since the 1939-45 War. For instance, there has been a remarkable increase in the volume of information on educational matters exchanged between Australia and South-east Asia, and Australia participates in the Technical Co-operation Scheme (Colombo Plan), the United Nations Technical Assistance programme, the cultural programme of SEATO, and the scheme of Australian International Awards, under which a limited number of scholarships are given annually. Australia also participates in the British Commonwealth Scholarship and Fellowship Plan. In 1959, there were 4,413 overseas students, most of them Asian, attending institutions of higher learning in Australia; of these, 2,352 were in universities and 1,503 in technical colleges.

Perhaps the most important single factor behind the quickening of Australian interest in international cultural affairs has been membership of UNESCO. Australia has been a member since 1946. Twelve expert committees in Australia are responsible for a wide and varied programme of activities on behalf of UNESCO. Their advice has helped to make Australia's contribution to international conferences and seminars highly effective. Other work undertaken by these committees has included the provision of technical material and advice to the countries of South and South-east Asia, the conducting of seminars in Australia, arranging for exhibitions and displays in Australia and overseas, and the publication of handbooks and brochures to assist teachers and other persons in meeting the problems involved in educating for international understanding.

The Australian National Advisory Committee for UNESCO, on which all the other committees are represented, advises the Commonwealth Government and co-ordinates the work of the specialist committees.

§ 10. Universities.

1. **General.**—There are at present ten universities in Australia. The following list shows the date of foundation and the faculties existing at each.

University of Sydney, established in 1850, located in Sydney, New South Wales. Agriculture, Architecture, Arts, Dentistry, Economics, Engineering, Law, Medicine, Science, Veterinary Science.

University of Melbourne, established in 1853, located in Melbourne, Victoria. Agriculture, Architecture, Arts, Dental Science, Economics and Commerce, Education, Engineering, Law, Medicine, Music, Science, Veterinary Science.

University of Adelaide, established in 1874, located in Adelaide, South Australia. Agricultural Science, Architecture and Town Planning, Arts, Dentistry, Economics, Engineering, Law, Medicine, Music, Science, Technology.

University of Tasmania, established in 1890, located in Hobart, Tasmania. Arts, Commerce, Engineering, Law, Science.

University of Queensland, established in 1909, located in Brisbane, Queensland. Agriculture, Architecture, Arts, Commerce and Economics, Dentistry, Education, Engineering, Law, Medicine, Science, Veterinary Science.

University of Western Australia, established in 1912, located in Perth, Western Australia. Agriculture, Arts, Dental Science, Economics, Education, Engineering, Law, Medicine, Science.

Australian National University, established in 1946, located in Canberra, A.C.T. *Institute of Advanced Studies*: John Curtin School of Medical Research, the Research School of Physical Sciences, the Research School of Social Sciences, the Research School of Pacific Studies. *School of General Studies* (consisting substantially of the former Canberra University College): Arts, Economics, Law, Science.

University of New South Wales, established in 1958 (established 1948 as New South Wales University of Technology), located in Sydney, New South Wales. Architecture, Arts, Commerce, Engineering, Medicine, Science, Technology. The University also provides part-time instruction in science and engineering at technical colleges in country towns in New South Wales.

University of New England, established in 1954 (established 1938 as New England University College), located in Armidale, New South Wales. Agricultural Economics, Arts, Rural Science, Science.

Monash University, established in 1958, located in Melbourne, Victoria. Arts, Economics and Political Science, Engineering, Medicine, Science.

There are also two university colleges in Australia:—Newcastle University College, founded in 1951, located in Newcastle, New South Wales, is affiliated with the University of New South Wales and has degree courses in the faculties of Applied Science, Architecture, Arts, Commerce, Engineering, Technology and Science. The Arts courses at the Newcastle University College are provided by the University of New England in co-operation with the University of New South Wales. Townsville University College, founded in 1961, located in Townsville, Queensland, is affiliated with the University of Queensland and has first-year degree courses in the faculties of Arts and Science.

2. Expansion within the Universities.—Within the past 20 years, the appearance of some of the universities has altered to a striking extent. Many new permanent buildings and some temporary ones have been erected and new wings have been added. The universities are expanding their accommodation greatly to meet an expected record enrolment in the next decade.

There was a continuing increase in university enrolments from 1929 (approximately 9,000) to 1940, followed by a slight recession. In the closing year of the 1939–45 War, however, the number of students had risen beyond any previous figure, and rapid post-war expansion was responsible for a peak enrolment of 32,453 students in 1948. After 1948, the numbers decreased each year until 1953 as ex-service personnel completed their training under the Commonwealth Reconstruction Training Scheme. Thereafter, enrolments increased again and it is expected that they will continue to increase rapidly. Enrolments in 1959 were 47,447.

3. Courses.—A brief survey of developments in university courses since the war and up to 1954 was given in the Official Year Book No. 42 (p. 476). Outlines of some developments from 1954 to 1959 have appeared in successive Year Books. Developments since 1959 have included the establishment of a number of courses offered for the first time in Australia, as follows:—

At the University of New South Wales, Sociology and Librarianship were offered for the first time in 1960. The former is a subject for the Bachelor of Arts degree, and the latter a Diploma Course. Ceramic Engineering for the Bachelor of Applied Science degree will be offered in 1961.

At the University of Melbourne, a post-graduate Diploma of Criminology will be offered in 1961.

At the University of New England, a post-graduate Diploma of Educational Administration for external students commenced in 1960; a post-graduate Bachelor of Letters degree for external students will be offered in 1961.

Other developments included the establishment of a faculty of Arts at the University of New South Wales in 1960; a proposal to establish a faculty of Applied Science at the University of Melbourne in 1961; a faculty of Medicine at the University of New South Wales in 1961; a school of Oriental Studies at the University of Melbourne in 1961; and the establishment of a Bachelor of Education in Pre-primary, Primary, or Physical Education at the University of Sydney in 1960.

For the majority of university courses, full-time attendance is required. At most universities, however, certain courses, such as arts, commerce and economics, may also be undertaken by part-time or evening study. At the University of New South Wales, a variety of degree courses are available to evening students.

Several universities have limited systems of external tuition whereby students in country areas may take a restricted number of courses by correspondence. The University of Queensland has developed a system of correspondence tuition which now caters not only for students within the State but for those in the Northern Territory, Papua and New Guinea and adjacent Pacific islands. External students within Queensland receive tutorial assistance at university centres in the principal country towns. In addition, the university operates in the Colombo Plan Correspondence Scholarship Scheme (*see pp. 598–9*).

The University of New England's Department of External Studies offers a wide range of subjects for external study, leading to the degree of Bachelor of Arts and the Diploma in Education. External students must attend short annual residential schools of instruction in their subjects, usually held at the university.

4. Research.—A wide range of research work is carried out by the universities as part of their normal functions. The research activities of the universities have been greatly stimulated over recent years by the interest and assistance of the Commonwealth and State Governments, government instrumentalities such as the Commonwealth Bank, the Rural Bank of New South Wales, and the C.S.I.R.O., private foundations, both overseas and

Australian, such as the Nuffield Foundation, the Carnegie Corporation and the Water Research Foundation of Australia, and industrial undertakings. Details of research work carried out at each university can be obtained from its calendar or research report.

Grants are made by the Commonwealth Government to bodies such as the Post-Graduate Committee in Medicine at the University of Sydney to facilitate arrangements for medical specialists from overseas to lecture and demonstrate advanced techniques in Australia.

Grants have been made by the Commonwealth Government, through the Australian Atomic Energy Commission, to a number of Australian universities for nuclear research.

The further expansion of teaching and research in various agricultural and veterinary fields was assisted by the annual and special grants of the Commonwealth Bank's Rural Credits Development Fund to several Australian universities. The C.S.I.R.O. also contributed to research in these and other fields.

5. The Commonwealth and the Universities—(i) General. The Commonwealth has given support to the Australian universities for many years. Prior to 1939, Commonwealth assistance was almost entirely concerned with research projects carried out by or in collaboration with the universities. During and since the 1939–45 War, the Commonwealth extended assistance to university students, at first to increase the number of highly trained people required for the war effort, then with the object of rehabilitating ex-servicemen, and finally as a social service benefit to the community. For the purpose of reconstruction training, the Commonwealth Government made available to the universities approximately £1 million for buildings and £500,000 for equipment. Since 1951, the Commonwealth has made special grants to the States for their universities and during the same time has continued to support the university institutions for which it is responsible.

(ii) *Assistance to Students.* Up to 1945, the Universities Commission functioned under National Security Regulations, but in that year it was established on a permanent basis under the Education Act. After the 1939–45 War, the Commission continued to provide financial assistance to students under an interim scheme until 1951, when the interim scheme was superseded by the Commonwealth Scholarships Scheme, and the Universities Commission became the Commonwealth Scholarships Board.

As from January, 1961, the number of Commonwealth scholarships granted annually was increased from a maximum of 3,000 to a maximum of 4,000. These are allocated to the States on a population basis and are tenable at universities and other approved institutions. Awards are made on merit and all successful applicants have their fees paid. In addition, scholarship holders may be paid a living allowance subject to a means test. As from 1st January, 1959, the maximum rates of allowance have been £338 per annum for a scholar living away from home and £221 per annum in the case where he lives at home.

At 30th September, 1960, 15,002 scholars had completed courses of training under the Scheme. At the same date, there were 11,756 scholars in training, of whom 10,861 were at universities and 895 at other institutions.

As from 1st January, 1959, post-graduate awards for training at Australian Universities were made available under the Scheme. One hundred awards were granted in 1960 and a similar number will be available each year. The benefits comprise a living allowance without a means test and payment to universities for tuition and facilities.

The Commonwealth Scholarships Board also provides for the training at universities and similar institutions of ex-service personnel and war widows under the Reconstruction Training Scheme, the Korea and Malaya Training Scheme and the Disabled Members' and Widows' Training Scheme. A detailed description of the Reconstruction Training Scheme was given on page 240 of Official Year Book No. 39. At 30th September, 1960, 21,500 students had completed courses under these schemes and at the same date there were 72 in training.

(iii) *Commonwealth Grants to the States for University Purposes.* Following a report submitted by a committee of inquiry appointed to report on university finances and requirements, the Commonwealth, since 1951, has made grants to the States for recurrent expenditure on university purposes. The payments have been made under the various States Grants (Universities) Acts.*

In 1957, the Prime Minister appointed a committee to investigate the problems of Australian universities. The Committee was given wide terms of reference. Among other things, it was asked to consider the role of the university in the Australian community,

* No. 81 of 1951; No. 75 of 1953; No. 28 of 1955; No. 37 of 1956; No. 7 of 1957; and No. 27 of 1958.

the extension and co-ordination of university facilities, technological education at university level, the financial needs of universities and appropriate means of providing for those needs, and the Commonwealth Scholarship Scheme.

In accepting the principal recommendations of the Committee (Murray Report)*, the Commonwealth agreed to continue grants for recurrent expenditure in 1958, 1959 and 1960, to make additional unmatched recurrent grants, and to assist with the capital needs of the universities for building projects and for equipment. The Commonwealth was also to provide grants between 1958 and 1960 for the building programmes of residential colleges affiliated with universities.

The States Grants (Universities) Act No. 27 of 1958 operated from 1st January, 1958, and gave effect to these recommendations. This Act amended those parts of the States Grants (Universities) Act No. 7 of 1957 which referred to 1958 and provided for payments for 1957 to the South Australian School of Mines and Industries (now the South Australian Institute of Technology).

Under the Australian Universities Commission Act No. 30 of 1959, the Australian Universities Commission was established. Its principal functions are to advise the Prime Minister on financial assistance to Commonwealth Universities and to States in relation to their Universities and also on the balanced development of Australian Universities. The Commission commenced its work in July, 1959. The first report of the Commission, covering the period 1961-63 was presented in October, 1960. The Commission recommended that Commonwealth grants should be approximately twice as great as grants available in the period 1958-60. The Commonwealth has accepted these recommendations.

The maximum Commonwealth recurrent grants for 1960 are shown in the following table:—

RECURRENT COMMONWEALTH GRANTS TO UNIVERSITIES, 1960.
(£.)

University.	Emergency Grant for Recurrent Expenditure.	Amount to be paid from (2) for Teaching and Administrative Costs of Residential Colleges.	General Grant for Recurrent Expenditure.	Amount to be paid from (4) for Teaching and Administrative Costs of Residential Colleges.
(1)	(2)	(3)	(4)	(5)
New South Wales—				
The University of Sydney ..	480,000	12,200	820,100	16,300
The University of New South Wales ..	230,000	4,000	402,525	5,300
The University of New England ..	66,000	3,500	90,200	4,600
Victoria—				
University of Melbourne ..	430,000	12,000	719,300	16,000
Queensland—				
University of Queensland ..	270,000	8,400	421,700	11,100
South Australia—				
The University of Adelaide ..	258,000	5,200	391,025	6,900
The South Australian Institute of Technology	47,600	400
Western Australia—				
The University of Western Australia ..	180,000	3,600	268,500	4,800
Tasmania—				
The University of Tasmania ..	86,000	1,100	134,450	1,400
Total	2,000,000	50,000	3,295,400	66,800

The emergency grant for recurrent expenditure (column 2) is an unmatched grant aimed at assisting the universities to meet some of their most urgent deficiencies in staff and equipment. The general grant for recurrent expenditure is a continuation of matched grants provided since 1951, and the maximum amount available in 1960 is shown in column 4. In general terms, the matched grants are made on a basis of £1 of Commonwealth money for every £3 of income received by a university from fees and State grants.

* Report of the Committee on Australian Universities (Canberra, Commonwealth Government Printer, 1957).

Columns 3 and 5 of the table above show the amounts which are required to be paid by each university from the emergency and the general recurrent grants, respectively, for the teaching and administrative costs of residential colleges administered by or affiliated with the university.

Between 1958 and 1960, the Commonwealth made grants for selected building projects, shown in detail in the Third Schedule to the 1958 Act. Payments were made up to a given maximum for each project, in the same proportion to State grants for these projects as that shown in the totals given for each university in the following table:—

COMMONWEALTH GRANTS FOR UNIVERSITY BUILDING PROJECTS, ETC.
(£.)

University.	Commonwealth Contribution.	State Contribution.
New South Wales—		
The University of Sydney	1,300,000	750,000
The University of New South Wales	950,000	1,500,000
The University of New England	450,000	450,000
Victoria—		
University of Melbourne	875,000	875,000
Monash University	75,000	75,000
Queensland—		
University of Queensland	775,000	775,000
South Australia—		
The University of Adelaide	375,000	375,000
Western Australia—		
The University of Western Australia	630,000	505,000
Tasmania—		
The University of Tasmania	840,000	670,000
Total	6,270,000	5,975,000

In addition, a grant of 16 per cent. of the cost to the Commonwealth of each project was made for equipment.

The Commonwealth also made grants for capital buildings for residential colleges affiliated with a university. The Commonwealth made grants of one half of the cost, at the request of a State, for the purchase, erection or alteration of a building at an affiliated residential college. The maximum amount available for distribution in each State in the period 1958–60 is shown in the following table:—

MAXIMUM COMMONWEALTH GRANTS FOR RESIDENTIAL COLLEGE BUILDINGS.

(£.)

State.	Maximum Grant.
New South Wales	180,000
Victoria	170,000
Queensland	110,000
South Australia	80,000
Western Australia	40,000
Tasmania	20,000
Total	600,000

The grants for capital building projects at universities and residential colleges were payable at any time within the period 1958–60.

6. **Teaching and Research Staff.**—The following table shows particulars of the teaching and research staff of Australian universities during 1959:—

UNIVERSITIES: TEACHING AND RESEARCH STAFF, 1959.

University or College.	Pro-fessors.	Readers. (a)	Lecturers.(b)		Demonstrators, Tutors and Research Assistants.		Honor- ary Lec- turers and Demon- strators.	Total.

Total	36,287	1,007	6,405	1,575	2,781	47,565

(a) Adjustment made for students enrolled for more than one course.

Of the students enrolled in 1959, 36,830 were males and 10,735 females. Included in those enrolled for degrees were 114 enrolled for higher degree courses at the Australian National University, 481 in Sydney, 376 at the University of New South Wales, 68 at the University of New England, 413 in Melbourne, 220 in Queensland, 236 in Adelaide, 223 in Western Australia, 66 in Tasmania, and 29 at the Canberra University College.

The following table shows the number of students enrolled at Australian universities for each of the years from 1955 to 1959:—

UNIVERSITIES: STUDENTS ENROLLED, SUMMARY, AUSTRALIA.

Year.	Degree Courses.		Diploma Courses.		Certificate Courses.	Miscellaneous Subjects.	Adjusted Total.(a)
	Higher Degrees.	Bachelor Degrees.	Post-graduate.	Sub-graduate.			
1955	1,094	21,539	321	5,153	801	2,130	30,868
1956	1,188	23,686	550	5,977	1,025	2,206	34,480
1957	1,357	26,153	735	5,834	1,135	2,006	36,903
1958	1,672	29,920	846	6,168	1,427	2,431	41,865
1959	2,226	34,061	1,007	6,405	1,575	2,781	47,565

(a) Adjustment made for students enrolled for more than one course.

(ii) *New Students Enrolled.* The number of new students enrolled for courses at the universities during the year 1959 is shown in the following table:—

UNIVERSITIES: NEW STUDENTS ENROLLED, 1959.

University or College.	Degree Courses.	Diploma Courses.		Certificate Courses.	Miscellaneous Subjects.	Adjusted Total.(a)
		Post-graduate.	Sub-graduate.			
Australian National University..	50	3	53
Sydney	2,555	62	358	..	107	3,082
New South Wales	931	5	763	66	177	1,942
New England	747	94	33	874
Melbourne	2,446	24	153	20	254	2,838
Queensland	1,368	6	179	317	222	2,090

Canberra University College ..	188	..	2	..	84	272
Total	10,339	198	1,712	483	1,321	13,985

(a) Adjustment made for students enrolled for more than one course.

Of the new students enrolled in 1959, 10,053 were males and 3,932 females. Included in those enrolled for degrees were 252 enrolled for higher degree courses—Australian National University 50, Sydney 27, University of New South Wales 72, New England 26, Melbourne 23, Queensland 17, Adelaide 16, Western Australia 7, Tasmania 9 and Canberra University College 5.

The following table shows the number of new students enrolled at Australian universities during each of the years from 1955 to 1959:—

UNIVERSITIES: NEW STUDENTS ENROLLED, SUMMARY, AUSTRALIA.

Year.	Degree Courses.		Diploma Courses.		Certificate Courses.	Miscellaneous Subjects.	Adjusted Total.(a)
	Higher Degrees.	Bachelor Degrees.	Post-graduate.	Sub-graduate.

1959	252	10,087	198	1,712	483	1,321	13,985

(a) Adjustment made for students enrolled for more than one course.

8. **Principal University Benefactions.**—Issues of the Official Year Book up to No. 40 included details of the principal private benefactions to universities. (See Year Book No. 40, pp. 467–8.)

9. **University Income for General Activities.**—The income of the universities is derived principally from State and Commonwealth Government grants, students' fees, and income from private foundations. From all sources other than new bequests, the income during 1959 for general university functions was as shown in the table below. In South Australia, Government grants and income from private foundations include amounts in respect of the Waite Agricultural Research Institute.

UNIVERSITIES: INCOME FOR GENERAL ACTIVITIES, 1959.

of B.S. degrees conferred.

(b) Excludes the number

§ 11. Other Aspects of Education.

1. **General.**—Beyond the schools, colleges and universities, there are agencies engaged in less direct educational work which cannot be readily assessed and described. Among these are such things as press, film, radio and television, which are powerful educational forces—whether they are used specifically to disseminate information such as new agricultural techniques or preventative health measures, or, on the other hand, in a much more general way to exert an influence on the cultural level of the population. There are also bodies and institutions such as the adult education authorities, libraries, art galleries and museums which aim at catering for the educational and cultural needs of the general public.

2. **Adult Education.**—(i) *General.* The term “adult education” is used in Australia to refer in the main to non-vocational educational and cultural activities for adults provided by some of the universities and by various adult education authorities, which vary in form from State to State. In 1960, an Australian Association for Adult Education was formed. It will handle matters pertaining to adult education at a national level and arrange liaison with similar bodies in other countries.

The Workers' Educational Association movement, which has for its object the bringing of the universities into closer relationship with the community in general and providing for higher education in civic and cultural subjects, has been active in Australia. In 1913, associations were formed in all the Australian States. In four States, the associations have been superseded by Adult Education Boards or Councils set up by the State Governments in Victoria, Queensland and Tasmania and by the university in Western Australia. In the other two States, New South Wales and South Australia, the associations continue to co-operate with the universities in their extension work and are given direct grants by the governments concerned.

While the choice of courses offered by these bodies is naturally more limited in the smaller States, a variety of topics, including social studies and current affairs, language and literature, drama, music, arts and crafts, are available in all States.

(ii) *New South Wales.* (a) *Adult Education Advisory Board.* State Government grants for adult education are allocated by the Adult Education Advisory Board. Grants are made to the University of Sydney (Department of Tutorial Classes), the Workers' Educational Association, the University of New England (Department of Adult Education), the Public Library of N.S.W. (Adult Education Section), and the Arts Council of Australia (N.S.W. Division).

(b) *University of Sydney.* The Extension Board of the University of Sydney provides lectures and short courses in city and country.

In 1914, the Department of Tutorial Classes was established to provide classes and study groups along the lines of similar work in England. Its activities include the provision of tutorial classes in a wide variety of subjects, discussion groups and “kits” to serve the needs of country districts and people who cannot be catered for by tutorial classes, and publication of the fortnightly *Current Affairs Bulletin*. This publication, begun in 1942 and produced for four years by the Australian Army Education Service, was recommenced in 1947 as a civilian and service publication by the Commonwealth Office of Education. At the beginning of 1952, the Department of Tutorial Classes took over full responsibility for the bulletin. It receives an annual grant from the Commonwealth Government for this purpose.

In 1959, there were 145 tutorial classes with a total enrolment of 4,572 and 152 discussion groups with a total enrolment of 2,114.

The department works in conjunction with the Workers' Educational Association through the Joint Committee of Tutorial Classes, appointed by the university senate.

(c) *Workers Educational Association.* In addition to co-operating with the Department of Tutorial Classes in organizing certain classes and groups, the Association itself provides classes in a wide variety of fields. It publishes *Highway*, a bi-monthly journal of adult education, and maintains a property near Sydney where short residential schools are held throughout the year.

In 1959, the Association ran 69 classes, for which there were 4,018 enrolments.

(d) *University of New England.* When the New England University College became an autonomous university in 1954, its Department of Adult Education took over full responsibility for the activities formerly undertaken by it on behalf of the Department of Tutorial Classes of the University of Sydney. It brings university extension activities to

the people of northern New South Wales and conducts classes in arts and social sciences in towns throughout this region. Short residential courses are held on topics of interest to primary producers in the area.

(e) *Public Library of New South Wales.* The Public Library's adult education section provides an adult education library service for all classes and groups conducted by the Department of Tutorial Classes of the University of Sydney, the Workers' Educational Association, and the Department of Adult Education of the University of New England.

(f) *Arts Council.* The New South Wales Division of the Arts Council of Australia provides a mobile theatre unit and organizes touring companies in ballet, opera and drama to country towns. Musicians provide some short lecture courses in the city.

(g) *Education Department.* The New South Wales Education Department provides evening colleges, housed in its schools and staffed by trained teachers, which provide non-vocational courses in a wide variety of crafts and dramatic and musical activities. Adults may prepare for the Intermediate and Matriculation examinations at certain of these colleges.

(iii) *Victoria.* The Council of Adult Education is a government instrumentality established by the Adult Education Act 1946. Its aims are to stimulate adult education in Victoria and to encourage voluntary organizations and associations by giving them advice and assistance. Its activities include a variety of classes on topics ranging from social studies, psychology, language and literature, to crafts, music, drama, etc., and usually lasting from 10 to 20 weeks. An annual 10-day summer school is another important activity. The Council publishes a bi-monthly bulletin, *C.A.E. Newsletter* and a quarterly journal, *Adult Education*. Its group service assists and provides programme material for the discussion groups formed by organizations and individuals throughout the State. In 1958-59, there were 6,192 enrolments for classes and 2,702 individual enrolments in 244 discussion groups.

A recent development of importance is the extension of the council's activities, including classes and discussion groups, to the prisons, as part of a general plan for penal reform in Victoria.

Through its community arts service, the Council organizes tours, by musicians and by theatrical and other companies, in country towns which otherwise would have no opportunity of seeing such performances. It provides an advisory service to musical societies and co-operates with the National Gallery of Victoria in the organization of travelling art exhibitions.

The council's income is derived mainly from a government grant, but also from student fees and Community Arts Service performances.

(iv) *Queensland.* The Queensland Board of Adult Education was constituted in 1944 and is responsible under the Minister for Education for the provision of adult education facilities throughout the State. Under the executive officer of the Board, the Supervisor, are six district officers, one based in Brisbane and five in large country towns, who are responsible for organizing activities in country areas.

The cost of the programme is borne by the State Government and admission to all courses is free. Activities include lectures, group meetings on a variety of topics, generally short-term but some of which extend over a full year, and film screenings. Library and film services are provided.

In 1959, enrolments for lectures totalled 2,612. Some form of adult education activity was available in more than 200 centres.

(v) *South Australia.* Since 1917, the University of Adelaide, through the Joint Committee for Tutorial Classes, has provided year by year in the metropolitan area a series of tutorial classes, lecture classes and study circles on a wide range of subjects of cultural and current interest, in co-operation with the Workers' Educational Association of South Australia.

In 1957, a Department of Adult Education was established and a full-time Director of Adult Education appointed. A wide range of University extension courses and educational conferences, summer schools and seminars, including a number dealing with subjects at post-graduate level, are organized directly by the University. In 1959, enrolments for tutorial and extension classes totalled 2,584.

The Workers' Educational Association of South Australia, in addition, carries on an independent educational programme of classes, schools, and exhibitions or film festivals.

The State Education Department also arranges an extensive programme of educational activities.

(vi) *Western Australia.* Adult education in Western Australia is organized by the Adult Education Board, established in 1928 under the terms of the statutes of the University of Western Australia. The board has a considerable degree of autonomy. Its executive officer is the Director of Adult Education.

The Board conducts, in the metropolitan areas, classes, refresher courses and short schools, conferences, seminars and public lectures, and maintains a library. Thirty-eight classes were held in 1959 with a total enrolment of 1,268. The Board's country work is mainly operated through a box library scheme for discussion groups, of which there were 76 in 1959. Lecture tours and week-end schools are held, and local adult education is encouraged through semi-autonomous local committees. Metropolitan work and country work are drawn together in an annual summer school.

The Board also operates a community arts service in city and country and arranges screenings of foreign films. Regional drama festivals and music festivals are arranged culminating in the annual Festival of Perth, inaugurated and administered by the Board.

(vii) *Tasmania*. Some form of adult education has existed since the formation in 1913 of a Workers' Educational Association, which worked in conjunction with the University of Tasmania for a number of years, receiving a grant through the university, which had a Director of Tutorial Classes. Later the grant was paid direct to the Association by the Government and the university's tutorial department ceased to exist. In 1948, the Adult Education Act was passed, providing for the formation of an Adult Education Board whose functions are to plan and develop adult education in Tasmania and to assist other bodies actively engaged in adult education.

The executive officer of the board, located at Hobart, is the Director of Adult Education. Activities are organized on a regional basis by organizers based in Hobart, Launceston and three large country centres.

The board organizes classes of ten weeks' duration on a wide range of subjects. In 1959, 314 courses were held with a total enrolment of 3,956. It sponsors special lectures, film screenings and art exhibitions, recitals of music and dramatic performances, in both city and country areas. Its income is derived from a State government grant and from students' fees.

3. **The New Education Fellowship.**—The New Education Fellowship is a world organization of parents, educators, and other citizens interested in the development of new educational practices. It was founded in London in 1915 and spread to Australia at the time of a regional conference held here in 1937. There are now sections in each State. Its Australia-wide journal *New Horizons in Education* is published quarterly.

4. **Australian College of Education.**—An Australian College of Education was formed in 1959. Its aim is to bring together leading members of every field of education for their mutual benefit and the furtherance of education in the Commonwealth.

5. **Migrant Education.**—The Commonwealth government's post-war immigration policy has brought to Australia some thousands of immigrants with little or no knowledge of English. To assist their assimilation into the Australian community, a system of migrant education has been developed to teach them English and to give them information about Australia.

Before arriving in Australia, migrants who do not speak English are given some instruction in English by shipboard education officers.

In Australia, free evening classes are arranged by State Education Departments wherever a group of nine or more migrants in country areas, or twelve or more migrants in city areas, wish to learn English. Should migrants find it impossible to attend classes, they may apply, through State Education Departments, for a free correspondence course in English. In addition, English lessons are broadcast regularly by the Australian Broadcasting Commission. The Commonwealth Office of Education provides technical advice on all aspects of migrant education and is responsible for the preparation of teaching materials.

In October, 1960, 16,623 migrants were enrolled in evening classes and 10,273 were taking correspondence lessons. At the same time, 14,669 were receiving the monthly booklet accompanying the radio lessons.

§ 12. The Commonwealth Literary Fund.

In 1908, the Commonwealth Government, under Alfred Deakin, first established the Commonwealth Literary Fund. The Fund was entirely a compassionate one devoted to literary pensions for aged or infirm authors, for the families of literary men who died in poverty and for writers who were unable for financial reasons to continue their activities.

In 1939, in an endeavour to encourage the development of Australian literature and to foster appreciation of it, the Commonwealth Government greatly enlarged the scope of the Fund. The Fund now awards a limited number of Fellowships each year, assists in the publication of manuscripts of high literary merit, makes annual grants for lectures in Australian literature, and awards pensions to writers who have achieved a nation-wide reputation for their work in the field of creative literature.

The Fellowships are awarded each year to writers who have proved their capacity to do creative work in the field of literature, but who are prevented from exercising their abilities because of financial circumstances. The Fellowship gives a writer the opportunity to devote all his time to creative writing for a period of up to one year. Since 1956, the Fellowships have had a maximum value of £1,000 per annum. The Fund does not seek out people on whom to bestow Fellowships, but considers only those who submit applications.

The Fund also assists in the publication of manuscripts which have outstanding literary merit, but which would not be commercially attractive propositions. This assistance takes the form of a guarantee of assistance to the publisher. The Fund does not itself enter the field of the publisher.

Since 1940, annual grants for lectures in Australian literature have been made to universities. In 1956, the Fund decided to initiate a scheme of lectures to the general public and to schools in both city and country areas, with the co-operation of State Adult Education authorities. Annual grants are now made to the State Adult Education authorities for this purpose.

The Fund also assists two literary magazines of long standing and recognized literary value.

The Fund is administered by a Committee consisting of the Prime Minister (Chairman), the Leader of the Country Party and the Leader of the Opposition in the House of Representatives, assisted by an Advisory Board of five persons with special literary qualifications.

§ 13. Libraries.

1. *General.*—The Munn-Pitt report of 1935 greatly stimulated interest in libraries and librarianship throughout Australia. This is seen in the rapid development of libraries, the passing of legislation in all States to increase library services, and in the establishment in 1937 of the Australian Institute of Librarians to improve the standard of librarianship. This body was reconstituted in 1949 as the Library Association of Australia, and its functions now include the promotion and improvement of libraries and library services. The Association conducts annual examinations for which students are prepared by courses of instruction in all States. Formal library schools exist in the Commonwealth National Library, Canberra, and the Public Libraries at Sydney and Melbourne. In 1960, the first library school to be attached to an Australian University was opened. This is in the University of New South Wales.

2. *Commonwealth.*—(i) *National Library of Australia.* This Library grew directly from the Library of the Commonwealth Parliament established in Melbourne in 1901, the Committee of which soon afterwards announced its intention to develop a library patterned on the Library of Congress at Washington, U.S.A., capable of serving purposes beyond those essential to the Parliament itself, appropriate to a national library and on a national scale. This policy was steadily pursued, so that, in addition to its primary function of serving Parliament, it gradually became a central source of information for the government and its departments and other agencies, and assumed increasing reference and bibliographical responsibilities in relation to scholarship and research in Australia and abroad. It was also influenced by the basic elements of the national library concept of the older countries of Europe; namely, that a national library is the proper place to collect the national literature systematically and to make it known and available for use, and that it is a place to which scholars may turn for what is most significant in the literature of other countries. For these growing extra-Parliamentary activities, the Parliamentary Library Committee, in 1923, adopted the title of Commonwealth National Library, by which name it was increasingly known for the next 37 years.

A committee appointed to examine the future control and functions of the Commonwealth National Library recommended, in 1957*, its establishment as the National Library of Australia, separate from the Parliamentary Library, with wide functions and controlled by a board subject to a Minister; the transfer, as a separate agency to an appropriate department, of its Archives Division, which constituted the Commonwealth's agency for the custody and organization of departmental records of permanent value which need no

* National Library Inquiry Committee. Report . . . with appendices. (Canberra, Commonwealth Government Printer, 1957.)

longer be held within departmental offices; and that the Parliamentary Library be a separate library under separate Parliamentary control. Continuing co-operation, where possible, between the two libraries was also proposed.

Effect was given to these recommendations by the National Library Act, No. 69 of 1960, which created the National Library of Australia as a body corporate under the control of a Council of nine members, of whom one is a Senator elected by the Senate, one a member of the House of Representatives elected by that House, and seven appointed by the Governor-General, and with the following functions:—

on behalf of the Commonwealth—

- (a) to maintain and develop a national collection of library material, including a comprehensive collection relating to Australia and the Australian people;
- (b) to make the national collection available to such persons and institutions in such manner and subject to such conditions as the Council determines with a view to its most advantageous use in the national interest;
- (c) to make available such other services in relation to library matters and material, including bibliographical services, as the Council thinks fit, and in particular for the purposes of—
 - (i) the library of the Parliament;
 - (ii) the Departments and authorities of the Commonwealth; and
 - (iii) the Territories of the Commonwealth; and
- (d) to co-operate in library matters (including the advancement of library science) with authorities or persons, whether in Australia or elsewhere.

The National Library comprehensively collects and preserves Australian books, periodicals, newspapers, government publications, pictures, prints, manuscripts, maps, moving picture films and sound recordings. In this, it has been assisted by the deposit provisions of the Copyright Act 1912–1950, and has also been enriched by the acquisition of such notable collections as the Petherick collection of 16,500 items in 1911, the Cook manuscripts in 1923, the Cumpston collection on Public Health in Australia in 1936, the Mathews Ornithological collection in 1940, the Nan Kivell collection of 16,000 items of Australian and Pacific interest including original paintings, prints, manuscripts and printed material in 1959, and the Ferguson Sociological collection which is still under transfer. A feature of the Library's Australian work is the copying on microfilm, in association with the Public Library of New South Wales, of all important unique material overseas relating to Australia, including over three million pages in the Public Record Office in London.

The Library fulfils its obligation to make Australian publications known, both at home and abroad, through select lists which include *Australian Books* (annual), and *Australian Public Affairs Information Services* (a monthly subject index with an annual cumulation), and by collections of Australian books maintained by it at all posts at which Australia is officially represented abroad. In London and New York, the National Library maintains and staffs Australian Reference Libraries supervised by its own Liaison Officers in those centres.

In the discharge of its wider bibliographical responsibilities, the Library publishes the *Australian National Bibliography* (monthly with an annual cumulation), which lists books, pamphlets, maps, prints, sheet music, government publications, the first issue of each new periodical or newspaper, and moving picture films produced in or relating to Australia. Commonwealth and State official documents, both monographic and serial, are listed in *Australian Government Publications* (annual). The Library has also compiled a union catalogue of serials in the social sciences and humanities in Australian libraries, and in 1961 began publication of the *National Union Catalogue of Current Monographic Accessions*. Preliminary steps have also been taken for a retrospective union catalogue of monographic holdings of Australian libraries.

In 1956, the Australian Bibliographical Centre was established within the National Library to serve as the secretariat of the Australian Advisory Council on Bibliographical Services. The Council, made up of representatives of the National Library, State libraries and library boards, the Commonwealth Scientific and Industrial Research Organization, each of the universities, and the Library Association of Australia, plans the further development and co-ordination of bibliographical services and co-operates with UNESCO and the International Advisory Committee of Bibliography. The Centre organizes bibliographical projects recommended by the Council, and operates as a centre for bibliographical information in Australia and overseas. It has published a *Union List of Newspapers in Australian Libraries*; Part 1: *Newspapers published outside Australia* (1959); and Part 2: *Newspapers published in Australia* (1960).

The Library acts as a central library of documentary and educational films, its film collection containing over 6,000 titles, together with Australian historical films and a great number of film strips. It published *Australian Films: a Catalogue of Scientific, Educational*

and Cultural Films, 1940–58 in 1959 and a first supplement in 1960. A revised edition of the *Catalogue of 16-mm. Films*, which lists all films available for loan, was also published in 1960. Special efforts are being made to discover and preserve samples of early Australian film production.

Through its Extension Division, the Library conducts the Canberra Public Library Service for residents of the Australian Capital Territory, to whom 315,000 books were loaned during 1959–60. It also assists in the provision of similar services in the Northern Territory, the Territory of Papua-New Guinea, and Norfolk Island.

The National Library's collections contain approximately 675,000 volumes, 32,000 pictures, prints, drawings and other graphic materials, one million feet of microfilm, 65,000 maps, and nine million feet of moving picture films. Special features of the book collection are its strong holdings of Australiana, of materials relating to the Pacific area and to East and South-east Asia, the publications of foreign governments and international organizations, and works in the social sciences, particularly in political theory and economics.

(ii) *Patent Office Library.* The Library of the Commonwealth Patent Office, Canberra contains approximately 8,500 books and a wide variety of periodicals and other literature relating to pure and applied science, industrial technology and the industrial property (patent, trade mark, design and copyright) laws and practice of most countries. Patent specifications of inventions are received from the principal countries of the world; present holdings are more than 6,000,000.

(iii) *Commonwealth Scientific and Industrial Research Organization.* The library holdings of the Organization cover the pure and applied sciences. In addition to the Head Office Library in East Melbourne, each of the Divisions and Sections has a specialized collection covering such subjects as food preservation, forest products, chemistry, physics, animal health and fisheries. The collections are particularly strong in the publications of overseas scientific and technical research institutions, with many of which extensive exchange arrangements have been made.

The Head Office library maintains a union catalogue of the holdings of all C.S.I.R.O. libraries, and is responsible for the following publications:—

(a) *Scientific Serials in Australian Libraries.*

(b) *Australian Science Index.* Index of articles published in Australian scientific and technical periodicals.

(c) *C.S.I.R.O. Abstracts*, which includes abstracts of papers published by C.S.I.R.O. officers, C.S.I.R.O. translations, translations available from other Australian organizations and additions to the British Commonwealth Index of Scientific Translations.

The larger libraries in the Organization have photocopying facilities which, while normally for internal use, will provide a service for the public when a publication is not held elsewhere in Australia.

(iv) *The Australian War Memorial Library.* In the War Memorial library are housed the documentary and pictorial records of Australia's fighting services in the 1914–18 and 1939–45 Wars, together with collections covering the war in Korea, 1950–53, and earlier wars in which Australian troops participated—Sudan, 1885, South Africa, 1899–1902 and the Boxer Rebellion in China, 1900–01. Books, periodicals and other records covering contemporary trends and events in the fields of military history and military science are constantly being added.

The printed records section contains approximately 65,000 volumes, a large collection of military maps, newscuttings and newspapers, sound recordings of war leaders, personalities and events, war posters and postage stamps. Many personal collections by distinguished soldiers and historical documents relating to the wars have also been placed in the Memorial's custody for preservation.

Written records comprise correspondence files of headquarters and units of both world wars, and the original war diaries compiled from day to day by each unit during its service.

The collection of official war photographs covering the 1914–18, 1939–45 and Korean Wars numbers over 250,000, and a collection of official motion picture film depicts Australia at war.

Facilities for public research are not yet fully developed, but all requests for information are met where practicable.

(v) *Other Commonwealth Government Libraries.* Most Commonwealth authorities have specialized collections in their own fields, and in addition draw largely on the National Library.

3. States. (Other than University Libraries, *see* para. 4).—(i) *State Public Libraries.* In each of the capital cities there is a well-equipped public library, the libraries in Melbourne and Sydney, especially, comparing very favourably with similar institutions elsewhere in the world. The following statement gives the number of volumes in the public library of each capital city at 30th June, 1959.

STATE PUBLIC LIBRARIES, 30th JUNE, 1959.

City.	Number of Volumes in—			Total.
	Reference Branch.	Ordinary Lending Branch.	Country Lending Branch.	
Canberra(a)	550,000	..	(b)	550,000
Sydney	(c) 570,573	..	(d) 156,813	727,386
Melbourne	659,273	114,399	45,931	819,603
Brisbane	197,095	197,095
Adelaide	189,675	(e) 64,016	77,745	331,436
Perth	181,712	(f) 147,200	..	328,912
Hobart	71,161	(g) 142,440	116,044	329,645
Darwin(h)	34,344	..	34,344

(a) Commonwealth National Library, including Parliamentary Section. (b) Books are lent to libraries or students throughout Australia wherever necessary for research work. (c) Includes 165,049 volumes in the Mitchell Library and 13,978 volumes in the Dixon Library. (d) Includes 1,943 volumes in the Model School Library. (e) Includes 19,462 volumes in the Children's Branch and 6,384 volumes in the Youth Lending Branch. (f) Includes the Country Lending Branch and the Children's Branch. (g) Includes 116,963 volumes in the Children's Branch. (h) Northern Territory Library Service. Includes the Country Lending Branch and the Children's Branch.

(ii) *New South Wales.* The Free Library movement in New South Wales, founded for the establishment of a system of public libraries on the basis suggested in the Munn-Pitt Report of 1935, helped to pave the way for the Library Act 1939, which was fully proclaimed as from 1st January, 1944. Of the 165 councils which have adopted the Library Act, 140 have put their adoption into effect. During 1959–60, they spent on their libraries £1,136,384, including £380,325 received in subsidy. There are 184 libraries, of which 47 are in the metropolitan area and 137 in the country. There are also 17 bookmobiles, of which two are in Sydney, six in the suburbs of Sydney and nine in country municipalities and shires. These libraries contain 2,022,277 volumes.

New South Wales departmental libraries are staffed by officers attached for duty from the State Library, which also provides a central cataloguing service for municipal and shire libraries constituted under the 1939 Act. The State Library maintains an adult education section servicing adult education activities for the universities of Sydney and New England and the Workers' Educational Association.

The Country Circulation Department forwards books on loan to State schools, to municipal and shire libraries and to individual students. During 1959–60, 103,909 books were lent to small State schools, and 2,508 to country libraries, while 40,277 reference works were lent to individual country students and to libraries to satisfy special requests.

The State Library, known as the Public Library of New South Wales, includes a general reference department of 401,639 volumes, together with the Shakespeare Tercentenary Memorial Library, and the Mitchell and Dixon Libraries and Galleries which are mainly devoted to Australian and Pacific material. The Mitchell Library, of more than 60,000 volumes and pamphlets and 300 paintings, was bequeathed to the trustees of the Public Library in 1907 by Mr. D. S. Mitchell, together with an endowment of £70,000. There are now 169,000 volumes in the library, in addition to valuable manuscripts, maps and other material. In 1929, Sir William Dixon gave a collection of historical pictures then valued at £25,000. These were subsequently added to, and at his death in 1952 Sir William bequeathed the whole of his collection of books, manuscripts, pictures and other material, together with an endowment of more than £113,000, mainly for the printing or reprinting of historical documents relating to Australia and the Pacific.

The total number of volumes in the State Library now exceeds 750,000, apart from manuscripts, historical pictures and other material.

The maintenance and control of the ordinary lending branch of the Public Library were transferred in 1908 to the Sydney Municipal Council to become the City of Sydney Public Library.

The State Library which has previously been the repository for State archives will transfer this responsibility to an Archives Authority in 1961.

Other important libraries in New South Wales are the Sydney Public Library, 206,978 volumes; Teachers' Colleges, 180,541; Railways Institute, 162,170; Technical Education Branch, 85,239; Government Transport Institute, 41,810; Australian Museum, 32,625; Cooper Library of the New South Wales Public School Teachers' Federation, 20,409; Workers' Educational Association, 12,500; and the Library at the National Herbarium, 10,090 volumes. At 30th June, 1960, the Parliamentary Library contained 133,485 volumes.

(iii) *Victoria*. Until the establishment of the Free Library Service Board in 1947, the only public library facilities available in Victoria (apart from those of the State Public Library and one or two Metropolitan Municipal Libraries) were those offered by about 200 Mechanics' Institute Libraries situated in country areas all over the State. The Board's policy has been to replace these services with modern public libraries controlled by local Municipal Councils and subsidized by the Board. Since the Board's inception, 89 municipalities have established libraries. Of these 20 are in the city, and 69 in the country. An amount of £264,376 was paid to the Councils in library subsidy for the year 1959–60 and £523,619 was expended in municipal library service for the same year. There are 1,512,500 books available to the communities in which libraries are established and combined circulation figures were over 7,400,000 at 30th September, 1960.

A feature of the services provided in the country is the number of co-operative or regional library groups now being developed. These services, of which there are sixteen comprising a total of 59 Councils, consist of groups of Councils which pool their financial resources, book-stocks and trained staff, in order to provide more comprehensive, efficient library facilities.

Approximately 140 Mechanics' Institute Libraries are still in existence in country areas. In 1959–60, 52 of them shared a grant of £2,000.

(iv) *Queensland*. The Library Board of Queensland was established in 1945 under the provisions of the Libraries Act of 1943. Its duty is to attain the fullest co-operation and improvement of the library facilities of the State, with the object of placing such facilities on a sound basis for the benefit and educational improvement of the citizens generally. The Board consists of six members with the State Librarian as *ex officio* member and secretary. A general function of the Board is to ensure that the fullest co-operation exists with the Department of Education, the University of Queensland, local bodies, and other bodies having for their object the encouragement of education, literature and the arts and sciences. A specific function of the board is the control and management of the Public Library of Queensland. Its policy is to build up the main collection of the Library, being as it is the State's reference centre.

The Country Extension Service, which is administered as a department of the Public Library, lends books of non-fiction free to adults and children residing outside the metropolitan area and to municipal libraries in areas of low population.

The Oxley Memorial Library, established in 1923, has been administered as a department of the Public Library since 1946, and the collection has been kept separate. Its object is to collect books, manuscripts, pamphlets and other graphic material relating to the history and literature of Australia, and of Queensland in particular, and to provide facilities for research students in Queensland literature and history.

In 1958, the section of the Libraries Act dealing with the preservation of public records was proclaimed, and in 1959 an Archives Section of the Public Library was instituted and an archivist was appointed.

Since 1948, a course in librarianship has been held annually at the Public Library for the purpose of preparing trainees for the Preliminary Examination of the Library Association of Australia. In 1959, a course covering the compulsory subjects of the Association's registration examination was inaugurated at the Central Technical College, Brisbane.

The holdings of the Public Library of Queensland and its extension services in 1959–60 were:—Main Reference Collection, 119,792 volumes and 5,863 maps and pamphlets; Country Extension Service, 63,746 volumes; Oxley Memorial Library, 19,738 volumes and 8,522 maps, pamphlets and miscellaneous items. Local authorities are empowered by the Libraries Act to establish and conduct library services as a function of local government. The Board encourages local authorities to use these powers. In 1959–60, 63 local authorities were conducting 86 library services and 10 others indicated that they would do so in the near future. The Brisbane City Council has established 12 of these libraries. There were 62 libraries in Queensland free to adults.

To help overcome the problems of large area and sparse population, various local authorities provide library services on a regional basis. By 30th June, 1960, four regional library services had been established:—the South Western (one town and six shires), the Central Western (seven shires), the North Western (six shires), and the Central Highlands (five shires), with head-quarters at Charleville, Barcaldine, Mt. Isa and Emerald respectively. Other regional services are being planned.

During 1959–60, the Board received a grant of £140,940 from consolidated revenue to finance the activities of the Public Library and to pay subsidies to local bodies of fifty per cent. on the purchase of books and the acquisition or improvement of library buildings and equipment. Subsidies were paid to four regional library service boards, 61 local authorities, 33 schools of arts and seven other bodies.

The library of the Parliament of Queensland was established in 1860. At 30th June, 1960, the library held 87,653 books and pamphlets, consisting of official publications and books devoted largely to history, the social sciences, biography and literature.

The Libraries Act Amendment Act, 1949 provides for the Public Library and the Parliamentary Library each to receive a copy of all books, pamphlets, maps and other printed material published in Queensland.

(v) *South Australia.* In the reference department of the Public Library of South Australia, there are about 195,000 volumes, most of which may be borrowed. Over 3,000 periodicals are filed, and the collection of newspapers includes every newspaper printed in South Australia. There are 39,000 volumes in the lending department available to persons living in the metropolitan area, and the country lending service has 100,000 volumes, of which more than half are suitable for children.

The Research Service specializes in scientific and technical inquiries, and supplements the resources of the Public Library by borrowing from other libraries and by obtaining microfilm copies of material not available locally. It has an extensive collection of trade catalogues.

The library of the Parliament of South Australia held approximately 65,000 volumes at 31st December, 1959.

The Institute's Association in 1959 comprised 218 suburban and country libraries with 750,696 volumes.

(vi) *Western Australia.* In 1955, the Library Board of Western Australia was made responsible for all public library services throughout the State to which the State Government contributes funds.

The Board has the following major functions:—

- (a) To encourage local authorities throughout the State to establish public libraries, and to provide as a State subsidy all books and bibliographical services necessary for such libraries when established;
- (b) to administer the State Library;
- (c) to advise the Government on all matters relating to libraries;
- (d) to provide for the training of librarians.

Local public libraries are subsidized on a £1 for £1 basis, the local authority providing accommodation and staffing and the Board all books and related services. The Board provides at least one volume per head of the population. All non-fiction books may be made available at any public library throughout the State on request to the Board. All cataloguing is done by the Board. The first library under this scheme was opened in August, 1954. By 30th June, 1960, 41 libraries had been established.

Prior to the establishment of the Library Board, the government appointed a Country Free Lending Libraries Committee in 1944 to make small grants to local authorities for library purposes. With the more comprehensive service now available through the Library Board, the activities of this Committee are becoming less important and in time it will cease to function altogether, probably in 1962.

The State Library, established in 1887, is the reference division of the Library Service of Western Australia. In addition to providing the normal facilities of a reference library for the metropolitan area, it extends its service throughout the State through local public libraries. It is divided into four subject departments as follows:—

- J. S. Battye Library of West Australian History;
- Library of Business, Science and Technology;
- Library of Social Sciences, Philosophy and Religion;
- Library of Literature and the Arts.

The State bibliographical centre is housed at the State Library and there is also a commercial information centre. The State archives are maintained by the State Library and managed by the staff of the Battye Library. The State Library is fully equipped with microfilm and photocopy apparatus.

The bookstock of the Board at 30th June, 1960, was approximately:—

Lending library services (including books in public libraries): 174,000 volumes;
State Library, 187,000 bound volumes.

The University of Western Australia, through its Adult Education Board, manages the Adult Education Library of some 15,000 volumes of general reading and fiction. Books are sent to country readers by post.

There are some 100 special libraries in government departments and industrial firms.

Union catalogues of periodicals and books received in the libraries of all types in the State are maintained by the Library Board of Western Australia in the bibliographical centre of the State Library.

(vii) *Tasmania*. The Tasmanian Library Board, constituted in 1944, is responsible for administering the State library head-quarters in Hobart, for the extension of library services throughout the State and for the control of State aid for libraries. State aid to municipalities is provided in the form of books of a value equal to the amount of library rates collected. The total cost of library services to the State during 1959–60 amounted to £119,892.

The Tasmanian Library Board provides lending and reference services for the people of Hobart, and operates a reference service for people throughout the State. In addition, it conducts screenings of documentary films, recitals of recorded music, lectures, library weeks in country centres, puppetry demonstrations, etc.

The Parliamentary Library works in close collaboration with the State Library, which provides a reference officer to serve members during session. It catalogues all new books added to the library and supplies recreational reading.

4. *University Libraries*.—The libraries of the Australian universities provide material not only for the education of graduates and undergraduates, but also for research workers and practical investigators all over the continent. Much of the material they contain is not available elsewhere, for although in most cases smaller, they are in many directions more highly specialized than the public libraries. They lend to one another and to State and private institutions as well as to individual investigators. Each of them is governed by a librarian, who is responsible as a rule to an executive sub-committee and a committee which is practically co-extensive with the professional staff. In size, the library of the University of Sydney is the third library in Australia, and the libraries of the Universities of Melbourne and Adelaide are respectively eighth and ninth. The following table shows the sizes, accessions during the year, and expenditure of the Australian university libraries; borrowing statistics are not shown, as they differ too widely to be comparable without considerable explanation.

UNIVERSITY LIBRARIES, 1959.

University or College.	Volumes.	Accessions during year.	Expenditure.
			£
Australian National University	146,875	8,215	58,361
Canberra University College(a)	62,370	10,310	44,926
Sydney(a)	567,401	99,145	152,910
New South Wales	110,123	15,775	96,344
New England(a)	88,944	14,999	48,368
Melbourne(a)	270,003	12,913	110,257
Queensland	197,175	19,094	87,659
Adelaide	244,266	11,397	82,721
Western Australia	171,839	12,806	54,699
Tasmania(a)	117,000	8,039	45,955
Total	1,975,996	212,693	782,200

(a) Includes pamphlets.

The library of the Australian National University consists of two main collections; the former Australian National University Library, founded in 1948, serves primarily the Institute of Advanced Studies, and the former Canberra University College library, founded in 1938, serves primarily the School of General Studies. At the end of 1960, the stock comprised about 235,000 volumes including some 45,000 volumes in oriental languages. The collection serving the Institute of Advanced Studies specializes in the fields of the physical and medical sciences, excluding clinical works, and in the social sciences it aims to provide a good working collection while giving consideration to the holdings of the Commonwealth National Library. It possesses significant collections in anthropology, linguistics, mathematics and mathematical statistics. The collection serving the School of General Studies has been built up to meet the needs primarily of undergraduates in the Faculties of Arts, Commerce, Law and Science, and will develop strength as a research collection in the humanities.

The library of the University of Sydney consists of the central collection which is known as the Fisher Library, the Law Library, the Medical Branch Library, the Burkhitt Library for preclinical medicine, and some fifty-two departmental libraries. The University Library, together with departmental libraries, held 567,401 volumes in December, 1959. Other libraries in the University grounds contain a further 250,000.

The first books were acquired in 1851, and shortly afterwards the library of Sydney College was added. The notable collection of Nicholas D. Stenhouse was acquired in 1878 as the gift of Thomas Walker. In 1885, Thomas Fisher bequeathed the sum of £30,000, the income from which is used as a book fund. Perhaps the finest collection in extent and importance which has been given to the University is that of Sir Charles Nicholson. There have been numerous other benefactions, among which may be mentioned the library of Sir Francis Anderson, the W. H. Deane collection of books and manuscripts and the Dalley-Scarlett music library.

The Libraries of the University of New South Wales consist of the Central Library on the Kensington campus, a Medical Library at present at Prince Henry Hospital, and the Newcastle University College Library. The Broadway campus is serviced by the Sydney Technical College Library, where 29,000 books from the University's Library are placed. Service to University Divisions at other centres is also provided by the Technical Education Department. In December, 1960, the university had 151,970 volumes in its Libraries or located in Technical Education Department Libraries.

The University of New England library was founded in 1938 and bears the name of its first benefactor, Sir William Dixon. At the end of 1960, it contained 85,000 volumes on the open shelves and subscribed to 1,550 current periodicals. The library is at present housed in temporary quarters with seating for 100 readers. The bindery and compactus shelving for newspapers and local records are housed in the two basement areas. Microfilm and microcard readers are available. The permanent library building, which will hold 278,000 volumes and 190 readers, as well as the bindery and photographic departments, is expected to be ready for occupation during 1961.

Early in 1854, the University of Melbourne made its first allocation for books, but the library was housed in temporary quarters until 1959. The W. L. Baillieu Trust made available the first instalments of a £100,000 gift for building purposes, which have been followed by subsequent gifts and substantial grants from the Commonwealth and State governments, and a new building costing £700,000 was occupied at the beginning of 1959, the first in the University to be designed specifically for library purposes. It provides space for 1,200 readers and 300,000 books. During the academic year, admissions of readers to the building average nearly 8,000 a day. Most of the books are accessible on open shelves, and though the library is intended primarily for reference purposes, borrowing, except of textbooks and certain valuable volumes, is made as easy as possible. The resources of the library are also extensively used on inter-library loan by industries and other organizations throughout Australia. The University library, including 13 branch libraries in various departments, is administered from the centrally situated Baillieu Library, and at the end of 1960 it contained approximately 291,000 books and pamphlets. The large medical branch library is specially rich in periodicals.

The library of the University of Queensland was founded in 1911. The main library is in its own building in the University at St. Lucia, and there are a considerable number of departmental libraries. All books are in open access and most are available for borrowing. At 1st November, 1960, the library contained more than 218,000 volumes. The main library includes a special collection of material relating to the history, development and culture of the countries surrounding the Pacific Ocean.

The Adelaide University library bears the title of its original benefactor, Robert Barr Smith, who, with members of his family in and after 1892, gave the university over £50,000 for the library. Although readers have access to all parts of the library, the book collection

is in two divisions, a collection of some 25,000 of the most frequently used books being kept in the main reading room and the remainder, consisting of older or more specialized books, being shelved on the four levels of the extensions. Bound periodicals are shelved in steel stacks under the main reading room. Borrowing facilities are available to all matriculated students, to country students and to graduates. There are branch libraries for medicine, law and music. The British Medical Association (S.A. Branch) and the Australian Physiotherapy Association (S.A. Branch) make annual contributions towards the maintenance of the medical library in return for borrowing privileges for their members. The Waite Agricultural Research Institute has a separately administered library of publications in agriculture.

In the University of Western Australia, the first permanent library staff was not appointed until 1927. Provision for a permanent library was not possible when the university moved to its present site, and space and facilities have consequently been inadequate. In 1960, a temporary annexe capable of holding some 200 readers and 30,000 volumes was provided. The first stage of the new library building is included in the buildings approved by the Australian Universities Commission for completion in the 1961–63 triennium. The University Library developed very slowly in the early years, but recently has been adding about 12,000 volumes a year to its stock and making good earlier deficiencies. In addition to the Central Library, there are a number of departmental libraries of which the more important are engineering, agriculture, pre-clinical and law. There is also a medical library, in accommodation provided by the Royal Perth Hospital, for use of the medical school.

Although the library of the University of Tasmania was founded in 1893, a full-time librarian was appointed for the first time at the end of 1945. Since 1954, a Hobart Union List of Serials has been housed in and kept up to date by the university library, thus providing a major reference tool for all bibliographic inquiries in the State. At the end of 1960, the library contained approximately 124,000 volumes and received 2,200 periodicals currently.

The Canberra University College library was established in 1938. In 1959, it contained 60,000 volumes, which are on open shelves.

5. **Children's Libraries and School Libraries.**—(i) *New South Wales.* Children's libraries are being developed as departments of municipal and shire libraries. The Education Department maintains a school library service for the fostering of State school libraries, which are maintained partly by parents' and citizens' associations and partly by departmental subsidy. Secondary and central schools have trained teacher librarians.

(ii) *Victoria.* Under the auspices of the Free Library Service Board, 89 municipal children's libraries have been, or are being, established as part of the library services provided by the councils concerned. All these libraries provide comprehensive modern children's book collections which are constantly being augmented. An annual grant of £5,000, which is additional to the ordinary annual municipal library grant, is provided to assist these libraries. In addition, seven independently controlled children's libraries shared in this grant in 1959.

The Education Department is making provision for the building of library rooms in new schools. Where accommodation is available in existing schools, library furniture is provided free of cost to the schools and the government subsidises the purchase of books. In June, 1959, 330 schools had central libraries.

A scheme of circulating libraries for small schools, particularly in remote areas, has been operating for some years. Three hundred and twenty schools benefited from this scheme in 1959.

The Department has a Library Service Officer with a small staff to advise and assist schools in the establishment and organization of libraries. A one-year course for the training of teacher-librarians was established at Melbourne Teachers' College in 1955. Approximately 20 teachers are trained each year.

(iii) *Queensland.* The Library Board of Queensland stresses to local bodies the importance of providing adequate library services for children. There are in Queensland 81 libraries free to children, of which 11 are conducted by the Brisbane City Council. The children's libraries at Rockhampton, Toowoomba, and Townsville are particularly active. Country children who are not catered for locally may borrow from the country extension service which possesses a separate children's collection. The purchase of books in State school libraries in Queensland is financed by school committees and parents' associations, with a subsidy from the Department of Education on a £1 for £1 basis. Trainees at the Teachers Training College are instructed in school library organization and management.

(iv) *South Australia.* A children's library of 25,000 volumes is used by school classes and individual children living in the metropolitan area. Except for works of reference, all books are available for loan. In August, 1957, a youth lending service was opened for young people from 13 to 18 years of age. It has a stock of 8,700 volumes.

(v) *Western Australia.* The State Education Department makes library subsidies and grants to government schools.

All high schools are provided with a library room and furniture, and trained teacher-librarians are appointed to them. Building plans do not provide for primary school libraries, but a number of the schools have set up central libraries when rooms have become available.

One-teacher and two-teacher schools are served by the Charles Hadley travelling library and the small schools fixed library services. Under the fixed library scheme, permanent libraries of reference books and encyclopaedias were placed in each such school. Books to the value of £15 were added to each of these libraries annually from 1948 to 1954. Since then, the grant for these books is made at three year intervals. The Hadley library provides recreational reading and operates 340 boxes which are exchanged every three months. The government grants £500 per annum for this service, and the participating schools contribute the commission received from the Commonwealth Savings Bank—about £140.

Children in isolated areas who are unable to attend school are catered for by books sent out by the State Correspondence School's Library. The children are kept in touch with the library by means of radio talks and leaflets issued periodically.

(vi) *Tasmania.* The Lady Clark Memorial Children's Libraries, at the State Library, Hobart, aim to serve all children in Tasmania with books. At 30th June, 1960, 208 children's libraries and depots had been established.

Practically all State secondary schools in Tasmania have libraries, with full-time librarians in four of them. A schools' library service gives a book service to schools and assists schools wishing to set up their own libraries. In 1959, the number of schools receiving service was 108 and the number of books issued was 12,437.

6. *Special Libraries.*—Before the 1939–45 War, the number of special libraries, apart from those maintained by government departments, was small, but during recent years many manufacturing, commercial, research and other firms, as well as statutory bodies, have found it necessary to establish special libraries to serve their staff. These libraries, which are most numerous in Sydney and Melbourne, are being administered increasingly by trained librarians.

7. *Microfilms.*—The following libraries supply microfilm or photostat copies of material usually at a small charge (the letter "P" signifies photostat supplied and "M" microfilm supplied):—*Australian Capital Territory*—Australian War Memorial (P), National Library of Australia (PM), C.S.I.R.O. (M), Australian National University (M), Patent Office (P); *New South Wales*—Metropolitan Water, Sewerage and Drainage Board (P), Public Library of New South Wales (M), Standards Association of Australia (P), School of Public Health and Tropical Medicine (M), Fisher Library, University of Sydney (PM); *Victoria*—Commonwealth Serum Laboratories (P), Technical Information Section, Munitions Supply Laboratories (PM), Public Library of Victoria (M), Standards Association of Australia (Melbourne Branch) (P), University of Melbourne (PM), C.S.I.R.O. (M); *Queensland*—Public Library (P); *South Australia*—Public Library of South Australia (PM), University of Adelaide (PM), Waite Agricultural Research Institute (P); *Western Australia*—State Library (PM); *Tasmania*—University of Tasmania (PM).

§ 14. Public Museums.

(i) *New South Wales.* The Australian Museum in Sydney, founded in 1836, is the oldest in Australia. In addition to possessing fine collections of Australian fauna, the museum contains valuable anthropological and mineral collections. The number of visitors to the institution during 1958–59 was 323,600 and the average attendance 806 on week-days and 1,374 on Sundays. The expenditure for 1958–59 amounted to £119,734. A valuable library containing 33,000 volumes is attached to the museum. Courses of evening popular lectures are delivered and lecturers also visit distant suburbs and country districts, and afternoon lectures for school children are provided; 10,650 children attended during 1958–59. Representative collections illustrative of the natural wealth of the country are to be found in the Agricultural and Forestry Museum and the Mining and Geological Museum. The latter institution prepares collections of specimens to be used as teaching aids to country schools. The

"Nicholson" Museum of Antiquities, the "Macleay" Museum of Natural History and the Museum of Normal and Morbid Anatomy attached to the University of Sydney, and the National Herbarium and Botanical Museum at the Sydney Botanic Gardens, are all accessible to the public.

There is a Museum of Applied Arts and Sciences in Sydney with branches in three country centres. Valuable research work is being performed by the scientific staff in connexion with oil and other products of the eucalyptus and the gums, kinos, tanning materials, and other economic products of native vegetation generally. Expenditure during the year 1958-59 was £58,771.

(ii) *Victoria*. The National Museum at Melbourne, devoted to natural history, geology and ethnology, is in the eastern section of the public library building. The Museum of Applied Science, also housed under the same roof, contained at 30th June, 1959, 24,000 exhibits which covered applied and economic aspects of all branches of science. There is a fine Museum of Botany and Plant Products in the Melbourne botanic gardens. In addition to the large collection in the geological museum attached to the Mines Department in Melbourne, well-equipped museums of mining and geological specimens are established in connexion with the School of Mines in the chief mining districts.

(iii) *Queensland*. The Queensland Museum, founded in 1855, is the State museum of natural science. It is a Government sub-department and is maintained by the State. The collections comprise extensive exhibited and reference series, mainly in the fields of zoology, geology, and ethnology, and some mechanical and historical material is held with a view to future museum development. Lessons supported by film displays are arranged for the public, and an annual refresher course in natural science is conducted for teachers. The museum is now the recognized State depository for valuable material in natural science, and the collections in general are constantly being increased. In addition, the Museum contains the outstanding library of the State in the fields of zoology, geology and anthropology.

(iv) *South Australia*. The South Australian Museum has considerable collections of most branches of natural history. In 1959-60, there were at least 200,000 visitors and expenditure was £63,750.

(v) *Western Australia*. The Western Australian Museum was established in 1895. It is under the statutory management of a board of five members, appointed by the State Government, but operates under its own director and staff. It is primarily a museum of natural history, with principal research interests in the fauna of Western Australia and the ethnology of the Western Australian aboriginal, and has extensive geological collections and also historical and technological exhibits.

The Education Department of Western Australia has three teachers attached to the museum. One gives instruction to visiting classes from schools in the metropolitan area, and 2,735 children attended these classes during 1959. The others act in an advisory capacity to teachers in country schools.

(vi) *Tasmania*. There are two museums in Tasmania—the Tasmanian Museum at Hobart, and the Queen Victoria Museum and Art Gallery at Launceston—both of which contain valuable collections of botanical, mineral and miscellaneous products. The museum received aid from the Government during 1959-60 to the extent of £29,000.

§ 15. Public Art Galleries.

(i) *New South Wales*. The Art Gallery of New South Wales originated in the Academy of Art founded in 1871. At the end of 1959, its contents comprised 1,452 oil paintings, 948 water colours, 2,509 prints and drawings, 144 sculptures and casts, and 1,284 ceramics, works in metal and miscellaneous. Since 1895, loan collections of pictures have been exhibited regularly in important country towns. The expenditure for 1959-60 was £52,427.

(ii) *Victoria*. The National Gallery at Melbourne at 30th June, 1959, contained 1,241 oil paintings, 7,792 objects of statuary, bronzes, ceramics, etc., and 8,218 water colour drawings, engravings and photographs. The gallery is situated in the same building as the museum and public library. Expenditure by the National Gallery in 1958-59 was £90,755, including £23,253 for purchases of works of art. Several bequests were made to the institution by private citizens. There are provincial art galleries at Ballarat, Bendigo, Castlemaine, Geelong, Mildura, Shepparton, St. Arnaud and Warrnambool, to which, periodically, pictures are sent on loan from the National Gallery.

(iii) *Queensland.* The Queensland Art Gallery, maintained by the State Government, was established in 1895.

During 1959, the Government passed a new Queensland Art Gallery Act re-organizing the gallery, appointing a new Board of Trustees and granting a site for the building of a new art gallery.

The collection has been enriched by numerous bequests. In 1959, an anonymous gift of £126,000 was devoted to the purchase of an important collection of modern French paintings. The collection comprises 474 oils, 636 watercolours and drawings, 67 sculptures and 178 art objects.

(iv) *South Australia.* The National Gallery at Adelaide originated in an exhibition of pictures in the public library building in 1881. Many bequests made by private citizens have materially assisted its growth. At 30th June, 1960, there were in the gallery 1,875 paintings in oil, water colours and pastels, 133 items of statuary and large collections of drawings, prints, furniture, ceramics and coins. The expenditure during 1959-60 was £37,112.

(v) *Western Australia.* The Western Australian Art Gallery was established in 1895. Although under the statutory management of a board of five members, appointed by the State Government, it functions under its own director and staff. At 30th June, 1960, the collection included 362 oil paintings, 202 water colours, 10 pastels, 792 drawings, 552 prints, 1,021 reproductions, 9 miniatures and 24 pieces of sculpture. International and interstate exhibitions are frequently held, and travelling exhibitions are sent to country centres.

(vi) *Tasmania.* In Tasmania, the Art Gallery at Hobart was opened in 1887. In June, 1960, it contained 212 oil paintings, 186 water colours, 127 black and white, three statuary and 146 etchings, engravings, etc. Expenditure in 1959-60 was £25,095.

The Art Gallery at Launceston was opened in 1891. In June, 1959 there were on view 233 oil paintings, 337 water colours, 87 black and white, and 211 miscellaneous exhibits. Expenditure in 1959-60 was £16,019.

§ 16. Scientific Societies.

1. *Royal Societies.*—The following table contains the latest available statistical information regarding the Royal Society in each State, the headquarters of which are in the capital cities.

ROYAL SOCIETIES.

Particulars.	Sydney.	Melbourne.	Brisbane.	Adelaide.	Perth.	Hobart.	Canberra.
Year ended—	Feb. 1960.	Dec. 1960.	Dec. 1960.	Sept. 1960.	Dec. 1959.	Dec. 1960.	Dec. 1959.
Year of charter	1866	1859	1884	1880	1913	1844	1930
Number of members	341	377	269	193	210	560	195
Volumes of transactions issued	94	98	71	83	42	94	..
Number of books in library	41,000	20,000	56,809	20,000	6,000	32,680	..
Societies on exchange list	384	320	288	259	220	316	..
Income	£ 3,686	3,396	864	2,728	a 1,228	1,830	158
Expenditure	£ 3,797	3,987	620	2,692	a 1,172	1,800	115

(a) 30th June, 1960.

2. *Australian Academy of Science.*—The Australian Academy of Science was founded in 1954 to promote scientific knowledge, to maintain standards of scientific endeavour and achievement in the natural sciences in Australia, and to represent Australian science at national and international level. These objectives it shares with the Royal Society of London and with the national academies of science of most other countries.

Prior to 1954, Australian science had been represented in international activities by the Australian National Research Council.

During the Royal Visit, Her Majesty Queen Elizabeth II was graciously pleased to present her Charter to the provisional Council of the Academy at a simple ceremony at Government House, Canberra, on 16th February, 1954, thus following the precedent of King Charles II who presented his Charter to the Royal Society of London in 1662.

Six Fellows, distinguished for their achievements in the natural sciences, are elected annually. The total Fellowship in 1960 was 91.

The affairs of the Academy are managed by an elected Council consisting of the President, the Treasurer, two Secretaries (one representing the Physical and the other the Biological Sciences) and eight other members. The Assistant Secretary (who must not be a Fellow) is the Academy's salaried administrative officer.

The headquarters of the Academy is situated in Canberra. This building houses the offices of the Academy and provides a conference centre of international standard for scientific and other meetings.

3. **The Australian and New Zealand Association for the Advancement of Science.**—This association was founded in 1887. Its headquarters are at Science House, Gloucester Street, Sydney, and congresses are held at intervals of approximately eighteen months in the various States and in the Dominion of New Zealand. The latest congress was held in Brisbane in May, 1961.

4. **Other Scientific Bodies.**—A number of scientific bodies have been set up by the Commonwealth Government. These are the Commonwealth Scientific and Industrial Research Organization, the Commonwealth Observatory (which has now been incorporated in the Australian National University), the Ionospheric Prediction Service, and the Atomic Energy Commission. Particulars concerning these bodies may be found in Chapter XXX.—Miscellaneous.

The Linnean Society of New South Wales, with headquarters in Sydney, was founded in 1874. Sir William Macleay, who died in 1891, during his lifetime and by his will endowed the Society to the amount of £67,000, which has been increased by investment to approximately £100,000. The Society offers annually to graduates of the University of Sydney who are members of the Society and resident in New South Wales, research fellowships (Linnean Macleay Fellowships) in various branches of natural history. One fellowship was awarded for 1961. The library comprises some 19,000 volumes. Eighty-five volumes of Proceedings have been issued, and the Society exchanges with about 300 kindred institutions and universities throughout the world. The membership at the end of 1960 was 270.

The British Astronomical Society has a branch in Sydney, and in each of the States there is a branch of the British Medical Association.

In addition to the societies enumerated above, there are various others in each State devoted to branches of scientific investigation.

§ 17. State Government Expenditure on Education, Science and Art.

The expenditure by each State Government on education, science and art during the year 1958–59 is shown in the following table. Owing to the details not being available in all States, the figures exclude officers' pensions and superannuation, pay-roll tax, and interest and sinking fund on capital expended on buildings. The cost of the medical and dental inspection of school children is also excluded, as this service is more appropriately classified under public health.

STATE EXPENDITURE ON EDUCATION, SCIENCE AND ART, 1958-59.
(£'000.)

State.	Expenditure from—				Receipts.	Net Expenditure.
	Revenue.	Loan.	Other Funds.	Total.		
New South Wales	46,032	11,543	..	57,575	1,030	56,545
Victoria	31,900	9,112	..	41,012	389	40,623
Queensland	14,270	3,167	829	18,266	598	17,668
South Australia	11,672	3,498	..	15,170	1,060	14,110
Western Australia	9,415	1,782	35	11,232	185	11,047
Tasmania	4,758	1,998	29	6,785	652	6,133
Total	118,047	31,100	893	150,040	3,914	146,126

CHAPTER XVI.

PUBLIC JUSTICE.

NOTE.—In interpreting statistics of public justice, it should be realized that a number of factors affect comparability from State to State and from year to year, e.g.:

- (a) Differences in the jurisdiction of courts;
- (b) Changes in the law in particular States and differences in the laws between States;
- (c) The methods of compilation of the figures (e.g. *see* footnotes to the tables dealing with convictions);
- (d) The attitude to laws such as those connected with liquor, vagrancy, gaming, and traffic offences;
- (e) The strength and distribution of the police force;
- (f) The proportion of various types of crimes reported and solved.

§ 1. The Australian Legal System.

1. **General.**—Australia, being a federation, has two systems of courts—State and federal. The only federal courts are the High Court of Australia, the Federal Court of Bankruptcy and the Commonwealth Industrial Court. Otherwise, federal jurisdiction is vested in the State courts.

Thus, while the High Court has extensive original jurisdiction, most civil cases involving federal jurisdiction are heard in the State courts. Almost all criminal matters involving federal jurisdiction are tried in State courts. In the tables in this chapter which give statistics of proceedings in State courts, no distinction has been drawn between State cases proper and cases where State courts are exercising federal jurisdiction.

2. **State Courts.**—(i) *Civil jurisdiction.* Lower courts (which term includes, for the purposes of this chapter, Magistrates' Courts, Courts of Petty Sessions, and Small Debts Courts) are presided over by a stipendiary or police magistrate. In some limited instances, justices of the peace may exercise the jurisdiction of the court. The powers of the magistrates in the various States and Territories are set out in § 2 below. In most cases, unless the amount involved is very small, appeal may be made to a higher court against a magistrate's decision. In any case, the Supreme Court has a supervisory power, by means of prerogative writs, to examine whether a lower court has properly exercised its jurisdiction.

In the higher courts (which term includes, for the purposes of this chapter, District Courts, County Courts, and the Supreme Courts), actions are usually tried by a single judge, sitting with or without a jury, from whose judgment appeal lies to the bench of the Supreme Court. In certain cases, the appeal can be carried to the High Court of Australia. Appeals to the Privy Council are discussed below.

(ii) *Criminal jurisdiction.* Criminal courts are of two kinds, namely, courts of summary jurisdiction, usually called Courts of Petty Sessions, which may deal summarily with minor offences, and higher courts, known as Courts of Sessions, Quarter Sessions or General Sessions, and the Supreme Court, which hear indictable offences. A court of summary jurisdiction consists of a stipendiary or police magistrate, or two or more justices of the peace; a higher court consists of a judge or chairman, sitting with a jury. The jury finds as to the facts of the case and the judge determines the applicable law.

In the case of other than minor offences, a preliminary hearing is held before a stipendiary magistrate or justice of the peace for the purpose of determining whether a *prima facie* case has been made out. If the magistrate or justice of the peace finds that there is a case to answer, the person charged is committed for trial at a higher court. A magistrate or justice of the peace has power to release on bail.

There is an appeal to a higher court from the decision of a court of summary jurisdiction hearing a minor offence, and an appeal from a higher court to the full bench of the Supreme Court, or Court of Criminal Appeal. A further appeal may, with leave, be brought to the High Court of Australia.

3. Federal Courts.—The judicial power of the Commonwealth is vested in the High Court of Australia (the Federal Supreme Court), in the Federal courts created by Parliament (the Federal Court of Bankruptcy and the Commonwealth Industrial Court), and in the State courts invested by Parliament with Federal jurisdiction, both civil and criminal. Further particulars regarding the judicial power of the Commonwealth will be found in Chapter III. (§§ 71–73) of the Commonwealth Constitution (*see* p. 16 of this Year Book).

Particulars concerning the Federal Court of Bankruptcy and the High Court of Australia will be found in §§ 4c and 5, respectively, of this chapter. Information regarding the Commonwealth Industrial Court, which was established under the Conciliation and Arbitration Act 1904–1960, will be found in Chapter XII.—Labour, Wages and Prices (p. 423).

4. Appeal to the Privy Council.—There is an appeal, by special leave of the Privy Council, from the High Court to the Privy Council. In certain important types of constitutional disputes, involving questions of the powers of the Commonwealth *vis-à-vis* the States, a certificate of the High Court in effect granting leave to appeal is necessary. There is also an appeal from the State Supreme Courts direct to the Privy Council.

§ 2. Lower (Magistrates') Courts.

A. POWERS OF THE MAGISTRATES.

1. New South Wales.—There is no general limit to the powers of the magistrates with regard to offences punishable summarily, their authority depending in each case on the statute which creates the offence and gives them jurisdiction. Except in the case of a very few statutes, and excluding cumulative sentences, the power of sentence is limited to twelve months. Imprisonment in default of fine is regulated by a scale limiting the maximum period according to the sum ordered to be paid, but in no case exceeding twelve months. Actions for debt and damage within certain limits also come within magisterial jurisdiction. In cases of liquidated debts, and damages whether liquidated or unliquidated, the amount is limited to £50 before a court constituted by a stipendiary magistrate. Magistrates have power to entertain claims of up to £250 under the Money Lenders and Infants Loans Act, 1941, as amended. The amount in actions of debt before two or more justices of the peace is limited to £30 and in actions of damage it is limited to £10, but may extend to £30 with the consent of the defendant. Outside the Metropolitan Area of Sydney and certain other prescribed districts, one justice of the peace may hear cases of debt, liquidated or unliquidated, or damage up to £5 or to £30 by consent of parties.

2. Victoria.—The civil jurisdiction of magistrates is restricted to what may be designated ordinary debts, damages for assault, restitution of goods, etc., where the amount in dispute does not exceed £100, and to actions arising out of torts or contracts to the extent of £250. No definite limit is fixed to the powers of the magistrates on the criminal side, and for some offences, sentences of up to two years' imprisonment may be imposed. The proportion of long sentences is, however, comparatively small.

3. Queensland.—Generally speaking, the maximum term of imprisonment which justices can impose is six months, but in certain exceptional cases, such as offences against sections 233, 344 and 445 of the Criminal Code (betting houses, aggravated assaults, and unlawfully using animals), sentences of twelve months may be imposed.

There is provision for applying cumulative sentences, but in practice not more than one sentence is generally made cumulative on a previous sentence.

4. **South Australia.**—The power of special magistrates to impose fines and imprisonment is defined by the special Act creating the offence and conferring jurisdiction. In the case of minor indictable offences which are tried summarily, a maximum penalty of £100 fine or two years' imprisonment is fixed by the Justices Act 1921–1960. Magistrates also have power to hear certain civil actions in which the amount claimed is less than £1,250.

5. **Western Australia.**—The powers of magistrates and justices with regard to offences which are tried summarily are governed by the Act creating the offence and giving them jurisdiction. Imprisonment in default of payment of a fine is regulated by a scale limiting the period according to the amount of the fine but not to exceed six months.

The civil jurisdiction of Local Courts is restricted in general to £500. By consent of the parties, any action that might be brought in the Supreme Court may be dealt with in a Local Court. Justices may act in the case of illness or absence of the magistrate.

Magistrates are coroners and justices may be appointed as acting coroners.

Magistrates have appellate jurisdiction under some statutes and in country districts act as Chairmen of the Courts of Session. They may be appointed as Commissioners of the Supreme Court. On the goldfields, the magistrate is also the warden.

6. **Tasmania.**—Magistrates are empowered to hear and determine in Courts of Petty Sessions all offences when an enactment expressly or by implication provides that the matter is to be determined summarily, or by or before justices, or that any offence is to be punishable upon summary conviction. In addition, stealing and analogous crimes may be heard and determined summarily on the election of the person charged, when the amount involved does not exceed £100.

No general limit is fixed in respect of sentences, the statute creating the offence almost invariably laying down the penalty. Where this is not the case, the Contravention of Statutes Act 1889 provides that a fine of £50 may be imposed. Sentences of imprisonment which justices may impose vary with the nature of the offence, with a maximum of two years. The aggregate of terms of cumulative sentences may not exceed two years.

The civil jurisdiction of magistrates is divided into two categories. A Commissioner of the Court of Requests, provided he is a legal practitioner, may hear actions for the recovery of debts and damages not exceeding £250. As Commissioners are invariably police magistrates, this jurisdiction is State-wide. Courts of General Sessions, constituted by at least two justices, exercise similar powers, but the jurisdiction cannot exceed £50. Only one court, that at Currie, King Island, has the maximum jurisdiction, the others being limited to £30.

7. **Northern Territory.**—Magistrates constituting courts of summary jurisdiction try offences punishable summarily. The punishment that may be imposed depends on the law creating the offence. Where there is no magistrate available the offence may be tried by two or more justices of the peace or, if all parties consent, by one justice. Proceedings for committal on indictable offences may be heard by either a magistrate or a justice of the peace. Certain minor indictable offences may be tried summarily by a magistrate or two justices of the peace, who may impose a fine up to £100 or two years' imprisonment.

A stipendiary magistrate constituting a local court has a civil jurisdiction to hear and determine claims for not more than £1,000. A local court constituted by two justices of the peace has a civil jurisdiction to hear claims up to £50.

8. **Australian Capital Territory.**—Magistrates have jurisdiction to try an offence which is punishable summarily and also where a person is made liable to a penalty or punishment and no other provision is made for trial. The punishment depends upon the statute which creates the offence. Certain indictable offences of a less serious nature may be tried summarily by a magistrate, who may impose a fine of £50 or imprisonment for one year. Magistrates also hear proceedings for committal on indictable offences. The stipendiary magistrate is also the coroner. In civil proceedings, magistrates try actions for amounts up to £200. Justices of the peace have no judicial functions.

B. CRIMINAL PROCEEDINGS.

1. **Cases Tried.**—The total numbers of cases tried at magistrates' courts in each State for the years 1955 to 1959 are shown in the following table:—

CASES TRIED AT MAGISTRATES' COURTS.

State or Territory.	1955.	1956.	1957.	1958.	1959.
New South Wales(a) ..	254,487	271,172	307,824	323,097	331,195
Victoria	149,296	175,899	224,015	270,017	287,622
Queensland(b) ..	49,372	47,072	53,611	(a) 62,468	(a) 65,773
South Australia(b) ..	32,593	31,799	34,399	36,305	38,003
Western Australia(a) ..	67,739	62,753	59,205	49,945	50,696
Tasmania	19,672	(a) 19,274	(a) 19,120	(a) 20,009	(a) 21,355
Northern Territory ..	(b) 2,105	(b) 2,779	(b) 2,615	3,103	3,617
Australian Capital Territory	1,480	1,564	1,875	2,197	2,539
Australia	576,744	612,312	702,664	767,141	800,800

(a) In addition, the following numbers of minor traffic offences were settled by payment of fines without court appearance:—New South Wales: 1955—61,179; 1956—163,921; 1957—237,811; 1958—315,058; 1959—321,157. Queensland: 1958—18,803; 1959—22,701. Western Australia: 1955—9,811; 1956—32,130; 1957—31,405; 1958—36,999; 1959—44,973. Tasmania: 1956—7,706; 1957—9,960; 1958—15,022; 1959—18,554. (b) Twelve months ended 30th June of year shown.

2. **Convictions at Magistrates' Courts.**—Of the persons who appeared before Magistrates' Courts in 1959, the following table shows the number who were convicted in each State.

CONVICTIONS AT MAGISTRATES' COURTS, 1959.

Class of Offence.	N.S.W.	Vic.	Qld. (a)(b)	S.A. (a)	W.A.	Tas.	N.T.	A.C.T.	Aust.
Against the Person ..	3,485	1,487	434	349	394	312	91	77	6,629
Against Property ..	26,884	10,737	3,983	2,203	5,025	1,294	178	239	50,543
Forgery and Offences against the Currency ..	400	36	5	2	4	28	28	68	571
Against Good Order ..	100,656	38,621	29,686	5,579	7,385	1,456	1,573	433	185,389
Other	172,079	214,333	26,104	26,070	34,771	16,004	1,342	970	491,673
Total	303,504	265,214	60,212	34,203	47,579	19,094	3,212	1,787	734,805

(a) Year ended 30th June. (b) A person convicted on several counts at the one hearing is included only once, but if a person has been convicted at different hearings during the year, whether for the same or for a different type of offence, the results of all hearings are recorded separately.

The following table shows the number of convictions in each year from 1955 to 1959:—

CONVICTIONS AT MAGISTRATES' COURTS.

State or Territory.	1955.	1956.	1957.	1958.	1959.
New South Wales(a) ..	233,777	249,131	282,489	294,540	303,504
Victoria	133,575	158,869	208,125	251,065	265,214
Queensland(b)(c) ..	46,242	45,711	52,113	(a) 60,592	(a) 60,212
South Australia(b) ..	29,264	28,221	30,658	32,621	34,203
Western Australia(a) ..	65,118	59,883	56,297	47,037	47,579
Tasmania	17,314	(a) 17,029	(a) 17,040	(a) 17,216	(a) 19,094
Northern Territory ..	(b) 1,864	(b) 2,444	(b) 2,340	2,715	3,212
Australian Capital Territory ..	1,285	1,209	1,597	1,910	1,787
Australia	528,439	562,497	650,659	707,696	734,805

(a) See footnote (a) to table in para. 1 above. (b) Twelve months ended 30th June of year shown. (c) A person convicted on several counts at the one hearing is included only once, but if a person has been convicted at different hearings during the year, whether for the same or for a different type of offence, the results of all hearings are recorded separately.

3. **Convictions for Serious Crime at Magistrates' Courts.**—(i) *General.* The figures given in the preceding tables refer to all convictions, and include offences of a technical nature, drunkenness, and minor breaches of good order which come under the heading of crime in a very different sense from the more serious offences. The following table has therefore been prepared to show convictions at Magistrates' Courts for what may be regarded as the more serious offences, i.e. offences against the person, offences against property, forgery and offences against the currency.

(ii) *Number and Rates.* The following table shows the number of convictions for serious crime at Magistrates' Courts for the years 1955 to 1959:—

CONVICTIONS FOR SERIOUS(a) CRIME AT MAGISTRATES' COURTS.

State or Territory.	1955.	1956.	1957.	1958.	1959.
New South Wales	19,803	21,399	23,510	27,960	30,769
Victoria	7,318	8,504	8,926	11,132	12,260
Queensland(b)(c)	3,546	3,942	4,079	4,301	4,422
South Australia(b)	1,867	1,889	2,298	2,338	2,554
Western Australia	4,368	5,289	5,205	6,016	5,423
Tasmania	1,127	1,176	1,738	1,666	1,634
Northern Territory	(b) 177	(b) 115	(b) 247	209	297
Australian Capital Territory	138	102	295	357	384
Australia	38,344	42,416	46,298	53,979	57,743

(a) Offences against the person, offences against property, forgery and offences against the currency.

(b) Twelve months ended 30th June of year shown. (c) A person convicted on several counts at the one hearing is included only once, but if a person has been convicted at different hearings during the year, whether for the same or for a different type of offence, the results of all hearings are recorded separately.

The number of convictions for serious crime at Magistrates' Courts per 10,000 of population for the same series of years is shown in the following table:—

CONVICTIONS FOR SERIOUS CRIME AT MAGISTRATES' COURTS.

(PER 10,000 OF POPULATION.)

State or Territory.	1955.	1956.	1957.	1958.	1959.
New South Wales	56.7	60.2	64.9	75.7	81.9
Victoria	29.0	32.7	33.4	40.6	43.6
Queensland(a)	26.8	29.1	29.5	30.2	31.0
South Australia(a)	23.1	22.6	26.7	25.7	28.1
Western Australia	66.3	78.1	75.2	85.3	75.4
Tasmania	35.6	36.5	52.6	49.3	47.4
Northern Territory	(a) 107.0	(a) 65.8	(a) 134.7	108.7	145.0
Australian Capital Territory ..	42.6	49.4	78.3	90.9	82.4
Australia	41.8	45.1	48.1	54.7	57.8

(a) Twelve months ended 30th June of year shown.

(iii) *Rate of Convictions 1881 to 1951.* The rate of convictions at ten-year intervals over a period of 70 years is shown below.

**RATE OF CONVICTIONS FOR SERIOUS CRIME AT MAGISTRATES' COURTS:
AUSTRALIA.**

Year	1881.	1891.	1901.	1911.	1921.	1931.	1941.	1951.
Convictions per 10,000 persons..	69.3	44.8	29.1	24.6	29.2	37.1	33.6	37.1

4. **Committals to Higher Courts.**—(i) *Number of Committals.* The following table shows the number of offences, classified according to the nature of the offence, for which persons appearing in the lower courts were committed to higher courts for each State and Territory for the year 1959:—

COMMITTALS TO HIGHER COURTS, 1959.

Class of Offence.	N.S.W.	Vic.	Q'land. (a)(b)	S. Aust. (a)	W.Aust.	Tas.	N.T.	A.C.T.	Aus- tralia.
Against the Person ..	1,347	884	257	226	69	54	25	9	2,871
Against Property ..	5,514	2,861	678	278	294	445	43	52	10,165
Forgery and Offences against the Currency ..	498	454	4	26	72	14	13	3	1,084
Against Good Order ..	95	44	3	5	8	..	12	1	168
Other ..	68	280	12	23	4	16	403
Total ..	7,522	4,523	954	558	447	529	93	65	14,691

(a) Year ended 30th June. (b) A person committed on several counts at the one hearing is included only once, but if a person has been committed at different hearings during the year, whether for the same or for a different type of offence, the results of all hearings are recorded separately.

The following table shows the number of committals to higher courts for each of the years 1955 to 1959:—

COMMITTALS TO HIGHER COURTS.

State or Territory.	1955.	1956.	1957.	1958.	1959.
New South Wales ..	4,792	6,056	7,221	7,327	7,522
Victoria ..	2,198	2,624	2,707	4,227	4,523
Queensland(a) ..	482	572	712	911	954
South Australia(a) ..	426	432	552	505	558
Western Australia ..	454	386	356	463	447
Tasmania ..	348	321	604	600	529
Northern Territory ..	(a) 45	(a) 87	(a) 62	66	93
Australian Capital Territory ..	25	40	37	74	65
Australia ..	8,770	10,518	12,251	14,173	14,691

(a) Twelve months ended 30th June of year shown.

(ii) *Rate of Committals, 1881 to 1951.* The rate of committals to higher courts for serious crime at ten-year intervals since 1881 is shown below:—

RATE OF COMMITTALS TO HIGHER COURTS: AUSTRALIA.

Year ..	1881.	1891.	1901.	1911.	1921.	1931.	1941.	1951.
Committals per 10,000 persons ..	12	11	8	6	7	8	5	8

5. **Drunkenness.**—(i) *Cases and Convictions.* The numbers of arrests for drunkenness and the convictions recorded during each of the years 1955 to 1959 are given in the following table:—

DRUNKENNESS: CASES AND CONVICTIONS.

State or Territory.	1955.	1956.	1957.	1958.	1959.
CASES.					
New South Wales ..	81,199	77,867	76,700	69,085	69,516
Victoria ..	20,685	20,457	25,657	29,752	29,973
Queensland(a) ..	23,986	22,748	23,550	28,242	26,993
South Australia(a) ..	4,772	4,739	5,030	4,312	4,452
Western Australia ..	5,752	5,959	5,484	4,870	5,632
Tasmania ..	776	705	786	746	732
Northern Territory ..	(a) 487	(a) 507	(a) 1,059	969	1,024
Australian Capital Territory ..	231	279	358	385	255
Australia ..	137,888	133,261	138,624	138,361	138,577

(a) Twelve months ended 30th June of year shown.

DRUNKENNESS: CASES AND CONVICTIONS—*continued.*

State or Territory.	1955.	1956.	1957.	1958.	1959.
CONVICTIONS.					
New South Wales	80,457	77,195	75,953	68,354	69,201
Victoria	20,437	20,184	25,284	29,434	29,334
Queensland(a)	23,947	22,687	23,521	28,196	26,918
South Australia(a)	4,765	4,732	5,019	4,299	4,439
Western Australia	5,720	5,912	5,428	4,821	5,587
Tasmania	757	674	760	718	660
Northern Territory	(a) 474	(a) 502	(a) 1,029	926	1,010
Australian Capital Territory	231	271	322	380	255
Australia	136,788	132,157	137,316	137,128	137,404

(a) Twelve months ended 30th June of year shown.

The term "drunkenness" includes drunkenness and disorderliness, and habitual drunkenness.

(ii) *Convictions per 10,000 of Population.* In the twenties, the convictions for drunkenness averaged approximately 100 per 10,000 of population, but the rate fell away considerably during 1930 and 1931, being only 57.1 in the latter year. The average then rose steadily, the annual average for the period 1936 to 1939 being 82.7 and that for the years 1940 to 1945, 90.8. In 1946, the convictions per 10,000 rose very steeply to 132.1, increasing further to 174.5 by 1951, since when they have declined again to 136.9 in 1959.

The rates of convictions for drunkenness for the years 1955 to 1959 are shown in the following table:—

CONVICTIONS FOR DRUNKENNESS.

(PER 10,000 OF POPULATION.)

State or Territory.	1955.	1956.	1957.	1958.	1959.
New South Wales	230.4	217.1	209.7	185.1	184.1
Victoria	80.9	77.5	94.6	107.4	104.3
Queensland(a)	180.7	167.7	170.4	200.9	188.8
South Australia(a)	59.0	56.7	58.3	48.5	48.9
Western Australia	86.8	87.3	79.5	68.3	77.7
Tasmania	23.9	20.9	23.0	21.3	19.2
Northern Territory	(a)286.6	(a)287.3	(a)555.8	481.6	493.3
Australian Capital Territory	71.3	78.1	85.6	88.5	54.7
Australia	149.1	140.6	142.8	138.9	136.9

(a) Twelve months ended 30th June of year shown.

(iii) *Remedial Treatment of Drunkenness.* For particulars of relevant legislation and some details of the various institutions established for the treatment of inebriates, see Official Year Book, No. 46, p. 632.

6. **First Offenders.**—In all States and Territories, statutes are in force for dealing with first offenders. For particulars of the relevant legislation, see Official Year Book, No. 46, page 632. Provisions are incorporated in the various Acts whereby courts may extend leniency to the offender by means such as: (i) dismissal of the charge without proceeding to a conviction; (ii) freeing the offender or suspending sentence with the requirement of a recognizance for good behaviour for a specified period; and (iii) by placing the offender under the supervision of a probation officer for a specified period. The provisions existing in the individual States and Territories are set out in Year Book No. 46.

C. CIVIL PROCEEDINGS.

The total numbers of plaints entered and the amounts awarded to plaintiffs during 1959 are shown in the following table. The figures are compiled from returns from the Small Debts Courts in New South Wales, Courts of Petty Sessions in Victoria, Magistrates' Courts in Queensland, Local Courts in South Australia and Western Australia, Courts of Requests in Tasmania, Courts of Summary Jurisdiction in the Northern Territory and the Court of Petty Sessions in the Australian Capital Territory.

CIVIL CASES AT LOWER COURTS, 1959.

Particulars.	N.S.W.	Vic.	Q'land. (a)	S.Aust.	W.Aust.	Tas.	N.T. (a)	A.C.T.	Aus- tralia.

(a) Year ended 30th June.

§ 3. Children's Courts.

1. **New South Wales.**—Children's Courts, first established in 1905, now exercise jurisdiction under the Child Welfare Act, 1939–60. Where practicable, they are not held in ordinary court rooms, and persons not directly interested are excluded from any hearing in order that children may be protected against the adverse influences which they would encounter in ordinary courts.

The magistrates exercise all the powers of a Court of Petty Sessions in respect of offences committed by or against children under 18 years of age. They also exercise jurisdiction in respect of neglected and uncontrollable children. Their functions are reformatory, not punitive; they may commit children to institutions, to the care of persons other than the parents, or to the care of the Minister.

2. **Victoria.**—Under the Children's Court Act 1958, the jurisdiction of Children's Courts is restricted, with certain exceptions, to children up to 17 years of age. Two stipendiary special magistrates with jurisdiction throughout the State and, in addition, honorary special magistrates, operate in some metropolitan courts and provincial cities. At country courts to which no special magistrates are appointed, the local stipendiary magistrate usually constitutes the bench. The Children's Court may deal with all offences except homicide. However, consent to the jurisdiction of the Children's Court must be indicated by the child (or by a parent if the child is under 14 years of age) before an indictable case may proceed.

The primary aim of the Children's Court is reformation and rehabilitation of the offender and the court is bound under Section 27(3) of the Children's Court Act 1958 to "firstly have regard to the welfare of the child".

The probation system has been in use by the Children's Court since 1907, and there are now in Victoria a large number of honorary probation officers as well as six stipendiary probation officers. Problem cases are referred by the Court for investigation to a Children's Court Clinic, which is staffed by psychiatrists, psychologists and social workers.

3. **Queensland.**—Children under the age of 17 years before the Court on summary charges are dealt with under the Children's Court Acts, 1907–1930, and the State Children Acts, 1911–1955. The Children's Court in the metropolitan area is presided over by a magistrate, and the services of the psychiatric clinic are available to him if he considers they are needed. Proceedings are held *in camera*. A non-commissioned police officer is present to offer any observations he considers necessary and to assist the magistrate. In country areas, the court is presided over by the local stipendiary magistrate or, in his absence, by two justices. If found guilty, a child may be either admonished, released on probation or committed to the care of the State Children Department or an institution. A conviction will not necessarily be recorded against him. His parent or guardian may be ordered to pay damages to the wronged party, and in default is liable to the same consequences as a defendant in an ordinary Court of Petty Sessions.

4. **South Australia.**—Provision for the treatment of juvenile offenders under the age of 18 years is contained in various Acts, the main ones being the Maintenance Act, 1926–1958, the Juvenile Courts Act, 1941, the Justices Act, 1921–1960, and the Offenders Probation Act, 1913–1953. A Juvenile Court to hear cases of offences by children is constituted by a special magistrate or two justices of a Juvenile Court, and it has power to determine all charges other than homicide. A child convicted of an offence punishable by imprisonment can be committed by a court only to a reformatory. For indictable offences, the penalty is committal to a reformatory or a fine of up to £50.

5. **Western Australia.**—Children's Courts deal with offenders under the age of 18 years and hear cases of certain offences against children. Special magistrates are appointed for Children's Courts, and the Governor may appoint other persons to be members of a particular Children's Court. One member may sit and adjudicate with the special magistrate, but in the magistrate's absence at least two members must be present.

A Children's Court is deemed to be a court of summary jurisdiction and may exercise exclusive jurisdiction in respect of all offences except wilful murder, murder, manslaughter or treason alleged to have been committed by children.

Adults charged with certain indictable offences against children may forego the right to trial by jury and agree to be dealt with summarily by Children's Courts.

6. **Tasmania.**—Under the provisions of the Infants' Welfare Act 1935, Children's Courts are established to deal with offenders under the age of 17 years. Special magistrates are appointed for the Children's Courts by the Governor. One or two special magistrates, or one or two justices, constitute a court.

A Children's Court is deemed to be a court of summary jurisdiction, and may exercise exclusive jurisdiction in respect of all offences alleged to have been committed by children.

7. **Northern Territory.**—The Child Welfare Ordinance 1958 provides for the establishment of Children's Courts. These courts are constituted by a special magistrate and one member of the Child Welfare Council authorized to sit as a member of the Children's Court. Where no Children's Court has been established for a particular area, or where special circumstances require it, the jurisdiction of a Children's Court may be exercised by a court of summary jurisdiction constituted by a special magistrate.

Proceedings in a Children's Court are in form similar to proceedings in a court of summary jurisdiction, but no reports of proceedings may be published without the express authority of the Court, and any person not directly concerned may be excluded from the hearing.

A Children's Court has jurisdiction in respect of all offences committed by persons under 18 years of age in respect of which proceedings may be taken in a court of summary jurisdiction. In dealing with such offences, the Court may, in cases other than homicide, impose a fine not exceeding fifty pounds or a sentence of imprisonment for not more than six months, and, in addition to or in lieu of these punishments, may make an order committing the child to the care of the Director of Child Welfare or of a person who is willing to undertake the care on the Courts' terms and conditions (in which case the child may be declared a State child), or it may commit the child to an institution for a specified period or release the child on probation on such conditions as the Court orders. Children's Courts also exercise jurisdiction in respect of destitute, neglected, incorrigible or uncontrollable children.

8. **Australian Capital Territory.**—The Child Welfare Ordinance 1957 provides that the Court of Petty Sessions constitutes the Children's Court when it is hearing proceedings involving persons under the age of 18 years. Its proceedings are similar to those of an ordinary Court of Petty Sessions except that persons not directly interested are excluded from the Court.

In addition to the power to deal with summary offences, the Children's Court has power to hear and determine summarily a charge for an indictable offence other than an offence punishable by death. In either case, the Court's powers include releasing an offender on probation, committing him to the care of a specified person, making him a government ward, or committing him to an institution for up to three years.

§ 4. Higher (Judges') Courts.

A. CRIMINAL PROCEEDINGS.

1. Persons Convicted at Higher Courts.—The following table shows the number of persons convicted at higher courts in each of the States and Territories of Australia during 1959, classified according to the nature of the offence:—

PERSONS CONVICTED AT HIGHER COURTS, 1959.

Offence.	N.S.W.	Vic.	Q'land. (a)(b)	S. Aust.	W. Aus.	Tas. (c)	N.T.	A.C.T.	Aus- tralia.

Australian Capital Territory..	6.2	11.5	8.5	12.2	8.6
Australia	4.2	4.8	5.6	6.1	6.1

(a) Twelve months ended 30th June of year shown. (b) A person convicted on several counts at the one hearing is included only once, but if a person has been convicted at different hearings during the year, whether for the same or for a different type of offence, the results of all hearings are recorded separately. (c) Convictions.

3. **Habitual Offenders.**—An account of the methods adopted in each jurisdiction in connexion with habitual offenders is given in the following paragraphs.

(i) *Commonwealth.* Under the provisions of the Crimes Act 1914–1960, where a person who is convicted of an indictable offence against the law of the Commonwealth has been previously convicted on at least two occasions of indictable offences against the law of the Commonwealth or of a State or Territory, the court before which he is convicted may declare that he is an habitual criminal, and may direct as part of his sentence that on expiration of the term of imprisonment then imposed on him he be detained during the pleasure of the Governor-General.

(ii) *New South Wales.* The Habitual Criminals Act, 1957, gives power to judges to declare as an habitual criminal any person of or above the age of 25 years who has been convicted on indictment and has on at least two occasions previously served separate terms of imprisonment as a consequence of convictions for indictable offences, provided that such offences were not dealt with summarily without his consent. A person may also be pronounced by a Judge to be an habitual criminal upon recommendation by a Stipendiary Magistrate.

A judge, having pronounced a person to be an habitual criminal, shall sentence him to a term of imprisonment of not less than five years nor more than fourteen years.

An habitual criminal so sentenced may be considered for release on licence in the light of his conduct and attitude after he has served two-thirds of his sentence. He will, in any event, be granted a remission to permit his release on licence after five-sixths of his sentence, subject to good conduct and industry.

At 30th June, 1960, there were 101 prisoners detained in pursuance of the legislation.

(iii) *Victoria*. The Indeterminate Sentences provisions of the Crimes Act were abolished as from 1st July, 1957, with the proclamation of the Penal Reform Act 1956. The terms "reformatory prison" and "habitual criminal" also ceased to exist as from that date.

Under the Penal Reform Act 1956, a sentence of twelve months or more must contain provision for an offender's release on parole after he has served a minimum term which must be named. With sentences of under twelve months, the courts may fix a minimum term.

The relevant parts of the Penal Reform Act 1956 have now been embodied in Sections 506 to 542 of the Crimes Act 1958. In the case of the persistent offender, if the court is satisfied that it is expedient for the protection of the public that he should be detained in gaol for a substantial time, the court may pass a sentence of preventive detention for a term of not more than ten years, and where any such sentence is passed shall fix a minimum term during which the offender shall not be eligible to be released on parole.

(iv) *Queensland*. Sections 659A to 659I of the Queensland Criminal Code deal with habitual criminals. Only the Supreme Court or a judge thereof may declare a person to be an habitual criminal. An habitual criminal is detained in a reformatory prison (Section 659D) and there employed (Section 659F).

Where the Supreme Court or a judge recommends the discharge of an habitual criminal, the Governor may direct his discharge and may order him so long as he remains in Queensland to report at intervals during any period not exceeding two years (Section 659G).

An habitual criminal may be released by order in writing (called a "parole order") by the Parole Board set up under the provisions of "The Offenders Probation and Parole Act of 1959," after he has been detained during a period of two years (Section 32).

(v) *South Australia*. The Criminal Law Consolidation Act, 1935–1956 provides that persons previously convicted of a certain number of indictable offences of a particular class may be declared habitual criminals and shall then be detained during Her Majesty's pleasure. Proof of previous convictions is in all cases relevant to the question of penalty.

(vi) *Western Australia*. Under the Criminal Code Amendment Act, 1918, power is given to sentence a prisoner to be detained in a reformatory prison during the Governor's pleasure, where such prisoner is deemed to be an habitual criminal, or in other special circumstances where the Court considers such a sentence is fit.

The number under preventive detention on 30th June, 1959, was 23 and the total number dealt with since the passing of the Act was 187.

(vii) *Tasmania*. Since the Indeterminate Sentences Act came into operation in 1922, 110 persons have been confined under its provisions and 13 were in custody at the end of 1960.

Of the 97 released on probation, 25 have been re-committed.

(viii) *Northern Territory*. The Habitual Criminals Amendment Act, 1907, of South Australia is still in force in the Northern Territory. By virtue of that Act, the Judge of the Northern Territory has power to declare as habitual criminals persons of any age who come before him for sentence and have had at least two or, in some cases, three previous convictions for certain indictable offences specified in the Act. The result of the declaration is that the offender is detained for an indefinite period after the completion of his sentence, and is released only when he is considered fit to be at large.

(ix) *Australian Capital Territory*. The Habitual Criminals Act, 1905, of New South Wales is still in force in the Australian Capital Territory. By virtue of that Act, a judge of the Australian Capital Territory Supreme Court has power to declare as habitual criminals persons of any age who come before him for sentence and have had at least two or, in some cases, three previous convictions for certain indictable offences specified in the Act. The result of the declaration is that the offender is confined for an indefinite period after the completion of his sentence, and is released only when he is considered fit to be at large. Habitual criminals declared in the Australian Capital Territory are detained in New South Wales.

4. **Capital Punishment.**—There were ten executions in Australia during the period 1949 to 1959. Three took place in Victoria (in 1951), four in South Australia (one each in 1950, 1953, 1956, and 1958), one in Western Australia (in 1952), and two in the Northern Territory (in 1952). In each case the offence was murder.

Under the Criminal Code Amendment Act of 1922, capital punishment was abolished in Queensland, and in New South Wales the Crimes Act was amended in 1955 abolishing capital punishment for all offences except treason and piracy. In the Australian Capital Territory, the Child Welfare Ordinance 1957 now provides that no death sentence is to be pronounced or recorded against a person under the age of 18 years.

In the early days of the history of Australia, the penalty of death was attached to a large number of offences, many of which would now be dealt with in a Magistrate's Court. The present tendency is to restrict death sentences to persons convicted of murder. Although rape is a capital offence in some States, the penalty of death has not been imposed in recent years on persons convicted of it.

The average annual number of executions in Australia from 1861 to 1880 was 9; from 1881 to 1900, 6; from 1901 to 1910, 4; from 1911 to 1920, 2; from 1921 to 1930, 2; from 1931 to 1940, 1; and from 1941 to 1950, 0.5.

B. DIVORCE AND OTHER MATRIMONIAL RELIEF.

1. Separation and Maintenance Orders of Courts of Summary Jurisdiction.—In all States and Territories, there are laws enabling a wife whose husband leaves her or the children of the marriage without adequate means of support to obtain a maintenance order against the husband from a court of summary jurisdiction. In some States and the Northern Territory, courts of summary jurisdiction also have power to make separation orders. A separation order is primarily intended for the protection of the person of the wife.

2. Divorce and Other Matrimonial Relief Granted by Higher Courts.—The matrimonial relationship may be terminated by a Supreme Court of a State or Territory in one of three ways. Firstly, there may be a dissolution of the marriage, commonly known as divorce; secondly, the courts may annul a marriage; and thirdly, there can be a judicial separation of the parties.

Up till now, each State has been primarily responsible for the provision of matrimonial relief. The law has varied from State to State; for example, as to the period of desertion needed to obtain a decree for the dissolution of marriage.

In 1959, however, the Commonwealth Parliament passed the Matrimonial Causes Act 1959 which came into force on 1st February, 1961. The Act establishes uniform grounds throughout the whole of the Commonwealth for the termination of marriage. While the Act displaces corresponding State law, it vests jurisdiction in existing State and Territorial Courts.

All statistical information given in this section relates to proceedings under the system before the operation of the Commonwealth Act. The various grounds of dissolution available are shown in the tables.

3. Matrimonial Causes Act 1959.—Under the Commonwealth Matrimonial Causes Act 1959, a decree for the dissolution of marriage may be granted on various grounds, such as adultery, desertion, insanity, separation for five years in certain circumstances, or failure to comply with a restitution decree.

Proceedings for nullity of marriage may be instituted in respect of a marriage which is void or voidable. A marriage which is void has no existence at all, and so it is not legally necessary to obtain a decree of nullity of marriage, but since the issue may depend on difficult questions of fact, such as proof that the consent of one of the parties to the marriage was not a real consent, it is advisable and customary to seek a court judgment which decides the question of the validity of the marriage.

Proceedings for annulling a voidable marriage may be instituted on various grounds, as, for example, where at the time of the marriage either party was a mental defective. Proceedings must be taken before the marriage is terminated by dissolution or death. A voidable marriage is void from the date of the decree absolute, but until then the parties have the status of married people, and transactions concluded on the basis of the existence of that status cannot be undone or reopened. Since the parties to a marriage which is void or which has been voided do not have the status of married people, they may re-marry.

A decree for dissolution or annulment is first a decree nisi. The decree automatically becomes absolute at the expiration of three months, unless it is in the meantime rescinded, appeal proceedings are instituted, or there are children of the marriage under the age of 16, in which case the Court must be satisfied that appropriate arrangements have been made for their welfare before the decree will become absolute. The parties cannot re-marry until a decree nisi has become absolute.

A decree of judicial separation is available on most of the grounds available for divorce. It leaves unimpaired the status of marriage, but suspends rights and duties with respect to cohabitation. A husband is not responsible for the acts of his wife, except that he is liable for necessities supplied to her if he has failed to pay alimony ordered by a court. Persons who have judicially separated cannot re-marry, but a divorce may be obtained on the same facts as those on which the decree of judicial separation is based.

The new Commonwealth Act provides for financial grants to approved marriage guidance organizations and the courts are enjoined to consider at all times the possibility of reconciliation, and they may take certain steps to endeavour to effect a reconciliation.

In the following tables the term "divorce" is used to cover dissolution of marriage, nullity of marriage and judicial separation.

4. Number of Petitions Filed.—The following table shows the number of petitions for dissolution of marriage, nullity of marriage and judicial separation filed in each State during 1959:—

PETITIONS FILED FOR DISSOLUTION OF MARRIAGE, NULLITY OF MARRIAGE AND JUDICIAL SEPARATION, 1959.

(a) Includes non-compliance with order for restitution of conjugal rights, 414.

9. **Ages of Husband and Wife at Time of Dissolution of Marriage.**—The following table shows the number of husbands and wives in each age group who were parties to marriages dissolved in 1959. Age is taken at the time the decree absolute is made.

Forty-two per cent. of wives were in the 25–34 years age group and 42 per cent. of husbands in the 30–39 years age group. These proportions have varied little during recent years, and are considerably higher than the proportions of married persons of those age groups in the whole population (27 per cent. and 26 per cent. respectively at the Census of 30th June, 1947; 28 per cent. and 26 per cent. respectively at the Census of 30th June, 1954).

10. Duration of Marriages Dissolved and Number of Children.—The following table shows the number of dissolutions of marriage granted in 1959, classified according to the legal duration of the marriage (i.e., the period from the date of marriage to the date when the decree nisi was made absolute) and number of children. In 1959, approximately two-thirds of the marriages dissolved were of less than fifteen years' duration and 38 per cent. were of less than ten years' duration.

(a) The term "children" used in the above table, being dependent upon State legislation and court rules, is not comparable in all States, and is defined as follows:—New South Wales, Victoria and Western Australia, issue of the marriage, of all ages, living and dead; Queensland, children, including adoptions and step-children of all ages, living and dead; South Australia, issue of the marriage, living, under 16; Tasmania, living issue of the marriage.

11. **Number of Divorced Persons at each Census 1901 to 1954.**—The following table shows the number and proportion of divorced persons in Australia as recorded from returns supplied at each census from 1901 to 1954. A classification of these persons by age appeared in earlier issues of the Official Year Book (*see* No. 39, p. 269). Prior to 1911, no record was made of divorced persons in South Australia, so comparisons cannot be made to extend beyond that date.

(a) Excludes South Australia.

C. BANKRUPTCY.

1. **General.**—Particulars relating to bankruptcy in each State to the end of 1927 were incorporated in issues of the Official Year Book prior to No. 23. On 1st August, 1928, the Commonwealth Bankruptcy Act, which is now the Bankruptcy Act 1924–1960, came into operation.

Under the Bankruptcy Act 1924–1960, the Commonwealth is divided into bankruptcy districts which coincide generally with State boundaries. A Federal Court of Bankruptcy has been established with jurisdiction throughout Australia, but it exercises this jurisdiction mainly in the bankruptcy districts of New South Wales, which includes the Australian Capital Territory, and Victoria. Certain State courts have been invested with federal jurisdiction in bankruptcy and, outside New South Wales and Victoria, usually exercise that jurisdiction in the appropriate bankruptcy district.

Any person unable to pay his debts may voluntarily apply for the sequestration of his estate, or his creditors may apply for a compulsory sequestration, if he has committed an act of bankruptcy. The act of bankruptcy usually relied on is non-compliance by a debtor with a bankruptcy notice which requires the debtor to whom it is addressed to pay within a specified time, to a creditor who has obtained a final judgment or order to pay, the amount of the debt, or satisfy the Court that he has a counter-claim, set-off, or cross demand which equals or exceeds the judgment debt. If a bankruptcy notice is not complied with, a creditor may thereupon present a petition against a debtor, provided that—

- (1) the debt or debts amount to £50;
- (2) the act of bankruptcy relied on has occurred within the six months preceding the presentation of the petition; and
- (3) the statutory requirements relating to domicile or residence are applicable to the debtor.

Upon the issue of a sequestration order, the property of the bankrupt vests in the official receiver named in the order, and his property is divisible among his creditors in accordance with the provisions of the Act. No creditor to whom the bankrupt is indebted in respect of any debt provable in bankruptcy has any remedy against the property or person of the bankrupt except by leave of the court.

Under Part XI of the Bankruptcy Act 1924–1960, instead of having a sequestration order made against his estate, a debtor may compound with his creditors or assign his estate for their benefit. Under Part XII of the Act, a debtor may enter into a scheme of arrangement. The object of Parts XI and XII of the Act is to allow a debtor and his creditors to enter into an agreement concerning the debts due to the creditors without having a sequestration order made against the debtor.

The Court has power to decide questions of law affecting a bankrupt estate. Questions of fact may be tried before a jury.

The Bankruptcy Act 1924–1960 provides for an Inspector-General in Bankruptcy, who performs such duties as are prescribed. The Act also provides for a Registrar and an Official Receiver to be appointed for each bankruptcy district.

A Registrar in Bankruptcy is controlled by the Court and has such duties as the Attorney-General of the Commonwealth directs, or as are prescribed, and exercises such functions of an administrative nature as are authorized by the Court. He may examine a bankrupt or a person indebted to a bankrupt or having in his possession any of the estate or effects of a bankrupt. Stipendiary magistrates are appointed Deputy Registrars in country districts.

All sequestrated estates are vested in an Official Receiver, who is a permanent officer of the Commonwealth Public Service. His duties are to investigate the conduct, property and transactions of the debtor, and the cause of bankruptcy of a debtor, and to realize and administer the estate of the debtor. In respect of these activities, the Official Receiver is under the control of the Court.

Persons registered by the Court as qualified to act as trustees may be appointed by resolution of the creditors to be trustees of estates. In cases where a registered trustee under a deed of arrangement, composition, or assignment (Parts XI and XII of the Bankruptcy Act) is removed from or vacates his office, the official receiver may be appointed by the Court to complete the administration of the estate, or the Court may direct the official receiver to convene a meeting of the creditors in the estate to enable them to appoint a registered trustee to complete the administration of the estate.

2. **Bankruptcy Proceedings.**—The following table shows the number of bankruptcies of the various types in each State, together with the assets and liabilities of the debtors, during the twelve months ended 30th June, 1960:—

(b) Twelve months ended 30th June, 1959.

(c) Judgments signed and entered.

(d) Not available.

§ 5. High Court of Australia.

Under the provisions of Section 71 of the Commonwealth Constitution, the judicial power of the Commonwealth is vested in a Supreme Court called the High Court of Australia and in such other courts as the Parliament creates or invests with Federal jurisdiction. The High Court of Australia possesses both original and appellate jurisdiction. The powers of the Court are defined in the Commonwealth Constitution and in the Judiciary Act 1903-55. The Court consists of a Chief Justice and six other judges. Sittings of the Court are held in the capitals of the various States as occasion requires. The High Court functions as a Court of Appeal for Australia. The following statement shows the transactions of the High Court for 1959 and 1960:—

TRANSACTIONS OF THE HIGH COURT OF AUSTRALIA.

Original Jurisdiction. (a)	1959.	1960.	Appellate Jurisdiction.	1959.	1960.
Number of writs issued	156	183	Number of appeals set down for hearing ..	119	134
Number of cases entered for trial ..	31	40	Number allowed ..	41	49
Judgments for plaintiffs	41	23	Number dismissed ..	59	85
Judgments for defendants	5	4	Otherwise disposed of	16	16
Otherwise disposed of ..	12	48			
Amount of judgments ..	£122,970	£182,693			

(a) Some matters dealt with by the High Court neither originate as writs nor are entered as cases.

During 1959 and 1960, respectively, the High Court dealt also with the following:— appeals from assessments under the Taxation Assessment Act, 30, 130; special cases stated for the opinion of the Full Court, 8, 13; applications for prohibition, etc., 26, 22. The fees collected amounted to £3,349 in 1959 and £4,305 in 1960.

§ 6. Police, Prisons and Prisoners.

1. **Police.**—The primary duties of the police are to prevent crime, to detect and detain offenders, to protect life and property, to enforce the law, and to maintain peace and good order. In addition, they perform many duties in the service of the State, e.g. they act as clerks of petty sessions in small centres, as crown land bailiffs, foresters, mining wardens, and inspectors under the fisheries and various other acts. In metropolitan and large country areas, they also regulate the street traffic. With the exception of the Commonwealth Police Force and the police in the Northern Territory and the Australian Capital Territory, the police forces of Australia are under the control of the State governments, but their members perform certain functions for the Commonwealth government, such as acting as aliens registration officers and policing various acts and regulations.

Women police perform special duties at places where young women and girls are subject to moral danger, control traffic at school crossings, and lecture school children on road safety. They also assist male police as required in the performance of normal police duties.

The strength of the police force in each State and Territory and the number of police officers per 10,000 of population are shown in the following table for the years 1955 to 1959. The figures include traffic police, probationers, cadets, special constables and women police, but exclude parking police, native trackers (natives employed in outlying districts in tracking lost persons and persons wanted by the police), female searchers, wardresses and interpreters. Figures refer to the 30th June, except where otherwise indicated.

(a) Figures refer to 31st December of year shown. (b) Included in total strength shown above.
(c) Not included in total strength shown above. (d) One native tracker, who is paid a small weekly retainer and is supplied with rations, is continually on call.

2. **Prisons and Prison Accommodation.**—The table below shows the number of prisons in each State and the accommodation therein in 1959. All figures refer to 30th June, except where otherwise indicated.

PRISONS AND PRISON ACCOMMODATION, 1959.

Particulars.	N.S.W.	Vic. (a)	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	Aus- tralia.
Prisons	18	11	7	16	19	1	2	74
Accommodation	2,768	2,046	929	920	900	244	59	7,866

(a) 31st December.

There is no gaol in the Australian Capital Territory, but there is a lock-up consisting of five cells attached to the police station at Canberra, and another lock-up at Jervis Bay, where offenders are held while awaiting trial or serving short sentences not exceeding one week imposed by a Magistrate's Court.

3. **Convicted Prisoners.**—The number of convicted prisoners at 30th June of each of the years 1955 to 1959 and the proportion per 10,000 of the population are shown in the following table. The figures exclude aborigines, except for New South Wales and Victoria.

CONVICTED PRISONERS.

At 30th June—	N.S.W. (a)	Vic. (b)	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	Aus- tralia.

(a) Includes the Australian Capital Territory.

(b) At 31st December of year shown.

§ 7. Cost of Administration of Law and Order.

1. **Expenditure by the States.**—The tables below show the net expenditure (i.e., gross expenditure less receipts from fees, fines, recoups for services rendered, etc.) from Consolidated Revenue during 1959–60 in connexion with the administration of justice, police and prisons in each State.

In South Australia, the receipts for legal fees and registrations exceed the expenditure under "Justice". Because of differing legislative and administrative arrangements in the various States, the activities covered by the figures shown are not exactly the same in each State. Small differences also result from differing accounting practices. However, the figures shown for individual States are comparable from year to year.

NET EXPENDITURE ON LAW AND ORDER, 1959-60.

State.	Net Expenditure.			Per Head of Population.		
	Justice.	Police.	Prisons.	Justice.	Police.	Prisons.
	£.	£.	£.	s. d.	s. d.	s. d.
New South Wales ..	1,198,120	7,828,364	1,218,052	6 4	41 3	6 5
Victoria ..	547,028	6,336,402	908,408	3 10	44 5	6 5
Queensland ..	113,330	4,062,471	393,717	1 7	56 1	5 5
South Australia ..	—205,791	2,136,275	347,009	—4 5	45 9	7 5
Western Australia ..	58,352	1,744,713	257,955	1 7	48 1	7 1
Tasmania ..	211,430	836,957	157,411	12 2	48 2	9 1
Total ..	1,922,469	22,945,182	3,282,552	3 10	45 2	6 6

2. **Commonwealth Expenditure.**—(i) *Attorney-General's Department.* The expenditure shown in the previous table is that incurred by the State Governments. Since the functions of the Commonwealth Government in the administration of law and order differ considerably from those of the States, precise comparison between Commonwealth and State expenditure in this field is not possible. The following table, however, shows the gross expenditure by the Commonwealth Attorney-General's Department during the year 1959–60 on the main services performed by that department.

**EXPENDITURE BY THE COMMONWEALTH ATTORNEY-GENERAL'S
DEPARTMENT, 1959-60.**
(£.)

Item.	Gross Expenditure.
Administration	300,813
Bankruptcy	196,668
Commonwealth Investigation Service	105,648
Industrial Registrar's Branch	195,182
Court Reporting Branch	153,743
Crown Solicitor's Office	413,241
High Court	147,967
Industrial Court	85,491
Judges' Salaries and Pensions	15,287
Legal Service Bureau	65,165
Miscellaneous Services	22,726
Patents, Trade Marks and Designs	473,811
Peace Officer Guard	161,041
Commonwealth Police Force	14,214
Rent	56,509
Repairs and Maintenance	27,322
Total	2,434,828

In addition, £158,991 was spent by the Attorney-General's Department on capital works and services.

The items of expenditure shown in the table above are gross. Receipts of the Attorney-General's Department for 1959-60 aggregated £670,048, of which revenue on account of Patents, Trade Marks and Designs, and Copyright amounted to £398,633, Bankruptcy £113,305, Court Reporting Branch £111,520, Fees, Fines and Costs of Court £32,755, and Miscellaneous £13,835.

Expenditure and receipts of the Attorney-General's Department for the five years 1955-56 to 1959-60 is shown in the following table:—

**EXPENDITURE BY THE COMMONWEALTH ATTORNEY-GENERAL'S
DEPARTMENT.**
(£.)

Year.	Gross Expenditure.	Receipts.	Net Expenditure.
1955-56	1,896,741	407,474	1,489,267
1956-57	1,952,184	451,758	1,500,426
1957-58	1,984,776	516,090	1,468,686
1958-59	2,100,388	572,771	1,527,617
1959-60	2,434,828	670,048	1,764,780

(ii) *Police and Prisons.* Expenditure by the Commonwealth Government on police in the Australian Capital Territory (excluding the Commonwealth Police Force shown above), and police and prisons in the Northern Territory for the five years 1955-56 to 1959-60 is shown in the following table.

**EXPENDITURE ON POLICE AND PRISONS IN THE NORTHERN TERRITORY
AND THE AUSTRALIAN CAPITAL TERRITORY.**
(£.)

Year.	Northern Territory.	Australian Capital Territory.(a)
1955-56	145,387	98,720
1956-57	136,000	109,710
1957-58	208,099	142,462
1958-59	227,031	137,894
1959-60	262,261	168,952

(a) Expenditure on police only. There is no prison in the Australian Capital Territory.

CHAPTER XVII.

PUBLIC HEALTH.

A. STATE GOVERNMENT ACTIVITIES

(including activities of the Commonwealth Government in the Northern Territory and the Australian Capital Territory).

§ 1. Public Health Legislation and Administration.

1. **New South Wales.**—The Department of Public Health comes under the jurisdiction of the Minister for Health, with an Under-Secretary as Permanent Head of the Department for administrative purposes.

There is also a Director-General of Public Health and Chief Medical Adviser to the Government, who is *ex officio* President of the Board of Health and Chairman of the Nurses' Registration Board.

The Director of State Psychiatric Services is responsible for the administration of that part of the Mental Health Act relating to the care and treatment of mental patients.

The Department's activities embrace all matters relating to public health and the greater part of the general medical work of the Government. These include:— (a) Supervision of the work of local authorities (municipal and shire councils) in relation to public health matters connected with the following Acts—Public Health Act, Noxious Trades Act and Pure Food Act; (b) Scientific divisions (Government Analyst, Microbiological Laboratory, and Division of Occupational Health); (c) Tuberculosis and Epidemiological Divisions; (d) Medical Officers of Health at Sydney, Broken Hill, Newcastle, Wollongong, Bathurst and Lismore; (e) State hospitals and homes and State sanatoria; (f) Mental hospitals; (g) Public hospitals (Hospitals Commission); (h) Maternal and baby welfare (baby health centres); (i) School medical and dental services; and (j) Publicity, nutrition and library services.

2. **Victoria.**—The Department of Health, which is constituted under the Health Act 1958, contains, in addition to the central administration, four branches, the General Health Branch, the Maternal and Child Hygiene Branch, the Tuberculosis Branch and the Mental Hygiene Branch. The work of these branches is described below.

(a) *The General Health Branch.* The branch, which, *inter alia*, is the administrative branch for the Commission of Public Health, protects or promotes the health of the community in the following ways:—

The Engineering Division scrutinizes from a public health point of view the plans of all public buildings and provincial sewerage installations and makes periodical inspections. Other activities include prevention of stream pollution and supervision of abattoirs and cattle sale yards.

The Poliomyelitis Division provides a comprehensive orthopaedic, physiotherapy and respirator service for all eligible patients and carries out rehabilitation in conjunction with the Commonwealth Government. Facilities developed for poliomyelitis are now being used for other neurological disorders. The Division is also concerned with the Salk immunization campaign being undertaken in Victoria. Through the municipalities, immunization against poliomyelitis, diphtheria, smallpox, whooping cough, and tetanus is encouraged and supervised.

Prevention and control of infectious diseases are functions of this Branch, which also sponsors original research into virus diseases and epidemiological investigations throughout Victoria.

The Venereal Diseases Division provides a centrally situated headquarters where the use of modern remedies is effecting a general improvement in the standard of treatment.

Standards of quality and purity of foods and drugs are fixed by the Food Standards Committee and are administered and enforced by both departmental and municipal health inspectors.

Investigations into occupational hazards to the health of workers, the treatment and incidence of occupational diseases, and research into the effects of toxic substances used in industry are conducted by the Industrial Health Division.

Subsidies are granted to municipalities to provide meals for pensioners, to clubs for elderly citizens, and to emergency housekeeper services.

Other services operated by the Branch are: registering plumbers and gasfitters; providing free travel to hospital for people with limited incomes; analysing food, drink, water and sewerage effluents; registering cinematograph operators; administering the Cemeteries Acts and the Clean Air Act; and advising industry on health hazards associated with handling radioactive substances.

(b) *The Maternal and Child Hygiene Branch.* This branch is concerned with pre-natal hygiene, the development of pre-school services, and the school medical and dental services.

(c) *The Tuberculosis Branch.* The Tuberculosis Branch is concerned with the prevention of tuberculosis and the treatment and rehabilitation of tubercular patients.

(d) *The Mental Hygiene Branch.* This Branch is controlled by the Mental Hygiene Authority and consists of institutions for in-patient care and out-patient's clinics and other services necessary for a comprehensive community mental health programme. Since the appointment of the Authority in 1951, existing buildings have been remodelled and new ones provided. Services have been re-organized to conform with modern requirements.

(e) *The Cancer Institute.* This Institute was incorporated in 1948 and provides, *inter alia*, facilities for research and investigation related to the causes, prevention, diagnosis and treatment of cancer and allied conditions. The policy of the Cancer Institute Board has been to ensure the provision of maximum clinical service to patients and to carry out related research. Clinics have been opened in a number of country centres in co-operation with the local hospital committees.

Under an agreement with the Government of Tasmania, clinics are also conducted at Launceston and Hobart.

A 4,000 kV linear accelerator was installed in Melbourne in 1956 and a Cobalt 60 unit in Launceston in 1957. Another 4,000 kV linear accelerator is expected to come into operation in Melbourne early in 1961. During the twelve months ended 30th June, 1960, out-patient attendances were 103,365, involving 7,327 individual patients. One hundred in-patient beds are available.

3. **Queensland.**—(i) *General.* The Health Acts 1937 to 1960 are administered by the Director-General of Health and Medical Services subject to the Minister for Health and Home Affairs. A central staff controls the following divisions:—

(a) *Division of Public Health Supervision.* This Division is controlled by the Deputy Director-General of Health and Medical Services, and comprises separate sections of communicable disease control, environmental sanitation, food and drug control, enthetic, (venereal) diseases, hookworm control and Hansen's disease (leprosy) control. Free treatment of venereal diseases is offered at the Department's clinics in Brisbane and at any public hospital. Free immunization against poliomyelitis, diphtheria, whooping cough and tetanus is offered by most of the local authorities. The majority of school children have been immunized against diphtheria and poliomyelitis.

(b) *Division of Tuberculosis.* A central chest clinic in Brisbane offers Mantoux tests, X-ray examinations, and inoculations of Mantoux negative reactors free of charge, and this service is extensively used. Similar clinics are situated at the Cairns, Rockhampton, Thursday Island, Toowoomba, and Townsville district hospitals. Mobile X-ray units visit country districts. Children in the final grade of primary schools are now being Mantoux-tested and given B.C.G. vaccine. The compulsory X-ray examination of all persons over the age of 14 years has commenced in Northern Queensland and will be applied progressively to other areas of the State.

(c) *Division of Industrial Medicine.* The services of this division are available both to industry and the trade union movement for the prevention of industrial hazards. This division is particularly interested in occupational diseases, such as silicosis and lead and other poisoning, and advises on industrial problems such as lighting, ventilation, fatigue, air pollution and the use of radio-active isotopes.

(d) *Division of Maternal and Child Welfare.* This Division offers supervision and advice on the rearing and health of infants and pre-school children at 245 baby health centres throughout the State. Outlying centres are visited by air or by special rail car. Homes for in-patient treatment of infants with feeding problems have been established at Brisbane, Toowoomba, Ipswich and Rockhampton.

(e) *Division of School Health Services.* This Division comprises the Chief Medical Officer, School Health Services, and a staff of doctors, dentists and visiting school nurses. Every child has a medical examination at least once in three years.

(f) *Division of Mental Hygiene.* The Director is responsible for the care and treatment of mentally sick patients in the State's four mental hospitals at Brisbane, Toowoomba, Ipswich and Charters Towers.

(g) *Division of Laboratory Services.* Two laboratories—the Laboratory of Microbiology and Pathology and the Government Chemical Laboratory—are maintained to ensure the purity of a wide range of foodstuffs and materials. The former also offers a service in clinical pathology to institutions, country hospitals and private doctors, and provides a medico-legal service for the whole State.

(ii) *Hospitals.* All public hospitals operate under the district system, which provides for the constitution of hospitals regions and hospitals districts, and a hospitals board for each district. The State is divided into 11 hospitals regions with a base hospital for each region. Each region comprises a number of hospital districts, the purpose of the regional scheme being to co-ordinate the public hospitals in the region with the base hospital. The administration of the hospital services, including public dental services, in each hospitals district is vested in the hospitals board, which comprises not less than four members nor more than eight members appointed by the Governor-in-Council, and one member elected by the component local authorities. During the year 1958-59, there were 57 hospitals boards controlling 131 public hospitals. In addition, five other general hospitals received aid from the Government, and there were two institutions for the treatment of Hansen's disease.

An institution for the treatment of Hansen's disease in aboriginals is maintained at Fantome Island near Townsville. Modern therapy has rendered the Peel Island institution unnecessary and patients are now treated at the South Brisbane Hospital.

Private hospitals in Queensland are controlled under the provisions of the Health Acts, 1937 to 1955, and the Private Hospitals Regulations, 1937. There are 56 private hospitals licensed in the State, containing 1,712 beds and cots, of which 21, containing 784 beds and cots, are in Brisbane.

4. *South Australia.*—The Department of Public Health embraces the activities of the Central Board of Health, the Food Drugs Advisory Committee, the Radiological Advisory Committee, the School Health Services (comprising School Medical and Dental Services and Deafness Guidance Clinic), Poliomyelitis Services and the public health aspect of the control of tuberculosis, including the State X-ray Health Survey, under the control of the Director of Tuberculosis.

The Central Board of Health consists of five members, three of whom (including the chairman) are appointed by the Governor, while one is elected by metropolitan local boards and one by all other local boards. The Central Board of Health administers the Health, Food and Drugs, Dangerous Drugs, Noxious Trades, Bakehouses Registrations and Early Notification of Birth Acts. The Board is also concerned to some degree with Acts relating to local government, abattoirs and cremation. Other legislation administered by the Department of Public Health relates to venereal diseases and vaccination.

The Health Act 1935-1956 constitutes every municipal council and every district council a local board of health for its municipality or district. There are 143 local boards under the general control and supervision of the Central Board. Under the Food and Drugs Act each local board is constituted the local authority for its respective district except in the metropolitan area, for which the Metropolitan County Board is the local authority.

5. *Western Australia.*—Health services are provided under the Health Act 1911-1959. The central authority is the Department of Public Health, controlled by a Commissioner, who must be a qualified medical practitioner. The State is divided into local government areas, each administered by a municipal council or a road board. All local government authorities have health administration powers.

In any emergency, the Commissioner may exercise all the powers of a health authority in any part of the State.

Features of legislation since 1947 are as follows:—(a) Act No. 70 of 1948 gives power to control sufferers from tuberculosis and established a Tuberculosis Control Branch; (b) Act No. 11 of 1952 gives wide powers to regulate the sale and use of pesticides; (c) Act No. 34 of 1954 provides for the licensing of manufacturers of therapeutic substances; (d) Act No. 21 of 1957 gives power to require the notification of any prescribed condition of health in addition to infectious diseases; (e) Act No. 17 of 1956 gives local authorities power to provide or subsidize centres for the accommodation and care of the aged; (f) Act No. 30 of 1958 provides for the establishment of the Health Education Council with the object of promoting and improving the health of the people of Western Australia; and (g) Act No. 43 of 1958 provides for the establishment of the Cancer Council of Western Australia with the objects of co-ordinating, promoting and subsidizing cancer research.

6. *Tasmania.*—The Department of Health Services is under the jurisdiction of the Minister of Health. The Department consists of a Headquarters and three Divisions. The Director-General of Health Services is the permanent head of the Department, and he administers the Department through Directors of each of the three divisions (Division of Public Health, Division of Mental Health, and Division of Tuberculosis) and through several other clinical directors and other senior officers attached to the Headquarters of the Department, including the Directors of Orthopaedics, Pathology and Anaesthetics, and the Government Analyst and Chemist.

In addition to his responsibility for the functioning of the Department as a whole, the Director-General of Health Services directly administers the various branches of the work performed by Headquarters. This is concerned particularly with the following:—

- (a) The Administration of the Hospital Services throughout the State.
- (b) The District Medical Service.
- (c) The Hospital and Government Nursing Service, which includes the administration of 27 District Nursing Centres throughout the State.
- (d) Legislation concerned with Health and allied matters and the Nurses' Registration Board.
- (e) The Health Education Council and National Fitness Council.
- (f) Specialist Medical Services.
- (g) Statistical classification of Diseases and Injuries.
- (h) Liaison with other States and the Commonwealth Health Department, and all matters dealing with the maintenance of Departmental property and the appointments and salaries of Departmental staff.

The Division of Public Health administers laws relating to sanitation, notification of infectious diseases, and food and drug legislation. The Division also controls the school medical and dental services and child health services.

The Division of Mental Health is responsible for the supervision of mental hospitals, the consultative diagnosis and treatment of psychiatric cases, the treatment and care of the mentally ill, the treatment and care of inebriates, the treatment and custody of sexual offenders, the treatment of psychopathic cases, and the care and treatment of retarded children. The Tuberculosis Division is concerned with the prevention (including B.C.G. vaccination), detection, notification, examination and treatment of all forms of tuberculosis occurring in the State. This Division also conducts the compulsory mass chest-X-ray examinations and maintains chest hospitals and diagnostic clinics.

7. *Northern Territory.*—The Commonwealth Department of Health provides hospital, health and medical services in the Northern Territory.

Four general hospitals have been established. The Darwin Hospital has accommodation for 253 in-patients, Alice Springs Hospital 125, Katherine Hospital 36, and Tennant Creek Hospital, 34. The treatment of Hansen's disease (leprosy) is carried out at East Arm Settlement. A full range of ancillary services is available at the Darwin hospital, which serves as a base hospital for the Territory. Dental clinics have been set up at Darwin and Alice Springs.

Medical and dental services to outback areas are provided by road and air. Aircraft used in the Territory are two De Havilland Doves stationed at Darwin, and one Drover at Alice Springs. They are staffed and serviced by Trans-Australia Airlines and are extensively

used in ambulance and survey medical work. At Alice Springs, doctors of the Northern Territory provide the medical services to the Royal Flying Doctor Service (South Australian) base.

A section of the Department of Health undertakes continuous investigation into native health.

School doctors and dentists travel throughout the Territory to carry out diagnosis and treatment. Public health services are provided, and health inspectors visit all settlements periodically.

Darwin, as a first port of entry for oversea aircraft and shipping, has a quarantine station.

8. **Australian Capital Territory.**—The Public Health Ordinance 1928–1951 places under the control of the Minister for Health all matters relating to public health and hygiene in the Australian Capital Territory. A Medical Officer of Health and a number of Health Inspectors are appointed to administer and police this ordinance. The Canberra Community Hospital is administered, subject to the Minister for Health, by a board consisting of five elected members and three members appointed by the Minister. The hospital has accommodation for 255 in-patients. A district nursing service, administered by the Commonwealth Department of Health, was established in 1950 to provide a home-nursing service for the sick and aged. The service is available at the request of a registered doctor.

§ 2. Supervision and Care of Infant Life.

1. **General.**—The number of infant deaths and the rate of infant mortality for the five years 1955 to 1959 are given in the following table. Further information regarding infant mortality (including information for each State as a whole and for the Territories) will be found in Chapter X.—Vital Statistics (*see* page 359).

INFANT DEATHS AND DEATH RATES.

(a) Excludes Territories.

(b) Number of deaths of children under one year of age per 1,000 live births registered.

Because the health of mothers and infants depends largely on pre-natal attention as well as after-care, government and private organizations provide instruction and treatment for mothers before and after confinement. The health and well-being of mother and child are looked after by baby health centres, baby clinics, crèches, etc.

In all States, Acts have been passed with the object of supervising the conditions of infant life and reducing the rate of mortality. Departments control the boarding-out of the wards of the State to suitable persons, and wherever possible the child is boarded out to

its mother or to a near female relative. Stringent conditions regulate the adoption, nursing and maintenance of children placed in foster-homes by private persons, while special attention is devoted to the welfare of ex-nuptial children.

Under the provisions of Part V. of the Social Services Act 1947–1960, a sum of £15 is payable to the mother in respect of each confinement at which a living or viable child is born if the mother has no other children under 16 years of age. Where there are one or two other children under 16, the amount payable is £16, and where there are three or more other children under 16, the amount payable is £17 10s. Where more than one child is born at a birth, the amount of the allowance is increased by £5 in respect of each additional child born at that birth. More detailed information concerning maternity allowances is given in Chapter XVIII.—Welfare Services, page 697.

2. *Nursing Activities.*—(i) *General.* In several States, the Government maintains institutions which provide treatment for mothers and children, and, in addition, subsidies are granted to various associations engaged in welfare work.

(ii) *Details by States.* In earlier issues of the Official Year Book (*see* No. 22, pp. 515–16), information concerning the activities of institutions in each State is given.

(iii) *Summary.* The following table gives particulars of the activities of Baby Health Centres and Bush Nursing Associations for the year 1960.

BABY HEALTH CENTRES AND BUSH NURSING ASSOCIATIONS, 1960.

(a) Year ended 30th June.

(b) Not available.

In the last thirty years, the number of attendances at the Baby Health Centres has nearly quadrupled. The numbers of attendances, at five-year intervals, since 1930 were as follows:—1930, 919,893; 1935, 1,355,306; 1940, 2,035,299; 1945, 2,927,764; 1950, 3,049,375; and 1955, 3,099,233. During the year 1960, the number of attendances was 3,480,203.

§ 3. Medical Inspection of School Children.

1. *General.*—Medical and dental inspection of school children is carried out in all States, in the Northern Territory and in the Australian Capital Territory. In some States, travelling clinics have been established to deal with dental defects.

2. *New South Wales.*—(i) *School Medical Service.* Doctors of the School Medical Service examine children attending all schools administered by the Department of Education and the majority of other schools in the State. They make annual visits to schools in the metropolitan, Newcastle and Wollongong areas, and in Armidale, Bathurst, Lismore and district, Grafton and district, and Cootamundra, and examine children in kindergarten or 1st grade in primary schools, and 1st and 4th years in secondary schools. Children in other classes are examined or reviewed as necessary. The vision and hearing of pupils in 4th grade are re-tested.

In country areas, school children are examined by local medical practitioners according to the normal practice of the School Medical Service and under the supervision of local Municipal and Shire Councils. During the first examination, all children at these schools are examined, and following that, the same procedure is adopted as in the metropolitan area. This scheme is growing and the majority of Councils in New South Wales have expressed interest and are endeavouring to arrange with local medical practitioners to have the scheme introduced.

If treatment is necessary, the parent is informed and, if possible, is called in for interview. In the metropolitan, Newcastle, Wollongong, Lismore and Grafton areas, school nurses follow up these cases with the object of persuading parents to seek medical advice for the children.

As well as examining school children, the medical officer examines the sanitary arrangements at each school. Bush nurses act as school nurses in schools at or near the bush nursing centres.

Medical officers of this service examined 135,513 children in 1959. Notifiable defects were found in 26.9 per cent. of the children examined.

Various surveys of school children are undertaken from time to time, e.g. hearing surveys, hookworm surveys, height-weight surveys, nutrition surveys, and investigations to determine the incidence of enlargement of the thyroid gland, defective vision, and postural defects.

Six child guidance clinics in the metropolitan area and one at Newcastle operate under the administration of the School Medical Service. One clinic functions at the Yasmar Boys' Shelter and deals exclusively with cases which come before the Children's Courts. Each clinic is staffed by a psychiatrist, a psychologist and social workers.

(ii) *School Dental Service.* There are 28 dental officers and 23 dental assistants of the staff of the Division of Dental Services, Department of Public Health, providing a School Dental Service for New South Wales school children.

At the beginning of the 1961 school year, nine fully-equipped mobile dental clinics were in service in country areas. The clinics are staffed by a dentist and assistant. They visit country schools and provide treatment free of charge.

Arrangements are proceeding for the erection of five fixed clinics, each of two surgeries, waiting room, office and separate washrooms for patients and staff. These will be located at Newcastle and Wollongong, and at Hurstville, Parramatta and Naremburn in the Sydney metropolitan area.

When the clinics are completed, free treatment may be obtained for those school children whose parents desire it. It will be necessary to restrict the treatment to children of 6, 7 and 8 years of age although children of any age may obtain free treatment of an emergency nature.

A system involving examination only was commenced in September, 1960, whereby as many primary school children as possible are encouraged to seek private treatment.

A well-equipped dental surgery is in continuous operation at the Stewart House Preventorium, staffed by officers of the Division.

A free dental service is provided for children living west of the Darling River in co-operation with the Royal Flying Doctor Service.

In country areas where no adequate dental facilities exist, school children of all ages are eligible for treatment in the mobile clinics.

In 1960, 49,812 school children were examined and 13,720 were treated in 45,778 visits; 21,136 extractions, 49,032 fillings and 53,434 other treatments were completed. The parents of a further 19,594 children were notified of dental defects requiring treatment.

3. *Victoria.*—School Medical Services are conducted in close association with the Education Department. All children between the ages of 5 and 14 years attending State and registered primary schools are examined regularly, and any disabilities found in the children are brought to the notice of their parents. School nurses, under medical direction, visit the homes and schools. Children suffering from physical and mental disabilities are recommended to attend appropriate schools or classes by the medical officers. Some special training for the handicapped is given.

The School Dental Service has a staff of 40 dental officers and provides dental attention for children in parts of the metropolitan area at one of three dental centres and for a number of country districts by means of 15 mobile units. It also provides dental service for children's institutions in and around Melbourne and certain provincial centres. This service is now providing dental attention for some 80,000 primary school children.

4. **Queensland.**—During 1959–60, medical officers and nurses examined 99,206 school children, referring children with defects to their own doctors. In western Queensland, local doctors act as part-time ophthalmic surgeons. In north Queensland, two school sisters assist in the control of hookworm. Advice is given on school sanitation, infectious diseases in schools, and health education.

During 1959–60, school dentists gave treatment to 9,578 school children whose parents could not afford private treatment. The treatment was carried out at four rail dental clinics and with portable equipment at schools. In addition, school children are treated at hospital dental clinics in the larger towns.

5. **South Australia.**—Children in State schools are examined while in Grades 1, 4 and 7 in the primary schools, and in their second and fourth years in secondary schools. Efforts are made to visit country schools every three years and all the children are examined. Students who wish to become teachers are examined on appointment as Leaving Teaching Scholars while still attending secondary schools, again immediately prior to entering the Teachers' College and finally when they leave the College to take up teaching. Courses of lectures in hygiene and in first aid are given to all College students and, in addition, domestic arts students are lectured on home nursing.

During 1959, 67,698 children were examined by medical officers in 201 country and 110 metropolitan schools. Of these, 5,243 required treatment for defective vision, 943 for defective hearing, and 14,192 for dental disorders.

There were 949 children examined at the deafness guidance clinic during 1959. Of the 505 new patients, 351 were referred to doctors or hospitals for treatment.

Educational work was assisted by talks to mothers' clubs and interviews with parents by doctors and dentists, and by home visits and interviews by nurses.

6. **Western Australia.**—The School Medical Service of the State Health Department employs seven full-time medical officers for schools. During 1959, these officers examined 48,321 children (metropolitan 31,289, country 17,032). The 274 schools visited comprised—metropolitan, 160 (state schools 111, convents 49), and country, 114 (state schools 89, convents 25). The aim is to examine each school child three times in his school career.

During 1959, the 15 full-time dentists employed by the School Dental Service visited 13 metropolitan schools, 143 country schools, 13 orphanages and 10 native missions. The number of children examined was 12,595. With the consent of their parents, 7,079 of these were treated. The number of dental vans operating was 12. The cost of the School Medical Service and the School Dental Service for 1958–59 was £77,413.

7. **Tasmania.**—During 1959, two full-time and three part-time medical officers examined school children in State and private schools, and 14 full-time and one part-time sisters visited homes and schools. Of the 19,976 children examined by medical officers, 6,887 were found to have defects.

Twelve school dental officers were employed during 1959, operating from surgeries at Hobart, Launceston, Burnie and Devonport, and from mobile clinics in other districts. A full-time dental surgeon is in charge of each surgery or clinic. During the year, there were 17,884 new visits to the school dentists and 28,400 repeat visits.

The cost of school medical and school dental services for the year ended 30th June, 1959, was £78,503.

8. **Northern Territory.**—(i) *School Medical Service.* The Schools Medical Officer makes routine physical examinations of all children attending both pre-school centres and the schools which come under the supervision of the Assistant Supervisor of Education in the Northern Territory. The only children not examined by him are those at the Native Welfare Settlement School, i.e. full-blood aborigines, who are examined during native health surveys.

An immunization clinic and a paediatric clinic are held each week at the Darwin Hospital.

(ii) *School Dental Service.* A special service for school and pre-school children is available in Darwin.

9. *Australian Capital Territory.*—The Commonwealth Department of Health is responsible for health aspects of child welfare in the Australian Capital Territory. These include a school medical service carried out by a medical officer and a trained nurse who are full-time officers of the Health Department.

Routine examinations are carried out at all schools, public and private, within the Territory. The programme is planned to provide for examinations, at the ages of six, eight and 12 years. During 1960, the total number of children examined in these age groups was 3,647.

Examinations of children attending Pre-School Centres are made according to the time available, an attempt being made to cover children aged 4½ to five years. In 1960, lack of time prevented full coverage but 206 pre-school children were examined.

In addition, an immunization programme for the protection of children aged from six months to 12 years against diphtheria, whooping cough and tetanus is carried out by the school doctor. Injections given during 1960 numbered 5,997.

The officer-in-charge of the school service also acts as medical adviser to the Mothercraft Council and at the Baby Health Centres.

The school dental service is staffed by nine dentists and ten dental nurses, and has operated since 1950. Free dental treatment is available to children at primary and infants' schools and pre-school centres. Approximately 90 per cent. of children accept treatment. During 1960, 7,666 children were examined, involving 21,448 visits by these children.

§ 4. Inspection of Food and Drugs for Sale.

Public health legislation in force in all States provides for the inspection of foods and drugs, with the object of ensuring that all goods sold shall be wholesome, clean, and free from contamination or adulteration, and that all receptacles, places and vehicles used for their manufacture, storage, or carriage shall be clean.

§ 5. Supervision of Dairies, Milk Supply, etc.

Earlier issues of the Official Year Book (*see* No. 22, p. 498), refer to the legislation in force in the various States to ensure the purity of dairy produce.

§ 6. Disposal of Dead by Cremation.

The first crematorium in Australia was opened in South Australia in 1903. At 31st December, 1960, there were seventeen crematoria in Australia, situated as follows:—New South Wales, 7; Victoria, 3; Queensland, 2; South Australia, 1; Western Australia, 2; Tasmania, 2.

There is no crematorium in the Northern Territory or in the Australian Capital Territory.

The following table shows the number of cremations in each State for each of the years 1956 to 1960:—

CREMATIONS.

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
1956	12,358	6,733	3,341	514	1,201	551	24,698
1957	12,189	6,849	3,250	539	1,239	688	24,754
1958	12,190	6,913	3,308	620	1,363	622	25,016
1959	13,352	7,549	3,678	779	1,433	666	27,457
1960	13,809	7,839	3,709	915	1,526	692	28,490

B. COMMONWEALTH GOVERNMENT ACTIVITIES.**§ 1. General.**

At the time of federation, the only health function given to the Commonwealth Government under the Constitution was the power to make laws with respect to quarantine. All other health powers remained with the State Governments. Under this power, the systems of State quarantine formerly in operation were abolished with the passing of the Quarantine Act 1908, and a branch of the Department of Trade and Customs, under the control of a Director of Quarantine, was created on 1st July, 1909.

The Commonwealth Department of Health was formed in 1921 by the extension and development of the quarantine service, the Director of Quarantine becoming the Director-General of Health. It had certain other functions in the field of public health. An amendment to the Constitution in 1946 gave the Commonwealth power to make laws with respect to pharmaceutical, hospital and sickness benefits, and medical and dental services. In addition, the Commonwealth Government has used its powers under Section 96 of the Constitution to make grants to the States for health purposes.

§ 2. National Health Benefits.

1. Pharmaceutical Benefits.—A comprehensive range of drugs and medicines is made available to all persons receiving treatment from a medical practitioner registered in Australia. The benefits are supplied by an approved pharmacist upon presentation of a prescription, or by an approved hospital to patients receiving treatment at the hospital.

The patient pays the first 5s. of the cost of the prescription, but pensioners who qualify under the Pensioner Medical Service (*see* para. 5, page 667) receive all benefits without any contribution being made.

Total expenditure on pharmaceutical benefits in the year 1959–60 was £24,335,671.

2. Hospital Benefits.—The payment of hospital benefits to the States is authorized under Part V. of the National Health Act 1953–1959. This Act continues the agreements entered into with the various States under the Hospital Benefits Act 1951. Under these agreements, the Commonwealth pays the States certain sums of money which vary according to the number of occupied beds in public hospitals and the status of patients.

The agreements provide for the payment of 12s. a day for patients who are pensioners or their dependants, and for patients in certain South Australian hospitals. The rate of 8s. a day is paid for other patients.

The National Health Act also provides for the payment of 8s. a day for patients in approved private hospitals. This payment is made to the proprietor of the private hospital. A condition of the benefit is that an equivalent amount has been allowed against the patient's account.

Commonwealth additional benefit is paid in the case of patients who are members of a registered hospital benefit organization. The additional benefit is payable at the rate of 4s. a day if a person contributes for a fund benefit of at least 6s. a day but less than 16s. a day, and at the rate of 12s. a day if a person contributes for a fund benefit of at least 16s. a day. Payment of the additional benefit is made through the benefit organization, and the patient normally receives it with the amount of fund benefit payable by the organization. Reimbursement of the Commonwealth additional benefit is subsequently made to the organization by the Commonwealth.

Until 1st January, 1959, organizations' rules generally provided for disallowance of claims for fund benefit in cases of chronic or pre-existing ailments, or after the contributor had received benefit for a certain maximum period each year. As from 1st January, 1959, provision was made for fund benefit to be paid in these cases. The fund benefit generally

payable in such cases is 16s. a day and is paid either from special accounts guaranteed by the Commonwealth, or from the ordinary accounts of the organizations. One of the original conditions of payment was that the treatment was given in a hospital recognized for the purpose of paying this benefit. While this condition still remains as a general rule, provision has been made as from 1st January, 1960, for fund benefit to be paid in certain circumstances to particular cases for treatment in hospitals which are not recognized.

Australian residents and their dependants who receive hospital treatment while temporarily living overseas are eligible to receive the benefit of 8s. a day and the additional benefit to which they are entitled.

Expenditure on hospital benefits in 1959-60 was £17,345,478. This does not include expenditure on mental hospitals (see para. 3, below).

The following tables show the amount of ordinary benefit paid for each of the years 1957-58 to 1959-60, together with the number of registered organizations, the membership thereof, and payments of Commonwealth additional benefit and hospital fund benefit on account of occupied beds in public and approved private hospitals, for the year 1959-60. As many persons contribute on behalf of both themselves and their dependants, the total number of persons covered by hospital benefit schemes is considerably higher than the number of members. Reliable figures for coverage are not available.

HOSPITAL BENEFITS: SUMMARY, 1956-57 to 1959-60.

1. Ordinary Benefits. (a) Paid to Hospitals in respect of occupied beds.

(£.)

Year Ended 30th June.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Territories and Overseas.	Aus- tralia.
1957	3,065,921	1,920,075	1,356,017	714,980	594,007	264,227	57,936	7,973,163
1958	2,832,282	2,024,597	1,415,169	735,079	644,149	276,378	63,498	7,991,152
1959	3,260,416	2,077,329	1,493,257	746,282	720,164	284,522	65,313	8,647,283
1960	3,788,086	2,144,317	1,577,241	820,126	740,266	305,693	71,176	9,446,905

(a) Ordinary benefits are payable in respect of:—(i) beds occupied by pensioners in public hospitals (12s. a day); (ii) beds occupied in certain South Australian hospitals (12s. a day); and (iii) other occupied beds in public hospitals and approved private hospitals (8s. a day).

2. Additional Benefits. (a) Paid through Benefit Organizations.

YEAR ENDED 30TH JUNE, 1960.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aus- tralia.(b)
Registered Organizations							
No. 30	(c)	47	3	14	11	10	115
Members	1,161,017	768,773	322,689	293,747	244,111	117,653	2,907,990
Commonwealth Benefit ..	£ 3,584,404	1,851,694	802,159	638,836	793,818	227,662	7,898,573
Fund Benefit	£ 6,194,954	2,184,408	1,093,288	1,136,306	952,343	488,497	12,049,796

(a) An additional benefit of 4s. a day is payable to registered hospital benefit organizations for persons who contribute for a fund benefit of at least 6s. a day but less than 16s. a day, or 12s. a day for those who contribute for a fund benefit of at least 16s. a day.

(b) No hospital benefit organization is registered in the Northern Territory or the Australian Capital Territory. Members who live in one of these territories, or who are overseas, receive their Commonwealth additional benefit and fund benefit through membership of an organization registered in one of the States.

(c) Includes 17 Bush Nursing Hospitals.

3. Mental Hospitals.—In 1946, when Commonwealth hospital benefits were introduced for patients in public hospitals, no provision was made for patients in mental hospitals. To help meet the cost of maintaining patients in mental hospitals, the Commonwealth Parliament passed the Mental Institutions Benefits Act 1948. This Act ratified agreements with the States, whereunder it was provided that:—

(a) the Commonwealth would pay the States a benefit equal to the amount being collected by the States from the relatives of patients in mental hospitals by way of charges for maintenance; and

(b) the States would cease making charges for the maintenance of mental patients.

These agreements operated for five years, and terminated in the latter half of 1954. The amount contributed by the Commonwealth during the operation of the agreements was approximately one shilling a day for each patient. When the agreements terminated, Dr. Alan Stoller, of the Victorian Mental Hygiene Authority, was commissioned to undertake a survey on mental health facilities and needs in Australia. His report was released in May, 1955. The report stated that serious overcrowding existed in the majority of mental hospitals in Australia. The provision of more beds was the most urgent need, but other accommodation and rehabilitation facilities were also required.

Following the report, the Commonwealth made an offer of £10 million to the States, as part of a capital expenditure programme of £30 million on increasing and improving patient accommodation. All States accepted the Commonwealth offer.

The following table sets out the amounts which have been paid to the State Governments by the Commonwealth Government each year from 1955–56 to 1959–60.

EXPENDITURE ON MENTAL HOSPITALS BY THE COMMONWEALTH GOVERNMENT.

(£.)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia.
1955–56 ..	208,763	445,747	66,588	12,245	9,984	29,822	773,149
1956–57 ..	383,555	527,213	88,068	128,467	51,855	68,974	1,248,132
1957–58 ..	324,151	545,365	114,104	152,159	29,236	91,384	1,256,399
1958–59 ..	196,831	619,585	118,512	122,328	17,210	45,892	1,120,358
1959–60 ..	359,060	518,271	74,613	91,770	36,799	66,995	1,147,508

Amounts shown in the foregoing table represent payments made during the year shown, under the States Grants (Mental Institutions) Act 1955. The total amounts payable to each State under this Act are in aggregate £10,000,000, to be distributed as follows:—New South Wales, £3,830,000; Victoria, £2,740,000; Queensland, £1,460,000; South Australia, £895,000; Western Australia, £720,000; Tasmania, £355,000.

There are no mental hospitals in the Northern Territory or the Australian Capital Territory.

4. Medical Benefits.—A medical benefits scheme has operated since July, 1953, being authorized firstly by the National Health (Medical Benefits) Regulations and then by the National Health Act 1953.

The basic principle of the scheme is Commonwealth support of voluntary insurance towards meeting the costs of medical attention. The benefits payable by the Commonwealth are paid either on a fee-for-service basis in respect of the items set out in the first and second schedules to the National Health Act, or in the form of a subsidy not exceeding half of the payments made to doctors by registered organizations under contract arrangements.

In order to qualify for the Commonwealth benefit, a person is required to be insured with a registered medical benefits organization. The organization pays the Commonwealth benefit to the contributor, usually at the time it pays its own benefit. Reimbursement of the Commonwealth benefit is subsequently made to the organization by the Commonwealth.

Provision was made from 1st January, 1959, for payments of fund benefit in cases of pre-existing ailments and long-term illnesses.

Substantially increased Commonwealth and fund benefits were introduced for a number of medical services from 1st January, 1960. The largest increases were for major operations, where the combined benefits were doubled.

An organization wishing to be registered by the Commonwealth for the purposes of the medical benefits scheme is required to provide to its contributors, subject to its rules, all benefits specified in the first schedule to the National Health Act 1953-59, at rates not less than those provided by the Commonwealth. The organization must be non-profit-making.

In 1959-60, Commonwealth expenditure on medical benefits was £9,205,151.

The following table shows the number of registered medical benefit organizations, their membership, the number of medical services rendered to members and their dependants, and payments of Commonwealth benefits and medical fund benefits to members of registered organizations. As many persons contribute on behalf of both themselves and their dependants, the total number of persons covered by medical benefit schemes is considerably higher than the number of contributors. Reliable figures for coverage are not available.

MEDICAL BENEFITS: SUMMARY, YEAR ENDED 30th JUNE, 1960.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia. (a)
Registered Organizations	No. 26	23	6	9	9	10	83
Members	No. 1,341,861	672,039	318,488	262,798	207,677	104,808	2,907,671
Medical Services	No. 7,938,952	4,929,790	2,345,294	2,069,741	1,784,036	557,168	19,624,981
Commonwealth Benefit	£ 3,873,800	2,203,422	1,053,307	983,995	842,856	247,771	9,205,151
Fund Benefit	£ 5,098,217	2,336,721	1,372,994	1,179,515	1,061,817	345,625	11,394,889

(a) No medical benefit organization is registered in the Northern Territory or the Australian Capital Territory. Members who live in one of those territories, or who are overseas, receive their Commonwealth Benefit and fund benefit through membership of an organization registered in one of the States.

The figures for Commonwealth Benefit above, and for Hospital Benefit on page 665, differ from those in the table on page 689 which include payments towards special account deficits in relation to chronic or pre-existing illnesses.

5. Pensioner Medical Service.—The Pensioner Medical Service, which commenced on 21st February, 1951, was introduced under the authority of the National Health (Medical Services to Pensioners) Regulations made under the provisions of the National Health Services Act 1948-1949. The service has been continued under the provisions of the National Health Act 1953-1959.

The service provided to eligible pensioners consists of medicines provided free of cost and a medical service of a general practitioner nature such as that ordinarily rendered by a general medical practitioner in his surgery or at the patient's home. Specialist services are not provided. Patients may be charged a small fee by doctors for travelling and attendance outside normal surgery or visiting hours. Doctors participating in the scheme are paid on a fee-for-service basis by the Commonwealth Government.

Persons eligible to receive the benefits of the service are those who satisfy a means test and are receiving an age, invalid or widow's pension under the Social Services Act or a service pension under the Repatriation Act; persons receiving a tuberculosis allowance under the Tuberculosis Act; and dependants of persons eligible for the service.

Since 1st November, 1955, the means test which has applied to new enrolments in the service is the income test that had to be satisfied in order to qualify for a full rate pension as at 31st December, 1953.

The means test does not apply to persons who had applied for and were eligible to receive a pension prior to 1st November, 1955, or to persons receiving a tuberculosis allowance.

At 30th June, 1960, 5,685 doctors were enrolled in the scheme to attend to approximately 739,937 pensioners and their dependants.

During the year ended 30th June, 1960, doctors in the scheme performed 6,839,196 services—visits and surgery consultations—for persons enrolled in the scheme. For these services, they were paid £4,112,637. The average number of services rendered by doctors to each person was 9.4.

6. Anti-Tuberculosis Campaign.—The main provisions of the Tuberculosis Act 1948 are as follows:—(a) Section 5 authorizes the Commonwealth to enter into an arrangement with the States for a national campaign against tuberculosis; (b) Section 6 empowers the Commonwealth to take over or provide specified facilities for the diagnosis, treatment and control of tuberculosis; (c) Section 8 provides for the setting up of an advisory council to advise the Commonwealth Minister for Health on matters relating to the national campaign; and (d) Section 9 authorizes the Commonwealth to pay allowances to sufferers from tuberculosis and their dependants.

Under an arrangement with the Commonwealth Government, each State conducts a campaign against tuberculosis. The Commonwealth Government reimburses the State for all approved capital expenditure in relation to tuberculosis, and for net maintenance expenditure to the extent that it exceeds net maintenance expenditure for the year 1947–48. Thus the States carry out the physical or field work of the national campaign and the Commonwealth acts in an advisory, co-ordinating and financial capacity. For this reason, the Commonwealth has not found it necessary to make much use of its powers under Section 6.

An advisory council, known as the National Tuberculosis Advisory Council, has been set up. There are twelve members, the chairman being the Commonwealth Director-General of Health. Other members are the Commonwealth Director of Tuberculosis, the six State Directors of Tuberculosis, the Consultant (Chest Diseases) of the Department of Repatriation, two specialist private practitioners, and an Administrative Officer of the Commonwealth Department of Health.

To help reduce the spread of infection, the Commonwealth Government pays living allowances to persons suffering from tuberculosis, so that they may give up work and undergo treatment. These allowances have been in operation since 13th July, 1950. Since 6th October, 1960, the rates payable have been:

Married sufferer with a dependent wife	£11 2s. 6d. a week.
Each dependent child under the age of sixteen years	10s. a week (additional to child endowment).
Sufferer without dependants	£7 2s. 6d. a week (reducible to £5 a week if a person is maintained free of charge in an institution).

There is a means test on income but not on property. The allowance is reduced by the amount by which a person's income from sources other than his allowance exceeds, in the case of a married person, £7 a week, and in the case of a person without a dependent wife, £3 10s. a week.

The following table gives particulars of the number of new cases of tuberculosis notified in Australia for the year 1959–60:—

TUBERCULOSIS: NEW CASES NOTIFIED, YEAR ENDED 30TH JUNE, 1960.

State or Territory.	Age Group.					Total.
	0–14.	15–34.	35–54.	55 and over.	Not Stated.	
New South Wales ..	80	273	549	511	6	1,419
Victoria	101	235	296	264	1	897
Queensland	31	130	285	320	22	788
South Australia ..	53	63	99	70	..	285
Western Australia ..	18	70	145	168	1	402
Tasmania	17	47	42	28	..	134
Northern Territory ..	1	19	12	15	..	47
Australian Capital Territory	6	6	1	..	13
Australia	301	843	1,434	1,377	30	3,985

Expenditure by the Commonwealth Government during 1959-60 on its anti-tuberculosis campaign is set out in the following table. The figures for "Maintenance" differ from those in the table shown in Chapter XVIII.—Welfare Services, p. 689, because they include administrative costs which are not a charge on the National Welfare Fund.

ANTI-TUBERCULOSIS CAMPAIGN: EXPENDITURE BY THE COMMONWEALTH GOVERNMENT, 1959-60.
(£.)

State or Territory.	Allowances.	Maintenance.	Capital.	Total.
New South Wales	358,178	1,400,000	215,451	1,973,629
Victoria	212,197	1,121,092	25,895	1,359,184
Queensland	201,420	547,749	353,188	1,102,357
South Australia	123,343	634,967	89,816	848,126
Western Australia	70,230	520,455	23,561	614,246
Tasmania	60,104	151,993	21,325	233,422
Northern Territory
Australian Capital Territory	(a) 38,364	..	(a) 38,364
Australia	1,025,472	4,414,620	729,236	6,169,328

(a) Consists of £20,000 for cost of manufacturing B.C.G. vaccine for distribution throughout Australia, and £18,364 for cost of a survey in the Northern Territory.

The following table sets out expenditure by the Commonwealth Government on its anti-tuberculosis campaign since the start of the campaign.

ANTI-TUBERCULOSIS CAMPAIGN: EXPENDITURE BY THE COMMONWEALTH GOVERNMENT 1947-48 TO 1959-60.
(£.)

Year.	Allowances.	Maintenance.	Capital.	Total.
Total 1947-48 to 1954-55 ..	9,524,723	13,455,750	5,758,975	28,739,448
1955-56	1,689,774	4,006,869	1,757,612	7,454,255
1956-57	1,460,651	4,754,765	2,381,210	8,596,626
1957-58	1,254,693	4,585,215	2,128,462	7,968,370
1958-59	1,062,609	4,864,186	1,411,062	7,337,857
1959-60	1,025,472	4,414,620	729,236	6,169,328

7. Anti-Poliomyelitis Campaign.—The success of the 1954 United States field trials of the poliomyelitis vaccine developed by Dr. Jonas Salk and his associates at the University of Pittsburgh was announced in April, 1955. The Commonwealth Government immediately decided to produce the anti-polio vaccine in Australia.

With the advantage of the experience of the campaigns in the United States and Canada, Australia has adopted a vaccine which has proved to be safe and effective in building up immunity against poliomyelitis.

The vaccine was being produced in Australia by the end of 1955 under the most rigid safety conditions. Plans were made for comprehensive testing procedures to be carried out at many stages both during the production process and with the finished product. These tests ensured the maintenance of safety standards no less rigid than those laid down in other countries where vaccination campaigns were in progress. The Research Laboratory at the Fairfield Hospital, Melbourne agreed to act as an independent testing authority under an arrangement with the Commonwealth Government, and the pathology department of the University of Melbourne also agreed to conduct tests. No vaccine was released for use unless the searching requirements of the Commonwealth Serum Laboratories, the Fairfield Hospital, and the University of Melbourne were met.

The vaccine was supplied to the States free of charge and the States accepted responsibility for the cost of their particular vaccination programmes. No child can be vaccinated without the consent of his parents or guardian.

Distribution of the Salk poliomyelitis vaccine to the States began in July, 1956. The States were responsible for the organization and running of their own campaigns and for the distribution of the vaccine in accordance with priority groups established by the National Health and Medical Research Council. Up to 1958, priority was given to children in the 0-14 age group, expectant mothers, and persons subjected to special risk. During 1958, this priority was extended to persons in the 15-44 age group.

Vaccination against poliomyelitis takes the form of three injections of the vaccine. The second injection is given approximately four weeks after the first, and the third injection is given not less than 32 weeks after the first.

Where the incidence of the disease in certain areas approaches epidemic proportions, special efforts have been made to vaccinate as soon as possible all persons in the area who give their consent.

By 30th June, 1960, approximately 2,631,200 children under the age of 15 years had completed the course of injections and, in addition, approximately 437,300 children had commenced the course. Also, by the same date, approximately 1,152,200 persons 15 years of age and over had completed the course of injections and 408,800 had commenced the course.

POLIOMYELITIS: NEW CASES NOTIFIED.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
1956	240	251	112	122	401	55	..	13	1,194
1957	58	13	24	16	8	6	125
1958	23	60	5	10	2	100
1959	16	30	6	1	3	56
1960	9	24	5	10	4	36	17	..	105

8. Free Milk for School Children Scheme.—In 1950, the States Grants (Milk for School Children) Act was passed. The object of this Act was to improve the diet of school children by the addition of a small quantity of milk each day. All children under the age of thirteen years attending public or private primary schools, including nursery schools, kindergartens, crèches and aboriginal missions, are eligible to receive free milk. The cost of the milk plus half the capital or incidental costs, including administrative expenses of the scheme, is reimbursed by the Commonwealth to the States. All States now participate in the scheme. At 30th June, 1960, approximately 1,588,000 children were entitled to receive free milk under this scheme.

Expenditure by the Commonwealth Government under the scheme since its inception has been as follows:—

COMMONWEALTH EXPENDITURE ON MILK FOR SCHOOL CHILDREN SCHEME.

(£.)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Australia.
1950-51 to 1954-55 ..	3,039,636	1,500,766	582,940	562,042	394,629	515,665	1,864	26,993	6,624,535
1955-56 ..	1,042,173	540,000	308,000	184,000	137,211	185,000	1,016	14,048	2,411,448
1956-57 ..	1,094,469	600,901	386,999	200,000	158,659	156,275	1,323	16,146	2,614,772
1957-58 ..	1,139,512	677,000	401,000	212,000	153,600	160,433	860	18,186	2,762,591
1958-59 ..	1,190,048	782,623	474,909	235,879	182,249	181,025	2,799	19,104	3,068,636
1959-60 ..	1,286,672	910,000	480,246	275,000	229,872	156,358	10,493	22,874	3,371,515

The figures in the foregoing table differ slightly from those in the table shown in Chapter XVIII., Welfare Services, page 689, as they include capital and administrative costs. Figures in the latter table represent only expenditure which is a charge on the National Welfare Fund (i.e., the cost of the milk).

§ 3. Commonwealth Laboratories and Research Institutions.

1. National Health and Medical Research Council.—In 1926, the Commonwealth Government established a Federal Health Council, in accordance with a recommendation of the Royal Commission on Health (1925), “for the purpose of securing closer co-operation between the Commonwealth and State Health Authorities”. This council held sessions each year except in 1932. In 1936, the Commonwealth Government decided to create a body with wider functions and representation, and the National Health and Medical Research Council was established with the following functions:—

- To advise Commonwealth and State Governments on all matters of public health legislation and administration, on matters concerning the health of the public and on medical research.
- To advise the Commonwealth Government on the expenditure of money specifically appropriated to be spent on the advice of this Council.
- To advise the Commonwealth Government on the expenditure of money on medical research and on projects of medical research generally.
- To advise Commonwealth and State Governments on the merits of reputed cures or methods of treatment which are from time to time brought forward for recognition.

The council consists of the Commonwealth Director-General of Health (as chairman), three officers of his department, the official head of the Health Department in each State, and the Director of Public Health for Papua and New Guinea, together with ten other members, one each being nominated by the Federal Council of the British Medical Association, the Royal Australasian College of Surgeons, the Royal Australasian College of Physicians, the Australian Regional Council of the Royal College of Obstetricians and Gynaecologists, the Council of the Australian College of General Practitioners, the College of Pathologists of Australia, the Australian Dental Association, the Australian Paediatric Association, the College of Radiologists of Australasia and (jointly) the Australian universities having medical schools. An eminent layman and laywoman, appointed by the Commonwealth Minister for Health, also serve on the council.

The first session of the National Health and Medical Research Council was held at Hobart in February, 1937. The fiftieth session was held at Sydney in October, 1960.

Under the Medical Research Endowment Act 1937, the Commonwealth Government has made an annual appropriation of funds to assist:—(a) departments of the Commonwealth or of a State engaged in medical research; (b) universities for the purpose of medical research; (c) institutions and persons engaged in medical research; and (d) in the training of persons in medical research. In 1959–60, this appropriation was £241,500.

Approved research institutions under this system now number 74. For 1961, grants for projects numbered 87 in the following fields:—bacteriology, biochemistry, biophysics, clinical research, cytology, dentistry, epidemiology, experimental biology, experimental medicine, experimental pathology, haematology, medical chemistry, neurology, neurophysiology, obstetrics, pathology, physiology and pharmacology, tuberculosis and diseases due to viruses. In certain instances, equipment and apparatus have been made available by the council; this has greatly facilitated some specialized lines of research. The wide scope of work being carried out is greatly assisted by the formation of committees which meet regularly and advise the council on such subjects as public health, epidemic diseases, occupational health, X-rays, radio-active isotopes, medical statistics, radio-therapy, medical radiation, antibiotics, tropical physiology and hygiene, ultrasonics, maternal and child welfare, nutrition, dental research, nursing and veterinary public health.

The research work being done under these grants is of a high standard, many of the individual investigators enjoying international reputations. Beyond this practical achievement, the original objectives of the council are being attained by encouraging young graduates to take up research work and by securing a continuity and permanence of medical research in Australia.

Four scholarships are available each year to allow study overseas for one year. In addition, assistance is often given to scholarship-holders to cover part of their travel expenses.

2. The National Biological Standards Laboratory.—The Therapeutic Substances Act 1953 provides the Commonwealth with powers to ensure that therapeutic substances used for the prevention, diagnosis and treatment of disease in man and animals are safe, pure and potent.

The Director-General of Health is authorized under this Act to set up laboratories to test such substances. In 1958, the first steps were taken to establish an Australian National Biological Standards Laboratory in Canberra.

The Laboratory is divided into two main divisions, a Biological Division and a Pharmaceutical Division. The Biological Division consists of the Bacterial Products Laboratory, the Viral Products Laboratory and an Antibiotic Products Laboratory. The Pharmaceutical Division consists of an Analytical Chemistry Laboratory, an Endocrine Products Laboratory and a Pharmacology Laboratory.

All the above laboratories have now been established and have commenced work with the exception of the Bacterial Products Laboratory.

Samples of therapeutic agents available in Australia are taken and tested for compliance with legal standards. A major function of the laboratories is the establishment of such standards where none at present exist or present standards are unsatisfactory.

The laboratories receive international reference standards of biological substances from stocks maintained in London, and will on request issue Australian reference standards which have been assayed against international standards.

3. Commonwealth Serum Laboratories.—The Laboratories were established in 1916 under the administration of the Department of Trade and Customs and since 1921 have operated under the Department of Health.

Their basic function is to ensure the supply of essential biological products to the Commonwealth in line with its national health needs. This includes:—

- (a) Production and supply of essential biological products.
- (b) Research and development relating to biological products and allied fields.
- (c) The maintenance of potential production capacity for use in emergencies.

Since their foundation, the Laboratories have greatly extended in size and scope. They now produce some 450 regular products and many special products for use in the diagnosis, prevention and treatment of human and animal diseases. Professional, technical and other staffs total over 1,000.

Products comprise a full range of human bacterial and virus vaccines, veterinary bacterial and virus vaccines, serum products such as blood fractions, a wide variety of antibacterial and antitoxic sera, antivenenes, penicillin, endocrines, including insulin, A.C.T.H., pituitary and thyroid extracts, allergy test materials and desensitizing preparations, culture media and diagnostic agents for clinical and laboratory work. More recently, tissue culture materials have been prepared and supplied to virus research workers throughout Australia.

Continuous research is conducted into the relevant aspects of microbiology and immunology, and related fields. As the growth of medical and scientific knowledge in Australia and overseas reveals new methods of diagnosis, prevention and treatment of diseases, this information is applied to the preparation of new biological products at the Laboratories, the most recent being the production of a combined vaccine for simultaneous immunization against tetanus, diphtheria, whooping cough and poliomyelitis.

Facilities are maintained for investigation in relation to public health matters which are inconvenient or impracticable to handle at the Commonwealth Health Laboratories or the School of Public Health and Tropical Medicine.

The Laboratories serve as a national centre for the maintenance in Australia of International Standards of the Permanent Commission on Biological Standards (World Health Organization). They act as a regional reference centre for W.H.O. in collating reports of the prevalence of certain infectious diseases, and provide facilities for the identification of these diseases.

Veterinary biological products produced at the Laboratories have given the lead to other producers in Australia, resulting in the diminution of incidence of a number of serious infectious stock diseases.

4. The Commonwealth Health Laboratories.—Health Laboratories, of which there are fourteen, are situated in the following towns: Albury, Bendigo, Cairns, Canberra, Darwin, Hobart, Kalgoorlie, Launceston, Lismore, Port Pirie, Rockhampton, Tamworth, Toowoomba and Townsville. They were established as an essential part of the quarantine

system, but were also to undertake research into local health problems and to provide doctors of each district with up-to-date facilities for laboratory investigation and diagnosis. It was realized that co-operation between the general practitioner, with his clinical observations and knowledge of the environment of disease on the one hand, and the staff of a well-equipped laboratory on the other, is essential to the investigation and control of disease.

From this standpoint, the Laboratories have already proved their value in the determination of leptospirosis and endemic typhus in North Queensland, in the investigation of special local problems in Darwin, of undulant fever throughout Australia, of silicosis and tuberculosis at Kalgoorlie and of plumbism at Port Pirie. In these investigations, close co-operation has existed with State and local health and hospital services, especially in Queensland, where collaboration has yielded exceptionally valuable results in differentiating the groups of fevers previously unclassified in that State. In this investigational work, as well as in more routine activities, the Laboratories have at their disposal the full resources and technical and specialist facilities available at the Commonwealth Serum Laboratories and the School of Public Health and Tropical Medicine, Sydney.

These laboratories are unique in that, with the exception of the use of X-rays, they cover all the fields of diagnostic requirements, namely, pathology, public health, haematology, parasitology, mycology, bacteriology and biochemistry.

5. Commonwealth Acoustic Laboratories.—Sponsored by the National Health and Medical Research Council, the Acoustic Research Laboratory, Sydney, investigated inter-communication difficulties and noise problems in aircraft and tanks (1942-46). It then investigated the problem of congenital deafness in children resulting from maternal rubella. The Department of Health took over this laboratory in January, 1947, and subsequently established branch laboratories in all other State capitals.

The Acoustic Laboratories Act 1948 gave the Minister for Health the right to establish, maintain and operate, within the Commonwealth, acoustic laboratories for scientific investigations, including tests in respect of hearing aids and their application to the needs of individuals, and in respect of problems associated with noise as it affects individuals. In 1949, the Government approved the provision and maintenance of hearing aids, without charge, to deaf school and pre-school children. This service has since been extended to those whose hearing loss is discovered after leaving school, but who are still under 21 years of age. The Laboratories' functions also include:—(1) provision and maintenance of hearing aids on behalf of Repatriation and other Commonwealth Departments; (2) assistance to the State Education Departments in measuring deafness by providing and maintaining portable audiometers; (3) the making of hearing tests of Civil Aviation aircrew as required by international agreement; and (4) the making of independent tests on behalf of State and other authorities.

The Sydney Laboratory is responsible for staff training, production of equipment, calibration of hearing-aids and audiometers, and the technical administration of branch laboratories.

6. Commonwealth X-ray and Radium Laboratory.—The Commonwealth Radium Laboratory was established in 1929 by the Commonwealth Department of Health to act as the custodian of radium and to ensure its equitable distribution and satisfactory use.

A total of 10 grams of radium, purchased in 1928 by the Commonwealth Government for use in treatment and research, is distributed on loan to treatment centres throughout Australia. Under the terms of this loan, treatment at well-equipped clinics is available to all persons requiring it, irrespective of their ability to pay. This work is co-ordinated by the Department. From time to time, portions of the original radium holding have been remounted by the Department in forms more suitable for recently developed techniques.

In 1935, the Commonwealth Department of Health extended the work of the Commonwealth Radium Laboratory to include the investigation of the physical problems of X-ray therapy. This laboratory, known since then as the Commonwealth X-ray and Radium Laboratory, is maintained by the Commonwealth Department of Health. It is specifically designed for work with X-rays, radium and radio-isotopes, and is amply provided with all necessary equipment for research work, including a 400 kV. high-tension generator. The free-air chamber which acts as the Australian standard X-ray dosimeter is maintained in the Laboratory.

Since 1939, the functions of the Laboratory have included investigations of the physical aspects of the diagnostic use of X-rays with particular emphasis on miniature radiography and high-kilovoltage techniques.

The Laboratory co-operates closely with the local physical services which have been developed in the other capital cities of Australia to provide local facilities for the production of radon, for the calibration of X-ray therapy equipment, and for the measurement of radiation exposure of those who work with X-rays and radioactive materials.

A radon service has been operated by the Laboratory since its inception. During the year 1959-60, 32,150 millicuries of radon were prepared and issued from the Laboratory in the form of implants, needles and tubes for use in Victoria, Tasmania, South Australia and Western Australia. A further 23,233 millicuries were issued by the associated centres in Sydney and Brisbane. The corresponding figures for 1958-59 were 66,646 and 23,776 millicuries respectively. The issue of radon from a few centres to serve hospitals all over the continent is an Australian development and enables very efficient use to be made of the radium available.

Through the development of atomic energy programmes overseas, supplies of radio-isotopes have been available for use in Australia since 1946. The radio-isotopes can be used medically, either as an alternative to natural radio-active materials such as radium and radon (sealed sources), or they may be administered orally or intravenously, in which case the selective up-take by a particular organ or tissue may be used to determine its condition and, in selected cases, to treat it. In addition, radio-isotopes are used in industry for the investigation of the efficiency of processes, for production control, and as research tools.

The importation of radio-isotopes is restricted under the Customs (Prohibited Imports) Regulations, approval for importation being given through the Laboratory by the Director-General of Health after it has been established that the isotope will be used safely and usefully. Isotopes used in Australia are obtained from Great Britain, Canada and the United States of America, and are imported through the Laboratory as the central procurement agency.

During 1959-60, 54 different radio-isotopes were imported for all purposes. This represented 820 separate deliveries from overseas sources of supply. Of this number of shipments, 389 were for medical purposes, 411 for research purposes and 20 for industrial purposes. In 1958-59, the total deliveries were 660, of which 330 were for medical purposes, 284 for research purposes and 46 for industrial purposes. In addition to the 820 deliveries of radio-isotopes arranged by the Laboratory in the year 1959-60, 49 certificates of approval under the Customs (Prohibited Imports) Regulations were issued to permit the entry of radioactive materials imported directly by local firms from their overseas principals. These radioactive materials were for use in industry, medicine and research. In the year 1958-59, the corresponding figure was 55. In addition, in the year 1959-60, 41 certificates of approval were issued to the Australian Atomic Energy Commission to permit the entry of special radio-active materials, including calibrated reference sources, for use within that establishment. Eight shipments of static isotopes were also procured.

Bulk supplies of radio-isotopes for medical purposes are obtained regularly, and these are distributed by the Laboratory as individual doses for use on patients throughout Australia in accordance with a policy developed by the Committee on Radio-isotopes of the National Health and Medical Research Council. These radio-isotopes are issued free of charge.

Six different radio-isotopes were imported in the year 1959-60 for medical purposes, labelled compounds of radio-iodine, radio-phosphorus and radio-colloidal gold being in greatest demand. However, the use of radio-colloidal gold for therapeutic purposes is decreasing, as colloidal solutions of chromic phosphate and zirconium phosphate labelled with radio-phosphorus are being used as the preferred alternative. During 1959-60, the demand continued for special compounds labelled with radio-iodine and for radio-chromium, radio-iron and radio-cobalt labelled vitamin B12.

In all, approximately 7,300 individual doses of radio-isotopes were issued by the Laboratory during 1959-60 for use on patients. The corresponding figure for 1958-59 was approximately 6,400.

The use of radio-isotopes in research and industry is also steadily increasing.

Investigations of the degree of protection necessary in particular applications of X-rays and radio-active materials continue to be an important activity of the Laboratory. It prepares specifications of the protection facilities necessary in departments and laboratories employing ionizing radiation in medicine, research and industry, and carries out measurements of radiation levels in existing departments and laboratories. A film badge service to measure the radiation dose received by those exposed to ionizing radiation is maintained. In 1959-60, 21,351 film badges were processed and assessed. The corresponding figure for 1958-59 was 18,049 films.

The Laboratory has an extensive library of special radiological literature and issues library bulletins at appropriate intervals. Technical communications on topics related to its functions are issued from time to time to medical men engaged in the clinical investigation and treatment of cancer, and to research workers and those in industry interested in applications of radiation.

Officers of the Laboratory serve on a number of committees, both national and international. The services of the Laboratory are available to all who work with ionizing radiation.

7. The School of Public Health and Tropical Medicine.—In March, 1930, the Commonwealth Government, under an agreement with the University of Sydney, established a School of Public Health and Tropical Medicine at the University of Sydney, for the purpose of training medical graduates and students in the subjects of public health and tropical medicine. The organization of the Australian Institute of Tropical Medicine at Townsville was merged in the new school, and the staff, equipment and material were transferred to Sydney.

The School comprises sections of Preventive Medicine, Tropical Medicine, Occupational Health, Environmental Health, Biochemistry, Bacteriology and Pathology, Parasitology, Medical Entomology and Medical Statistics. The Child Welfare section of the Institute of Child Health is located at the School, with which it is closely associated. The Occupational Health Section undertakes surveillance of the health of persons employed at the Small Arms Factory, Lithgow, and at the Munitions Filling Factory, St. Mary's. The library, which includes approximately 17,000 bound volumes and a large collection of official and institutional papers and reports, forms an important information centre in the subjects of public health and tropical medicine.

The work of the school comprises both teaching and investigation. Courses are held for the university post-graduate diploma in public health and the diploma in tropical medicine and hygiene. Lectures are given in public health and preventive medicine as prescribed for the fifth year of the medical curriculum. Courses are also provided in hygiene and social medicine for students of architecture and social studies, in tropical medicine for lay officers, nurses in tropical service, and missionaries, and in industrial health for engineering students. Training is also provided for certain personnel of the armed services, for laboratory workers from various services and institutions, and for post-graduate nursing diploma students.

Investigation covers a wide field of public health and medical subjects, both in the laboratory and in the field. Field work has been carried out in Australia and in Papua, New Guinea, Norfolk Island and Nauru in co-operation with the local administrations and the South Pacific Commission. *Limited accommodation and other facilities for investigation can be made available at the school for independent research workers.*

8. Institute of Child Health.—The institute, which was established early in 1950 in association with the School of Public Health and Tropical Medicine, Sydney, is located at the Royal Alexandra Hospital for Children, where a special teaching and research unit with the necessary ancillary services was made available by the Board of the Hospital.

The Director of the Institute is a senior honorary paediatrician on the staff of the Hospital, and thus has access to the 430 beds for teaching purposes. He is also the Professor of Child Health in the University of Sydney.

The Director is required to co-ordinate and control under-graduate and post-graduate teaching in paediatrics and child health, and thus the Institute and its staff are brought into close contact with each group of medical students who attend the Children's Hospital for 10 weeks tuition in paediatrics and child health.

In the 10 years since its foundation, the staff of the Institute has carried out a number of substantial research projects, including the natural history and prevention of rheumatic fever in childhood, accident prevention, endemic goitre, endocrine disorders and stress in children. All told, some 90 scientific papers describing the research work have been published in Australian and overseas scientific journals.

The Institute and its staff have come to be recognized as an authoritative source for advice and information on many matters relating to paediatrics and child health. The Director and senior members have acted as consultants to Medical Schools of Universities and to Commonwealth and State Authorities and on missions for the World Health Organization to a number of foreign countries. At present, the staff consists of the Director, a Senior Medical Officer, two other medical officers (full time), four part-time medical officers, a social psychologist, a social worker, and clerical and stenographic staff.

9. **Commonwealth Bureau of Dental Standards.**—This laboratory is concerned with research, standards, and testing, related to dental and allied materials and processes. It became part of the Department of Health in January, 1947, but for the preceding eight years it was sponsored by the National Health and Medical Research Council. During that time, the former Dental Materials Research Laboratory established itself as a recognized authority in its special field and proved to be of particular value to the defence services, government departments, the dental profession and manufacturers of dental products. By maintaining the quality of dental materials and improving techniques for their use, the Bureau continues to assist the dentist in his service to the community—a service that calls for restorations and appliances of a high degree of precision and permanence under very exacting conditions.

The functions of the Bureau are: (1) original research into dental equipment, materials, techniques and processes; (2) regular reporting of the results of these investigations in recognized Australian scientific journals; (3) the development of specifications for dental materials and equipment, through the Standards Association of Australia, in consultation with a committee representing the Commonwealth Department of Health, the Australian Dental Association, and manufacturers and distributors; and (4) the provision of a consultative service and testing facilities for manufacturers and distributors of dental materials with a view to assisting them in the improvement of existing products and the development of new materials.

10. **The Australian Institute of Anatomy.**—The Australian Institute of Anatomy is situated in a building erected in Canberra by the Commonwealth Government under the Zoological Museum Agreement Act of 1924. Prior to the passing of this Act, the Commonwealth Government had expressed regret that the Australian nation possessed neither a collection of specimens of the unique and fast disappearing fauna of Australia, nor a museum in which such specimens could be preserved for future generations. Sir Colin MacKenzie, the first Director of the Institute of Anatomy, presented his entire private collection of Australian fauna to the Commonwealth Government. This gift was housed in the Institute. The Institute became part of the Commonwealth Department of Health in 1931.

The original collection has been greatly augmented. A list of gifts to the Australian nation may be found in Official Year Book No. 39, page 1277. In addition to these donations of material, there have been several endowments for orations and lectures, particulars of which are shown in previous issues of the Official Year Book.

The Institute consists of a museum section and a laboratory section. In the museum section, which is open to the public, a portion of the original collection of anatomical specimens assembled by Sir Colin MacKenzie is displayed, together with ethnological collections which have been added since the foundation of the Institute. The material has been arranged to present simple lessons in human hygiene, to display the anatomical features and peculiarities of Australian fauna, and to display aspects of the character of Australian aborigines and natives of Papua and New Guinea.

A number of Health Department sections are now situated in the Institute. These include the Museum and Medical Artistry Section, the Nutrition Section, the Commonwealth Health Laboratory for the Australian Capital Territory, and a Veterinary Laboratory.

The scientific research work of the Institute is now concentrated on problems of nutrition. It takes the form of field surveys of the dietary status of the Australian population and laboratory investigations into the biochemistry of nutrition and metabolism.

§ 4. Control of Infectious and Contagious Diseases.

1. **General.**—The provisions of the various Acts with regard to the compulsory notification of infectious diseases, and the precautions to be taken against the spread thereof, may be conveniently dealt with under the heading of quarantine and notifiable diseases, including venereal diseases.

2. **Quarantine.**—The Quarantine Act is administered by the Commonwealth Department of Health, and has three sections of disease control, as follows:—(i) human quarantine which controls the movements of persons arriving from overseas until it is apparent that they are free of quarantinable disease; (ii) animal quarantine, which controls the importation of animals and animal products from overseas and the security of other animals present on vessels in Australian ports; and (iii) plant quarantine, which regulates the conditions of importation of all plants and plant products with the object of excluding plant diseases, insect pests and weeds.

In respect of interstate movements of animals and plants, the Act becomes operative only if the Governor-General considers that Commonwealth action is necessary for the protection of any State or States, and, in general the administration of interstate movements of animals and plants is left in the hands of the States.

(i) *Human Quarantine.* All passengers and crews arriving in Australia from overseas, whether by air or sea, are subjected to a medical inspection for the purpose of preventing the introduction of disease into Australia. At the major ports, full-time quarantine officers carry out the work, but in the minor ports local doctors act as part-time quarantine officers. In each State, quarantine activities are controlled by the Commonwealth Director of Health, who is a medical officer of the Commonwealth Department of Health.

The main concern of the examining officers is to detect cases of the quarantinable diseases smallpox, cholera, yellow fever, plague and typhus fever. These diseases are not endemic to Australia, and it is of great importance to prevent their entry. Quarantine stations at the major ports and at Darwin and Townsville are kept ready for occupation at all times. In addition, persons arriving in Australia and suffering from infectious diseases such as chicken pox, mumps, scarlet fever and measles are directed to appropriate care and placed in isolation where necessary.

The increasing use of air travel has created particular quarantine problems. Before the use of air transport, persons suffering from an infectious disease would show symptoms on arrival and before disembarkation. Passengers travelling by air, however, can arrive well within the incubation period, and they are, therefore, required to be vaccinated against smallpox before departure. Those from an area infected with cholera or yellow fever are required to be inoculated, in addition, against the particular disease prevalent in that area. They are also required to report any sickness which they might suffer within the fourteen days after arrival. Passengers arriving in Australia by sea are also required to be vaccinated against smallpox, but exemption is granted to those who hold religious convictions against vaccination or who are suffering from a medical condition which makes vaccination undesirable. All passengers, whether they arrive by sea or air, are required to give their intended place of residence, so that they may be traced if a case of disease occurs among the passengers on the aircraft or ship by which they travelled to Australia.

The number of cases of infectious (non-quarantinable) diseases which were discovered among the passengers and crew of overseas vessels and aircraft calling at Australian ports during the year ended 30th June, 1960, and during the preceding four years, are shown in the following tables.

HUMAN QUARANTINE: CASES OF INFECTIOUS (NON-QUARANTINABLE) DISEASES ON OVERSEA VESSELS AND AIRCRAFT CALLING AT AUSTRALIAN PORTS, YEAR ENDED 30th JUNE, 1960.

Disease.	Number of Oversea Vessels and Aircraft on which Cases were Found.	Number of Cases of Infectious Disease.	
		Passengers.	Crew.
Amoebic Hepatitis and Colitis ..	1	1	1

1959	2,826	1,938	63	344	9
1960	3,046	2,063	61	234	12

(ii) *Animal Quarantine.* Animal quarantine, authorized by the provisions of the Quarantine Act 1908–1950, aims at preventing the introduction or spread of animal diseases. It covers the importation of all animals, raw animal products and biological cultures associated with animal diseases, and goods associated with animals.

Of the domesticated animals, only horses, dogs, cats and poultry are admitted from a limited number of countries depending on diseases present in the country of origin. All must be accompanied by health certificates which include prescribed tests. On arrival in Australia, they are subject to quarantine detention.

Zoological specimens are imported into registered zoos, where they remain in permanent quarantine. Circuses are also registered if exotic species of animals are kept. In a somewhat similar manner, animals for scientific purposes are imported to approved laboratories. All these premises are kept under constant surveillance. Raw animal products such as hair, special types of wool, skins and hides, are specially treated under quarantine control, while such items as raw meat, sausage casings and eggs, which cannot be sterilized, are admitted from very few countries. Other items, such as harness fittings, fodder, and ship's refuse, are treated to destroy any possible infection.

The Animal Quarantine Service is also responsible for the health certification of animals for export to overseas countries in accordance with their various requirements.

The Division of Veterinary Hygiene was created in 1926 to deal with the administration of animal quarantine. Formerly, the full responsibility for this administration fell on the Director of Quarantine. The organization of the Division provides an excellent example of Commonwealth and State co-operation. The central administration is situated within the Health Department at Canberra, with a Director, an Assistant Director, and Veterinary Officers. The Principal Veterinary Officer of the Department of Agriculture in each State is appointed Chief Quarantine Officer (Animals) of the State, and members of his staff Quarantine Officers (Animals). These State officers carry out the quarantine policy formulated by the central administration. Quarantine accommodation is provided in permanent animal quarantine stations at each capital city.

The Division participates in world-wide international notification of the more serious contagious diseases of animals and maintains a census of such diseases throughout the world. Information regarding animal diseases and parasites in Australia is also collected and disseminated by means of service publications. Consultation on technical matters is maintained with various scientific institutions, notably the Commonwealth Scientific and Industrial Research Organization. In matters of policy and the quarantine control of imports, there is a close liaison with the Department of Customs and Excise.

The Division collaborates with the "General" and "Plant" divisions of the quarantine service. Many diseases of animals are communicable to man, and for this reason "Animal" and "General" quarantine administration are in some respects inseparable. Similarly the interests of "Animal" and "Plant" divisions overlap, many items such as insects, fodder and straw being the subject of combined control.

In each alternate year, the Director of the Division convenes the Biennial Conference of Principal Commonwealth and State Veterinarians, which meets under the auspices of the Australian Agricultural Council to discuss problems of animal health and disease control and animal quarantine.

(iii) *Plant Quarantine.* Since 1st July, 1909, the importation into Australia of all plants or parts of plants, cuttings, seeds and fruits, whether living or dead, has been subject to an increasingly stringent quarantine with the object of preventing the introduction of insect pests, plant diseases and weeds not yet established in this country. Under the Quarantine Act 1908-1950, quarantine inspectors are required to examine all plant material at the first port of entry and to release only material free from diseases and pests. Everyone entering Australia is required to declare if he or she has any plant material in luggage or personal effects. Heavy penalties are laid down for those found evading the regulations. All plant material entering as cargo must also be declared.

When the Commonwealth became responsible for all plant quarantine, the State Governments agreed to co-operate by providing and maintaining inspection facilities and personnel, for which they are reimbursed by the Commonwealth. In 1921, the administration of the regulations came under the newly-formed Department of Health, and in 1927 the Division of Plant Quarantine was created, under a Director who is responsible for policy and legislation and for co-ordinating the work of the State officers, who carry out the detailed administration in their capacity as Commonwealth officers.

Any plant material found carrying diseases or pests, or suspected of doing so, may be ordered into quarantine for remedial treatment, or, if the treatment be impracticable, may be destroyed. The cost of treatment is met by the importer. Regulations governing the different types of plants are based on the following broad principles:—(a) The importation of plants likely to be infected with plant diseases, noxious fungi or poison plants is prohibited. (b) Agricultural seed must conform to standards of purity, insect pest and disease freedom. (c) Many commodities such as hops, cotton, peanuts in shell, potatoes, certain crop seeds, vines and specified plants may be imported only by approved importers under special conditions. (d) Certain plant products such as bulbs and timber (in logs or sawn) from specified areas may be imported only if accompanied by certificates showing that prescribed treatment has been given in the country of origin. (e) All nursery stock, including bulbs, must be grown in post-entry quarantine. It may only be imported by approved importers who are registered for this purpose. The numbers of plants which may be imported in any one year are limited.

3. *Notifiable Diseases.*—(i) *General.* (a) *Methods of Prevention and Control.* Provision exists in the Health Acts of all States for the compulsory notification of certain infectious diseases and for the application of preventive measures. When any such disease occurs, the local authority must be notified at once, and in some States notification must be made also to the Health Department.

As a rule, the local authorities are required to report from time to time to the Central Board of Health in each State on the health, cleanliness and general sanitary state of their several districts, and on the appearance of certain diseases. Regulations provide for the disinfection and cleansing of premises, and for the disinfection or destruction of bedding, clothing or other articles which have been exposed to infection. Regulations also provide that persons suspected to be suffering from or to be carriers of infectious disease must submit to clinical and laboratory examination. Persons suffering from certain communicable diseases, for example, small pox and leprosy, may be detained in isolation.

(b) *Diseases Notifiable and Cases Notified in each State and Territory.* The following table, which has been compiled by the Commonwealth Department of Health, shows for each State and Territory the diseases notifiable in 1959 and the number of cases notified. Diseases not notifiable in a State or Territory are indicated by an asterisk.

**DISEASES NOTIFIABLE IN EACH STATE AND TERRITORY OF AUSTRALIA

Typhus—flea, mite or tick borne	2	..	11	..	6	19

* Not notifiable.

NOTE.—No cases of cholera, plague, smallpox, epidemic typhus or yellow fever were notified.

(ii) *Venereal Diseases.* The prevention and control of venereal diseases is the responsibility of State Health Departments. The necessary powers for the purpose are provided either by a special Venereal Diseases Act or by a special section of the Health Act. These Acts make it obligatory upon the patient to report for and continue under treatment until certified as cured. Treatment of venereal disease must be by a registered medical practitioner. Facilities for treatment of venereal disease free of charge may be arranged at subsidized hospitals or at special clinics. Drugs and instruments required for the treatment of venereal disease may be sold only by a registered pharmaceutical chemist on the prescription of registered medical practitioners.

Penalties may be imposed on a patient who fails to continue under treatment. Clauses are inserted in the Acts which aim at preventing the marriage of any infected person, or the employment of an infected person in the manufacture or distribution of foodstuffs.

§ 5. Commonwealth Grants to Organizations Associated with Public Health.

1. *General.*—In addition to providing the services mentioned in sections 1–4 above, the Commonwealth Government gives financial assistance to certain organizations associated with public health. Examples of organizations included in this category are the National Fitness Organizations, the Royal Flying Doctor Service of Australia, the Red Cross Blood Transfusion Service, and the Lady Gowrie Child Centres.

2. **National Fitness.**—In 1938, arising from a recommendation of the National Health and Medical Research Council, the Commonwealth Government appointed a Commonwealth Council for National Fitness, under the Commonwealth Minister for Health, to effect collaboration of Commonwealth, State and Local Government authorities in the National Fitness Movement. Following the recommendations of the first Commonwealth Council meeting in 1939, the Commonwealth Government agreed to make available an annual sum of £20,000 for five years, and grants were allocated to each State for purposes of organization and to each of the six Australian universities to establish lectureships in physical education. In June, 1942, this grant was increased to £72,500 to include grants to State Education Departments and for the work in the Australian Capital Territory.

The functions of autonomous National Fitness Councils operating in each State are connected with voluntary leader training, camping and hostels, assisting the work of voluntary youth and amateur sports organizations, and providing advisory services to these organizations.

The six State education departments spend their Commonwealth grants to assist the promotion of physical education programmes in schools and teachers' colleges. This is done mainly through the organization of training courses for teachers and the development of school camping, which in most States is part of the regular school physical education programme. In New South Wales and Victoria, holiday play centres and camps have become a special feature of the programmes, while Queensland has led the way in the provision of school swimming pools financed in co-operation with parent organizations.

In the universities, departments of physical education provide either a diploma course in physical education or a major course in physical education as part of a degree course.

An annual grant of £2,000 is allocated in the Australian Capital Territory, and is distributed on a £1 for £1 basis to youth and sports organizations for the purchase of equipment, the development of coaching schemes, and the extension of club and camp facilities.

3. **Royal Flying Doctor Service of Australia.**—The purpose of the Royal Flying Doctor Service of Australia is to provide medical and dental services to white and aboriginal persons in isolated areas. Most remote homesteads are equipped with two-way radio sets which they use for receiving ordinary radio programmes, participating in the School of the Air, and for contacting each other. In cases of minor illness or injury, they also use these sets to seek medical advice. If the illness or injury is serious, a doctor flies to the homestead and, if necessary, flies the patient to the nearest hospital. Standard medicine chests are supplied by the service. Each chest contains a first-aid book and instructions on the use of the various drugs and medical supplies in it. Further instructions are given by doctors over the air.

From time to time, special purpose work is undertaken in connexion with flood relief, searching for lost parties and co-ordinating cattle movements.

The service is not conducted with a view to profit. In some sections, small charges are made for particular services or a fixed annual charge is levied on graziers. Other sections rely on voluntary contributions from those who use their services. Donations and government contributions help to provide much of the overhead and capital expenditure incurred each year.

The Commonwealth has made an annual grant to this organization for operational expenses since 1936. Prior to that, from 1928 to 1931, the Commonwealth subsidized the Australian Inland Mission Aerial Medical Service. The Commonwealth annual grant to the Royal Flying Doctor Service of Australia towards maintenance was increased from £25,000 to £40,000 per annum for four years from 1st July, 1958. The Commonwealth grant towards capital expenditure was increased from £15,000 to £27,500 per annum for the same period. This capital expenditure grant is made on a £1 for £1 basis, in respect of approved projects.

The Royal Flying Doctor Service of Australia is conducted by a federal council comprising representatives of six sections, namely Queensland, New South Wales, Victoria, South Australia, Western Australia and the Eastern Goldfields of Western Australia. The Queensland, New South Wales and South Australian sections are centred in their own States but in Western Australia there are three centres, that in the far north being under the control of the Victorian section, and that in the south-east under the control of the Eastern Goldfields section. The third one, which has bases at Port Hedland and Meekatharra, is sponsored by the Western Australian section.

4. **Red Cross Blood Transfusion Service.**—The Australian Red Cross Society conducts a blood transfusion service in all States.

Before 1952–53, the cost of the Red Cross Blood Transfusion Service was borne by the Red Cross Society with assistance from the State Governments. In 1952, the Commonwealth made an amount of £50,000 available to the Red Cross Society through the State Governments. The States were to continue to assist the society at the same level as previously and make arrangements with the society to share any deficit still remaining.

The Commonwealth recognized that the proper maintenance of a blood transfusion service was of the utmost importance to the welfare of the community, and that the service was one eminently suited for operation by the Australian Red Cross Society. In March, 1954, therefore, the Commonwealth offered each State Government a grant equal to 30 per cent. of the certifiable operating expenses incurred by the Society in the conduct of the blood transfusion service in that State. The grant was to be made subject to the conditions that the government of the State concerned agreed to meet 60 per cent. of the cost of operating the service in that State, leaving the society to meet the remaining 10 per cent. of the cost. All States accepted this proposal. The payments made by the Commonwealth government to the State governments in 1959–60 were as follows:—New South Wales, £36,644; Victoria, £43,691; Queensland, £24,494; South Australia, £16,116; Western Australia, £14,923; Tasmania, £4,925; Total, £140,793.

5. **Lady Gowrie Child Centres.**—In 1940, the Commonwealth Government established a pre-school demonstration centre in each of the six capital cities. These centres are known as the Lady Gowrie Child Centres and are administered by the Australian Pre-school Association for the Commonwealth Department of Health.

The specialized function of the centres is that of demonstration and research, and the programmes are carried out under the supervision of the Federal Pre-school Officer. Each centre is concerned with a study of the factors promoting and retarding physical and mental health in young children, and in demonstrating an educational health programme based on the developing needs of children aged 3 to 6 years.

The centres are used for observation by university students of Medicine, Psychology, Education, Social Studies, Architecture, Physical Education, Teacher Training Colleges, Nursing Colleges and Domestic Science.

Fuller information concerning these centres was given in earlier issues of the Year Book (*see* No. 44, p. 536).

C. INSTITUTIONS.

§ 1. General.

In Australia, institutions related to public health may be classified to three groups: (a) State, (b) public and (c) private. To the first group belong those institutions wholly provided for by the State, such as the principal mental hospitals in the various States and the Government and leased hospitals in Western Australia. To the second group belong public institutions of two kinds, namely:—(i) those partially subsidized by the State or by State endowments for maintenance, but receiving also private aid, and (ii) those wholly dependent upon private aid. To the first of these two kinds belong such institutions as the principal metropolitan hospitals; in the second are included institutions established and endowed by individuals for the benefit of the needy generally. All institutions of a private character are included in the third group. A more or less accurate statistical account is possible in classes (a) and (b), but in respect of (c) general tabulation is impossible. Owing to differences in the dates of collection and tabulation, it is impossible to bring statistics of some charitable institutions to a common year.

§ 2. Public Hospitals (other than Mental Hospitals).

1. **General.**—All the State capitals have several large and well-equipped hospitals, and there is at least one in every important town. In large centres, there are special hospitals for infectious diseases, tubercular patients, women, children, and patients suffering from chronic diseases.

The particulars given herein refer to public hospitals at the latest available date and include all institutions affording hospital relief, whether general or special, with the exception of mental hospitals, repatriation hospitals, and private hospitals conducted commercially.

2. Number, Staff and Accommodation.—Details regarding the number of public hospitals, staff, and accommodation for the year 1958–59 are given in the following table:—

PUBLIC HOSPITALS: NUMBER, STAFF AND ACCOMMODATION, 1958–59.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.

In addition to those admitted to the hospitals, there are large numbers of out-patients treated. During 1958–59, there were 1,132,024 out-patients treated in New South Wales, 568,194 in Victoria, 571,013 in Queensland, 96,761 in South Australia, 119,000 (estimated)

in Western Australia, 86,064 in Tasmania, 82,468 in the Northern Territory and 10,167 in the Australian Capital Territory, making an estimated total for Australia of 2,665,691. The figures quoted refer to cases, as distinct from persons and attendances.

4. **Revenue and Expenditure.**—Details of the revenue and expenditure for the year 1958–59 are shown in the next table. The revenue includes the Commonwealth Hospital Benefits Scheme.

5. **Summary.**—A summary, for the years 1954–55 to 1958–59, of the number of public hospitals in Australia, medical and nursing staffs, beds, admissions, in-patients treated, out-patients, deaths, average daily number resident, revenue and expenditure is given in the following table.

PUBLIC HOSPITALS: AUSTRALIA.

Particulars.	1954–55.	1955–56.	1956–57.	1957–58.	1958–59.
Hospitals ..	709	721	731	737	735
Medical Staff ..	7,738	8,103	8,573	9,094	9,406
Nursing Staff ..	27,566	29,070	31,006	32,436	34,372
Beds and cots ..	52,979	53,550	55,801	56,618	58,544
Admissions during year ..	1,008,955	994,466	1,028,320	1,085,503	1,133,172
Total in-patients (cases) treated	1,046,171	1,032,668	1,065,045	1,123,799	1,172,861
Out-patients (cases) (a) ..	2,651,000	2,587,000	2,583,600	2,641,000	2,665,691
Deaths ..	32,489	31,417	33,267	33,689	35,848
Average daily number resident	38,179	38,341	39,092	40,056	41,659
Revenue .. £'000	(b) 63,998	71,612	82,182	87,692	90,512
Expenditure .. £'000	(b) 64,323	74,568	83,922	86,817	90,157

(a) Partly estimated.

(b) Excludes loan receipts and expenditure for New South Wales.

§ 3. Leper Hospitals.

Isolation hospitals for the care and treatment of persons suffering from Hansen's disease (leprosy) are located at Little Bay, New South Wales; Fantome Island, North Queensland; Derby, Western Australia; and East Arm Settlement, Northern Territory. Special wards for the isolation of leprosy patients have been provided at Fairfield (Victoria) and Wooroloo (Western Australia). Peel Island (Queensland) lazaret was closed down on 5th August, 1959, the patients being transferred to the chronic diseases section of South Brisbane Hospital. At the end of 1960, there were seven cases at Little Bay, 19 at Fantome Island, 159 at Derby, two at Wooroloo, 173 at East Arm Settlement and six at Fairfield. Of the 366 cases, 305 were full-blood aboriginals, 38 were half-caste aboriginals, three were South Sea Islanders, one was an Asian and nineteen were Europeans.

§ 4. Mental Hospitals.

1. **General.**—The methods of compiling statistics of mental patients are fairly uniform throughout the States, but there is an element of uncertainty about possible differences in diagnosis in the early stages of the disease. Statistics of mental hospitals (except those relating to revenue and expenditure) include particulars of the two licenced houses in New South Wales. The figures exclude those of reception houses and observation wards in gaols. There are no mental hospitals in the Northern Territory or the Australian Capital Territory.

2. **Hospitals, Staff and Accommodation.**—Particulars regarding the number of hospitals, the medical and nursing staff, and accommodation are given in the following table for the year 1959. Figures for Victoria and Western Australia relate to 31st December, 1959. Figures for the other States relate to 30th June, 1959.

MENTAL HOSPITALS: NUMBER, STAFF, ACCOMMODATION, 1958-59.

Average daily number of patients resident—							
Males	5,995	4,040	2,405	1,376	1,000	375	15,191
Females	5,875	4,286	1,903	1,203	706	389	14,362
Persons	11,870	8,326	4,308	2,579	1,706	764	29,553
Number of patients at end of year per 1,000 of population—							
Males	3.61	3.39	3.36	3.06	2.95	2.14	3.34
Females	3.73	3.54	3.05	2.67	2.50	2.42	3.33
Persons	3.67	3.46	3.21	2.87	2.73	2.28	3.33
Average number of patients resident in mental hospitals per 1,000 of population—							
Males	3.21	2.89	3.30	2.99	2.74	2.12	3.02
Females	3.16	3.11	2.73	2.68	2.03	2.37	2.92
Persons	3.19	3.00	3.02	2.84	2.39	2.24	2.97

(a) Year ended 31st December, 1959.

(b) Includes persons treated at the Epileptic Home.

Persons who are well advanced towards recovery are allowed to leave the hospitals and live with their relatives or friends, but they are under supervision and their names are kept in the records. These persons have been included in the table above as patients at the end of the year.

4. Revenue and Expenditure, 1958-59.—Mental hospitals are maintained by the State Governments. They derive a small proportion of their revenue from other sources (chiefly patients' fees, pharmaceutical benefits and sale of farm produce), but in 1958-59 this source provided less than 8 per cent. of all their revenue. For a statement on the funds provided by the Commonwealth Government for mental hospitals, see para. 3. Mental Hospitals, page 666.

In New South Wales, the expenditure includes the cost of Broken Hill patients treated in South Australian mental hospitals:—

MENTAL HOSPITALS: FINANCES, 1958-59.

Revenue (excluding Government Grants)(a)	£ 862,221	803,873	916,201	1,026,689	1,070,673
Total Expenditure(a)	£ 13,397,004	15,579,361	17,553,438	18,236,114	18,195,831

(a) See footnote (a) above.

6. **Number of Mental Patients.**—The total number returned as under treatment at the end of each year shows a slight increase during the period, but the proportion to total population shows a slight decline. A more rational attitude towards the treatment of mental cases has resulted in a greater willingness in recent years to submit afflicted persons to treatment at an early stage, and an increase in the number of recorded cases, therefore, does not necessarily imply an increase in mental diseases. The difference between States in the number of patients in mental hospitals per 1,000 of population may also to some extent be the result of differences in practice. Figures for Victoria and Western Australia relate to 31st December of the year shown; figures for the other States relate to 30th June of the year shown.

(a) Includes persons treated at the Epileptic Home.

CHAPTER XVIII.

WELFARE SERVICES.

A. COMMONWEALTH EXPENDITURE ON SOCIAL AND HEALTH SERVICES.

§ 1. Introduction.

The Welfare services outlined in this chapter are those administered by the Commonwealth Department of Social Services. Particulars of benefits provided under the National Health Service appear in Chapter XVII.—Public Health, page 664.

§ 2. National Welfare Fund.

The National Welfare Fund was established by the National Welfare Fund Act 1943 to finance a scheme of national welfare. In introducing this measure to Parliament, the Prime Minister said that part of the scheme was to be introduced immediately, and part was to be deferred until after the end of the war. A certain balance, which would therefore accrue to the fund, would be invested in Commonwealth securities, and would thus provide finance for the war effort.

The fund operated from 1st July, 1943. At its commencement, it was used to finance funeral benefits and maternity allowances. Other social and health benefits were made a charge on the fund from time to time. At present, expenditure on all benefits except repatriation and a few minor social and health benefits is met from the fund. The fund is used only to finance the benefits themselves; it is not used to finance the cost of administering the benefits, or of capital works associated with the benefits.

For particulars of the income of the fund, see Chapter XXI, Public Finance, Division A, § 2, C., para. 6. The following table sets out expenditure from the fund during 1959-60.

(a) Payments for some Health Services to residents of the Northern Territory and the Australian Capital Territory are included in the amounts shown for States. (b) Includes special benefits to migrants in reception and training centres. (c) Includes payments to Bush Nursing Centres and Royal Flying Doctor Service. (d) Paid to the State Governments as a contribution towards the cost of surveys and the maintenance of institutions for the treatment of tuberculosis. (e) This item covers the cost of district laboratory services, the free supply of prophylactic materials and biological products (e.g., insulin, poliomyelitis and diphtheria prophylactics), the supply and maintenance of hearing aids for children, subsidies to voluntary organizations conducting home-nursing services, and certain costs associated with the blood transfusion services of the Australian Red Cross Society. (f) Includes £241,364 for the production of poliomyelitis vaccine, £80,000 for running expenses of the Blood Fractionation Plant at the Commonwealth Serum Laboratories and £53,616 for home-nursing service throughout Australia.

Expenditure from the fund during each of the years 1955-56 to 1959-60 is shown in the following table. A graph showing expenditure from the fund from 1943-44 to 1959-60 is to be found on page 699.

§ 3. Capital and Administrative Expenditure.

Particulars of Commonwealth capital expenditure on mental hospitals and the Anti-Tuberculosis campaign are given in Chapter XVII., Public Health (*see* pages 666 and 669). Grants are made to private organizations for the construction of homes for elderly people (*see* para. 4, p. 705).

Information concerning the cost of administering each benefit separately is not compiled. Particulars of the cost of administering the Department of Health and the Department of Social Services may be found in Chapter XXI., Public Finance, Division A, § 2, C., para. 5.

B. COMMONWEALTH SOCIAL SERVICES.

§ 1. Introduction.

Under the provisions of section 51 of the Constitution, the Commonwealth Government is empowered to legislate on:—

“(xxiii) Invalid and old-age pensions:

(xxiiiA) The provision of maternity allowances, widows' pensions, child endowment, unemployment, pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorize any form of civil conscription), benefits to students and family allowances:”.

The latter paragraph was inserted in the constitution after being accepted by the electors at a referendum on 28th September, 1946. The enabling Act was assented to on 19th December, 1946.

Before 1947, each social service benefit was paid under a separate Act. On 1st July, 1947, with the passage of the Social Services Consolidation Act 1947, all Acts providing social service benefits were amalgamated. This Act eliminated certain anomalies and obsolete provisions and changed the title “old-age pension” to “age pension”. The word “Consolidation” was dropped from the short title of the Act in 1954. The Act is at present styled the Social Services Act 1947-1960.

The social service benefits provided by the Commonwealth Government, and the date on which each came into operation, are:—

Age pension	1st July, 1909
Child endowment (for other than first child)	1st July, 1941
Child endowment (for first child)	20th June, 1950
Commonwealth Rehabilitation Service	10th December, 1948
Funeral benefit	1st July, 1943
Invalid pension	15th December, 1910
Maternity allowance	10th October, 1912
Sickness benefit	1st July, 1945
Special benefit	1st July, 1945
Unemployment benefit	1st July, 1945
Widows' pension	30th June, 1942.

§ 2. Age and Invalid Pensions.

Age pensions are payable to men, 65 years of age and over, and women, 60 years of age and over, who are British subjects and who have resided in Australia¹ continuously for at least 20 years, which need not be immediately prior to the date of claim for a pension. Absence in a Territory of the Commonwealth, any periods of absence during which a person's home remained in Australia, and absences in certain other circumstances including, in the case of a claimant who has had at least 18 years' residence, occasional absences aggregating up to 2 years plus 6 months for every year of residence in excess of 18 years, are counted as residence.

Invalid pensions are payable to persons, 16 years of age and over, who have resided in Australia for a continuous period of five years (including certain absences), and who are permanently incapacitated for work to the extent of at least 85 per cent., or permanently blind. If the incapacity or blindness first occurred outside Australia, except during a temporary absence, a total of 20 years' residence is necessary. Certain absences count as residence.

Aboriginal natives, other than those who are nomadic or primitive, are eligible for age and invalid pensions on the same conditions as other members of the community.

A pension is not payable to:—an alien; a person who has deprived himself of property or income in order to qualify for a pension; a person whose annual rate of income is £442 per annum (£884 per annum for a married couple) or more; a person who owns property, apart from his permanent home and other exempt property, valued at £4,620 or more (£9,240 for a married couple). A pensioner with dependent children may, in certain circumstances, have additional income of 10 shillings a week for each child under 16 years of age.

Since 6th October, 1960, the maximum rate of pension has been £260 per annum (£5 a week). The wife of an invalid pensioner (or of an age pensioner who is permanently incapacitated for work or permanently blind) may be granted a wife's allowance of not more than £91 per annum (£1 15s. a week). A child's allowance of £29 18s. per annum (11s. 6d. a week) is also paid to an invalid pensioner who is maintaining a child under 16 years of age. If an invalid pensioner is maintaining more than one child, his pension is increased, subject to the means test, by £26 per annum (10s. a week) for each additional child. Supplementary assistance of £26 per annum (10s. a week) is payable to single pensioners and to married pensioners whose spouses do not receive pension or allowance, if the pensioner pays rent and is considered to be entirely dependent on his pension. At 30th June, 1960, 407,650 age pensioners (76 per cent. of all age pensioners) and 70,151 invalid pensioners (87 per cent. of all invalid pensioners) were receiving the maximum pension (£247 at that date).

If a pensioner is an inmate of a benevolent home, £1 15s. a week of his pension is paid to him. The rest is paid to the home for his maintenance, except where he is a patient in an infirmary ward.

Age and invalid pensions (other than invalid pensions paid to blind persons) and allowances paid to wives of invalid pensioners (but not the child's allowance of 11s. 6d. a week) are subject to a means test which applies to income and to property. From March 1961, the means tests previously applied separately on income and property were merged into

one composite means test. The pension payable depends on the claimant's *means as assessed*. These consist of his annual rate of income plus a property component equal to £1 for each complete £10 of his net property above £200. A person's *means as assessed* may consist entirely of income, entirely of property component, or of various combinations of income and property component. The pension payable is calculated by deducting from the maximum annual rate of pension the amount by which the *means as assessed* exceeds £182. No pension is payable if the pensioner's property is £4,620 or more.

Certain types of income are excepted. The main exceptions are:—income from property; gifts or allowances from children, parents, brothers or sisters; benefits from friendly societies; child endowment or other payments for children; Commonwealth health benefits and amounts received from registered benefit organizations. The value of free board and lodging received by a pensioner is assessed as income of 12s. 6d. a week.

Certain types of property are disregarded. They include the permanent home of the pensioner, his furniture and personal effects, the surrender value (up to £750) of life insurance policies, the capital value of annuities or contingent interests and the value of any reversionary interests.

For the purposes of the means test, the income and property of a married person are considered to be half the total income and property of the husband and wife (unless they are legally separated or in other special circumstances. The pension is then assessed as for a single pensioner.

The following statement shows the rates of pension at 1st July, 1909, and the rates as they have been varied since that date, subject in all cases to income and property qualifications:—

(a) Excludes amounts payable for wives and children of invalid pensioners and supplementary assistance. (b) Additional pension of £6 10s. per annum (2s. 6d. a week) was payable to a pensioner with no income. Pensioners with income of less than 2s. 6d. a week were paid additional pension of 2s. 6d. less the amount of income. (c) Variation according to change in retail price index number. (d) Increase paid on 9th July, 1942, retrospective to 2nd April, 1942. (e) Rate restored to £70 4s. per annum under National Security (Supplementary) Regulations 112A—Statutory Rule 315 of 1943.

NOTE.—Provision for variations according to retail price index numbers was repealed on 6th April, 1944.

The number of age pensioners at 30th June, 1960, was 538,022, of whom 168,185 (or 31 per cent.) were males, and 369,837 (or 69 per cent.) were females. This was an increase of 24,233 for the year. Over a third of the increase was due to statistical adjustments in Victoria, Queensland and Western Australia, where the introduction of mechanical methods for paying pensions enabled the Department to make a complete count of the numbers receiving the different kinds of pensions and allowances. This revealed that a number of age pensioners had previously been shown incorrectly in these statistics as invalid pensioners. The adjustment between the two types of pensions has altered the numbers in each category, but the combined total of pensioners has not been affected to any significant extent.

During 1959-60, 52,472 age pension claims were granted, 39,357 pensions expired through cancellations and deaths, and 11,252 pensioners were transferred from the invalid pension list. Of the latter, 10,237 were due to the statistical adjustment referred to above.

The recorded ages of the 52,472 persons (19,812 males and 32,660 females) to whom age pensions were granted during the year 1959-60 varied considerably, ranging from 9,615 at age 60 to four who were over 97; 38,904 were in the 60-69 age-group. The conjugal condition of these new pensioners was as follows:—Males—single and divorced 2,385; married, 14,383; and widowed, 3,044; Females—single and divorced, 4,235; married, 18,026; and widowed, 10,399.

The number of invalid pensioners at 30th June, 1960, was 80,816 of whom 42,834 (or 53 per cent.) were males and 37,982 (or 47 per cent.) were females. During 1959-60, 14,416 invalid pension claims were granted, 6,271 pensions ceased through cancellation or death, and 11,252 invalid pensioners were transferred to the age pension list. Of the latter, 10,237 were due to the statistical adjustment. Pensioners in benevolent homes have been included.

The recorded ages of the 14,416 persons (8,891 males and 5,525 females) to whom invalid pensions were granted during 1959-60 varied widely, 1,215 (9 per cent.) were in the 16-19 years age-group, 2,437 (17 per cent.) were in the 20-44 years age-group, 7,255 (50 per cent.) were in the 45-59 years age-group, 2,765 (19 per cent.) were in the 60-64 years age-group, and 744 (5 per cent.) were over 65 years of age.

The conjugal condition of persons to whom invalid pensions were granted during the year was as follows:—males—single, 3,018; married, 5,278; and widowed, 595; females—single, 2,102; married, 2,598; and widowed, 825.

AGE AND INVALID PENSIONS, 30th JUNE, 1960.

(a) On 30th June, 1960, a number of invalid pensioners were transferred to their correct designation of age pensioners as follows:—Victoria, 4,843; Queensland, 4,908; and Western Australia, 486.

The sum disbursed in age and invalid pensions in 1959-60, including the amount paid to homes for the maintenance of pensioners and allowances to wives of invalid pensioners, represented an expenditure of £14 9s. 1d. per head of population as compared with £13 0s. 4d. in 1958-59.

The following table gives details of age and invalid pensions for the years 1955-56 to 1959-60:—

(a) Number of pensioners per 1,000 persons of pensionable age (males aged 65 years and over and females aged 60 years and over). (b) Includes age and invalid pensioners in benevolent homes.

(c) Includes allowances and supplementary assistance. (d) Excludes age pensioners in benevolent homes.

(e) Excludes invalid pensioners in benevolent homes. (f) On 30th June, 1958, 15,205

invalid pensioners in New South Wales were transferred to their correct designation of age pensioners.

(g) On 30th June, 1960, a number of invalid pensioners were transferred to their correct designation of age pensioners as follows:—Victoria, 4,843; Queensland, 4,908; and Western Australia, 486.

§ 3. Child Endowment.

A person who is resident in Australia and has the custody, care and control of one or more children under the age of 16 years, or an approved institution of which children are inmates, shall be qualified to receive an endowment in respect of each child under 16. There are provisions to meet cases of families divided because of divorce, separation, unemployment or death of a parent. There is no means test.

Twelve months' residence in Australia is required if the mother and the child were not born here, but this requirement is waived if the Department of Social Services is satisfied that they are likely to remain in Australia permanently. Where the child's father is not a British subject, endowment is payable if the child was born in Australia, if the mother is a British subject, or if the Department is satisfied that the child is likely to remain permanently in Australia.

Under certain conditions, endowment may be paid to Australians who are temporarily absent overseas. Endowment is payable to aboriginal natives unless they are nomadic or primitive.

From 1st July, 1941, the rate of endowment was 5s. a week for each child in excess of one in a family, and for each child under 16 in an approved institution. The rate was increased to 7s. 6d. a week in June, 1945, and to 10s. a week in November, 1948. Since June, 1950, the rates of endowment have been 5s. a week for the first child in a family, 10s. a week for each other child in a family, and 10s. a week for each child in an institution.

The number of families receiving child endowment at 30th June, 1960, was 1,476,835, an increase of 25,319 or 1.7 per cent. during the year. The following table shows, for each State and Territory, the number of claims for child endowment in force and the number of endowed children at 30th June, 1960.

CHILD ENDOWMENT: CLAIMS AND ENDOWED CHILDREN, 30th JUNE, 1960.

The following table shows, as at 30th June, 1960, the number of claims in force and the number of endowed children, classified according to the number of endowed children in the family group. The families included in the table are not necessarily made up entirely of the children of one marriage, but may include step-children, foster children, adopted children, and all children under the custody, care and control of the claimant.

CHILD ENDOWMENT: ENDOWED CHILDREN IN FAMILY GROUPS, 30th JUNE, 1960.

Total ..	64,746,227	617,656	65,363,883	62,531,977

The following table shows, for Australia, the number of claims, the number of endowed children and the annual liability at 30th June for each of the years from 1956 to 1960 and the actual expenditure for the years 1955-56 to 1959-60.

CHILD ENDOWMENT SUMMARY: AUSTRALIA.

At 30th June—	Family Group Claims.	Institutions.	Endowed Children.	Annual Liability for Endowment. (a)	Total Payments. (a) (b)
				£	£
1956 ..	1,339,807	392	2,875,664	57,349,773	(c) 60,380,685
1957 ..	1,378,169	397	2,978,191	59,516,769	57,036,962
1958 ..	1,415,378	415	3,073,945	61,522,656	58,733,561
1959 ..	1,451,516	421	3,171,823	63,597,690	(c) 67,539,615
1960 ..	1,476,835	443	3,252,413	65,363,883	62,531,977

(a) A number of endowments are paid every twelve weeks. During two years out of every three, there are four such payments, but every third year there are five. Figures for annual liability, therefore, reflect trends in expenditure on child endowment more accurately than do figures for payments.

(b) Year ended 30th June.

(c) Expenditure for this year includes five twelve weekly payments.

§ 4. Commonwealth Rehabilitation Service.

The Commonwealth Rehabilitation Service has been set up to help persons who are unable to work because of physical handicap, or who have had to give up their employment because of sickness or injury. It helps disabled persons to reach their maximum physical fitness and to prepare for suitable employment. They are given suitable treatment and training, the cases selected being those in which the person's disability is remediable and there are reasonable prospects of his engaging in a suitable vocation within three years after the commencement of treatment or training.

The benefits are available to invalid and widow pensioners, persons receiving unemployment, sickness or special benefits, persons receiving tuberculosis allowances and persons aged 14 or 15 who, without treatment and training, would be likely to qualify for

an invalid pension on reaching the age of 16 years. Other persons may participate in the scheme upon reimbursement of the cost of treatment and training. During treatment, payment of pension or benefit continues. When vocational training begins, the pension or benefit is suspended and a rehabilitation allowance, together with a training allowance of £1 10s. a week, is paid instead. With an invalid pensioner, or a sickness, unemployment or special beneficiary, this is equivalent to and calculated in the same manner as an invalid pension. In the case of a widow pensioner, the rate is the same as that of the widow's pension.

Living-away-from-home allowances are paid where necessary. Fares and living expenses (including those of an attendant where required) incurred in connexion with treatment, training or attendance for an interview or for medical examination may also be paid. A person receiving treatment or training may be provided, free of charge, with necessary artificial replacements, surgical aids and appliances. He may also be provided with books, equipment and tools of trade, costing not more than £40. If these are retained by him, he is required to pay the cost, but payments may be made by small instalments after he has commenced in employment.

If the treatment or vocational training does not result in the trainee being able to engage in employment, he receives the pension or benefit to which he is entitled.

The numbers of persons receiving benefits who were examined, accepted, trained and placed in employment during the year 1959–60 are shown in the following table:—

COMMONWEALTH REHABILITATION SERVICE: AUSTRALIA, 1959–60.

Type.	Examined.	Accepted.	Completed Training.	Placed in Employment.	
				After Training.	Without Training.
Invalid pensioners	11,795	200	121	95	96
Widow pensioners	5	4	..	3	..
Unemployment and sickness beneficiaries	8,678	844	221	203	601
Special beneficiaries	2
Recipients of Tuberculosis allowance	517	76	56	63	32
Persons aged 14–15 years ..	166	71	39	36	42
Persons provided with rehabilitation on payment of the cost ..	129	92	3	3	69
Total	21,292	1,287	440	403	840

§ 5. Funeral Benefits.

A funeral benefit of up to £10 is payable to the person who has paid, or is liable to pay, the cost of the funeral of an age or invalid pensioner or of a claimant who, but for his death, would have been granted an age or invalid pension, or of a person who at the time of his death was receiving, or was a claimant for, a tuberculosis allowance, if he would otherwise have been qualified to receive an age or invalid pension. Where the cost of the funeral has been partly met by payment from a contributory funeral benefit fund of an organization other than a friendly society, funeral benefit is payable to the extent of the amount (not above £10) by which the cost of the funeral exceeded the amount paid from the fund. A funeral benefit is not payable to a person administering a contributory funeral benefit fund.

The following table shows the number of funeral benefits which were paid in each State and Territory for the years 1955–56 to 1959–60.

FUNERAL BENEFITS GRANTED, AUSTRALIA.

Australia	32,019	34,391	32,496	34,961	35,465

§ 6. Maternity Allowances.

Maternity allowances are paid to provide financial assistance towards the expenses associated with the birth of children and are additional to the benefits provided under the Commonwealth hospital benefits scheme. They are not subject to a means test.

The allowance is £15 if the mother has no other children, £16 if she has one or two other children and £17 10s. if she has three or more other children under the age of 16 years. The amount is increased by £5 for each additional child born at a birth. An advance payment of £10 on account of a maternity allowance may be made four weeks before the expected date of birth. The balance is payable immediately after the birth. Payment may be made in respect of the birth of a still-born child, or a child which lives for less than twelve hours, if the child had developed for at least $5\frac{1}{2}$ months.

A maternity allowance is payable to a woman who, at the date of giving birth to a child, is residing in Australia, is temporarily abroad, or is on board a ship proceeding from a port in Australia or an Australian Territory to another port in Australia or another Australian Territory, or on board a ship proceeding to Australia, provided she receives no maternity benefit from the country from which she came. An alien mother may receive the allowance if she or her husband resided in Australia for at least twelve months immediately prior to the birth of the child, or if she is likely to remain in Australia. Aboriginal natives, other than those who are nomadic or primitive, are eligible for maternity allowances on the same conditions as other members of the community.

The following table gives details of the amount paid in each State for the years 1955-56 to 1959-60:—

MATERNITY ALLOWANCES: AMOUNT PAID IN EACH STATE.

(£'000.)

Year ended 30th June—	N.S.W.	Vic.	Q'land.	S.Aust.	W.Aust.	Tas.	N.T.	A.C.T.	Over- seas.	Total.

§ 7. Unemployment, Sickness and Special Benefits.

Unemployment and Sickness benefits are paid to men over 16 and under 65 years of age, and women over 16 and under 60 years of age who, through unemployment, sickness or accident, suffer temporary loss of regular earnings. They must have been living in Australia during the preceding twelve months or be likely to remain permanently in Australia. A person receiving an age, invalid or widow's pension, or a service pension (as distinct from a war pension) under the Repatriation Act, or a tuberculosis allowance is ineligible to receive a benefit.

To qualify for an unemployment benefit, a person must establish that he is unemployed and that his unemployment is not due to his being a direct participant in a strike, that he is capable and willing to undertake suitable work, and that he has taken reasonable steps to obtain such work. Registration with the local Commonwealth District Employment Office is necessary.

To qualify for a sickness benefit, a person must establish that he is temporarily incapacitated for work because of sickness or accident and that he has thereby suffered a loss of salary, wages or other income.

COMMONWEALTH EXPENDITURE ON SOCIAL AND HEALTH SERVICES

1943-44 TO 1959-60

A married woman is not eligible to receive a sickness benefit if it is reasonably possible for her husband to maintain her. Where her husband is able to maintain her only partially, a benefit may be paid at such rate as is considered reasonable in the circumstances. In exceptional cases, a married woman may qualify for an unemployment benefit in her own right.

Aboriginal natives, other than those who are nomadic or primitive, are eligible for these benefits on the same conditions as other members of the community.

The maximum weekly rates of benefit payable and permissible income, since the 17th October, 1957, have been as follows:—

Age and Marital Status of Claimant.			Maximum Weekly Rates.	Permissible Weekly Income.
			£ s. d.	£ s. d.
Unmarried person under 18 years of age	1 15 0	1 0 0
Unmarried person 18–20 years of age	2 7 6	1 0 0
All others	3 5 0	2 0 0

An additional benefit of £2 7s. 6d. a week may be paid for a dependent spouse and 10s. for one dependent child under 16 years of age if resident in Australia. If no allowance is paid for a dependent spouse, a similar benefit may be paid for a claimant's housekeeper, provided there are one or more children under 16 years of age in the home and the woman is substantially dependent on the claimant but is not employed by him.

The weekly rate of benefit is reduced by the amount by which a beneficiary's other income exceeds the amount shown in the relevant line of the final column in the above table. For unemployment benefit purposes, the incomes of the claimant and his spouse are taken into account, unless they are permanently separated. For sickness benefit purposes, the income of the claimant only is taken into account, while any payment received from an approved friendly society or other similar approved body in respect of the incapacity for which sickness benefit is payable is disregarded. "Income" does not include child endowment, or other payments for children, Commonwealth hospital and pharmaceutical benefits, or a tuberculosis allowance or an amount paid in reimbursement of medical, dental or similar expenses paid. There is no means test on property.

The amount of compensation, damages or similar payment, or war pension, if paid in respect of the same incapacity as that for which sickness benefit is claimed, is deducted from the sickness benefit. If not paid in respect of the same incapacity, compensation is regarded as income and war pension is ignored.

There is a waiting period of seven days for which unemployment or sickness benefit is not payable. Unemployment and sickness beneficiaries are eligible to participate in the Commonwealth Rehabilitation Service under the same conditions as invalid pensioners.

A special benefit may be granted to a person not qualified for unemployment or sickness benefit who is not receiving an age, invalid or widow's pension or a service pension, if because of age, physical or mental disability or domestic circumstances, or for any other reason, he is unable to earn a sufficient livelihood for himself and his dependants. Special benefits are also paid to migrants who are in reception centres and are awaiting their first placement in employment in Australia. During this time, they receive a short instruction in English and in Australian conditions to facilitate their assimilation into the community and employment.

During the year 1959–60, special benefits were granted to 10,827 migrants at a cost of £62,286.

The following table shows the number admitted to benefit during 1959–60, the number of persons on benefit at 30th June, 1960, and the amount paid for each benefit during 1959–60.

(a) Includes migrants in reception and training centres.

(b) Includes payments to migrants in reception and training centres.

§ 8. Widows' Pensions.

Widows' pensions are payable to the following classes of women. The rates shown have been in operation since 11th October, 1960.

Class. "A"—A widow who has the custody, care and control of one or more children under the age of 16 years—£273 per annum (£5 5s. a week) plus £26 per annum (10s. a week) for each child after the first in her custody, care and control.

Class. "B"—A widow who has no children under 16 years of age in her custody, care and control, and who is not less than 50 years of age or who, after having attained the age of 45 years, ceased to receive a Class "A" widow's pension because she no longer had the custody, care and control of a child—£227 10s. per annum (£4 7s. 6d. a week).

Class. "C"—A widow who is under 50 years of age and has no children under the age of 16 years in her custody, care and control, but is in necessitous circumstances within 26 weeks after the death of her husband—£4 7s. 6d. a week for not more than 26 weeks. If at the time of her husband's death the widow is pregnant, this period will be extended until the child's birth. She may then become eligible for a Class "A" widow's pension.

Widow pensioners may receive supplementary assistance of £26 per annum (10s. a week) if they pay rent and are considered to be dependent entirely on their pensions.

For classes "A" and "B", the term "widow" includes a deserted wife, a divorcee, a woman whose husband has been imprisoned for at least six months, and a woman whose husband is in a mental hospital. Certain "dependent females" may qualify for "A" "B" or "C" Class pensions.

The residential qualification is five years' continuous residence in Australia immediately prior to the date of lodgment of the claim, but this period may be reduced to one year if the widow and her husband were living permanently in Australia when he died. Certain absences count as residence.

A widow's pension is not payable to an alien, a woman receiving an age or invalid pension, a tuberculosis allowance, or a war widow's pension, a woman who has deprived herself of property or income in order to qualify for a pension, or a deserted wife or a divorcee who has not taken reasonable action to obtain maintenance from her husband or former husband. Aboriginal natives, other than those who are nomadic or primitive, are eligible for widows' pensions on the same conditions as other members of the community.

Widow's pensions are subject to a means test on income and property. The pension payable depends on the claimant's *means as assessed*. These consist of her annual rate of income together with a property component equal to £1 for every complete £10 by which the value of her property is in excess of a stipulated sum. In the case of a Class "B" widow, £200 of property is exempt. A Class "A" widow has a basic exemption of £1,000 when the value of her property exceeds £2,250, but no property component is calculated where she has property of no more than £2,250 in value. A Class "A" pension is not payable where a widow has property valued at £5,550 or more; no Class "B" pension is payable where property is £4,300 or more. There is no specific means test for the Class "C" pension, which is paid only where it is evident that a widow has insufficient means of support. The types of income and property disregarded for means test purposes are the same as for age and invalid pensions.

The pension payable to a Class "A" widow may be continued until her child reaches the age of 18 years if the child continues with full-time education at a school or university, is still dependent on the widow and is not in employment.

The number of widows' pensions by class, current at 30th June, 1960, was as follows:—Class "A", 23,240; Class "B", 28,359; Class "C", 87; Class "D", 236; total, 51,922.

From 11th October, 1960, Class "D" was abolished and the women concerned became eligible for Class "A" or Class "B". Class "D" related to women whose husbands had been in prison for at least six months.

The amount paid in pensions during 1959–60 was £12,137,248. The following table shows details of widows' pensions paid in each State and Territory in the year 1959–60:—

WIDOWS' PENSIONS AT 30th JUNE, 1960.

(a) Included in figures for State in which pensioner is permanently domiciled.

§ 9. Reciprocal Agreements with Other Countries.

1. **New Zealand.**—An agreement between the governments of Australia and New Zealand for reciprocity in social services came into operation on 1st July, 1949.

The reciprocal arrangements cover age and invalid pensions, widows' pensions, child endowment and unemployment and sickness benefits, and apply to both permanent and temporary changes of residence.

Residence in one country counts as residence in the other country in relation to entitlement to benefits in which a residential qualification applies.

Persons from one country taking up permanent residence in the other country become eligible for any of the specified benefits of the new country under the same conditions (with one or two exceptions) as apply to citizens of that country.

Persons in receipt of any of the specified benefits in one country may continue to receive those benefits while temporarily absent in the other country.

2. **United Kingdom.**—A new reciprocal agreement on social services between the United Kingdom and Australia came into operation on 1st April, 1958, replacing the original agreement which operated from 7th January, 1954.

Under this agreement, residence in one country now counts as residence in the other country as the basis for entitlement to benefits in which a residential qualification applies.

Australians going to the United Kingdom for permanent residence are treated in the United Kingdom as if they had been insured under the National Insurance Scheme while in Australia, so that they can qualify for various National Insurance benefits.

There is also provision for the safeguard of social service rights for persons going from one country to the other for temporary residence.

C. OTHER SERVICES.

§ 1. Benevolent Homes.

1. **General.**—Numerous establishments exist for the housing and protection of persons no longer able to provide for themselves. These homes are supported by government and municipal aid, public subscriptions, bequests, etc. In many cases, relatives of poor and afflicted persons contribute to their maintenance.

An entirely satisfactory statistical tabulation of all forms of charitable aid provided by benevolent institutions is difficult because these services differ considerably.

2. **Principal Institutions.**—Particulars respecting the accommodation and the number of inmates of the principal institutions were published in earlier issues of the Official Year Book (see No. 22, p. 485).

3. **Revenue and Expenditure.**—Details regarding revenue and expenditure for the year 1958–59 are given in the following table.

BENEVOLENT HOMES: REVENUE AND EXPENDITURE, 1958–59.
(£.)

Total ..	1,144,575	1,849,316	776,283	150,685	427,311	362,661	4,710,831

(a) These figures relate to the three State hospitals and homes only. (b) Includes Commonwealth hospital benefits and age and invalid pension receipts. (c) Includes such items as purchase of land, cost of new buildings and additions to buildings.

4. **The Aged Persons Homes Act.**—The Aged Persons Homes Act which operated from 16th December, 1954, was amended in October, 1957. The purpose of the Act is to encourage the provision of homes in which aged persons may reside in conditions approaching normal domestic life.

To be eligible for assistance under this Act an organization must be—

- carried on otherwise than for purposes of profit or gain to the individual members; and
- a religious organization, an organization the principal objects or purposes of which are charitable or benevolent, an organization of former members of the defence forces established in every State or a State branch of such an organization, or an organization approved by the Governor-General for the purposes of this Act.

An organization conducted or controlled by, or by persons appointed by, the Government of the Commonwealth or of a State or a local governing body established under the law of a State, is not eligible for assistance under this Act.

The Director-General of Social Services may make a grant of money to an organization as assistance towards meeting the cost of the construction or purchase of a home, including land, to be used permanently for the accommodation of aged persons. The grant is made on a £2 for £1 basis with money raised by the organization, not counting money which the organization received from a governmental body or borrowed. Before a grant is made, the Director-General must be satisfied that the sum of the money expended and the money presently available for expenditure by the organization towards the capital cost of the home, together with the amount of the grant, will be not less than the capital cost of the home. Expenditure by the Commonwealth Government was £397,994 in 1955-56, £751,136 in 1956-57, £837,895 in 1957-58, £1,767,470 in 1958-59 and £1,871,748 in 1959-60.

§ 2. Orphanages, Industrial Schools, etc.

1. **General.**—The methods of caring for orphans and neglected children differ extensively, some being placed in orphanages and industrial schools, while others are boarded out with their mothers or female relatives or with approved foster-mothers. The children in orphanages and similar institutions may receive, in addition to primary education, some craft training. In all cases, employment is found for the children on their discharge from the institution, and they remain for some time under the supervision of the proper authorities. The conditions under which orphans, neglected children and children boarded out live are subject to frequent departmental inspections.

2. **Principal Institutions.**—Particulars concerning the principal institutions in each State were published in earlier issues of the Official Year Book (*see* No. 22, p. 486).

3. **Children under Government Authority.**—The following table shows the expenditure by State Departments during 1958-59 in connexion with children under their control or supervision. In addition to neglected children, the figures refer to uncontrollable and convicted children who are wards of a government authority, as well as poor children whose parents obtain assistance from the government without giving up the legal right of custody.

**CHILDREN UNDER GOVERNMENT AUTHORITY: COST OF
MAINTENANCE, 1958-59.**
(£.)

Particulars.	N.S.W.	Vic.(a)	Q'land.	S.Aust.	W.Aust.	Tas.	Aust.
Gross cost of children's relief	1,954,433	1,151,783	547,232	337,314	308,464	79,852	4,379,078
Receipts from parents' contributions, etc. ..	105,050	58,918	38,583	42,931	31,933	6,204	283,619
<i>Net Cost to State</i>	<i>1,849,383</i>	<i>1,092,865</i>	<i>508,649</i>	<i>294,383</i>	<i>276,531</i>	<i>73,648</i>	<i>4,095,459</i>

(a) Year ended 31st December, 1959.

The total expenditure on children's relief in the foregoing table shows considerable variation between the States, owing to the different methods of treating assistance to mothers with dependent children. In South Australia, Western Australia and Tasmania, large amounts have been excluded from the total expenditure on this account, owing to the difficulty of obtaining separate particulars for allowances made in respect of the dependent children only.

§ 3. Protection of Aborigines.

For the protection of the aboriginal Australian race, there are institutions, under the supervision of Aborigines Boards, where these people are housed and encouraged to work, the children receiving elementary education. The work is usually carried on at mission stations, but many of the natives are nomadic and receive food and clothing when they call, while others only rarely come near the stations. The aboriginal race is extinct in Tasmania. The expenditure from Consolidated Revenue in 1959-60 was as follows (figures in brackets are for the year 1958-59):—New South Wales, £239,541 (£204,576); Victoria, £25,000 (£25,000); Queensland, £695,773 (£726,693); South Australia, £357,169 (£365,561); Western Australia, £636,224 (£591,020); Northern Territory, £979,984 (£719,695); Australian Capital Territory, £5,102 (£4,687); Australia, £2,938,793 (£2,637,232).

§ 4. Lifesaving.

There are two life saving organizations in Australia, the Royal Life Saving Society—Australia, and the Surf Life Saving Association of Australia.

The objects of these organizations are the prevention of death from drowning and other forms of asphyxiation; the education of the general public in methods of life saving and resuscitation of the apparently drowned or asphyxiated; technical education in water safety; the encouragement of swimming and life saving in schools and other organizations; the encouragement of all aspects of swimming and aquatics which would assist in saving lives; and the initiation of research within the field of water safety and lifesaving.

The Royal Life Saving Society operates at lakes, rivers, bay and harbour beaches, and the Surf Life Saving Association patrols surf beaches.

Numerous certificates and medallions of proficiency in various grades are awarded.

§ 5. Royal Humane Society.

The Royal Humane Society of Australasia has as its main object the granting of awards to all who with bravery, skill and perseverance risk their own lives in saving or attempting to save those of their fellow creatures. The classes of awards are (a) Gold Medal; (b) Silver Medal; (c) Bronze Medal; and (d) Certificate of Merit. The Clarke Medal is awarded for the outstanding case of the year, and the Rupert Wilks Trophy is awarded for the most outstanding bravery by a child under 13 years of age. About 50 awards are made annually.

§ 6. The Order of St. John.

The Priory in Australia of the Most Venerable Order of the Hospital of St. John of Jerusalem is the governing body of the various activities of the Order which comprises the St. John Ambulance Association, the St. John Ambulance Brigade and the Hospitallers' Clubs in all States and Commonwealth Territories.

Members of the St. John Ambulance Association teach first aid to the injured, home nursing, hygiene and child welfare.

Members of the St. John Ambulance Brigade provide first aid at public functions.

The Hospitallers' Clubs in each State undertake the collection of funds for the St. John Ophthalmic Hospital in Jerusalem, and other duties which tend to bring together all persons interested in the work of the order.

The Order of St. John maintains ambulance transport services in some States, acts as an auxiliary to such services in other States, and provides technical reserves for the medical services of the Crown.

The Lifesaving Medal is awarded by the Order as warranted.

§ 7. Other Charitable Institutions.

Owing to the variety of names and functions of other charitable institutions, it has been found impracticable to give detailed particulars. The aid given in kind—food, clothing, tools of trade, etc.—is considerable, whilst the shelter and treatment afforded range from a bed for a night for casual callers in establishments ministering minor charity, to indoor treatment over long periods in those that exist for the relief of the aged and the infirm. The institutions not particularized include homes for the deaf, dumb and blind, infant homes, homes for the destitute and aged poor, industrial colonies, night shelters, crèches, rescue homes for females, free kindergartens, auxiliary medical charities, free dispensaries, benevolent societies and nursing systems, ambulance and health societies, boys' brigades, humane and animals' protection societies, prisoners' aid associations, shipwreck relief societies, bushfire, flood and mining accident relief funds.

CHAPTER XIX.

LOCAL GOVERNMENT.

§ 1. Introduction.

1. **Local Government Authorities.**—In each State of the Commonwealth, there exists a system of local government whose powers and responsibilities are in general similar, and cover such matters as the construction and maintenance of roads, streets and bridges, water, sewerage and drainage systems, and health and sanitary services, the supervision of building, and the administration of regulations relating to items such as weights and measures, slaughtering, the registration of dogs, etc. In addition to these obligatory functions, there are also many which may be performed by a local government authority either with or without the consent of the ratepayers or the Governor-in-Council. These include transport facilities, electricity, gas, and other business undertakings, hospitals, charitable institutions, recreation grounds, parks, baths, libraries, museums, etc.

The system is based on the principle of a grant of specific powers by the State legislatures to the local authorities, their autonomy, however, being more or less limited by the provision for general supervision by a department of the central government or by the Governor-in-Council. Otherwise, within the scope of the Acts under which they are constituted or which they have to administer, they are responsible only to the ratepayers.

While the broad pattern of local government throughout the States of Australia is similar, the range of activities, election of officers, methods of valuation and rating powers, etc., differ considerably.

The areas over which local government bodies exercise general control, numbering 904, are known in New South Wales as cities, municipalities and shires; in Victoria as cities, towns, boroughs and shires; in Queensland as cities, towns and shires; in South Australia as cities, corporate towns and district council areas; in Western Australia as cities, towns and shires;* and in Tasmania as cities and municipalities. In New South Wales, some local government authorities in an area have combined to provide services such as electricity, water, sewerage and drainage—e.g., the county councils. Within shires, there are also some municipal units known as urban areas. Apart from the more thinly populated parts of New South Wales and South Australia, and the Commonwealth Territories, practically the whole of Australia comes within local government jurisdiction.

The financial statistics in § 2 following are classified under the headings of Ordinary Services and Business Undertakings. The former covers the obligatory and general functions referred to above. Business Undertakings include public utilities such as water supply, sewerage, electricity, gas, transport and hydraulic power undertakings, and other miscellaneous works such as abattoirs, quarries, ice works, cinemas, etc.

2. **Semi-Governmental Authorities.**—In addition to local government authorities, a large number of authorities have been set up to control specific activities, which are often identical with some of those performed by either, or both, of the other classes of public authority—central government and local government—and a complete picture of any field of activity for a State or Australia as a whole cannot be obtained without reference to each class operating in that particular field. These semi-governmental authorities differ primarily from local government authorities in that their operations are restricted to the specific activity for which they were constituted—e.g., roads and bridges, water and sewerage, electricity and irrigation, harbours, or tramways, etc.—i.e. each dispenses a specific service throughout an area as distinct from the general services of the local authority.

In §§ 3 to 7, which deal with debt, roads and bridges, water supply and sewerage, harbours, and fire brigades, particulars are included of the more important of these authorities which operate within the range covered by this chapter.

3. **Roads, Bridges, etc.**—The construction and maintenance of roads, bridges and ferries are generally part of the functions of local authorities, but in each State there exists a central road authority or a government department whose duties relate to the construction, reconstruction and maintenance of "main" and "developmental" roads, the distribution of funds to local bodies, and the supervision and co-ordination of road construction and policy throughout the State. Although roads and bridges constructed and maintained.

* Commencing 1st July, 1961—formerly known as cities, municipalities and road districts.

directly by the government or by the central road authority do not properly come under the heading of "Local Government", they have been included in this chapter for the sake of convenience. Owing to difficulty in obtaining complete particulars of receipts and expenditure of the various local governing bodies in respect of roads under their control, the details of receipts and expenditure given in § 4 are those of central governments only, relating either to the supervisory board or commission in the State or to direct activities of a department. However, estimates of the aggregate net expenditure of all public authorities concerned with roads and bridges in Australia are given in paragraph 9 of that section. In § 2, some information is given of the revenue and expenditure of local government authorities in respect of roads.

4. **Water Supply and Sewerage.**—In the cities of Sydney and Melbourne, the control of water supply and sewerage is in the hands of special boards, while in Adelaide and Perth these services are under the direct supervision of government departments. In most of the other cities and towns, the municipal councils or, in some cases, water trusts, are the controlling bodies, which either construct the works out of their own resources or take them over after they have been constructed by the government.

5. **Harbours.**—The majority of the harbours in Australia are managed by boards, the members of which are either elected by persons interested, or appointed by the government. In some instances, however, they are directly controlled by the government.

6. **Fire Brigades.**—In all the States, the management of fire brigades is undertaken by boards. These boards usually comprise members elected by the councils of municipalities and insurance companies within the districts placed under their jurisdiction, and one or more members appointed by the government. Occasionally, volunteer or country fire brigades are represented.

7. **Other Local or Semi-Governmental Activity.**—The activities referred to above are not the only forms of local or semi-governmental undertakings. There are others, the most important being tramways and omnibus services, and electricity and gas undertakings, which are not dealt with in this chapter except to the extent that they are represented in the finances as shown in the following section. Chapter XIV., Transport and Communication, contains information on municipal transport services, and Chapter VII., Electric Power Generation and Distribution, deals with the various types of electricity undertakings in each State. In addition, particulars of municipal electricity and gas undertakings, although not shown separately, are included in the relevant sections in Chapter VI., Manufacturing Industry.

§ 2. Local Government Authorities.

1. **New South Wales.**—For purposes of local government, the whole of the Eastern and Central land divisions and a small portion of the sparsely populated Western division have been divided into cities, municipalities (most principal towns) and shires (mainly large rural areas, some of which embrace important towns). At the end of 1958, the area incorporated was 251,000 square miles, or nearly five-sixths of the total area of the State.

All local government authorities in the State are subject to the general provisions of the Local Government Act.

Municipalities and shires may combine to form county councils for the establishment and conduct of services of joint benefit, e.g., electricity, water, sewerage. At 31st December, 1958, there were 51 county councils including the Sydney County Council.

2. **Victoria.**—Local government is established throughout the State, the various divisions being termed cities, towns, boroughs or shires. The only unincorporated areas are French Island (42,000 acres) in Westernport Bay, Julia Percy Island (650 acres) off Port Fairy, and Tower Hill (1,460 acres) adjacent to the Borough of Kororoit. Melbourne and Geelong were incorporated under special statutes prior to the establishment of a general system of local government, but are now subject to several provisions of the Local Government Act.

3. **Queensland.**—The whole of the State (except certain islands along the coast, the Dawson Valley Irrigation Area and the Somerset Dam Area) is incorporated into cities, towns and shires under the Local Authorities Act 1902 and its amendments.

4. **South Australia.**—The settled portion of South Australia is incorporated, being mostly under municipal corporations in the larger cities and towns, and district councils in the agricultural areas.

5. **Western Australia.**—Local government is established throughout the State, the divisions since 1st July, 1961, being cities, towns and shires (formerly cities, municipalities and road districts).

6. **Tasmania.**—The whole State is divided into municipal districts, Hobart and Launceston being incorporated as cities under separate Acts.

7. **Area, Population, Dwellings and Value of Ratable Property.**—The area, population, dwellings and value of ratable property in the incorporated areas of each State are shown for the year 1958–59 in the following tables. The valuations relate to ratable property only and exclude Government and other non-ratable property, whose value in the aggregate is considerable. In this table, particulars of dwellings are in accordance with the definition used in the 1954 Census, and are compiled from information collected on the Census Schedules. For the purpose of the Census, a dwelling was defined as any habitation occupied by a household group living together as a domestic unit, whether comprising the whole or only part of a building. The term has, therefore, a very wide meaning and includes, in addition to houses and flats, a great variety of dwellings ranging from a single-roomed shack to a multi-roomed hotel or institution. Unoccupied dwellings include "week-end" and holiday dwellings and other dwellings temporarily unoccupied on the night of the Census. Dwellings being built are not included.

§ 3. Local and Semi-Governmental Authorities' Debt.

1. **General.**—Statistics of local and semi-governmental debt for the years 1954–55 to 1958–59 are given in the following paragraph. The information covers all local government authorities and those semi-governmental authorities responsible for the provision of the following services:—

New South Wales. Water Supply, Sewerage and Drainage, Electricity Supply, Fire Brigades, and Banking. County Councils are included among these authorities.

Victoria. Water Supply and Sewerage, Irrigation and Drainage, Harbours, Tramways, Electricity and Gas Supply, Fire Brigades, Marketing (Buying and Selling), Industry Assistance, Grain Elevators, Housing, and Miscellaneous.

Queensland. Water Supply and Sewerage, Irrigation and Drainage, Harbours, Electricity Supply, Fire Brigades, University, Hospitals and Ambulances, Marketing (Buying and Selling and Agency), and Industry Assistance.

South Australia. Irrigation and Drainage, Tramways, Electricity Supply, Fire Brigades, Hospitals and Ambulances, Marketing (Agency), Industry Assistance, Banking, Housing, and Miscellaneous.

Western Australia. Water Supply and Sewerage, Irrigation and Drainage, Harbours, Tramways, Electricity Supply, Fire Brigades, Hospitals and Ambulances, Marketing (Agency), Housing and University of Western Australia.

Tasmania. Harbours, Electricity Supply, Fire Brigades, Transport, and Housing.

A detailed list of the authorities included is shown in *Finance, Part I.—Public and Private Finance*, Bulletin No. 51, 1959–60.

2. **Local and Semi-Governmental Authorities' Debt.**—The following table provides a summary of new money loan raisings, provisions for debt redemption, debt outstanding and interest payable by local and semi-governmental authorities for the year ended 30th June, 1959. For greater detail, see *Finance, Part I.—Public and Private Finance*, Bulletin No. 51, 1959–60.

(a) Includes debt or interest payable in London and New York. The former is expressed in United Kingdom currency, the latter is payable in dollars which have been converted at the rate of \$4.8665 to £1.

(b) Included in debt figures above.

(c) Not available.

In this and the following tables, debt includes all liabilities for which arrangements have been made for repayment over a period of one year or more, and net overdrafts. Interest capitalized and amounts due for the capital cost of assets or for services rendered which are to be repaid over a period of one year or more are included. Current liabilities, such as interest accrued (but not capitalized), trade creditors, amounts held in trust and other debts which are to be repaid in less than one year are not included. Net overdraft is the gross overdraft of all funds less all bank credit balances (including fixed deposits) which do not form part of a sinking fund to repay a loan. New loans raised during the year include new loan liabilities incurred during the year, loans raised from the public to repay indebtedness to the Government, and interest capitalized. Loans raised and redeemed within the year, increases in overdrafts and loans raised for conversion or redemption of existing debt are excluded. Funds provided for redemption include instalments of principal repaid and amounts credited to sinking funds established for the purpose of repaying the debt on maturity. Amounts provided for redemption from loans raised for that purpose are excluded.

In the following table, a summary is given of new money loan raisings, provisions for the redemption of debt and debt outstanding of local and semi-governmental authorities for the years 1954-55 to 1958-59.

**LOCAL AND SEMI-GOVERNMENTAL AUTHORITIES, AUSTRALIA: NEW

(a) Includes debt in London and New York. The former is expressed in United Kingdom currency, the latter is payable in dollars which have been converted at the rate of 4.8665 dollars to £1. (b) Included in debt figures above.

§ 4. Roads and Bridges.

1. **Commonwealth Government Grants.**—The following table shows the allocation to the States under the several Commonwealth Aid Roads Acts, for road construction, maintenance, repair and other works connected with transport for each of the years 1955–56 to 1959–60, and to the Commonwealth for expenditure on the construction and maintenance of strategic roads and for the promotion of road safety practices for each of the years 1954–55 to 1958–59. After 1st July, 1959, when the Commonwealth Aid Roads Act 1959 came into operation, the Commonwealth made separate provision for expenditure on strategic roads and the promotion of road safety practices. See also Chapter XXI.—Public Finance, and *Finance* bulletins.

**ROAD CONSTRUCTION, MAINTENANCE, ETC.: GRANTS UNDER THE
COMMONWEALTH AID ROAD ACTS.**
(£'000.)

Year ended 30th June—	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	C'wealth. (a)	Total.
1956 ..	7,282	4,660	5,097	2,976	5,178	1,326	950	27,469
1957 ..	8,587	5,495	6,009	3,509	6,105	1,563	950	32,218

1960 ..	12,172	8,660	8,021	4,922	7,964	2,184	..	43,923

(a) In the years prior to 1959–60, allocations under the Commonwealth Aid Roads Act 1954–56 for expenditure on the construction and maintenance of strategic roads and the promotion of road safety practices.

2. **New South Wales.**—(i) *General.* A central road authority, known as the Main Roads Board, was created by legislation in 1925 for the purpose of providing improved and uniform standards of construction, reconstruction and maintenance of the principal roads of the State and to administer government subsidies for works on those roads. In 1932, the Main Roads administration was reorganized as a separate department under the control of a Commissioner. The activities of the Department of Main Roads embrace works on main and developmental roads throughout the State, all roads in the unincorporated portion of the Western Division, and certain associated works, principally bridges and vehicular ferries, constructed from government funds. The Department of Main Roads co-operates with the municipal and shire councils in the work of constructing and maintaining the main roads system.

Public roads, except those within the City of Sydney, may be proclaimed as main roads on the recommendation of the Commissioner for Main Roads, who takes into consideration the representations made by the councils concerned, availability of funds for construction and maintenance purposes, and the value of the roads as connecting links between centres of population or business. The classes of main roads are (i) the State highways which form the principal avenues of road communication throughout the State and connect with similar avenues in other States; (ii) trunk roads, which, with the State highways, form the framework of a general system of intercommunication throughout the State; (iii) ordinary main roads, which provide a network of roads connecting towns and important centres of population with the State highways and trunk roads and with each other. In addition to the main roads, there are also (i) secondary roads (in the County of Cumberland), which carry a substantial volume of through traffic and thereby relieve neighbouring main roads of traffic and (ii) developmental roads, which help to develop country districts.

In the County of Cumberland, which for the purposes of the Main Roads Act is deemed to include the City of Blue Mountains and small sections of other councils' areas on the boundary of the County of Cumberland, the full cost of road and bridge construction is paid from the funds of the Department of Main Roads. The Councils contribute towards the cost at the rate of ¼d. in the £ on the unimproved value of ratable property. The rate payable in respect of lands used principally for primary production is one-half the rate levied on other lands. In country districts, the Department meets the full cost of road and bridge works on State highways, the full cost of bridge works and three-quarters of the cost of road works on trunk roads, and three-quarters of the cost of bridge works and two-thirds of the cost of road works on ordinary main roads. The cost of constructing developmental roads and works is borne in full by the Department of Main Roads, but local Councils are required to maintain them in a satisfactory condition. The Department of Main Roads meets half the cost of works on secondary roads.

(ii) *Length of Roads.* (a) *Proclaimed Roads.* The total length of proclaimed roads in New South Wales at 30th June, 1960, was 25,362 miles classified as:—State highways, 6,503 miles; trunk roads, 4,181 miles; ordinary main roads, 11,727 miles; secondary roads,

87 miles; and developmental roads, 2,864 miles. The length of proclaimed main roads was altered slightly because of the proclamation and re-routing of short lengths of road. The proclamation on approximately 4 miles of main roads was revoked during 1959–60.

During 1959–60, 120 miles of new development roads were proclaimed and 147 miles were removed from the list of proclaimed developmental roads.

The length of main and secondary roads maintained by the Department of Main Roads at 30th June, 1960, was 4,900 miles (22 per cent.), while the length maintained by councils was 17,598 miles (78 per cent.). The proportions of main roads maintained by the Department and councils respectively were:—State highways, 59 per cent., 41 per cent; trunk and ordinary main roads, 7 per cent., 93 per cent. Secondary roads were maintained wholly by councils. In the County of Cumberland (the metropolis and adjoining areas), the Department maintained 56 per cent. of the roads (524 miles).

(b) *Composition of Roads.* In 1957, the total length of all roads in New South Wales was estimated at 127,097 miles. The lengths of roads, according to their composition or nature, were as follows:—sealed, 15,740 miles; macadam, 42,522 miles; formed only, 27,604 miles; cleared only, 41,231 miles.

(iii) *Main Roads Department.* (a) *General.* Progress has continued with the implementation of the Department's plan for main roads development in the County of Cumberland. Most of the Department's proposals have been incorporated in the County of Cumberland Planning Scheme approved by Parliament under the Local Government (Amendment) Act 1951.

The Department's proposals for the development of the main roads system in Newcastle and the surrounding districts have been largely incorporated in the Northumberland County District Planning Scheme, and some sections of the system have been constructed.

With some modifications, the Department's proposals for the planning of the main roads in the Wollongong-Port Kembla district have been incorporated in the planning scheme prepared by the Illawarra Planning Authority.

During 1959–60, 47 new bridges were constructed. Major bridge works under construction include steel and/or concrete bridges over the Cook's River at Tempe on the Princes' Highway (length 300 feet); over the Murray River at Albury on the Hume Highway (length 300 feet); over the Hastings River near Blackman's Point on the Pacific Highway (length 1,500 feet); over Iron Bark Creek at Hexham (320 feet); over the Richmond River at Lismore (688 feet); over the Parramatta River at Gladesville (2,000 feet); over the Parramatta River at Silverwater (620 feet); over the Lane Cove River at Fig Tree (749 feet); over the Goulburn River at Sandy Hollow (length 576 feet); and over the Mann River at Jackadgery (length 939 feet).

(b) *Revenue and Expenditure.* The funds of the Department of Main Roads are derived principally from (1) motor vehicle taxation; (2) charges on heavy commercial goods vehicles under the Road Maintenance (Contribution) Act 1958; (3) grants under Commonwealth Aid Roads Acts (see para. 1 above and Chapter XXI.—Public Finance); (4) other grants from the State or Commonwealth Governments and (5) proceeds of a levy on municipal and shire councils in the County of Cumberland in accordance with the Main Roads Act 1924–58. The State Government also makes repayable advances for Main Roads Department works.

Revenue and expenditure for the five years 1955–56 to 1959–60 are shown below.

Item.	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.
EXPENDITURE.(b)					
Roads and Bridges—					
Construction	7,157,110	7,813,332	9,371,017	10,444,734	13,808,696
Maintenance	5,946,283	6,174,524	6,096,227	5,908,649	6,352,014
Administration	515,715	562,056	614,098	705,745	824,203
Interest, Exchange, etc., on Debt ..	151,652	171,242	184,067	190,789	202,439
Other(c)	166,854	127,790	295,895	276,270	426,421
Total	13,937,614	14,848,944	16,561,304	17,526,187	21,613,773

(a) Excludes repayable advances by the State Government (£150,000 in 1955-56, £448,073 in 1956-57, £150,000 in 1957-58 and £800,000 in 1959-60) and transfer from Sydney Harbour Bridge Reserve Account for Expressway construction (£100,000 in 1958-59 and £362,000 in 1959-60). Expenditure from these amounts is fully reflected in Expenditure. (b) Excludes debt redemption (£36,299 in 1955-56, £38,677 in 1956-57, £39,966 in 1957-58, £340,790 in 1958-59 and £45,981 in 1959-60). (c) Mainly purchase of assets not subject to annual depreciation charge. The purchase of other assets is omitted here because the depreciation charge for them is reflected each year in "Roads and Bridges".

The figures shown above represent the aggregate revenue and expenditure of five funds—the County of Cumberland Main Roads General and Special Purposes Funds, the Country Main Roads General and Special Purposes Funds, and the Developmental Roads Fund.

(c) *Sydney Harbour Bridge.* The Sydney Harbour Bridge was opened for traffic on 19th March, 1932. The main span is 1,650 feet and the clearance for shipping 170 feet from high water level. The deck, 160 feet wide, carries a roadway of eight traffic lanes and two railway tracks, and there is also a footway on each side. The capital cost of the bridge to 30th June, 1960, was £9,578,006, but this amount will be reduced slightly on completion of the disposal of the remaining surplus resumed property. The portion met from repayable loan funds, over £7,900,000, is repayable from toll income. The accumulated surpluses of the Bridge Account have been used to make transfers to a Reserve Account (£2,405,000) and in 1958-59 and 1959-60 to convert tram tracks to roadway (£762,131) and construct expressways (£12,000). The Account showed a deficiency of £44,968 at 30th June, 1960. In 1959-60, income amounted to £1,266,000, including road tolls, £1,079,311, railway passenger tolls, £146,335 and omnibus passenger tolls, £17,911. Expenditure amounted to £871,000, including interest, exchange, flotation expenses, etc., £313,550, sinking fund, £112,920, maintenance £183,719, and major improvements £64,291. Expenditure from accumulated surpluses on major improvements amounted to £486,029 in 1959-60, including £350,000 from the Harbour Bridge Reserve Account. During 1959-60, 25,493,000 rail travellers, 14,164,000 omnibus travellers, and 44,431,000 road travellers in 27,614,000 road vehicles crossed the bridge, contributing, respectively, 12 per cent., 1 per cent. and 87 per cent. of the total toll revenue.

3. *Victoria.*—(i) *General.* With the object of improving the main roads of the State, the Country Roads Board was established by legislation passed in 1912. The principal duties of the Board are to determine the main roads, State highways, tourists' roads, etc., to inquire into the State's resources in road materials and the most effective methods of road construction and maintenance, and to recommend deviations in existing roads or the construction of new roads in order to facilitate communication or to improve the conditions of traffic.

Following the preparation by the Melbourne and Metropolitan Board of Works of a Planning Scheme for the metropolitan area of Melbourne, and the appreciation of the general principle that where practicable, it is desirable for the responsibility for the implementation of planning scheme proposals to be with the Planning Authority, the Melbourne and Metropolitan Board of Works Act was amended in June, 1956, making the Melbourne and Metropolitan Board of Works responsible for the construction and maintenance of such metropolitan highways and bridges as are declared for this purpose.

(ii) *Length of Roads.* (a) *Declared Roads.* The total length of declared roads in Victoria at 30th June, 1960, was 14,391 miles, classified as follows:—State highways, 3,845 miles; main roads, 9,751 miles; tourist roads, 417 miles; forest roads, 378 miles. The length of the surface treated (black) or higher type of pavements included in the foregoing mileage was 10,319 miles or 72 per cent. of the total.

(b) *Composition of Roads.* It is estimated that, in addition to the 14,391 miles of classified roads as above, there were approximately 86,000 miles of unclassified roads at 30th June, 1960. The latest detailed estimate of the length of roads and streets in Victoria (as at 30th September, 1959) provides the following information:—sealed, 17,970 miles; macadam, 32,738 miles; formed only, 23,403 miles; cleared only, 26,490 miles; total, 100,601 miles.

(iii) *Country Roads Board.* (a) *General.* During 1959–60, 1,741 miles of declared roads under the Board's control were treated with bitumen. In addition, 801 miles of undeclared roads, for which the Board contributed funds, were similarly treated. The total length of bitumen treatment carried out in 1959–60 was 2,629 miles (including 87 miles for other authorities). Of the work on the roads under the Board's control in 1959–60, 592 miles related to State highways.

During 1959–60, 208 bridge projects with the total value of £1,630,000 were initiated. Of these, 154, costing £732,000, were under municipal supervision.

(b) *Receipts and Payments.* The funds of the Country Roads Board are derived principally from motor registration fees, two thirds of all money received by way of owners' certificates, one half of drivers' licence fees, fines, payments by the Commonwealth Government under the Commonwealth Aid Roads Acts, road charges under the Commercial Goods Vehicles Act and repayments by municipalities. In addition, loans have been authorized from time to time under the Country Roads Acts for permanent works on main and developmental roads, State highways, tourists' and forest roads, while the State Government has provided, free of repayment, loan moneys for restoration of flood and bush fire damage. During the year ended 30th June, 1960, loan receipts and payments each amounted to £160,000, and expenditure included £5,124 for restoration of flood and bush fire damage. The total loan expenditure to 30th June, 1960, was £14,386,217. This figure does not include loan expenditure from the Developmental Roads Loan Account, a fund which was created for the purpose of constructing and maintaining subsidiary or developmental roads. Loan money raised on this account was exhausted at 30th June, 1937, the total expenditure at that date being £6,425,758.

Total receipts and payments during each of the years 1955–56 to 1959–60 are shown below:—

(a) After costs of collection. Since 1950, one half of the drivers' licence fees has been credited to the funds of the Country Roads Board while the remaining half has been credited to the Municipalities Assistance Fund. (b) Excludes portion of Commonwealth Aid Roads Acts advances drawn by the Public Works Department for expenditure on wharfs, jetties, etc. (c) Includes fees for licences issued for periods of two and three years.

(iv) *Melbourne and Metropolitan Board of Works.* Since assuming responsibility for carrying-out planning scheme proposals relating to metropolitan highways and bridges, a tentative £20,000,000 construction programme of urgent highway works throughout the metropolitan area of Melbourne has been adopted and is being progressively implemented by the Board of Works. Expenditure on these projects up to 30th June, 1960, was £536,614.

(v) *Level Crossings.* In 1954-55, the Level Crossings Fund was created under the Country Roads and Level Crossings Funds' Act 1954 to finance (a) the elimination of level crossings or the provision of alternative routes to enable road traffic to avoid level crossings, (b) the provision of lights, signs, and lighting at, and the improvement of approaches to, level crossings and (c) generally, the reduction of danger at level crossings. The Act provides for the payment into the Fund of one third of all moneys received by way of additional motor registration fees (owner's certificates) and money provided under any other Act. The amount available for expenditure in 1959-60 was £652,338, comprising receipts from owners' certificates, £302,226, and the balance brought forward from 1958-59, £350,112. Expenditure from the Fund amounted to £345,233, of which £316,733 was incurred by the Railways Department and the balance by the Country Roads Board.

4. *Queensland.*—(i) *General.* Under the Main Roads Act 1920, a Main Roads Board was constituted, consisting of three members appointed by the Governor-in-Council. In 1925, the Board was abolished and its powers conferred upon a single Commissioner. The Main Roads Commission was constituted a Department under the name of the Department of Main Roads in February, 1951, with the Commissioner of Main Roads as its permanent head. The duties of the Commissioner are to carry out surveys and investigations necessary to determine State highways, main, developmental, secondary, mining access, farmers' and tourist roads and tourist tracks, and the responsibility for building and maintaining these declared roads is largely that of the Commissioner. Roads of purely local importance are constructed and maintained by local authorities. In many cases, construction is financed by the State Government by means of Treasury loans. Other roads may be built by the Public Estate Improvement Branch of the Lands Department in order to open up areas of previously inaccessible or undeveloped country.

(ii) *Length of Roads.* (a) *Declared Roads.* The total length of declared roads in Queensland at 30th June, 1959, was 20,781 miles, comprising State highways, 8,252 miles; main roads, 10,434 miles; developmental roads, 235 miles; and secondary roads, 1,860

miles. By the amendments to the Main Roads Acts published in the Government Gazette of 6th April, 1959, mining access, farmers' and tourist roads become secondary roads, and the provisions relating to the declaration of tourist tracks were repealed.

(b) *Composition of Roads.* The total length of roads and streets in Queensland at 30th June, 1960, was:—sealed, 9,341 miles; macadam, 19,388 miles; formed only, 38,587 miles; cleared only, 51,245 miles; total, 118,561 miles.

(iii) *Department of Main Roads. (a) General.* During 1958–59, the Department completed 1,088 miles of roads, including new construction and stage construction. Bridges of all types to a length of 5,664 linear feet were constructed, bringing the total constructed by the Department at 30th June, 1959, to 202,396 feet. In addition, at 30th June, 1959, 6,090 feet were under construction.

(b) *Receipts and Payments.* The funds of the Department of Main Roads are obtained chiefly from motor vehicle registration and collections, fees, etc. under the Transport Acts, contributions under the Commonwealth Aid Roads Acts, and loans, grants and advances from the State Government. The total receipts and payments, including amounts for defence works, during each of the years 1954–55 to 1958–59 are shown below:—

5. *South Australia.*—(i) *General.* The Highways and Local Government Department is administered by the Commissioner of Highways, who is empowered, subject to the approval of the Minister of Roads, to undertake the construction, maintenance and protection of the principal roads of the State. In addition, the Commissioner—

- (a) allocates grants to councils for roadworks and supervises the expenditure,
- (b) assists Councils to purchase road-making plant and to defray the cost of roadworks,
- (c) advises Councils on any question concerning the construction, maintenance or repair of roads.

(ii) *Source of Funds.* Funds of the Department are derived mainly from—

(a) *State Government*—the Highways Fund, into which are paid the proceeds from motor vehicle registration and drivers' licences (less cost of collection), appropriations from loan funds, repayments of advances made to Councils and contributions by the Municipal Tramways Trust,

(b) *Commonwealth Government*—contributions under the Commonwealth Aid Roads Acts.

(iii) *Length of Roads.* In South Australia, there are only two classifications of roads. These are main roads proclaimed under the provisions of the Highways Act and all other roads, commonly designated district roads. At 30th June, 1960, there were 8,188 miles of proclaimed main roads and 54,257 miles of district roads, totalling 62,445 miles. The composition was as follows:—Sealed, 5,136 miles; macadam, 12,999 miles; formed only, 15,405 miles; cleared only, 28,905 miles.

(iv) *State Highways and Local Government Department, Receipts and Payments.* The following table shows particulars of receipts and payments, during the years 1955–56 to 1959–60, of funds controlled by the Highways and Local Government Department.

HIGHWAYS AND LOCAL GOVERNMENT DEPARTMENT, SOUTH AUSTRALIA: RECEIPTS AND PAYMENTS.

Total	6,751,756	7,347,886	7,660,796	8,455,740	9,251,337

(a) Administrative Expenses, amounting to £596,876 in 1958–59 and £735,738 in 1959–60, have been charged to "Construction and Reconstruction of Roads and Bridges" and to "Maintenance".

The total expenditure, both revenue and loan, by State and local governments on roads, streets and bridges in South Australia during the years 1955–56 to 1958–59 was, respectively, £7,539,000, £8,812,000, £9,228,000, £9,889,000 and £11,723,000.

6. Western Australia.—(i) *General.* In 1926, the central road authority known as the Main Roads Board was established by legislation for the purpose of improving and maintaining the principal roads in the State. In 1930, following administrative reorganization, the Main Roads Board was replaced by a separate Department under the control of a Commissioner. The functions of the Commissioner are to determine and declare main roads, controlled access roads, and developmental roads throughout the State, and carry out such other functions as are provided for in the Main Roads Act 1930–59.

(ii) *Length and Composition of Roads.* The total length of roads for which financial provision was made by the Main Roads Department at 30th June, 1960, was:—Declared main roads, 3,466 miles; controlled access roads, 5 miles; important secondary roads, 7,440 miles; and developmental roads, 21,157 miles. Controlled access roads are roads which do not permit direct access from abutting property but which may be entered and departed from only at certain selected road connexions located at points which are considered to serve best the traffic for which the controlled access roads were designed. Important secondary roads are roads formerly included as developmental, which, however, by virtue of their consistent use by through traffic, warrant a special provision of funds for their upkeep by the Main Roads Department. The classification of "important secondary roads" has no legal significance, as the care and control of these roads remains the responsibility of the Local Authorities.

The total length of roads and streets in Western Australia at the 30th June, 1960, was made up as follows:—sealed, 8,419 miles; macadam, 19,226 miles; formed only, 39,898 miles; cleared only, 23,724 miles; total, 91,267 miles.

(iii) *Main Roads Department.* (a) *General.* During the year 1959–60, the activities of the Department included—clearing, 2,234 miles; forming, 2,897 miles; gravelling, 1,486 miles; reconditioning, 5,312 miles; and stabilizing, 571 miles. In addition, 1,511 miles were primed and sealed (including widening) and 29 bridges constructed. The Narrows Bridge and approaches and Kwinana Freeway were completed at a cost approximating £3,500,000.

(b) *Receipts and Payments.* The funds of the Main Roads Department are derived principally from allocations made under the Commonwealth Aid Roads Act 1959. Other sources of income include one-half of the net amount of traffic fees collected in the Metropolitan Area and an allocation of Transport Board funds. (Outside the Metropolitan Area, motor vehicle licence fees are collected and retained by the Local Authorities.) Receipts and payments for the years 1955–56 to 1959–60 are shown below:—

MAIN ROADS DEPARTMENT, WESTERN AUSTRALIA: RECEIPTS AND PAYMENTS.

Total	5,730,096	6,379,240	7,575,195	7,993,803	8,980,357

(a) Motor Vehicle Registration, Licences, Fees, etc., in excess of base year, 1958–59. (b) Includes £230,742 to be distributed to Metropolitan and Country Local Authorities early in 1960–61. (c) Includes £173,057 to be distributed to Metropolitan and Country Local Authorities early in 1960–61. (d) Includes administration and expenditure on hire and maintenance of road construction plant, etc., and on purchase of materials.

NOTE.—Figures for each year to 1958–59, have been revised to show Receipts and Payments of the Main Roads Department only instead of the combined transactions of several trust accounts as in previous issues of this Year Book.

7. *Tasmania.*—(i) *General.* Under the Road Construction (Transfer of Functions) Act 1951, which came into operation on 1st July, 1951, the control of the construction and maintenance of roads and certain road making plant was vested in the Minister for Lands and Works. Works authorized by the Minister in respect of roads classified as State highways, tourist, and developmental roads are constructed by the Department of Public Works and financed from the State Highways Trust Fund, into which are paid the proceeds from Commonwealth Aid Roads grants, motor vehicle registration fees and taxes, licence fees for drivers and public transport, and other moneys made available by Parliament. In addition, provision was made under the Road Construction (Transfer of Functions) Act for certain works authorized by the Transport Commission to be carried out and constructed by the Department. The expenditure by the Public Works Department during 1958–59 on the construction of roads, tracks and bridges amounted to £4,050,000, of which £3,031,000 was charged to road funds, £47,000 to revenue, £724,000 to loan and £248,000 to other funds. Except in special cases, municipal councils bear the cost of maintaining country roads and a proportion of the cost of main and secondary roads.

(ii) *Length of Roads.* (a) *Classified Roads.* The mileages of classified roads in Tasmania at 30th June, 1960, were as follows:—State highways, 1,155 miles; main roads, 687 miles; secondary roads, 176 miles; tourist roads, 46 miles; developmental roads, 16 miles; other roads, 135 miles; total, 2,215 miles. Country roads totalled nearly 10,000 miles. The mileages of sealed roads, and their proportions to the respective totals, were:—State highways, 638 miles (55 per cent.); main roads, 335 miles (49 per cent.); secondary and other roads, 43 miles (11 per cent.); total, 1,016 miles (46 per cent. of all classified roads, and 8 per cent. of all roads in Tasmania).

(b) *Composition of Roads.* The length of all roads in Tasmania, including those with surfaces of lower grade, at 30th June, 1960, was as follows:—sealed, 1,713 miles; macadam, 8,302 miles; formed only and cleared only, 1,551 miles; total 11,566 miles.

(iii) *Receipts and Payments—Combined Road Funds.* The table below shows particulars of the receipts and payments of the combined Road Funds for the years 1955–56 to 1959–60:—

ROAD FUNDS, TASMANIA: RECEIPTS AND PAYMENTS.

8. *Summary of Roads used for General Traffic.*—(i) *Proclaimed or Declared Roads.* The table hereunder is a summary of the roads proclaimed or declared under the Acts of the several States relative to the operations of the central road authorities, and shows the

lengths of various classes proclaimed or declared as at 30th June, 1960. The central road authority in each State assumes responsibility under the Act for the whole, or a proportion, of the cost of construction and/or maintenance of these roads, the extent varying from State to State and with the class and locality of the roads. Before proclamation of a main road, consideration is given, in general, to the following points:—availability of funds; whether the road is, or will be, within one of several classes of main trunk routes; whether the district is, or will be, sufficiently served by railways. Provision is also made in some States for the declaration of roads other than main roads. The absence of a particular class in any State does not necessarily imply that there are no roads within that State that might be so classified; the classes are restricted only to roads proclaimed or declared under the Acts. A further point to make is that, through various causes, e.g., insufficiency of funds, man-power or materials, etc., construction or maintenance may not keep pace with gazettals of mileages, and, therefore, the condition of a road may not match its status.

PROCLAIMED OR DECLARED ROADS: LENGTHS, 30th JUNE, 1960.

(b) Includes water-bound macadam, granite,

9. **Aggregate Net Expenditure on Roads and Bridges in Australia.**—In most States there are three classes of authorities concerned with roads and bridges, the State Government, the central road authority and numerous local government bodies. The Commonwealth Government, in addition to the grants it makes to the States for road purposes, is also concerned with roads in the Northern Territory, Australian Capital Territory and roads of access to Commonwealth property in the various States. Some information relating to Commonwealth grants to the States for road purposes and particulars of the expenditure on roads and bridges by local government bodies and the central road authorities are given in preceding sections of this chapter.

Most of these authorities may expend money directly on road construction or indirectly by means of grants and payments to other authorities. These indirect payments, which, if included, would duplicate expenditure, together with the fact that some authorities are unable to supply separate information concerning their road expenditure, make it difficult to compile precise statistics of aggregate expenditure on roads and bridges.

The information in the following table, which is partly estimated and which excludes the main indirect payments, provides an approximate measure of the aggregate net expenditure by all public authorities on roads and bridges in Australia during each of the years ended 30th June, 1956 to 1960. The figures cover expenditure from revenue and loan funds on the construction, reconstruction and maintenance of roads and bridges and direct administration but not debt charges. Because of the difficulties associated with the indirect payments mentioned above, it is not possible to give separate net details for each authority. The figures in the following table differ from those published in the table in this paragraph in previous issues of the Year Book, mainly because the latter represented the aggregate expenditure of the central road authorities only.

PUBLIC AUTHORITY NET EXPENDITURE ON ROADS AND BRIDGES.

§ 5. Water Supply, Sewerage and Drainage.

NOTE.—See also Chapter VIII.—Water Conservation and Irrigation.

1. **New South Wales.**—(i) *General.* The two largest domestic water supply and sewerage systems are controlled by statutory boards each consisting of a president and a vice-president appointed by the State Government and five members elected by local councils. These are (a) the Metropolitan Water, Sewerage and Drainage Board, which administers the systems in the County of Cumberland, i.e., in Sydney and in the surrounding districts, and, in addition, has jurisdiction over territory extending along the South Coast beyond Wollongong to Lake Illawarra, and (b) the Hunter District Water Board, serving the Newcastle area. At Broken Hill, a similar board includes a representative of the mining companies. Other systems, apart from irrigation projects and water storage systems administered by the State Government, are controlled by county, municipal or shire councils.

(ii) *Water Supply—to 30th June, 1960.* (a) *Metropolitan.* The storage reservoirs of the metropolitan system, with a combined available capacity of 402,503 million gallons, drain catchment areas of 3,788 square miles (Warragamba, 3,412 square miles, Upper Nepean, 347 square miles, and Woronora, 29 square miles). The development of a water supply system on the Warragamba River was completed with the official opening of the Warragamba Dam in October, 1960. This dam, constructed in concrete, has a storage capacity of 452,500 million gallons. Its safe net draught is estimated to be 285 million gallons a day. A hydro-electric power station at the dam generates 50,000 kWh a day. At 30th June, 1960, there were 127 service reservoirs in use with a combined capacity of 580 million gallons. Rating for water for 1959–60 was 10d. in the £1 of assessed annual value and the charge for water measured by meters 2s. 3d. per 1,000 gallons.

(b) *Newcastle.* The water supply is drawn from two sources (1) the Chichester Reservoir, with a storage capacity of about 5,000 million gallons and draining a catchment of 76 square miles, and (2) the Tomago Sandbeds, which extend northerly along the coast towards Port Stephens. Service reservoirs and tanks distributed throughout the Water Supply District have a total storage capacity of 113 million gallons. Water rating for 1959-60 was 1s. 5½d. in the £1 on assessed annual value for occupied properties and 1s. 2½d. in the £1 for unoccupied properties. The price of water to domestic and industrial consumers is 2s. 6d. per 1,000 gallons.

(c) *Water Supplied, etc.* The following tables show, for the Sydney and Newcastle systems, the number of properties, the estimated population supplied, and other details for the years 1955-56 to 1959-60:—

WATER SUPPLY, SYDNEY(a): SERVICES.

Year.	Improved Properties for which Water Mains available.	Estimated Population Supplied.	Average Daily Consumption.	Total Consumption for the Year.	Average Daily Consumption.		Length of Mains.	Number of Meters.
					Per Property.	Per Head of Estimated Population.		
			Mill. gals.	Mill. gals.	Gallons.	Gallons.	Miles.	
1955-56 ..	531,977	2,053,000	174.3	63,791	332	85.6	5,788	308,511

1958-59 ..	81,398	325,592	28.2	10,281	346	86.5	1,439
1959-60 ..	84,497	337,988	28.6	10,474	339	84.7	1,460

(iii) *Sewerage and Drainage—to 30th June, 1960.* (a) *Metropolitan.* Sydney and suburbs are served by three major sewerage systems and six minor systems, consisting of six outfalls discharging directly into the Pacific Ocean, and three treatment works. In addition, four centres outside the metropolitan area (Camden, Campbelltown, Liverpool and Wollongong) are served by local treatment works.

Stormwater drainage channels under the control of the Metropolitan Water, Sewerage and Drainage Board at 30th June, 1960, were 180 miles long. Sewerage rating for 1959-60 was 9d. in the £1 of assessed annual value, and drainage rating 1½d. in the £1.

(b) *Newcastle.* The main sewerage system of the Newcastle area discharges into the Pacific Ocean at Merewether Gulf. In some of the outlying districts, treatment works have been installed.

Sewerage rates for 1959-60 were 1s. 0½d. in the £1 of assessed annual value of occupied lands and 9½d. in the £1 for unoccupied lands, and drainage rates (on certain areas served) 1½d. in the £1.

(c) *Particulars of Services.* The following table gives, for the Metropolitan system, details of sewerage services and stormwater drains as at 30th June, 1956 to 1960.

SEWERAGE AND DRAINAGE, METROPOLITAN(a): SERVICES.

At 30th June—				Improved Properties for which Sewerage Available.	Estimated Population Served.	Lengths of Sewers.	Length of Stormwater Channels.
						Miles.	Miles.
1956..	344,655	1,425,000	3,349	175
1957..	353,800	1,457,000	3,462	175
1958..	364,712	1,483,000	3,628	180
1959..	379,069	1,520,000	3,791	180
1960..	395,869	1,560,000	4,021	180

(a) Includes part of South Coast.

At 30th June, 1960, 55,644 premises had been connected to the Hunter District Water Board's sewerage system (Newcastle area). The total length of sewers under the Board's control was 774 miles, and the length of drains was 49 miles.

(iv) *Finances, Sydney and Newcastle Systems.* The following table shows the debt, revenue and expenditure of the Metropolitan Water, Sewerage and Drainage Board and the Hunter District Water Board for each of the services of water supply, sewerage and drainage during 1959–60, and for the three services combined during the years 1955–56 to 1959–60.

(a) Includes provision for renewals, long service leave, loss on exchange, etc. (b) Includes part of South Coast. (c) Excludes non-interest bearing capital in respect of stormwater drains transferred from Public Works Department—£2,219,823 at 30th June, 1960.

(v) *Country Water Supply and Sewerage Systems.* (a) *Local Government.* At 31st December, 1958, country water supply services were conducted or under construction by 55 municipalities, 76 shires and 5 county councils, and country sewerage services by 53 municipalities and 27 shires. The capital indebtedness of these schemes was £25,164,523 at 31st December, 1958, namely, £17,048,957 for water and £8,115,566 for sewerage. Debt of the municipalities amounted to £14,475,001, shires to £6,577,189 and county councils to £4,112,333. Government advances amounting to £495,595 are included in these figures. Aggregate income and expenditure amounted to £4,151,171 and £3,314,533, respectively, in 1958.

(b) *Other.* The water supply and sewerage services for Broken Hill are operated by a statutory board, the Broken Hill Water Board. Its capital indebtedness at 31st December, 1959 was £3,233,382. In 1959, income (excluding subsidies, State Government £100,753 and Mining Companies £298,505) amounted to £240,035 and expenditure (excluding debt redemption £201,249) amounted to £436,154.

The following country water supply systems—South-West Tablelands, Junee and Fish River—are administered by the Department of Public Works. These supply water in bulk to municipalities and shires, the Railways Department, and other large consumers. Only a small quantity is sold direct to private consumers. The capital indebtedness of these systems was £5,765,310 at 31st December, 1959.

The Mulwala Water Supply and Sewerage Service was constructed as an urgent war-time work for the Commonwealth, and the Bethunga Water Supply System is administered by the Department of Public Works in conjunction with the Junee supply.

2. *Victoria.*—(i) *Melbourne and Metropolitan Board of Works.* (a) *General.* The Board was established by Act of Parliament on 20th December, 1890. Since June, 1959, the Board has consisted of a Chairman and 51 Commissioners elected to represent the municipalities which lie wholly or partly within the metropolitan area. The Chairman is elected by the Commissioners for a four-year term. The principal functions of the Board until 1954 were to control and manage the metropolitan water supply system; to provide the metropolitan area with an efficient main and general sewerage system; to deal with main drains and main drainage works; and to control and manage the rivers, creeks and watercourses within the metropolitan area. The Board has carried out since December, 1954, the additional functions of a permanent planning authority, and in June, 1956, it became the authority directly responsible for certain metropolitan main highways, bridges, parks and foreshores.

(b) *Water Supply.* There are six storage reservoirs serving the metropolitan area—Yan Yean, 7,233 million gallons (available for consumption, 6,649 million gallons); Toorourong, 60 million gallons; Maroondah, 6,289 million gallons (4,870 million gallons); O'Shannassy, 931 million gallons; Silvan, 8,853 million gallons (8,823 million gallons); and Upper Yarra, 45,400 million gallons (44,120 million gallons); total 68,766 million gallons (65,453 million gallons). Service reservoirs number 27, with a total capacity of 327 million gallons.

The water rate levied by the Board in 1959–60 was 8d. in the £1 on the net annual value of the properties served. The charge for water consumed in excess of the quantity which, at 1s. 6d. per 1,000 gallons, would equal the assessed water rates on each property, was 1s. 6d. per 1,000 gallons. The following table shows particulars of Melbourne metropolitan water supply services for the years 1955–56 to 1959–60.

WATER SUPPLY, MELBOURNE: SERVICES.

Year.	Number of Houses Supplied.	Estimated Population Supplied.	Average Daily Consumption.	Total Consumption for the Year.	Average Daily Consumption.		Length of Aqueducts, etc., Mains and Reticulation.	Number of Meters.
					Per House.	Per Head of Estimated Population.		
			Mill. gals.	Mill. gals.	Gallons.	Gallons.	Miles.	
1955-56 ..	424,500	1,528,000	113.0	41,377	266	74.0	4,381	289,567

1959-60 ..	384,844	1,385,000	83.2	30,459	216.2	60.1	3,458	181

The metropolitan sewerage system consists of the Main system (serving an area of 76,854 acres) and three subsidiary systems—the Sunshine system (serving an area of 1,760 acres), the Kew system (serving an area of 103 acres) and the South-eastern system (serving an area of 2,701 acres in Cheltenham, Parkdale, Mentone and Mordialloc). The Metropolitan Sewage Farm, 26,854 acres in extent and situated about 24 miles south-west of Melbourne beyond the township of Werribee, serves to purify and dispose of approximately 95 per cent. of the sewage flow of the metropolis before its discharge into Port Philip Bay. The total capital cost (less depreciation) of the Farm to 30th June, 1960, was £3,835,542. Revenue during 1959-60 amounted to £273,962, cost of sewage disposal to £262,268, trading expenses to £129,774, interest to £185,972, and net cost of sewerage purification to £304,052. These financial particulars are included in the sewerage items of the summary below.

(d) *Finances.* The following table provides for the year 1959-60 a summary of the financial operations of the water supply, sewerage and drainage services conducted by the Melbourne and Metropolitan Board of Works.

MELBOURNE AND METROPOLITAN BOARD OF WORKS: FINANCES, 1959-60.
(£.)

Service, etc.	Capital Cost of Works and Buildings at 30th June.(a)	Revenue.	Expenditure.				Surplus (+) or Deficit(—).

(ii) *State Rivers and Water Supply Commission.* (a) *General.* Water supply and conservation throughout Victoria (except for the area controlled by the Melbourne and Metropolitan Board of Works) is the responsibility of the State Rivers and Water Supply Commission. The events leading to the establishment of the Commission and its works in the spheres of irrigation, domestic and stock water supply to farms, drainage, flood protection and river improvement, have already been described in Chapter VIII.; this section is therefore confined to the Commission's functions in connexion with urban water supply and sewerage.

(b) *Water Supply.* At 30th June, 1960, the Commission provided a reticulated water supply from its own works to 131 cities and towns having a combined population of 200,000 persons.

The principal systems operated by the Commission serve part of the Mornington Peninsula—Dandenong area (about 85,000 people supplied); Bendigo, Castlemaine, etc. (58,000) and about 8,000 people in the Western District. In addition, 10,000 persons in a number of towns in the Bellarine Peninsula receive supply through a Commission-operated distributary system from headworks controlled by the Geelong Waterworks and Sewerage Trust.

Outside these areas, the Commission supplies mainly small towns in the north of the State, in areas where it also supplies farms with water for irrigation or domestic and stock purposes.

Capital expenditure at 30th June, 1960, net of redemption payments, was divided up as follows between the several systems:—Mornington Peninsula, £7,075,000; Bendigo, Castlemaine, £3,700,000; Bellarine Peninsula, £725,000; Otway System (Western District), £650,000; Other, £950,000; Total, £13,100,000.

In addition to the towns supplied by the Commission, there are more than 500,000 people in 205 cities and towns throughout the State who get a reticulated water supply from works operated by local authorities.

All these authorities operate under the supervision of the State Rivers and Water Supply Commission, largely because the Government subsidizes their capital expenditure. Most new works are financed from Government loan funds, but in recent years some local authorities have been able to borrow money privately. In most cases, the local authority controls both headworks and distribution system, but a few large towns—serving about 50,000 people—draw their water from the State Rivers and Water Supply Commission and are concerned only with reticulation of the water. Together, therefore, the Commission and local authorities supply 336 urban centres containing about 750,000 people. Very few towns of any importance are now without a reticulated water supply.

The following table presents the financial position in respect of town water supply at 30th June, 1960.

TOWN WATER SUPPLY, VICTORIA: CAPITAL LIABILITY, 30TH JUNE, 1960.
(£'000.)

Particulars.	Water supply provided by—		
	Local Authorities.	State Rivers and Water Supply Commission.	Total.
Government advances	15,100	13,750	28,850
Private loans	1,025	..	1,025
Total Expenditure	16,125	13,750	29,875
Redemption and repayments	1,350	650	2,000
Loan Expenditure Outstanding	14,775	13,100	27,875
Borne by State	3,800	6,375	10,175
Borne locally	10,975	6,725	17,700

The proportion of loan capital borne by the State is much higher in the case of Commission undertakings than for towns supplied by local authorities. This is because most Commission undertakings have been developmental in nature. Besides interest on capital borne by it, the State pays the difference between 3 per cent. and the actual rate paid on practically all of the capital carried locally. The total annual subsidy on country town water supply is currently about £700,000.

(c) *Sewerage.* The State Rivers and Water Supply Commission directly controls the sewerage system of the town of Eildon. With that exception, the construction and management of sewerage works in Victoria's country cities and towns are the responsibility of local authorities supervised by the Commission. Except for the Geelong Waterworks and Sewerage Trust and the Latrobe Valley Water and Sewerage Board which have special Acts dealing with their activities, all sewerage authorities operate under the Sewerage Districts Act.

At 30th June, 1959, there were 36 cities and towns with sewerage systems in operation. These contained about 325,000 persons, approximately a third of the total number of residents outside the metropolitan area.

Expenditure on sewerage in Victorian country towns at 30th June, 1960, was a little over £13,000,000 of which approximately £10,000,000 had been advanced by private lenders. The annual State subsidy on country sewerage in Victoria is currently about £175,000, mainly provided in the form of subsidies on interest rates paid, along the same lines as for town water supply. Comparatively little capital is borne directly by the State.

(iii) *Geelong Waterworks and Sewerage Trust.* (a) *General.* The Geelong Waterworks and Sewerage Trust was constituted in 1908 and reconstituted under the Geelong Waterworks and Sewerage Act in 1910. It was further reconstituted in September, 1950, to include a Government nominee (Chairman) and provision was made for a commissioner to be elected by the ratepayers of the Shire of Corio, making a total of seven commissioners instead

of five as formerly. The amount of loan money which may be raised is limited to £6,500,000 for water supply undertakings, and £5,000,000 for sewerage undertakings. The population supplied is estimated by the Trust at 96,684 persons. This and other general information relates to 30th June, 1959.

(b) *Water Supply.* The catchment area is about 35,000 acres. There are seven storage reservoirs and eleven service basins whose total storage capacity is 8,640 million gallons. The length of water mains and reticulation is 486 miles. The total expenditure on water supply to 30th June, 1959, was £3,510,006. Expenditure for 1958–59 comprised £126,970 for working expenses and £199,676 for interest, redemption and reserves, while revenue amounted to £324,564. The sinking fund appropriations at June, 1959, amounted to £216,313. The replacement and contingencies reserve amounted to £291,802. There is a water rate of 1s. 6d. in the £1 (with minima of 10s. for vacant land and £1 for tenements) on the net annual value of ratable properties.

(c) *Sewerage Works.* The sewerage scheme consists of a main outfall sewer to the ocean at Black Rock, about 9 miles from Geelong, and 205 miles of main and reticulation sewers. The sewerage area is 10,559 acres, and the number of buildings connected within the sewered areas is 19,108. The total expenditure on sewerage works to 30th June, 1959, was £1,505,950. The revenue in 1958–59 amounted to £172,312 and the expenditure comprised £66,961 on working expenses and £103,380 on interest, redemption and reserves. Sinking fund appropriations at June, 1959, were £156,017. Replacement and contingencies reserve amounted to £293,235. A general rate of 1s. 4d. in the £1 is levied on the net annual value of ratable properties.

(iv) *The Ballarat Water Commission and the Ballarat Sewerage Authority.* (a) *General.* The Ballarat Water Commission was constituted on 1st July, 1880, and the Ballarat Sewerage Authority on 30th November, 1920. The members of the Water Commission constitute the Sewerage Authority. The Commissioners number nine, three (one of whom is chairman) being appointed by the Government, four being elected by the Council of the City of Ballarat, one being elected by the Councils of the Borough of Sebastopol and the Shires of Buninyong and Grenville and one being elected by the Councils of the Shires of Bungaree and Ballarat. General and financial information given herein relates to the year ended 31st December, 1960.

(b) *Water Supply.* The Water Supply District embraces an area of about 65 square miles, containing a population of about 55,000. The total storage capacity of the seven reservoirs is 5,435 million gallons and the catchment area is 23,872 acres.

The capital cost of construction of the waterworks was £2,457,052 to 31st December, 1960. The liabilities amounted to £1,497,109 at 31st December, 1960, including loans due to the Government totalling £1,361,568. The revenue for the year 1960 was £176,074. Working expenses during 1960 amounted to £102,773 and interest and other charges to £73,203. A rate of 1s. 1d. in the £1 is levied on the net annual value of all ratable properties, with minima of £1 10s. per annum for land on which there is a building and £1 per annum for land on which there is no building.

(c) *Sewerage.* The Ballarat sewerage district embraces the City of Ballarat and parts of the Shires of Ballarat, Bungaree and Grenville and the Borough of Sebastopol. Work was commenced in 1922 and up to 31st December, 1958, the Authority had constructed a disposals works, a nightsoil depot, an ejector station and more than 132 miles of sewers. The capital cost of sewerage construction works to 31st December, 1960, was £1,304,477. The method of sewage disposal is by sedimentation, oxidation and sludge digestion. One hundred and ninety-seven sewered areas had been declared as at 31st December, 1960. Assessments in the sewerage district numbered 17,767, while those in sewered areas numbered 13,880. There were 12,058 buildings connected.

The scheme is financed by debenture-issue loans from various financial institutions. The liabilities on account of loans secured for construction at 31st December, 1960, amounted to £1,039,927; redemption payments at that date totalled £301,647. An expenditure of £157,122 was incurred for house connexions, the whole of which has been redeemed. Revenue during 1960 amounted to £120,451 and expenditure, which included £61,589 on interest and redemption, was £116,606.

A sewerage rate of 1s. 4d. in the £1 is levied, with a minimum charge of £3 on the net annual value of any ratable sewered property on which there is a building and £1 on any ratable sewered property on which there is no building.

(v) *Latrobe Valley Water and Sewerage Board.* (a) *General.* The Latrobe Valley Water and Sewerage Board was constituted on 1st July, 1954. The Board consists of seven members, namely:—two Government nominees (one of whom is Manager and also Board

Chairman), three members elected by water supply, sewerage and river improvement authorities within the Latrobe Valley, and one representative each of the State Electricity Commission of Victoria and the Gas and Fuel Corporation of Victoria.

(b) *Water Supply.* The Board is empowered to construct water supply works within the Latrobe Valley but at present its main construction activities are confined to the central and industrialized areas, particularly around the towns of Morwell and Traralgon. At 30th June, 1960, a pumped water supply scheme from the Tyers River had been constructed and work was proceeding on a reservoir with a capacity of 7,000 million gallons on the Upper Tyers River. The capital cost of construction of the water works was £2,032,164 to 30th June, 1960. Liabilities amounted to £2,317,556 including loans due to the Government totalling £2,278,338. Revenue for the year was £140,787. Working expenses during 1959-60 amounted to £37,536 and interest and other charges to £66,920. The Board does not strike a rate but supplies consumers, including local water supply authorities, by measure. The quantity supplied during the year ended 30th June, 1960, was 2,020 million gallons.

(c) *Sewerage.* The sewerage system consists of a main outfall sewer, about 50 miles in length, to the Dutson Downs Disposal Farm. Wastes conveyed consist mainly of industrial wastes, such as paper wastes and gasification wastes, together with small quantities of domestic sewage. The capital cost of the sewerage construction works to 30th June, 1960, was £2,133,899. Liabilities amounted to £2,404,051 including loans due to the Government totalling £2,292,180. Revenue in 1959-60 was £157,012, and expenditure comprised £34,676 working expenses and £64,363 interest and other charges. No sewerage rate is levied but a charge is made by measure for wastes both from industries and public authorities. The quantities of effluent admitted to the outfall system during 1959-60 averaged 4.84 million gallons a day.

(vi) *Other Sewerage Authorities.* At 30th June, 1960, 64 other sewerage authorities had been constituted under the provisions of the Sewerage Districts Acts and systems were in operation in 36 districts.

3. Queensland.—(i) *Brisbane City Council—to 30th June, 1960.* (a) *General.* This organization conducts the water supply and sewerage systems of the City of Brisbane. Prior to 1928, water and sewerage activities had been controlled by the Metropolitan Water and Sewerage Board, but were then absorbed by the Brisbane City Council, which also supplies, in bulk, the whole of the water used by the City of Ipswich and the Town of Redcliffe.

(b) *Water Supply.* Water storage facilities comprise the following (available capacities are shown in parentheses):—Somerset Reservoir, 200,000 million gallons (55,000 million gallons); Lake Manchester, 5,806 million gallons (5,720 million gallons); Brisbane River, 543 million gallons (484 million gallons); Pure Water Reservoir, Holt's Hill, 8.3 million gallons (8.3 million gallons); Enoggera Reservoir, 1,000 million gallons (600 million gallons); Gold Creek Reservoir, 407 million gallons (400 million gallons). There are 16 service reservoirs with a capacity of approximately 41 million gallons. The Somerset reservoir is under the control of Stanley River Works Board and is a dual purpose project with a designed total holding capacity of 200,000 million gallons, 55,000 million gallons to be for water storage and 145,000 million gallons for flood mitigation. Water rating at 30th June, 1960, was 4d. in the £1 of unimproved capital value for improved properties, and 3d. in the £1 for vacant lands, with a minimum charge of £6 10s. and £6 respectively. The following table is a summary of operations of the complete Brisbane City Council system (metropolitan area, Ipswich and Redcliffe) for the years 1955-56 to 1959-60:—

WATER SUPPLY, BRISBANE(a): SERVICES.

Year.	Services Connected.	Estimated Population Supplied.	Average Daily Consumption.	Total Consumption for the Year.	Average Daily Consumption.		Length of Trunk and Reticulation Mains.	Number of Meters.
					Per Service.	Per Head of Estimated Population.		
			Mill. gals.	Mill. gals.	Gallons.	Gallons.	Miles.	
1955-56 ..	148,632	543,000	36.4	13,283	245	67.0	1,929	49,588
1956-57 ..	153,035	560,000	41.1	15,012	269	73.5	1,959	(b)
1957-58 ..	157,750	575,212	41.0	14,970	260	71.3	1,995	(b)
1958-59 ..	163,336	594,124	41.4	15,127	254	69.7	2,059	(b)
1959-60 ..	168,687	615,293	44.3	16,214	272	73.1	2,137	(b)

(a) Includes Ipswich and Redcliffe.

(b) Not available.

(c) *Sewerage.* The sewage treatment works is situated at Luggage Point at the entrance to the Brisbane River. An activated sludge system of treatment was originally planned but since the commencement of pumping operations a sedimentation plant only has been used. Sewerage rating at 30th June, 1960, was 3d. in the £1 of unimproved capital value for improved properties, and 2½d. in the £1 for vacant lands, with a minimum charge of £7 and £6 10s. respectively. The following table is a summary of operations of the Brisbane sewerage scheme for the years 1955–56 to 1959–60:—

SEWERAGE, BRISBANE: SERVICES.

Year.	Premises Connected.	Estimated Population Served.	Total Sewage Pumped for the Year.	Length of Main, Branch, Reticulation etc., Sewers.
			Mill. Galls.	Miles.
1955–56	53,100	196,000	6,222	696
1956–57	54,300	201,000	4,837	712
1957–58	55,846	206,630	5,316	731
1958–59	58,616	216,879	6,043	757
1959–60	58,942	218,185	5,626	77

(d) *Finances.* The following table shows particulars of the finances of the water supply and sewerage undertakings of the Brisbane City Council for the years 1955–56 to 1959–60:—

WATER SUPPLY AND SEWERAGE, BRISBANE: FINANCES.

(£.)

Service and Year.	Gross Capital Cost to 30th June.	Revenue.	Expenditure.			Surplus(+) or Deficit(—).
			Working Expenses.	Interest, Redemption, etc., Charges.	Total. (a)	
Water Supply—						
1955–56 ..	12,618,584	1,479,045	765,970	549,707	1,459,738	+ 19,307
1956–57 ..	13,159,492	1,634,624	810,150	564,708	1,610,117	+ 24,507
1957–58 ..	13,560,777	1,728,751	875,248	569,267	1,577,222	+ 151,529
1958–59 ..	14,688,559	1,786,978	907,186	629,422	1,736,230	+ 50,748
1959–60 ..	(b)	2,149,216	984,213	793,263	2,115,298	+ 33,918
Sewerage—						
1955–56 ..	13,125,463	719,623	217,238	408,917	707,476	+ 12,147

1958–59 ..	14,434,390	807,399	267,861	444,562	806,862	+ 537
1959–60 ..	(b)	907,148	(b)	460,896	839,761	+ 67,387

(a) Total including other expenditure.

(b) Not available.

(ii) *Country Towns.* (a) *Water Supply.* In addition to the City of Brisbane, there were, at 30th June, 1959, 144 cities and towns in Queensland provided with water supply systems controlled by municipal and shire councils.

(b) *Sewerage Systems.* At 30th June, 1959, there were 19 cities and towns outside the Metropolitan Area—Barcaldine, Blackall, Bundaberg, Charleville, Cunnamulla, Goondiwindi, Hughenden, Ipswich, Kingaroy, Mackay, Maryborough, Mt. Isa, Quilpie, Rockhampton, Redcliffe, Surat, Toowoomba, Townsville and Warwick—with sewerage systems.

Sewerage schemes were in course of construction at Bowen, Longreach and Roma.

(c) *Finances.* The receipts (other than loan and loan subsidy) of water undertakings controlled by the cities and towns referred to above amounted to £2,027,296 in 1958-59. Expenditure amounted to £2,008,107, including £809,310 for debt charges. In addition, expenditure from loans and loan subsidy amounted to £2,012,584.

Finances of sewerage undertakings are incorporated in council general funds and are not available separately.

4. *South Australia.*—(i) *General.* The water supply and sewerage systems in this State were constructed and are maintained by the Engineering and Water Supply Department under the control of the Minister of Works. The works controlled comprise the Adelaide, Barossa, Baroota Creek, Beetaloo, Bundaleer, Tod River, Warren and other country water districts systems, the Morgan-Whyalla water supply system, the Adelaide metropolitan sewerage system, the Murray River Weirs water conservation, and the Metropolitan Flood Waters Scheme. In 1955-56, construction commenced on the Salisbury-Elizabeth Sewerage Scheme and early in 1959 sewerage of the town of Naracoorte and further extensions to the Port Lincoln sewerage scheme were commenced.

(ii) *South Australian Waterworks.* (a) *Services.* The table below shows particulars of the area, capacity, etc., of combined metropolitan and country waterworks for the years 1955-56 to 1959-60:—

WATERWORKS, SOUTH AUSTRALIA: SERVICES.

Year.	Assessments.(a)		Area of Districts Supplied. (a)	Capacity of Reservoirs, Tanks, etc.	Length of Mains.	Number of Meters.
	Number.	Annual Value.				
		£	Acres.	Mill. gals.	Miles.	
1955-56..	243,809	20,827,954	12,106,795	24,014	7,777	150,317
1956-57..	250,306	22,687,480	12,860,508	24,015	7,916	166,350
1957-58..	262,430	26,810,750	12,983,539	33,949	8,260	180,815
1958-59..	269,825	28,361,294	13,003,305	33,954	8,537	197,914
1959-60..	289,235	31,617,930	13,037,312	33,957	9,016	213,024

(a) Excludes Morgan-Whyalla Water Supply—water sold by measure.

(b) *Finances.* Figures for 1955-56 to 1959-60 are shown in the following table:—

WATERWORKS, SOUTH AUSTRALIA: FINANCES.

(£.)

Year.	Invested Capital to 30th June.	Revenue.	Expenditure.			Deficit.
			Working Expenses. (a)	Interest.	Total.	
1955-56	41,501,133	2,082,694	1,920,666	1,328,068	3,248,734	1,166,040
1956-57	45,239,197	2,318,072	2,295,444	1,485,486	3,780,930	1,462,858
1957-58	49,161,026	3,028,193	2,944,648	1,740,157	4,684,805	1,656,612
1958-59	54,301,234	3,106,348	2,768,406	1,933,850	4,702,256	1,595,908
1959-60	59,754,865	3,386,221	3,391,892	2,205,764	5,597,656	2,211,435

(a) Includes debt redemption.

(iii) *Adelaide Waterworks.* At 30th June, 1960, the Adelaide waterworks supplied a district of 185,834 acres. The capacity of its five reservoirs and storage tanks was 14,469 million gallons and there were 2,293 miles of mains.

The Mannum-Adelaide pipeline conveys water from the River Murray to the River Torrens and the River Onkaparinga, and supplements the Metropolitan and Warren systems, serving country areas en route. Another major project, the construction of a large reservoir on the South Para River, is now completed. This reservoir provides additional storage to serve the lower northern areas of the State and makes some additional provision for the metropolitan area. The capacity of the new reservoir is 11,300 million gallons.

Particulars of finances for the years 1955-56 to 1959-60 are shown below:—

ADELAIDE WATERWORKS: FINANCES.

(£.)

Year.	Invested Capital to 30th June.	Revenue.	Expenditure.			Surplus (+) or Deficit (—).
			Working Expenses. (a)	Interest.	Total.	
1955-56..	20,434,323	1,358,896	930,138	646,720	1,576,858	— 217,962
1956-57..	23,115,689	1,492,610	1,218,285	759,012	1,977,297	— 484,687
1957-58..	25,900,153	2,045,625	1,632,326	895,679	2,528,005	— 482,380
1958-59..	28,719,570	2,101,768	1,450,994	1,019,331	2,470,325	— 368,557
1959-60..	32,104,642	2,311,402	1,941,493	1,114,418	3,055,911	— 744,509

(a) Includes debt redemption.

(iv) *Adelaide Metropolitan Sewerage.* The Adelaide metropolitan sewerage system, comprising the Adelaide, Glenelg and Port Adelaide areas, with drainage areas of 116 square miles in all, includes a sewage farm, and treatment works at Glenelg and Port Adelaide. Financial and other particulars for 1955-56 to 1959-60 are shown hereunder:—

ADELAIDE METROPOLITAN SEWERAGE: SUMMARY.

Year.	Length of Sewers.	Number of Connexions.	Invested Capital to 30th June.	Revenue.	Expenditure.			Surplus(+) or Deficit(—)
					Working Expenses. (a)	Interest.	Total.	
	Miles.		£	£	£	£	£	£
1955-56 ..	1,335	137,995	7,602,416	866,754	577,872	238,748	816,620	+ 50,134
1956-57 ..	1,370	143,743	8,273,936	1,167,508	648,999	263,270	912,269	+ 255,239
1957-58 ..	1,411	149,104	9,213,112	1,393,260	653,810	309,145	962,955	+ 430,305
1958-59 ..	1,444	154,636	10,437,696	1,471,067	685,104	349,312	1,034,416	+ 436,651
1959-60 ..	1,471	160,407	11,305,495	1,576,769	676,660	401,009	1,077,669	+ 499,100

(a) Includes debt redemption.

(v) *Country Sewerage Schemes.* In 1959-60, the total length of the Salisbury sewerage scheme was 75 miles and the number of its connexions 6,707. The Port Lincoln scheme, which is seven miles in length, had 103 connexions in 1959-60. The Naracoorte sewerage scheme was proclaimed in January, 1959, the area being 2.43 square miles, and now has twelve miles of sewer and 116 connexions.

(vi) *Country Water Supply.* Water district systems outside Adelaide at 30th June, 1960, comprised an area of 12,851,478 acres, and the capacity of the reservoirs was 19,443 million gallons. These figures exclude the Morgan-Whyalla supply system, which obtains its water from the River Murray. The storage tanks of this system have a capacity of 44 million gallons.

The Uley-Wanilla sub-artesian basin has been utilized to augment the Tod River District supplies. Pumping began in 1947. In 1959-60, nine bores were in operation and 600 million gallons were pumped from the basin.

The scheme to reticulate water to Yorke Peninsula is nearing completion.

The following table gives financial information on country waterworks for 1955-56 to 1959-60:—

COUNTRY WATERWORKS, SOUTH AUSTRALIA: FINANCES.

(£.)

Year.	Invested Capital to 30th June.	Revenue.	Expenditure.			Deficit.
			Working Expenses. (a)	Interest.	Total.	
1955-56..	21,066,810	723,798	990,528	681,348	1,671,876	948,078
1956-57..	22,123,508	825,462	1,077,159	726,474	1,803,633	978,171
1957-58..	23,260,873	982,568	1,312,322	844,478	2,156,800	1,174,232
1958-59..	25,581,664	1,004,580	1,317,412	914,519	2,231,931	1,227,351
1959-60..	27,650,223	1,074,819	1,450,399	1,091,346	2,541,745	1,466,926

(a) Includes debt redemption.

(vii) *Morgan-Whyalla Water Supply Scheme.* This scheme, which involved the laying of 223 miles of main, was officially opened on 31st March, 1944, the capital invested to 30th June, 1960, being £2,646,826. Particulars of this scheme, where applicable, are included in the tables of the combined waterworks in (ii) above. During 1959-60, the water used from the system between Morgan and Whyalla amounted to 2,918 million gallons. Revenue for the year 1959-60 was £410,071, working expenses, etc., £310,454, interest charges, £131,244, and deficit, £31,627.

5. *Western Australia.*—(i) *General.* The water supply, sewerage and drainage systems of Western Australia are principally under the management of two State Government Departments, namely, the Metropolitan Water Supply, Sewerage and Drainage Department, having as its territory the metropolitan area centred on Perth and extending to Kwinana and Serpentine in the South, Marmion in the north and Greenmount on the east, and the Public Works and Country Water Supply Department, which controls the Comprehensive Water Supply Scheme (covering the Goldfields and Agricultural Areas Water Supply and the Great Southern Towns Water Supply) as well as supplies, from local sources, to 57 country towns not included in the scheme. Both Departments are administered under the portfolio of Minister for Works and Water Supplies. (See also Chapter VIII.—Water Conservation and Irrigation, of this Year Book, pp. 281-2.)

(ii) *Metropolitan Water Supply, Sewerage and Drainage.* (a) *General.* The sources of the metropolitan water supply are the Canning Dam, the Churchman Brook Reservoir, the Victoria Reservoir, the Wungong Brook Diversion Weir, a pipehead dam (capacity 850 million gallons) on the Serpentine River and the partly completed Serpentine Main Dam. The supply from these sources is supplemented as necessary from a number of

artesian bores and from a pipeline link with Mundaring Weir. The largest reservoir, the Canning Dam, has a capacity of 20,550 million gallons. Since the opening of the Serpentine pipehead dam in November, 1957, work has proceeded on the main Serpentine Reservoir designed to have an ultimate capacity of 39,000 million gallons, the estimated cost of the whole project being £9 million.

The sewage treatment works of Perth and suburbs consist of primary sedimentation with separate sludge digestion and discharge of all effluent directly to the ocean. Plant for secondary treatment at Subiaco is now being provided. Fremantle treatment works consist of septic tanks with ocean outfall for effluent. There are three treatment works, situated at West Subiaco, Swanbourne and Fremantle.

(b) *Water Supply.* The following table shows particulars of water supply services for 1955-56 to 1959-60.

METROPOLITAN WATER SUPPLY, WESTERN AUSTRALIA: SERVICES.

Year.	Number of Services.	Estimated Population Supplied.	Average Daily Consumption.	Total Consumption for Year.	Average Daily Consumption.		Length of Mains.	Number of Meters.
					Per Service.	Per Head of Estimated Population.		
			Mill. gals.	Mill. gals.	Gallons.	Gallons.	Miles.	
1955-56 ..	113,437	380,294	39.4	14,408	348	103.5	1,709	82,636
1956-57 ..	118,230	393,596	41.0	14,982	355	106.2	1,792	83,151
1957-58 ..	122,159	407,376	47.5	17,337	394	118.4	1,891	85,896
1958-59 ..	125,761	410,000	49.5	18,061	399	122.5	1,991	92,495
1959-60 ..	129,956	417,260	(a) 33.7	(a) 12,335	(a) 263	(a) 81.5	2,072	97,002

(a) Water restrictions in force for 180 days.

Water rating for 1959-60 was 1s. 6d. in the £1 on annual valuation.

(c) *Sewerage and Main Drainage.* Some particulars of the metropolitan sewerage and main drainage services for 1955-56 to 1959-60 are shown below:—

METROPOLITAN SEWERAGE AND MAIN DRAINAGE, WESTERN AUSTRALIA: SERVICES.

Year.				Houses Connected.	Estimated Population Served.	Length of Sewers.	Length of Main Drains.
						Miles.	Miles.
1955-56	60,702	240,860	692	34
1956-57	62,282	246,900	709	37
1957-58	63,969	253,800	713	66
1958-59	64,944	257,500	714	67
1959-60	65,781	260,600	719	69

Sewerage rating for 1959-60 was 1s. 9d. in the £1 on annual valuation, while metropolitan main drainage rating was 4d.

(d) *Finances.* The following table shows particulars of the finances of the Western Australian Metropolitan Water Supply, Sewerage and Drainage Department for the years 1955-56 to 1959-60.

**METROPOLITAN WATER SUPPLY, SEWERAGE AND MAIN DRAINAGE,
WESTERN AUSTRALIA: FINANCES.**

(iii) *Country Water Supplies.* Information concerning country water supplies is included in Chapter VIII.—Water Conservation and Irrigation, of this Year Book (*see p. 282*).

6. *Tasmania.*—(i) *Waterworks.* At the end of 1959-60, there were 95 municipally operated waterworks in Tasmania. The capacity of the reservoirs was 1,750 million gallons, the estimated population served was 250,000 and the number of tenements served was 63,000. In addition, two regional schemes operated by the State Government were serving an estimated population of 35,000 in 9,000 tenements.

(ii) *Sewerage.* At the end of 1959-60, there were 12 municipal sewerage schemes in operation in Tasmania. They served an estimated population of 165,000 and the number of tenements served was 41,600.

§ 6. Harbour Boards and Trusts.

NOTE.—The number and net tonnage of vessels which entered the major ports in each State during the years 1958-59 and 1959-60 are shown in Chapter XIV.—Transport and Communication, (*see p. 527*). Particulars of oversea and interstate cargo discharged and shipped during 1959-60 are shown on page 529 of the same chapter.

1. *New South Wales.*—(i) *Maritime Services Board of New South Wales.* (a) *General.* The Maritime Services Board of New South Wales is a corporate body of five Commissioners comprising three full-time members and two part-time members representing shipping and other interests. The Board was constituted on 1st February, 1936, under the Maritime Services Act 1935, to co-ordinate the port and navigation services of the State, which had previously been administered by the Sydney Harbour Trust and by the State Department of Navigation.

The Board exercises general control over intra-state shipping, including the survey and certification of vessels, the licensing of harbour craft, and the examination and issue of:

certificates to officers. It is responsible for the provision of pilotage services, lights, beacons, buoys and other port facilities, imposes and collects rates and charges on goods and vessels and is vested with the general control and management of the navigable waters and ports within the State.

At the Port of Sydney, the Board is also responsible for the provision of adequate wharfage and channels, and carries out all construction, maintenance and dredging work. At other ports of New South Wales, such work is undertaken by the Department of Public Works.

(b) *Port of Sydney.* The entrance to Sydney Harbour, the principal port of New South Wales, is nearly a mile wide, and the depth of its navigable channel is not less than 80 feet. Between the entrance, known as "The Heads", and the Harbour proper, a distance of four miles, there are two separate channels, each 700 feet wide, the Western Channel not less than 42 feet deep (low water ordinary spring tide) and the Eastern Channel 41 feet deep. The foreshores, which have been reduced by reclamations, are 152 miles in length, and the total area of the port is 13,600 acres, or 21 square miles, of which about one-half has a depth of 30 feet or more at low water ordinary spring tide. The mean range of tides is 3 feet 6 inches.

The wharves are situated in close proximity to the business centre of the city, about four or five miles from the Heads. At present, there are 6 dolphin berths each 550 feet long, and 101 effective commercial cargo berths with a total length of 47,493 feet controlled by the Board. Accommodation for harbour craft amounts to 3,335 feet, while the length of other berths including oil and private wharves totals 28,807 feet. Depth of water at wharves is up to 40 feet. Special facilities for the storage and handling of staple products such as wheat, wool, etc., are provided, and modern plant has been installed for replenishing ships' bunkers with oil or coal.

Docking facilities are available for the largest vessel afloat. The Captain Cook Graving Dock ranks amongst the largest graving docks in the world, being 1,139 feet by 147 feet 7½ inches with a depth of 45 feet 2 inches over the sill at high water. There are also several smaller dry docks and floating docks in the port.

The following table shows particulars of the finances of the Board in respect of the Port of Sydney for 1955-56 to 1959-60:—

MARITIME SERVICES BOARD: FINANCES OF THE PORT OF SYDNEY.

(£.)

Year.	Total Capital Debt at 30th June.	Revenue.			Expenditure.			Surplus(+) or Deficit(—).
		Wharfage and Transhipment Rates.	Tonnage Rates and Berthing Charges.	Total.	Administration and Maintenance.	Interest, Debt Redemption, Exchange, etc.	Total. (a)	
1955-56	13,775,278	1,688,743	459,783	3,042,924	1,740,698	644,783	2,910,481	+ 132,443
1956-57	14,041,252	1,725,590	385,006	2,887,506	1,857,539	722,373	2,869,912	+ 17,594
1957-58	14,546,035	1,822,587	378,284	2,899,795	1,964,830	789,230	2,999,060	— 99,265
1958-59	15,322,219	1,871,384	403,342	2,995,160	1,830,589	843,580	2,924,169	+ 70,991
1959-60	16,400,513	2,138,724	414,071	3,326,944	1,870,595	903,590	3,274,185	+ 52,759

(a) Excludes capital expenditure but includes transfers to the Renewals Fund Reserve Account, 1955-56, £525,000; 1956-57, £290,000; 1957-58, £245,000; 1958-59, £250,000; and 1959-60, £500,000.

(c) *Port of Newcastle.* The Maritime Services Board of New South Wales is the port authority, but other government bodies are responsible for certain functions and activities of a maritime character at Newcastle. These include—

- (i) the Department of Public Works, which is the constructing, dredging and maintenance authority at Newcastle as well as at other New South Wales ports except Sydney;

- (ii) the Department of Railways, which is responsible for the control of wharfrage and shipping arrangements in connexion with the coal industry, and the provision and maintenance of appliances necessary for the transport and shipment of coal.

An Advisory Committee consisting of eight members, appointed by the Governor, assists the Board in matters associated with the operation of the port. It is primarily a coal-loading port, and the proximity to the coal fields has led to the establishment of important industries, including iron and steel works, in the district. Facilities are available for the shipment of wool, wheat and frozen meat, and a wharf is available for timber.

The area used by shipping is about 570 acres, excluding the entrance to the harbour and the inner basin, which together cover an area of 162 acres. The width of the harbour at the entrance is 1,500 feet, and the navigable channel, with a depth of 25 feet 6 inches at low water, is 350 feet wide. Wharfrage accommodation amounts to approximately 12,000 feet, the Maritime Services Board controlling approximately 5,000 feet and the Railways Department approximately 4,000 feet while approximately 3,000 feet is privately owned. There are also several dolphin berths available for tie-up purposes. A floating dock of 15,000 tons capacity is available at the port.

(d) *Port Kembla.* As from 3rd May, 1948, the Maritime Services Board assumed the administration and navigational control of Port Kembla, which had previously been administered by the New South Wales Department of Public Works. The Department, however, continues to be the constructing authority in respect of works, dredging and maintenance. An Advisory Committee consisting of eight members appointed by the Governor has been formed to assist the Board in the operation of the port. It has an area of approximately 330 acres, with depths ranging from 20 to 50 feet (low water ordinary spring tide), and wharfrage accommodation totalling 6,800 feet has been provided for large ocean-going vessels. No cargo sheds are available, as the nature of trade at the port does not call for the provision of sheltered storage accommodation at the berths. It is the port of the southern coalfields and for the expanding industrial area in and about Wollongong. The developmental programme for Port Kembla includes the construction of an inner harbour to provide wharfrage for the steelworks in addition to general cargo berths.

(e) *Botany Bay.* The Maritime Services Board of New South Wales is the administrative and controlling authority. The port is primarily a discharging centre for the oil refinery at Kurnell and two berths are available as well as tanker mooring buoys. The entrance to the Bay is approximately $1\frac{1}{4}$ miles wide, with a minimum depth of about 36 feet in the dredged swinging basin.

(f) *Other Ports.* In addition to the ports of Sydney, Newcastle, Port Kembla and Botany Bay, the Board controls 28 outports along the coastline of 609 miles. The shipping trade of these outports is relatively small.

(ii) *Port Charges.* The port charges payable in respect of shipping and ships' cargoes in New South Wales are imposed by the Commonwealth Government in terms of the Light-houses Act and the Navigation Act, and by the State authorities under the Navigation Act of New South Wales, the Harbour and Tonnage Rates Act, and the Sydney Harbour Trust Act. Since 1st February, 1936, the State enactments have been administered by the Maritime Services Board. The gross collections by the State authorities amounted to £6,281,949 in 1959-60. This figure includes the Port of Sydney revenue (see table on p. 744) and State navigation service collections (£2,955,005 in 1959-60). Commonwealth Government revenue from light dues and navigation receipts, for the whole of Australia, amounted to £612,489 in 1959-60.

2. *Victoria.*—(i) *Melbourne Harbor Trust.* (a) *General.* Information regarding the origin and constitution of this Trust, which controls the Port of Melbourne, appears in Official Year Book No. 12, pages 970-2. The membership of the Board of the Melbourne Harbor Trust Commissioners was increased to five during 1954 by the appointment of a further part-time Commissioner to represent waterside workers' interests. At 31st December, 1959, the sheds available for wharfrage accommodation had a length of 22,600 feet, covering an area of 1,689,516 square feet. The area of water in Port Philip Bay and the River Yarra under the control of the Trust is approximately 5,327 acres, and the total length of wharves, piers and jetties in the port is 63,327 feet, giving an area of over 58 acres of wharfrage,

and 56,148 feet of effective berthing space. During 1959, work was continued on the new berths at Appleton Dock, Victoria Docks, South Wharf, Port Melbourne and Williamstown. A new dock in the river entrance area has been constructed for the use of the ferry service which commenced operating between Melbourne and Devonport, Tasmania, in September, 1959. The depth of water (low water ordinary spring tide) from the main channels to the principal wharves is 31 to 37 feet.

(b) *Finances.* The following table shows particulars of the financial operations of the Trust during the years 1955 to 1959.

MELBOURNE HARBOR TRUST: FINANCES.

(£.)

Year.	Gross Loan Indebtedness at 31st December.	Revenue.		Expenditure.				Surplus (+) or Deficit (-)
		Wharfage and Tonnage Rates.	Total.	Administration and Maintenance.	Interest, Debt Redemption, Exchange, etc.	Depreciation, Renewals and Insurance Account.	Total. (a)	
1955 ..	9,978,842	2,120,780	3,019,048	1,475,467	446,348	532,372	2,906,406	+ 112,642
1956 ..	11,296,811	1,841,176	2,676,698	1,649,047	483,905	145,825	2,662,047	+ 14,651
1957 ..	12,175,428	1,882,501	2,746,513	1,557,933	520,223	250,938	2,718,159	+ 28,354
1958 ..	12,907,279	2,043,848	3,020,913	1,310,119	603,899	631,988	2,958,686	+ 62,227
1959 ..	13,833,011	2,100,924	3,292,329	1,634,513	766,909	376,397	3,201,943	+ 90,386

(a) Includes statutory payments to Consolidated Revenue and Geelong Harbour Trust:—1955, £452,219; 1956, £383,270; 1957, £389,065; 1958, £412,680; 1959, £424,124. Excludes capital expenditure:—1955, £1,509,665; 1956, £1,609,928; 1957, £1,054,236; 1958, £1,658,589; 1959, £1,458,499.

(ii) *Geelong Harbor Trust.* The Geelong Harbor Trust, constituted in 1905, is under the control of three Commissioners appointed from time to time by the Governor-in-Council. One of these, the chairman, is on a full time basis.

At the end of 1959, there were 17 effective berths in the port, while two extra berths at Refinery Pier were under construction and a further berth for general cargo is in the course of planning. Four berths have a depth of 36 feet at low water and all others (except Yarra Pier 29 feet) have a depth of 32 feet at low water.

Total trade for 1959 amounted to 4,711,605 tons, imports being 3,048,231 tons and exports 1,663,374 tons. During 1959, 520 vessels with a total gross tonnage of 4,424,395 tons entered the port.

Revenue for the year 1959 was £992,814 and expenditure from revenue totalled £603,872. At 31st December, 1959, the value of the Trust's fixed assets was £7,679,486 and loans outstanding amounted to £2,939,004.

(iii) *Portland Harbor Trust.* Construction of an all weather deep-sea port of three berths with a low water depth of 36 feet was commenced following the proclamation of the Portland Harbor Trust Act on 18th May, 1951. This was completed to operational standards in 1960.

Operating revenue for the year ended 30th June, 1959, was £46,475 and revenue expenditure was £35,696. The value of the Trust's fixed assets, less depreciation, was £4,559,110 at 30th June, 1959, and loans and advances outstanding amounted to £4,755,111.

During the year ended 30th June, 1959, total trade of the port was 145,562 tons which was carried in 66 vessels of a total gross tonnage of 460,674.

(iv) *Other Victorian Ports.* There are no other Victorian ports of more than minor importance.

3. *Queensland.*—(i) *General.* The ports of Queensland, except Brisbane and certain minor ports, are administered by Harbour Boards with members representing the towns and districts served by the ports. Brisbane and the minor ports are controlled by the State Treasury through the Department of Harbours and Marine, which supervises the engineering activities of the other ports.

(ii) *Brisbane.* Brisbane accommodates comfortably, in its dredged and improved river, the largest vessels in the Australian trade. The main centres for shipping, although further downstream than formerly because of the increasing size of vessels, are still within easy access of the city. Adequate dry-docking facilities are available. The finances of Brisbane Harbour for the years 1954-55 to 1958-59 are shown below:—

BRISBANE HARBOUR: FINANCES.
(£'000.)

Year.	Loan Indebtedness at 30th June.	Receipts.		Payments.	
		Harbour Dues.	Total.	Working Expenses.(a)	Total.
1954-55	2,633	688	853	522	693
1955-56	2,899	701	817	582	772
1956-57	3,011	671	918	843	1,048
1957-58	3,042	696	938	731	944
1958-59	2,702	709	1,097	664	883

(a) Excludes Interest and Redemption included in Total.

In addition to Brisbane Harbour, the Department of Harbours and Marine also controls the Brisbane Dry Dock, the Cairncross Dock, the Brisbane River, and ten smaller harbours not administered by harbour boards.

(iii) *Harbour Boards.* Harbour boards control the ports of Bowen, Bundaberg, Cairns, Gladstone, Mackay, Rockhampton and Townsville. Finances for each port for the year ended 30th June, 1959, are shown below, together with a summary for the years ended 30th June, 1955 to 1959.

HARBOUR BOARDS, QUEENSLAND: FINANCES.
(£.)

Harbour Board.	Loan Indebted- ness at 30th June.	Revenue.		Expenditure (excluding Loan).		Surplus (+) or Deficit (-).
		Wharf- age and Harbour Dues.	Total.	Working Expenses.	Total (including Interest and Redemption). (a)	
Bowen	275,448	40,568	68,681	39,985	56,307	+ 12,374
Bundaberg	1,977,953	88,979	240,976	(b) 4,742	327,401	- 86,425
Cairns	252,270	194,579	273,776	216,814	258,835	+ 14,941
Gladstone	615,669	47,929	100,713	27,309	81,995	+ 18,718
Mackay	1,367,985	234,264	446,198	86,147	417,475	+ 28,723
Rockhampton	545,628	53,883	64,418	34,497	64,021	+ 397
Townsville	2,348,368	238,620	407,647	192,897	490,013	- 82,366
Total, 1958-59 ..	7,383,321	898,822	1,602,409	602,391	1,696,047	- 93,638
„ 1957-58 ..	5,435,172	775,436	1,226,581	603,081	1,190,356	+ 36,225
„ 1956-57 ..	3,567,335	757,778	1,005,986	578,259	1,170,528	- 164,542
„ 1955-56 ..	2,885,528	720,642	955,846	512,776	1,361,568	- 405,722
„ 1954-55 ..	2,807,527	766,504	1,108,613	530,541	996,604	+ 112,009

(a) Includes expenditure on capital works from accumulated revenue.

(b) Excludes wages.

4. *South Australia.*—*The South Australian Harbors Board.* All South Australian harbours are controlled by the South Australian Harbors Board, which consists of three Commissioners appointed by the Governor for a period of five years and eligible for re-appointment. The Board is responsible to the Minister of Marine for the discharge of its duties and functions. The most important ports are the five deep sea ports of Port Adelaide,

Port Pirie, Wallaroo, Port Lincoln and Thevenard. At a few ports, the wharves or jetties are privately controlled, the principal of these being at Whyalla, Ardrossan and Rapid Bay, all of which are controlled by the Broken Hill Pty. Co. Ltd. Port Augusta is controlled by the Commonwealth Railways on behalf of the Commonwealth Government. Maximum depths of water (low water ordinary spring tide) at the wharves of the main ports range from 20 to 24 feet at Port Pirie to 35 feet at Port Adelaide (Outer Harbour). The following table shows the finances of the Board for 1955-56 to 1959-60:—

THE SOUTH AUSTRALIAN HARBORS BOARD: FINANCES.

(£.)

Year.	Capital at 30th June. (a)	Revenue.	Expenditure from Revenue.			Surplus (+) or Deficit (—)
			Working Expenses.	Interest.	Total.	
1955-56..	12,366,653	1,920,340	1,451,296	404,188	1,855,484	+ 64,856

(a) State Treasurer's Funds and Reserve employed.

5. *Western Australia.*—(i) *Fremantle Harbour Trust.* The Port of Fremantle is operated and controlled by the Fremantle Harbour Trust, a body corporate administered by a Board of five Commissioners appointed triennially by the Governor. The port covers an extensive water area of some 180 square miles and comprises an Inner and an Outer Harbour. The Inner Harbour includes 18 deep water land-backed berths, providing more than 680,000 sq. ft. of covered storage space and 11,148 feet of wharf berth accommodation. All Inner Harbour berths are dredged to a depth of 36 feet. The Outer Harbour includes three main anchorages, Gage Roads, Owen Anchorage and Cockburn Sound. Deep water jetties are available in the Outer Harbour including the Oil Refinery Jetties in Cockburn Sound. Ocean going deep draft ships enter the Sound by means of channels dredged through Success and Parmelia Banks to a low water depth of 38 feet and a bottom width of 500 feet. The depth of water at the Refinery Jetties is a minimum of 44 feet.

Gross earnings for the year 1959-60 amounted to £2,756,490, working expenses to £2,149,418, interest charges to £244,735, debt redemption to £68,703 and renewals fund to £2,000. Special loan redemptions were £281,019 and net capital totalled £7,281,508.

(ii) *Albany Harbour Board.* The Albany Harbour is controlled by a board of five members appointed by the Government. The depth of water in the entrance channel is 33 feet, at one arm of the jetty 31 feet and at the other arm 34 feet. On approaches to wharf berths, the depth is 30 feet and dredging to accomplish a depth of 34 feet is being carried out. Wharf accommodation consists of 1,115 feet, and in addition the Deepwater Jetty has 2,500 feet of accommodation. Gross earnings for the year 1959-60 amounted to £116,757, working expenses £47,764, interest and sinking fund charges, £84,534, and amounts debited to loan capital account, £1,725,406.

(iii) *Bunbury Harbour Board.* The Bunbury Harbour is controlled by a board of five members appointed by the Government. The depth of water in the harbour is 30 feet and berthing accommodation is 3,700 feet. Gross earnings for the year 1959-60 amounted to £110,901, working expenses £85,555, interest and sinking fund charges £76,623, and amounts debited to loan capital account, £1,784,385.

(iv) *Other Ports.* The following ports are controlled by the State Government Harbour and Lights Department:—Geraldton, Yampi, Port Hedland, Carnarvon, Wyndham, Derby, Point Samson, Busselton, Onslow and Broome. The Port of Esperance is under the control of the Railways Commission.

6. *Tasmania.*—There are eight marine boards and two harbour trusts in Tasmania. The marine boards control the ports of Hobart, Launceston, Stanley (Circular Head), Burnie and Wynyard (Table Cape), Devonport, Strahan, Currie (King Island), and White-mark (Flinders Island), and the harbour trusts those of Smithton and Leven. Aggregate

receipts of revenue accounts of all these authorities during the year 1958–59 were £1,297,468, and expenditures £1,225,285 including loan charges £239,320. The total receipts of the Hobart Marine Board during 1958–59 were £553,431, loan charges amounted to £91,513 and total expenditure to £576,462. Launceston Marine Board receipts during 1958–59 amounted to £311,723, loan charges to £25,532 and total expenditure to £287,726. Loan indebtedness of all marine boards and trusts at 30th June, 1959, was £3,372,508, of which £1,079,967 was in respect of Hobart (including Port Huon Wharf) and £345,254 in respect of Launceston.

Hobart, Launceston, Burnie and Devonport are the principal ports of Tasmania. In addition to their interstate and intra-state traffic, there is also considerable oversea shipping. Depths of water at wharves vary, in general, between 16 and 34 feet (low water ordinary spring tide), but at Hobart there is a depth of water of from 30 to 52 feet.

§ 7. Fire Brigades.

1. *New South Wales*.—A Board of Fire Commissioners, consisting of five members, one appointed by the State Government (President) and one each representing insurance companies, local government authorities, volunteer firemen, and permanent firemen, operates under the Fire Brigades Act 1909–1958, and 158 fire districts had been constituted at the end of 1959. The cost of maintenance of fire brigades is borne in proportions of local councils and the Government each one-eighth, and the insurance companies three-quarters. The Board's borrowing power is limited to £1,000,000.

At 31st December, 1959, the authorized strength of the Fire Brigade throughout the fire districts of New South Wales was 378 officers and 1,112 permanent and 2,608 volunteer firemen. Corresponding figures for the Sydney Fire District were 304, 1,008 and 327. The revenue for the year 1959 was £2,866,137, made up as follows:—from the Government, £355,381; municipalities and shires, £355,381; fire insurance companies and firms, £2,132,289, and from other sources, £23,086. The disbursements for the year were £2,830,760. The Board of Fire Commissioners provides the fire protection services for Canberra, in the Australian Capital Territory, and the cost of these services is reimbursed by the Commonwealth Government.

A Fire Regions and a Bush Fire Fighting Fund exists for the prevention and fighting of bush fires and is financed from contributions by the Government, councils and insurance companies in the proportion of one-quarter, one-quarter and one-half, respectively. At 30th June, 1960, Volunteer Brigades, equipped by means of this fund, numbered 2,500 with an active membership in excess of 60,000 persons. Up to 30th June, 1960, expenditure from the Fund for equipment amounted to £1,354,790.

2. *Victoria*.—(i) *General*. In Victoria, fire brigades are controlled by the Metropolitan Fire Brigades Board consisting of ten members, including an employees' representative, and the Country Fire Authority also consisting of ten members.

(ii) *Metropolitan Fire Brigades Board*. The Metropolitan Fire Brigades Board receives contributions from the municipalities and the insurance companies in the proportion of one-third and two-thirds respectively. On 30th June, 1960, the Board had under its control 44 stations, 883 permanent staff, 211 special service and clerical, etc., staff, and 15 part-time firemen. The total receipts for 1959–60 were £1,797,274 comprising contributions, £1,457,776, receipts for services, £141,321 and interest and sundries, £198,177. The expenditure was £1,796,194.

(iii) *Country Fire Authority*. This authority is responsible for the prevention and suppression of fires in the "country area of Victoria", which embraces the whole of the State outside the metropolitan fire district, excluding State forests and certain crown lands. The country area has been divided into 24 fire control regions, three of which (Ballarat, Bendigo and Geelong) are wholly urban and the remainder mixed urban and rural. The Country Fire Authority receives contributions in the proportion of two-thirds from insurance companies and one-third from the Treasury. At 30th June, 1960, the Act applied to 192 insurance companies, 205 urban and 1,031 rural fire brigades. The effective registered strength of the brigades was 100,959 members.

Income for the year 1959–60 amounted to £569,870. Total expenditure other than loan amounted to £525,604.

3. *Queensland.*—(i) *General.* Fire Districts are constituted under the Acts of 1920–1956. For each district, there must be a Fire Brigades Board consisting of seven members, and the cost of maintenance of each brigade is proportioned as follows:—Treasury, one-seventh, insurance companies five-sevenths, and local authorities one-seventh. The insurance companies' contribution is paid to the State Government and thence to Fire Brigades.

(ii) *Fire Brigade Boards.* At 30th June, 1959, there were 75 Fire Brigade Boards. The total number of stations was 139 and full-time staff numbered 766, including 22 administrative, 153 officers and 591 firemen. Volunteers numbered 126. Part-time staff numbered 1,042 including 74 administrative, 107 officers and 861 firemen. The total revenue for the year 1958–59 was £1,057,420, received mainly from the following sources:—Government £143,619, local authorities £143,609, insurance companies £718,452. Loan receipts (Government and other) were £93,648. The total expenditure for the year was £1,107,541, the chief items being salaries and wages £804,598, and interest and redemption of loans £76,400.

4. *South Australia.*—The Fire Brigades Act 1936–1958 provides for a board of five members, and the expenses and maintenance of brigades are defrayed in the proportion of two-ninths by the Treasury (subject to certain limits when the contribution exceeds £10,000), five-ninths by insurance companies, and two-ninths by the municipalities concerned. At 30th June, 1960, there were altogether 35 fire brigade stations, of which 12 were metropolitan and 23 country.

The strength of the permanent staff at 31st December, 1960, was 389, including 270 officers and men, 89 country auxiliary firemen and 30 other employees (including maintenance workers). The total revenue for the year 1959–60 was £445,926, including contributions of £379,701 made up as follows:—insurance companies £228,628, Treasury £59,622 and municipalities £91,451. The Treasury contribution includes an additional grant of £47,420.

5. *Western Australia.*—In 1942, certain municipal and road board districts were constituted fire districts under the control of the Western Australian Fire Brigades Board. There were 37 fire districts at 30th September, 1959. The contribution to the Board is made in the proportion of two-ninths from the Government, two-ninths from local government authorities, and five-ninths from insurance companies. The number of local government authorities and insurance companies who contributed numbered 56 and 151 respectively. The brigades, throughout the State, controlled by the Western Australian Fire Brigades Board at 30th September, 1959, numbered 55, with a staff of 1,503 including 265 permanent officers and firemen and 1,238 volunteer brigade officers and firemen. The revenue for the year ended 30th September, 1959, was £479,596 and the expenditure £470,173.

Under the Bush Fires Act, a Bush Fires Board, consisting of ten members, five of whom are nominated by the Road Board Association, was set up to advise the Minister for Lands on bush fire control. The Act also provides for the registration of bush fire control officers, who numbered 1,523 at 30th June, 1960, and the establishment of bush fire brigades, 716 at 30th June, 1960. Many individual brigades are large organizations with numerous self-contained sections.

6. *Tasmania.*—The Fire Brigades Act 1945 provided for the creation of the Fire Brigades Commission of Tasmania to co-ordinate the activities of existing fire brigades boards, while leaving the responsibility for individual control and management with the boards. The Commission consists of two persons nominated by the Minister, one person elected by the City or Municipal Councils representatives and three persons elected by the insurance representatives of the Fire Brigades Boards. Contributions towards the cost of operations are on the basis of one quarter each from the Treasury and the municipalities respectively and one half from the insurance companies concerned. The cost for the year 1958–59 amounted to £152,000. There were, at 30th June, 1959, 23 brigades controlling 37 stations, and their aggregate staffs numbered 542, including 100 permanent officers, 360 part-time firemen, including officers, and 82 volunteers.

CHAPTER XX.

PRIVATE FINANCE.

NOTE.—Further information on the subjects dealt with in this chapter is contained in the annual bulletin *Finance, Part 1.—Public and Private Finance* published by this Bureau. Current information is contained in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics* (monthly), and the monthly mimeograph statements *Australian Banking Statistics* (bulletin and preliminary statement), *Australian Savings Bank Statistics* (bulletin and preliminary statement) and *Australian Life Assurance Statistics* (bulletin). The annual mimeograph bulletin *Australian Fire, Marine and General Insurance Statistics* contains the most recent information available on this subject. Other relevant mimeograph statements are:—*Retail Hire Purchase Operations of Finance Businesses* (monthly), *New Capital Raisings by Companies in Australia* (quarterly) and *Capital and Maintenance Expenditure by Private Businesses in Australia* (half-yearly).

A. CURRENCY.

§ 1. General.

The Australian monetary system is based on the British system, of which the unit is the pound (£) divided into 20 shillings (s.) each of 12 pence (d.). When the Australian currency was introduced in 1909 the Australian pound was specified as equivalent to 123.27447 grains of gold $\frac{11}{12}$ ths fine or 113.002 grains of fine gold and, until the depression in 1930, was identical with the pound sterling. There was a gradual depreciation of the Australian pound in terms of sterling from the beginning of 1930 until 3rd December, 1931, when it was stabilized at the rate of £125 Australian = £100 sterling. This relationship has been maintained until the present time. Following the depreciation, no action was taken to define the value of the Australian pound in terms of gold until 5th August, 1947, when the Australian Government advised the International Monetary Fund, in terms of the membership agreement, that the par value of the Australian pound was 2.86507 grammes (44.2148 grains) of fine gold. From 18th September, 1949, this was reduced to 1.99062 grammes (30.720 grains) of fine gold.

When the Commonwealth was established in 1901, the currency in Australia consisted of United Kingdom gold, silver and bronze coins, notes issued by the banks, and Queensland Treasury notes. Queensland Treasury notes were in circulation in Queensland only, having superseded bank notes in that State after the 1893 crisis. Under the Commonwealth Constitution, the control of currency, coinage and legal tender and the issue of paper money was vested in the Commonwealth. The Commonwealth assumed these powers by enacting the Coinage Act 1909 and the Australian Notes Act 1910.

Australian notes are legal tender in Australia for any amount. Australian silver coins are legal tender for any amount not exceeding forty shillings and Australian bronze coins are legal tender for any amount not exceeding one shilling.

§ 2. Coinage.

1. *Coins in Circulation.*—Brief historical notes relating to the Australian Coinage are given in Official Year Book No. 37, pages 557 and 558. For weight, metal, composition, etc., of Australian coins in circulation see Official Year Book No. 39, page 697.

The silver coins issued prior to July, 1947, have a millesimal fineness of 925 (thirty-seven fortieths silver and three fortieths copper) and those issued since 1st July, 1947 (dated 1946 and later) have a millesimal fineness of 500 (one-half silver and one-half other metals).

From 1910 to 1916, Australian coins were minted in England by the Royal Mint, London, and the Mint, Birmingham Ltd., and in 1916 and 1917 by the Indian Mints. The minting of Australian coins was undertaken by the Australian Mints in 1916, and coins have been minted at the Melbourne branch of the Royal Mint from 1916 to the present time, at the Sydney branch from 1919 until that Mint closed in 1926, and at the Perth branch in 1922 and from 1940 to the present time.

During the 1939–45 War, the two Australian Mints were unable to meet the demand for Australian coins, and some coins were minted in the United States of America and India. In 1951–52 and 1952–53, some coins were minted at the Royal Mint, London, to meet the heavy demand for coins. Details of Australian coins obtained from each mint to 30th June, 1960, are as follows:—Melbourne, £47,293,000; Perth, £1,529,000; Sydney, £488,000; United Kingdom Mints, £3,016,000; United States Mints, £6,000,000; Indian Mints, £169,000; Total, £58,495,000.

2. **Issues of Australian Coins.**—The net issues of Australian silver and bronze coin from 1910 to 30th June, 1960, were:—Crown (5s.), £276,000; Florin (2s.), £19,551,000; Shilling (1s.) £7,803,000; Sixpence (6d.), £5,713,000; Threepence (3d.), £6,087,000; Total silver coin, £39,372,000; Penny (1d.), £2,461,000, Half-penny (½d.), £740,000; Total bronze coin, £3,201,000. Except in the total, no allowance has been made for £58,000 worth of damaged silver coin, for which denominations are not available, withdrawn since 1910.

3. **Profits on Coinage of Silver and Bronze.**—Australian silver and bronze coins are token coins and, as the face value of the coins is greater than the value of the bullion they contain, a profit is made from their issue. This profit forms part of the Commonwealth Consolidated Revenue. In the following table, details are given of the value of coins issued, the cost of bullion, the cost of minting and sundry expenses connected with the issue, and the profits made on the issue of coins during the years 1955–56 to 1959–60.

AUSTRALIAN SILVER AND BRONZE COINS: PROFITS FROM ISSUE.
(£.)

Year.	Face Value of Coin Issued. (a)	Cost of Bullion.	Gross Profit.	Cost of Minting and Sundry Charges.	Net Profit.

(a) Includes selected and proof pieces.

NOTE.—Minus sign (—) denotes a loss.

4. **Australian Mints.**—(i) *General.* Soon after the discovery of gold in Australia, a branch of the Royal Mint was established in Sydney. The formal opening took place on 14th May, 1855. The Melbourne branch was opened on 12th June, 1872, and the Perth Branch on 20th June, 1899. The States of New South Wales, Victoria and Western Australia provided an annual endowment in return for which the mint receipts were paid to the respective State Treasuries. Owing to losses incurred in its operations, the Sydney branch was closed at the end of 1926.

Since their establishment, the Australian branches of the Royal Mint have been primarily concerned with the refining of gold, minting of Imperial gold coins and the production of bars and ingots of gold bullion for export. The minting of Imperial gold coins was discontinued in September, 1931. In 1916, the Melbourne branch took over the minting of Australian silver and bronze coins from the Royal Mint, London. Australian coins were also minted at the Sydney Mint from 1919 to 1926 and at the Perth Mint in 1922 and from 1940 to the present time. The Melbourne branch has also minted token coins for the Territory of New Guinea and for New Zealand.

(ii) *Gold Receipts and Issues.* (a) *Receipts.* The receipts of gold at Australian mints during 1959 and 1960 amounted to 991,846 and 972,963 fine ounces respectively (Melbourne, 127,533 and 115,491 fine ounces respectively; Perth, 864,313 and 857,472 fine ounces respectively).

(b) *Issues.* The Australian mints issue gold bullion for the use of local manufacturers (jewellers, dentists, etc.) and for export. Since September, 1931, when the United Kingdom departed from the gold standard, the minting and issue of gold coins by Australian mints has ceased. Australian exports of gold are mainly in the form of 400-oz. ingots, but in earlier years a considerable amount of gold was shipped to India in 10-oz. bars. Since early in the 1939-45 War, all gold has been acquired by the Reserve Bank, and the export and use of gold have been subject to regulation by the Commonwealth Government. From December, 1951, export of a proportion of newly-mined gold for sale on premium markets overseas was permitted. The issues from Australian mints during 1959 and 1960 amounted to 990,559 and 976,410 fine ounces respectively (Melbourne, 125,961 and 118,631 fine ounces respectively; Perth, 864,598 and 857,779 fine ounces respectively).

5. *Price of Gold.*—The following table shows the average prices of gold and the average values of the sovereign in London and Australia for the years 1955-56 to 1959-60. The average price of gold in Australia is based on the Reserve Bank's buying price for gold lodged with the mints.

PRICE OF GOLD: LONDON AND AUSTRALIA.

Period.	London.		Australia.			
	Average price per fine oz.	Average value of Sovereign.	Average price per fine oz.	Sovereign.		Equivalent to a premium of—
				Average value.		
	£Stg. s. d.	£Stg. s. d.	£A. s. d.	£A. s. d.		%
1955-56..	12 9 11	2 18 10	15 12 6	3 12 6		267.8
1956-57..	12 10 8	2 18 10	15 12 6	3 12 6		267.8
1957-58..	12 9 10	2 18 10	15 12 6	3 12 6		267.8
1958-59..	12 9 11	2 18 10	15 12 6	3 12 6		267.8
1959-60..	12 10 3	2 18 10	15 12 6	3 12 6		267.8

In December, 1951, arrangements were made whereby producers could sell a proportion of newly-mined gold for industrial purposes on overseas premium markets. Under these arrangements, gold is acquired by the Reserve Bank in the usual manner and sold, at the Bank's buying price, to an association representing gold producers participating in the scheme. The association pays the Bank's handling charges and the costs of preparation of the gold and makes arrangements for export and sale. The gold can be sold only against payment in United States dollars. Profits earned by the association after meeting administrative expenses are distributed to members in proportion to the quantity of gold delivered to the Reserve Bank. Until August, 1952, when permission was given for the export of fine gold, gold exported under this arrangement was not to exceed a fineness of 22 carats ($\frac{11}{12}$ ths.).

The average price per fine ounce in Australian currency (f.o.b.) obtained for gold exported under this scheme for the only month during 1959-60 for which there were sales was—September, £15 12s. 10d.

§ 3. Notes.

1. *General.*—Brief historical notes relating to the circulation and issue of notes in Australia are given in Official Year Book No. 37, pages 561 and 562. The issue of notes intended for circulation as money other than by the Reserve Bank is prohibited.

2. **The Australian Note Issue.**—(i) *General.* Notes in circulation in Australia are issued by the Reserve Bank through the Note Issue Department. The Bank is authorized to issue Australian notes in denominations of 5s., 10s., £1, £5, £10 and any multiple of £10. The Reserve Bank is not required to hold a specific reserve in gold against the note issue, but the assets of the Note Issue Department must be held or invested in gold, on deposit with any bank, or in securities of the Government of the United Kingdom, the Commonwealth, or a State. Under the Reserve Bank Act 1959, the profits of the Note Issue Department are paid to the Commonwealth.

Australian notes are legal tender to any amount within Australia and have been issued in denominations of 10s., £1, £5; £10, £20, £50, £100 and £1,000. Notes of denominations higher than £10, however, have not been issued to the public since 1945.

(ii) *Australian Notes in Circulation.* Particulars of the average values of notes in circulation for the years 1955–56 to 1959–60 are given in the following table:—

AUSTRALIAN NOTE ISSUE.
(£'000.)

Denomination.	Average of monthly statements(a) for year—				
	1955–56.	1956–57.	1957–58.	1958–59.	1959–60.

(iii) *Reserve Bank—Note Issue Department.* The following statement shows particulars of liabilities and assets of the Note Issue Department of the Reserve Bank as at 30th June, 1959 and 1960:—

RESERVE BANK OF AUSTRALIA(a): NOTE ISSUE DEPARTMENT—
LIABILITIES AND ASSETS, 30th JUNE.
(£'000.)

Liabilities.	1959.	1960.	Assets.	1959.	1960.
Notes on Issue(b) ..	391,457	419,112	Gold and Balances held abroad (including money at short call)	125,416	198,457
Special Reserve—			Government Securities (including Commonwealth Treasury Bills)	280,456	235,033
Premium on gold sold	4,755	4,755	Other Assets ..	57	60
Other Liabilities(b) ..	9,717	9,683			
Total	405,929	433,550	Total	405,929	433,550

(a) Prior to 14th January, 1960, Commonwealth Bank of Australia. (b) Notes of a denomination not exceeding one pound which have been on issue for more than twenty years, and notes of a denomination exceeding one pound which have been on issue for more than 40 years are not included in the item "Notes on Issue" but are included in the item "Other Liabilities".

In 1959–60, the net profits of the Note Issue Department amounted to £10,516,002 and were paid to the Commonwealth of Australia.

B. BANKING.

§ 1. Cheque-Paying Banks.

1. **Royal Commission on Monetary and Banking Systems.**—A Royal Commission was appointed by the Commonwealth Government in November, 1935, to inquire into the monetary and banking systems in operation in Australia and to report whether any, and if so what, alterations were desirable in the interests of the people of Australia as a whole, and the manner in which any such alterations should be effected. The Commission presented its report on 15th July, 1937, and a summary of the recommendations appears in Official Year Book No. 31, page 1010.

2. **Banking Legislation.**—(i) *Commonwealth Legislation.* Under Section 51 of the Commonwealth Constitution, the Commonwealth Parliament has power to legislate with respect to "Banking, other than State banking; also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money." The principal Commonwealth Acts at present in force relating to Banking are—

- (a) *The Reserve Bank Act* 1959, which provides for the constitution and management of the Reserve Bank of Australia and the management of the Australian note issue;
- (b) *The Commonwealth Banks Act* 1959, which provides for the constitution and management of the Commonwealth Banking Corporation, Commonwealth Trading Bank of Australia, Commonwealth Savings Bank of Australia and Commonwealth Development Bank of Australia; and
- (c) *The Banking Act* 1959, which provides for the regulation of banking and for the protection of the currency and the public credit of the Commonwealth.

The Banking Act 1959, which replaced the Banking Act 1945–1953, was assented to on 23rd April, 1959, and came into operation on 14th January, 1960. It applies to all banks, except State banks trading in their own State, operating in Australia or the Territories of the Commonwealth. The objects of the Act are:—(a) to provide a legal framework, uniform throughout Australia, for regulating the banking system; (b) to safeguard depositors of the banks from loss; (c) to provide for the co-ordination of banking policy under the direction of the Reserve Bank; (d) to control the volume of credit in circulation and bank interest rates; (e) to mobilize and to provide machinery for the control of the foreign exchange and gold resources of the Australian economy. A summary of the main provisions of the Act is given in Official Year Book No. 46, pages 759 and 760.

(ii) *State Legislation.* State banking legislation relates to the incorporation of banks and the constitution and management of State banks. The Acts under which the various banks are incorporated differ. While some of the older banks were incorporated by special Act or Charter, e.g., the Bank of New South Wales by Act of Council 1817, The Bank of Adelaide by Act of the South Australian Parliament, and the Bank of New Zealand by Act of the General Assembly of New Zealand, most of the banks are incorporated under a Companies Act of the States or the United Kingdom. This is also the case with those banks which were reconstructed after the crisis of 1893. State banks, constituted under State Acts, transacting general banking business, are The Rural Bank of New South Wales, the State Bank of South Australia and The Rural and Industries Bank of Western Australia.

3. **Presentation of Banking Statistics.**—Because of the different purposes they serve in the Australian financial system, Australian banks have been divided for statistical purposes into five groups and a separate series is presented for each. These groups are:—

- (a) *The Reserve Bank of Australia.* Formerly the Commonwealth Bank, this bank is the Central Bank. It also provides special banking facilities through the Rural Credits Department. Statistics of the Central Banking Business (including the Note Issue Department) and of the Rural Credits Department are presented in separate series.
- (b) *The Commonwealth Development Bank of Australia.* This bank, which commenced operations on 14th January, 1960, under the control of the Commonwealth Banking Corporation, an organization entirely separate from the Reserve Bank, was formed basically from an amalgamation of the Mortgage Bank and Industrial Finance Departments of the Commonwealth Bank. Its prime purpose is to assist in the development of worth-while enterprises in the field of both primary and secondary industries which would otherwise be unable to obtain the necessary finance on reasonable and suitable terms and conditions.

- (c) *The Commonwealth Trading Bank of Australia.* This bank commenced operations on 3rd December, 1953. On that date, under the provisions of the Commonwealth Bank Act 1953, it took over the business of the General Banking Division of the Commonwealth Bank. On 14th January, 1960, under the provisions of the Commonwealth Banks Act 1959, it came under the control of the Commonwealth Banking Corporation.
- (d) *Private Trading Banks.* This group was formerly known as the Nine Trading Banks, but the number of banks included has been reduced to seven by amalgamations. With the Commonwealth Trading Bank, these banks provide the major part of the general banking facilities in Australia. The banks included in this group are—the Australia and New Zealand Bank Ltd. (an amalgamation of the Bank of Australasia Ltd. and the Union Bank of Australia Ltd.), The Bank of Adelaide, the Bank of New South Wales, The Commercial Bank of Australia Ltd., The Commercial Banking Company of Sydney Ltd., The English, Scottish and Australian Bank Ltd. and The National Bank of Australasia Ltd. (which has absorbed The Queensland National Bank Ltd. and The Ballarat Banking Co. Ltd.).
- (e) *Other Banks.* This group consists of (i) three State Government Banks—The Rural Bank of New South Wales, the State Bank of South Australia and The Rural and Industries Bank of Western Australia, which, in their general banking business, specialize mainly in financing rural industries, (ii) one joint stock bank—The Brisbane Permanent Building and Banking Co. Ltd., which has specialized business in one district only, and (iii) branches of three overseas banks—the Bank of New Zealand, Comptoir National d'Escompte de Paris and the Bank of China, which transact limited business in Australia and are mainly concerned with financing trade, etc., between Australia and overseas countries.

In addition to the series mentioned above, a series for all cheque-paying banks is presented. This series covers the Commonwealth Trading Bank, the Private Trading Banks and the other cheque-paying banks included in the fifth group.

Unless otherwise stated, the statistics presented are averages of weekly returns. Averages of liabilities and assets are the averages of the liabilities and assets of the banks on the weekly balance days during the period concerned. Averages of bank clearings and debits to customers' accounts are the averages of transactions for weeks ended on the balance days during the period.

4. **Banks Transacting Business in Australia.**—(i) *Number of Branches.* At 30th June, 1960, the 15 banks operating in Australia transacted all classes of banking business at 3,769 branches and 1,668 agencies. The Commonwealth Trading Bank and the Private Trading Banks have branches throughout the Commonwealth. The Rural Bank of New South Wales, the State Bank of South Australia and The Rural and Industries Bank of Western Australia, being State Government banks specializing mainly in financing rural industries, have branches only in their respective States. The Brisbane Permanent Building and Banking Co. Ltd. transacts business in Brisbane only. The remaining three banks are branches of overseas banks.

CHEQUE-PAYING BANKS: NUMBER OF BRANCHES(a) AT 30th JUNE, 1960.

(a) At various balance sheet dates during 1960. (b) For the Commonwealth Trading Bank, the amount shown in this column is the amount specified as capital in the Commonwealth Banks Act 1959. For the State Bank of South Australia and The Rural and Industries Bank of Western Australia, the amounts shown in this column are capital funds provided by the respective State Governments. Capital of The Rural Bank of New South Wales consists of Inscribed Stock and Debentures issued by the Bank for capital purposes. (c) Includes dividends declared but not paid at date of balance-sheet. (d) For the Commonwealth Trading Bank and the State Banks, the amount shown in this column is total capital and reserves. (See footnote (b).) (e) Includes uncalled capital. (f) For the State Government Banks, the net profit is the profit after writing off bank premises and payment of interest on capital. For the other Banks, the net profit is the profit before writing off bank premises. (g) Dividends paid and payable out of profits earned during 1959-60. (h) These banks are in process of liquidation consequent upon the amalgamation of their business with the National Bank of Australasia Ltd.

5. **The Reserve Bank of Australia.**—(i) *General.* The Reserve Bank of Australia, established under the Reserve Bank Act 1959, which came into operation on 14th January, 1960, continued in existence the body corporate known as the Commonwealth Bank of Australia. An account of the progress and development of that Bank is given in earlier issues of the Official Year Book (see No. 37, pp. 570 to 573, and No. 45, pp. 735 to 737).

The general functions of the Reserve Bank are set out in Section 10 of the Reserve Bank Act 1959 which states:—

“ It is the duty of the Board, within the limits of its powers, to ensure that the monetary and banking policy of the Bank is directed to the greatest advantage of

the people of Australia and that the powers of the Bank under this Act, the Banking Act 1959, and regulations under that Act are exercised in such a manner as, in the opinion of the Board, will best contribute to,

- (a) the stability of the currency of Australia;
- (b) the maintenance of full employment in Australia; and
- (c) the economic prosperity and welfare of the people of Australia."

In addition to its functions as a Central Bank, the Bank controls the Australian note issue through a Note Issue Department, provides special banking facilities through the Rural Credits Department, and acts as banker to the Commonwealth and some of the States.

Prior to its reconstitution as the Reserve Bank, the Commonwealth Bank also provided general banking facilities through a General Banking Division up to the 3rd December, 1953, when that business was taken over by the Commonwealth Trading Bank, and special banking facilities through the Mortgage Bank and Industrial Finance Departments. In addition, the Board of the Commonwealth Bank was responsible for the policy and administration of the Commonwealth Trading Bank and Commonwealth Savings Bank. On 14th January, 1960, on its reconstitution as the Reserve Bank, the Mortgage Bank and Industrial Finance Departments were amalgamated to form the Commonwealth Development Bank, and that institution, together with the Commonwealth Trading Bank and the Commonwealth Savings Bank, was placed under the control of the Commonwealth Banking Corporation, an organization established under the Commonwealth Banks Act 1959 and entirely separate from the Reserve Bank.

(ii) *Management.* Under the Commonwealth Bank Act 1911, the Commonwealth Bank was managed by a Governor. From 1924 to August, 1945, it was controlled by a Board of Directors. Under the Commonwealth Bank Act 1945, control was vested in a Governor, assisted by an Advisory Council. From August, 1951, under the Commonwealth Bank Act 1951, it was controlled by a Board of Directors.

Under the provisions of the Reserve Bank Act 1959, the policy of the Reserve Bank is determined by a Board consisting of the Governor (Chairman), the Deputy Governor, the Secretary to the Treasury, and seven other members appointed by the Governor-General. The bank is managed by the Governor, who acts in accordance with the policy of the Board and with any directions of the Board. The Bank is required to inform the Government of the monetary and banking policy of the Board. In the event of a disagreement between the Government and the Board as to whether the monetary and banking policy of the Bank is directed to the greatest advantage of the people of Australia, the Governor-General, acting with the advice of the Executive Council, may determine the policy to be adopted by the Bank.

(iii) *Central Banking Business.* Under the powers it possessed under the Commonwealth Bank Act 1911-1943 and under its war-time powers under the National Security Regulations, the Commonwealth Bank gradually assumed the functions of a Central Bank. Part III. of the Commonwealth Bank Act 1945 formally constituted the Bank as a Central Bank and granted the necessary powers to carry on the business of a Central Bank, and these powers were carried through into the present Act constituting the Reserve Bank. Under the provisions of the Reserve Bank Act 1959, the capital for the Central Banking Business is the capital of the Commonwealth Bank for Central Banking purposes immediately prior to 14th January, 1960, and such other sums as are transferred from the Reserve Bank Reserve Fund. The profits of the Bank are distributed as follows: (a) such sums as the Treasurer, after consultation with the Bank, determines shall be placed to the credit of the Reserve Bank Reserve Fund and (b) the remainder shall be paid to the Commonwealth.

(iv) *Note Issue Department.* The Note Issue Department, established in 1920 when the control of the Australian note issue was transferred from the Commonwealth Treasury to the Commonwealth Bank, was maintained in the same form under the Reserve Bank Act 1959. The Reserve Bank may, through this Department, issue, re-issue and cancel Australian notes. Under the Reserve Bank Act 1959, the profits of the Note Issue Department are paid to the Commonwealth.

(v) *Rural Credits Department.* The Rural Credits Department, established in 1925 for the purpose of making short-term credit available for the orderly marketing of primary produce, was continued in the same form under the Reserve Bank Act 1959. The Reserve Bank may, through this Department, make advances upon the security of primary produce placed under the legal control of the bank, or other security associated with the production or marketing of primary produce, to co-operative associations or marketing boards formed under the laws of the Commonwealth or a State or Territory of the Commonwealth or other bodies specified by proclamation. The period of the advance shall not exceed one year. Under the provisions of the Reserve Bank Act 1959, the capital of the Rural Credits Department is the capital of the Rural Credits Department of the Commonwealth Bank immediately prior to 14th January, 1960, and £2,000,000 provided by the Reserve Bank. The profits of the Rural Credits Department are dealt with as follows: (a) one half shall be placed to the credit of the Rural Credits Department Reserve Fund and (b) one half shall be placed to the credit of the Rural Credits Development Fund.

(vi) *Liabilities and Assets—All Departments.* Liabilities and assets of each Department of the Reserve Bank at 30th June, 1960, are shown in the following table.

RESERVE BANK OF AUSTRALIA: LIABILITIES AND ASSETS, 30th JUNE, 1960.

1960	54,542	62,605	217	62,822

(a) Prior to 14th January, 1960, Commonwealth Bank of Australia.

6. The Commonwealth Banking Corporation.—(i) *General.* The Commonwealth Banking Corporation was established under the Commonwealth Banks Act 1959 and came into being on the 14th January, 1960. The Corporation is entirely separate from the Reserve Bank and is the controlling body for the Commonwealth Trading Bank, Commonwealth Savings Bank and Commonwealth Development Bank. The general functions of the corporation are set out in Section 9 of the Commonwealth Banks Act 1959 which states:

“ It is the duty of the Board, within the limits of its powers, to ensure that the policy of the Trading Bank, of the Savings Bank and of the Development Bank are directed to the greatest advantage of the people of Australia and have due regard to the stability and balanced development of the Australian economy.”

Under the Banking Act 1959, the Corporation and its constituent banks are subject to the same central banking controls as are the private trading banks.

(ii) *Management.* The Board of the Corporation consists of the Managing Director of the Corporation, the Deputy Managing Director, the Secretary to the Treasury and eight other members appointed by the Governor-General of whom one is Chairman and another Deputy Chairman. In addition, there is an Executive Committee of the Board for each of the three separate banks. These Executive Committees are appointed by the Treasurer, after consultation with the Board, and are charged with taking such action as is necessary to ensure that effect is given by the respective banks to the policies laid down for them and to any directions given by the Board in relation to their affairs. Under the Board, the Corporation is managed by the Managing Director and the Deputy Managing Director. Each of the three constituent banks of the Corporation has its own statutory functions and responsibilities and its separate identity within the framework of the Corporation. Each bank is managed by a General Manager under the Managing Director of the Corporation.

In paras. 7 and 8 following, details are given of the assets and liabilities of the Commonwealth Development Bank and the Commonwealth Trading Bank. Details for the Commonwealth Savings Bank are shown in § 2 of this chapter, page 780.

7. *Commonwealth Development Bank of Australia.*—(i) *General.* The Commonwealth Development Bank of Australia was established by the Commonwealth Banks Act 1959 and commenced operations on 14th January, 1960. It was formed basically from an amalgamation of the Mortgage Bank and Industrial Finance Departments of the Commonwealth Bank. Under the Act, the Bank is authorized to provide assistance for the development of worthwhile enterprises in the fields of primary and secondary industries which would otherwise be unable to obtain the necessary finance on reasonable and suitable terms and conditions. The Commonwealth Development Bank is managed by a General Manager under the Managing Director of the Commonwealth Banking Corporation, and its policy is determined by the Board of that Corporation. The capital of the Development Bank consists of the capital of the Mortgage Bank and Industrial Finance Departments of the Commonwealth Bank immediately prior to 14th January, 1960, £5,000,000 provided by the Reserve Bank, and such other sums as are provided from the Commonwealth Development Bank Reserve Fund. The net profits of the Bank are paid to the Commonwealth Development Bank Reserve Fund.

(ii) *Liabilities and Assets.* The liabilities and assets of the Commonwealth Development Bank at 30th June, 1960, are shown in the following table:—

**COMMONWEALTH DEVELOPMENT BANK OF AUSTRALIA(a):
LIABILITIES AND ASSETS, 30th JUNE, 1960.
(£'000.)**

Liabilities.	1960.	Assets.	1960.
Capital	15,857	Coin, bullion, notes and cash at bankers	558
Commonwealth Development Bank reserve fund	5,262	Australian Public Securities—	
Balances due to other banks	15,758	Commonwealth and States—	
Deposits, bills payable and all other liabilities (including amounts provided for contingencies)	7,716	Treasury bills	
		Other Securities	9,639
		Other Securities	422
		Loans to authorized dealers in the short-term money market	100
		Cheques and bills of other banks and balances with and due from other banks	147
		Loans, advances and bills discounted (after deducting provisions for debts considered bad or doubtful)	33,579
		All other assets	148
Total	44,593	Total	44,593

(a) Prior to 14th January, 1960, Industrial Finance and Mortgage Bank Departments of the Commonwealth Bank of Australia.

(iii) *Average Liabilities and Assets within Australia.* The average liabilities and assets of the Commonwealth Development Bank within Australia for the year ended June, 1960, are shown in the following table:—

**COMMONWEALTH DEVELOPMENT BANK OF AUSTRALIA(a): AVERAGE
LIABILITIES AND ASSETS WITHIN AUSTRALIA.
(£'000.)**

Year ended June—	Total Liabilities.	Loans Advances, etc.		Australian Government Securities (Including Treasury Bills).	Other Assets.	Total Assets.
		Hire Purchase.	Other.			
1960	18,339	17,830	15,934	6,784	1,057	41,605

(a) Prior to 14th January, 1960, Industrial Finance and Mortgage Bank Departments of the Commonwealth Bank of Australia.

(iv) *Profits.* The net profit of the Commonwealth Development Bank for the year ended 30th June, 1960, was £582,035. The net profit was appropriated to the Commonwealth Development Bank Reserve Fund.

8. *The Commonwealth Trading Bank of Australia.*—(i) *General.* The Commonwealth Trading Bank of Australia was established by the Commonwealth Bank Act 1953 and on 3rd December, 1953, took over the business of the General Banking Division of the Commonwealth Bank. It was managed by a General Manager under the Governor of the Commonwealth Bank and its policy was determined by the Board of that Bank. Under the provisions of the Commonwealth Banks Act 1959, which came into operation on 14th January, 1960, the Commonwealth Trading Bank was maintained in the same form but was placed under the control of the Commonwealth Banking Corporation. The Commonwealth Trading Bank is managed by a General Manager under the Managing Director of the Commonwealth Banking Corporation. The capital of the Commonwealth Trading Bank is the capital of the Commonwealth Trading Bank immediately prior to 14th January, 1960, £2,000,000 provided by the Reserve Bank, and such other sums as are transferred from the Commonwealth Trading Bank Reserve Fund. Under the Act, the Bank is liable for income taxes. The net profits of the Bank, after provision for taxation, are divided as follows:—
(a) one-half shall be placed to the credit of the Commonwealth Trading Bank Reserve Fund and (b) one-half shall be paid to the Commonwealth.

(ii) *Liabilities and Assets.* The liabilities and assets of the Commonwealth Trading Bank at 30th June, 1959 and 1960, are shown in the following table:—

COMMONWEALTH TRADING BANK OF AUSTRALIA: LIABILITIES AND ASSETS, 30th JUNE, 1959 AND 1960.

13. Classification of Advances within Australia—Commonwealth Trading Bank of Australia and Private Trading Banks (Major Trading Banks).—(i) *States, June, 1960.* A classification of bank advances of the Commonwealth and Private Trading Banks outstanding at the end of June, 1960, is shown in the following table.

Resident borrowers cover institutions (including branches of oversea institutions) engaged in business in Australia and persons permanently residing in Australia. Non-resident borrowers cover all other persons and institutions incorporated abroad, which, though represented, do not carry on business in Australia. Advances to resident borrowers have been classified as business advances, advances to public authorities, personal advances and advances to non-profit organizations. Business advances have been further classified to the main industry of the borrower and include advances to partnerships, companies and other institutions engaged in business in Australia, advances to persons actively engaged in business on their own behalf if the advance is mainly for business purposes, advances to mutual, co-operative and benefit societies which distribute their profits or surpluses (if any) to members by way of dividends, rebates on charges for goods and services, or increased benefits. Advances to public authorities cover advances to local and semi-governmental authorities including separately constituted government business undertakings but not the Commonwealth or State Governments. Personal advances cover advances to persons for purposes other than carrying on a business. Advances to non-profit organizations cover advances to organizations which are not carried on for the purpose of making a profit or gain to individual members, any income of the organization being used for the purposes of the organization or for the benefit of the community.

Commencing with the June, 1957, survey, the classification used in previous surveys was revised, and, because of changes in definition and regrouping of some classes, a complete review of the classification of all accounts was necessary. The main changes made in the classification were (a) the provision of separate classes for advances to non-residents and non-profit organizations and (b) changes in the definition of and grouping of several industrial classes. The main changes under (b) were:—

Manufacturing. This class now includes motor repairs, previously included in the class, Transport, Storage and Communication.

Finance. This class was previously Finance and Property. The previous sub-class (i), Builders and Contractors, has been transferred to a new class 6, Building and Construction. The sub-class (ii), Building Investment Companies and Housing Societies, has been restricted to Building and Housing Societies (Building Investment Companies are included in class 7, Other Businesses) and the sub-class (iii), Other (Banking and Insurance, etc.), has been restricted to financial institutions only. Business services (e.g., Stock Brokers, Estate Agencies, etc.), previously included in this sub-class, have been transferred to class 7, Other Businesses. Holding companies, also previously included, are now classified to the main industry of their subsidiary companies.

Commerce. The sub-class Retail Trade now includes motor garages and service stations, previously included in the class Transport, Storage and Communication.

These revisions should be noted when comparing the figures for June, 1957, and subsequent periods with those for earlier periods.

COMMONWEALTH TRADING BANK OF AUSTRALIA AND PRIVATE TRADING BANKS (MAJOR TRADING BANKS): CLASSIFICATION OF ADVANCES WITHIN AUSTRALIA(a)—STATES, AT END OF(b) JUNE, 1960.

(a) Excludes deposits of Commonwealth and State Governments. (b) Includes Territories of Papua and New Guinea. (c) "At end of" is used for convenience. Information for individual banks or groups of banks relates to various dates around the end of the period shown. (d) The combined deposits of these two groups are distributed over the above industries.

15. Interest on Deposits: Rates—Cheque-paying Banks.—Particulars of interest rates for fixed deposits since 1952 are shown hereunder.

BANK FIXED DEPOSIT RATES: AUSTRALIA.

(Per cent. per annum.)

Date from which Operative.	Deposits for—			
	Three Months.	Six Months.	Twelve Months.	Twenty-four Months.
29th July, 1952	1	1½	1½	(a) 1½
1st January, 1955	1½	1½	1½	2
15th March, 1956	2½	2½	2½	3
4th December, 1956	2½	2½	2½	3½
17th November, 1960	4(b)		4½	(c)

(a) On first £10,000; rate on amounts in excess of £10,000 was 1½ per cent. (b) Three months but less than twelve months. (c) The maximum period for fixed deposits is 12 months.

16. **Clearing House Returns—Average Weekly Clearings.**—The average weekly clearings in each capital city for the years ended June, 1956 to 1960, are shown in the following table.

BANK CLEARINGS(a): AVERAGE WEEKLY CLEARINGS.

(£'000.)

Year ended June—	Sydney.	Melbourne.	Brisbane.	Adelaide.	Perth.	Hobart.	Total.
1956 ..	109,975	101,153	22,488	21,021	14,089	3,962	272,688
1957 ..	119,381	107,563	25,571	23,042	14,927	4,237	294,721
1958 ..	124,172	114,854	25,835	24,099	15,598	4,427	308,985
1959 ..	135,387	128,870	27,227	25,299	15,786	4,893	337,462
1960 ..	167,858	156,625	34,202	30,461	19,579	6,062	414,787

(a) Excludes transactions connected with the issue and redemption of Treasury Bills.

17. **Debits to Customers' Accounts—Cheque-paying Banks.**—Statistics of debits to customers' accounts have been collected since September, 1945. Generally they represent the total of all cheques drawn by the customers of the banks. In the following table, the average weekly debits to customers' accounts of all cheque-paying banks (including the Rural Credits Department of the Reserve Bank and the Commonwealth Development Bank) are shown for each State for the years ended June, 1956 to 1960. In this table, debits to accounts of Australian Governments in capital cities are excluded, as they are subject to abnormal influences and are not uniform for each State.

ALL CHEQUE-PAYING BANKS: AVERAGE WEEKLY DEBITS TO CUSTOMERS' ACCOUNTS.

(Excluding Debits to Australian Government Accounts in Capital Cities.)

Australian Capital Territory ..	2 0	2 0	2 6	5 0	7 6	5 0	..

(a) Unchanged since 1st January, 1940.

There is no charge for transfers within a city or a town. In all States excepting Queensland and Western Australia, the exchange for transfers between towns in the same State is 2s. per £100. Queensland and Western Australia are divided into zones. The exchange rate for transfers between towns in the same zone is 2s. per £100, with higher rates for inter-zone transfers.

The exchange rate between the Territories of Papua and New Guinea and the mainland is 10s. per £100 for all points.

§ 2. Savings Banks.

1. *General.*—For information as to the origin of savings banks in Australia and the facilities currently available, see Official Year Book No. 46, page 779 and earlier issues of this Year Book.

During 1956, four new savings banks, the Bank of New South Wales Savings Bank Ltd., the Australia and New Zealand Savings Bank Ltd., the C.B.C. Savings Bank Ltd., and The Rural and Industries Bank of Western Australia, were established. Three of these are associated with and operate from the same premises as existing private trading banks, and the other is a division of a State bank—The Rural and Industries Bank of Western Australia. Savings banks operating at the end of 1959 were—the Commonwealth Savings Bank and the Australian and New Zealand Savings Bank Ltd. (in all States and Territories), the Bank of New South Wales Savings Bank Ltd. (in all States and Territories except South Australia and Tasmania), the C.B.C. Savings Bank Ltd. (in all States except South Australia and Tasmania), and in the Australian Capital Territory, The State Savings Bank of Victoria, The Savings Bank of South Australia, The Rural and Industries Bank of Western Australia, and the two trustee banks, The Launceston Bank for Savings and The Hobart Savings Bank.

All savings banks, including trustee savings banks but not State savings banks, are subject to the Banking Act 1959. Details of this Act and the special provisions applying to savings banks are given in Official Year Book No. 46, pages 759-60.

2. Branches and Agencies.—The number of branches and agencies in Australia of the various savings banks at 30th June, 1960, are given in the following table.

ALL SAVINGS BANKS: NUMBER OF BRANCHES AND AGENCIES AT 30th JUNE, 1960.

Bank.	Branches.	Agencies.
Commonwealth Savings Bank	664	6,575
Australia and New Zealand Savings Bank Ltd.	488	477
Bank of New South Wales Savings Bank Ltd.	667	214
C.B.C. Savings Bank Ltd.	374	81
The State Savings Bank of Victoria	370	627
The Savings Bank of South Australia	97	598
The Rural and Industries Bank of Western Australia	40	183
The Launceston Bank for Savings	20	74
The Hobart Savings Bank	20	17
Total	2,740	8,846

3. Number of Operative Accounts.—The following table shows the number of operative savings bank accounts in existence at the end of June, 1959 and 1960. It should be noted that these figures relate to the number of accounts and not necessarily to the number of depositors.

ALL SAVINGS BANKS: NUMBER OF OPERATIVE ACCOUNTS.(a)

State or Territory.	At end of June—	
	1959.	1960.
New South Wales	2,878,656	3,013,260
Victoria	2,565,242	2,691,561
Queensland	1,080,229	1,140,200
South Australia	888,614	930,812
Western Australia	527,079	550,966
Tasmania	299,328	310,844
Northern Territory	13,965	15,126
Australian Capital Territory	29,278	34,554
Total	8,282,391	8,687,323

(a) Excludes school bank accounts and inoperative accounts, i.e., accounts of less than £1 which have not been operated on for more than two years.

4. Business Transacted.—The following table shows details of the business transacted in Australia by savings banks during the years ended 30th June, 1959 and 1960:—

**ALL SAVINGS BANKS: BUSINESS TRANSACTED IN AUSTRALIA.
(£'000.)**

State or Territory.	Year ended June, 1959.				Year ended June, 1960.			
	Deposits During Year.	Withdrawals During Year.	Interest Added to Accounts During Year.	Amount on Deposit at end of June, 1959.	Deposits During Year.	Withdrawals During Year.	Interest Added to Accounts During Year.	Amount on Deposit at end of June, 1960.

6. **Cheque Accounts.**—At most savings banks, cheque accounts are available to non-profit organizations such as friendly, co-operative and charitable societies. Similar facilities are also available to other depositors at the State Savings Bank of Victoria. Details of the transactions on these accounts during the year ended June, 1960 (excluding the Savings Bank of South Australia), together with the number of operative accounts and the amount on deposit at the end of June, 1960, were as follows:—Deposits during the year, £331,576,395; withdrawals during the year, £326,137,955; interest added during the year, £699,643; number of operative accounts at the end of year, 163,138; amount on deposit at end of year, £42,134,479. These figures are included in the statistics in previous paragraphs.

7. **School Banking.**—With the object of encouraging principles of thrift among children, agencies of the savings banks have been established at most of the schools throughout Australia. Particulars of operative accounts within Australia at the end of June, 1956 to 1960, appear below:—

SCHOOL SAVINGS BANKS: AUSTRALIA.

At end of June—				Number of School Agencies.	Number of Operative Accounts.	Deposits.	Deposits per Operative Account.
						£	£ s. d.
1956..	8,591	825,692	5,785,495	7 0 2
1957..	8,294	895,139	6,429,490	7 3 8
1958..	8,650	986,758	6,924,422	7 0 4
1959..	8,856	1,050,742	7,479,254	7 2 4
1960..	9,042	1,118,101	8,154,973	7 5 10

8. **Assets.**—The assets within Australia of all Savings Banks as at the end of June 1959 and 1960, are given in the following table:—

ALL SAVINGS BANKS: ASSETS WITHIN AUSTRALIA.(a)
(£'000.)

Particulars.	At end of June—	
	1959.	1960.
Coin, Bullion and Australian Notes	3,253	2,888
Deposits with Reserve Bank	121,979	133,258
Deposits in Australia with Trading Banks	53,693	54,925
Australian Public Securities (including Treasury Bills and Seasonal Securities)—		
Commonwealth and States	740,128	793,829
Local and Semi-Governmental Authorities	248,938	285,296
Loans to Authorized Dealers in the Short-term Money Market	(b)	1,675
Cheques and Bills of other Banks and Balances with and due from other Banks	142	342
Loans, Advances and Bills Discounted—

Total	1,457,096	1,596,181

(a) Includes assets in Territories of Papua, New Guinea and Norfolk Island.
separately, included in All other Assets.

(b) Not available

9. **War Savings and Savings Certificates.**—Sales of savings certificates and stamps under the War Savings and Savings Certificate schemes, particulars of which were given in earlier issues of the Official Year Book (see No. 37, page 586), were discontinued after 31st January, 1949, except for some sales made to wind up savings groups, etc. The total value of savings certificates outstanding at 30th June in each of the last five years was:—1956, £23,365,000; 1957, £20,043,000; 1958, £16,004,000; 1959, £10,633,000; 1960, £8,205,000.

10. **Commonwealth Savings Bank of Australia.**—(i) *General.* The Commonwealth Savings Bank of Australia was established as a separate institution on 9th June, 1928, having functioned previously as a department of the Commonwealth Bank (for particulars of the origin of the Savings Bank Department and the extension of its services see Official Year Book No. 46, page 783 and earlier issues of this Year Book). It has since then operated independently, publishing its own balance-sheets and profit and loss accounts. The Commonwealth Bank Act 1927, which provided for the establishment of the Commonwealth Savings Bank as a separate institution, provided for a Commission of three members to manage the savings bank. This Commission was never appointed, and the Commonwealth Bank Act 1945 placed the control of the Commonwealth Savings Bank under the Governor of the Commonwealth Bank. Under the provisions of the Commonwealth Banks Act 1959, which came into operation on 14th January, 1960, the Commonwealth Savings Bank was maintained in the same form, but was placed under the control

of the Commonwealth Banking Corporation (*see also* para. 6, page 762, Commonwealth Banking Corporation). Under the Banking Act 1959, the Commonwealth Savings Bank is subject to the same conditions as apply to the private savings banks and the trustee savings banks.

(ii) *Balance-sheet, 30th June, 1959 and 1960.* Particulars of the liabilities and assets of the Commonwealth Savings Bank as at 30th June, 1959 and 1960, were as follows:—

COMMONWEALTH SAVINGS BANK(a): LIABILITIES AND ASSETS, 30th JUNE, 1959 AND 1960.

(£'000.)

Liabilities.	1959.	1960.	Assets.	1959.	1960.
Reserve Fund ..	10,326	10,839	Coin, Bullion and Australian Notes ..	1,209	1,119
Depositors' Balances ..	764,817	807,121	Deposits with Reserve Bank ..	84,505	88,525
Bills payable and all other Liabilities	19,043	24,357	Deposits in Australia with Trading Banks ..		
			Australian Public Securities (including Treasury Bills)—		
			Commonwealth and States ..	470,552	495,935
			Local and Semi-Governmental Authorities ..	84,740	88,924
			Other Public Securities	..	996
			Loans to Authorized Dealers in the Short-term Money Market	..	825
			Loans and Advances (after deducting provisions for Debts considered bad or doubtful) ..	127,473	136,096
			Bank Premises ..	10,522	11,537
			Bills Receivable and all other Assets ..	15,185	8,099
Total	794,186	842,317	Total	794,186	842,317

(a) Includes branches in London, in the Territories of Papua, New Guinea, and Norfolk Island, and in the British Solomon Islands.

(iii) *Profits.* Under the terms of the Savings Bank Amalgamation Agreements relative to the absorption of the State savings banks by the Commonwealth Bank, the profits of the Commonwealth Savings Bank in New South Wales, Queensland, Western Australia and Tasmania are equally divided between the Bank and the former controlling authorities in those States. Net profits for the years ended 30th June, 1956 to 1960, and the distribution of those profits, are shown in the following table.

COMMONWEALTH SAVINGS BANK: DISTRIBUTION OF PROFITS.

(£.)

Year ended 30th June—	Total Profit.	Payments to State Authorities under Savings Bank Amalgamation Agreements.	Net Profit.	Distribution of Net Profit.	
				Commonwealth of Australia.	Savings Bank Reserve Fund.

12. **Trustee Savings Banks, Hobart and Launceston.**—(i) *General.* Two Trustee Savings Banks, Hobart and Launceston, operate within Tasmania. These banks commenced business in 1845 and 1835 respectively. Under the Banking Act 1959, they are subject to the same conditions as apply to the Commonwealth Savings Bank and the private savings banks.

(ii) *Assets.* The assets of the Trustee Savings Banks as at 31st August, 1959 and 1960, are set out in the following table:—

TRUSTEE SAVINGS BANKS: ASSETS AT 31st AUGUST, 1959 AND 1960.
(£'000.)

(a) Commenced Savings Bank business on 19th January, 1956. (b) Commenced Savings Bank business on 16th July, 1956. (c) Commenced Savings Bank business on 5th April, 1956. (d) No interest is payable on amounts in excess of the maximum amount shown. (e) State Savings Bank of Victoria only. (f) Prior to the 1st March, 1957, the maximum amount on which interest was payable was £450. (g) Prior to 1st January, 1960, the maximum amount on which interest was payable was £1,500.

C. REGISTERED BUILDING AND CO-OPERATIVE SOCIETIES.

§ 1. Registered Building Societies.

1. Summary.—During 1958 and 1959, returns were received from 1,310 and 1,457 societies respectively, but the information was not exhaustive, as particulars regarding a number of organizations were not included. In the following table, general information is given relating to the societies in each State for the year 1958–59 and to the combined States for 1957–58.

REGISTERED BUILDING SOCIETIES: SUMMARY, 1957-58 AND 1958-59.

3. **Co-operative Housing Societies, Victoria.**—In addition to the information shown above, the following details of co-operative housing societies in Victoria have been extracted from the Annual Reports of the Registrar of Co-operative Housing Societies. At 30th June, 1959 (1958 in parentheses), 482 (442) co-operative housing societies were registered in Victoria with 34,828 (33,024) members who had subscribed for 1,418,663 (1,291,614) shares, giving a nominal share capital subscribed of £72,850,785 (£66,924,924). For the twelve months ended 30th April, 1959 (1958), returns were submitted by 460 (424) societies, the total income of those societies being £357,475 (£314,756) and total expenditure, £318,646 (£285,657). The liabilities at 30th April, 1959 (1958), of the societies submitting returns were:—bank or other loans £47,290,197 (£42,611,674), subscriptions £7,689,078 (£6,730,299), surplus interest and management expenses £670,189 (£534,505), other liabilities £1,892,399 (£1,471,783), total liabilities £57,541,863 (£51,348,261). Assets at the same date consisted of:—advances £57,273,561 (£51,017,980), other assets £268,302 (£330,281), total assets £57,541,863 (£51,348,261).

§ 2. Co-operative Societies.

Co-operative societies are divided into three classes—(i) those engaged in the manufacture and marketing of primary products and trade requirements; (ii) those engaged in retailing general household requirements; and (iii) those engaged in activities covered by both classes (i) and (ii). The first class may be described briefly as Producers' Co-operative Societies and the second as Consumers' Co-operative Societies. The particulars given for New South Wales relate to societies registered under the Co-operation Act 1923-1954. A summary of the business of all co-operative societies for the years 1958-59 or 1959 for all States except Western Australia is given in the following tables. Separate particulars for each of the three types of Co-operative Societies are given in the annual bulletin *Finance, Part I.—Public and Private Finance*, and issue No. 50—1958-59 contains details for 1957-58 or 1958.

D. INSURANCE.

§ 1. Introductory.

1. **Legislation.**—Section 51 of the Commonwealth Constitution confers the necessary powers on the Commonwealth Parliament to legislate with respect to “insurance other than State insurance; also State insurance extending beyond the limits of the State concerned”. Commonwealth legislation includes the Marine Insurance Act 1909 defining the limits of marine insurance and regulating the terms of contracts, etc., the Insurance Act 1932–1937 requiring the lodgment of deposits by insurance companies, and the Life Insurance Act 1945–1959 generally regulating life assurance business in Australia. The Marine Insurance Act 1909 and the Insurance Act 1932–1937 have limited application, and, except for life assurance business, which is regulated by the Life Insurance Act 1945–1959, insurance business is conducted almost entirely under State laws.

2. **Insurance Act 1932–1937.**—Companies, persons or associations of persons carrying on insurance business in Australia or in any Territory of Australia are required to lodge a deposit with the Commonwealth Treasurer.

Money deposited is invested by the Treasurer in prescribed securities selected by the depositor, and all interest is paid to depositors. Deposits remain as security against liability to policy holders, and are available to satisfy judgments obtained in respect of policies.

Deposits held by States on 1st February, 1932, could, however, remain with the States subject to the conditions embodied in the laws of the States, and depositors to the extent of the value of these deposits were exempt from liability to make deposits under the Commonwealth Act.

The following are not regarded as insurance business under the Act:—

Staff superannuation schemes; schemes of religious organizations solely for insurance of their property; and friendly society, union and association schemes involving superannuation or insurance benefits to employees.

This Act does not apply to State insurance within the limits of the State concerned, and, under the Life Insurance Act 1945–1959, ceased to apply to life assurance business.

3. **Life Insurance Act 1945–1959.**—The objects of this Act are:—(a) to replace all State legislation on the subject of life assurance, except that relating to the life assurance operations of State insurance offices within the State concerned, and to provide uniform legislation for the whole of Australia; (b) to appoint an Insurance Commissioner to exercise active supervision of the activities of life assurance companies, with a view to securing the greatest possible protection for policy holders; (c) to set up adequate machinery for dealing with any company that fails to maintain a required minimum standard of solvency.

The Act was assented to on 16th August, 1945, and came into operation on 20th June, 1946. A summary of the provisions of the Act is given in Official Year Book No. 37, pages 595 to 597.

The provisions of the Act relating to the establishment of a Commonwealth Government Insurance Office were repealed under the Life Insurance Act No. 94 of 1953.

4. **Export Payments Insurance Corporation Act 1956.**—Details of the operations of the Export Payments Insurance Corporation set up under this Act may be found in § 5 of Chapter XIII., Trade (*see* p. 491).

5. **Deposits under Insurance Acts.**—Deposits lodged under the Insurance Acts at 30th June, 1960, totalled £8,150,853, comprising £1,566,580 held by the Commonwealth in respect of Life Assurance and £6,361,983 held by the Commonwealth and £222,290 held by the States in respect of other forms of insurance. The deposits consisted of government, local, and semi-governmental securities £5,327,013, fixed deposits £6,000, bank guarantees and undertakings £1,913,000, Corporation Debentures and Stock £162,400 and titles and mortgages £520,150 (Commonwealth-held deposits only).

§ 2. Life Assurance.

1. General.—Since 1947, returns lodged under the Life Insurance Act 1945–1959 have been used to compile life assurance statistics. Except where otherwise indicated, the figures in the succeeding paragraphs refer to Australian business only. Business in the Territories of Papua and New Guinea is, however, included in the Australian figures.

2. Offices Transacting Business.—The number of offices which transacted life assurance business in Australia during 1959 was 32, including 9 oversea companies. Of the 23 Australian offices, 6 are purely mutual, including one which transacts general business in respect of which share capital is used, 15 are public companies, and 2 are State Government institutions. Of the total offices, 19 transacted ordinary business only and the remainder both ordinary and industrial business. Where possible, ordinary and industrial business have been kept separate in the following tables.

3. Australian Business—Policies in Existence.—In the following table, details of policies on the registers in each State and in the Australian Capital Territory are given for the year 1959:—

LIFE ASSURANCE : POLICIES EXISTING IN AUSTRALIA, 1959.

State or Territory.(a)	Assurance and Endowment Policies.				Annuity Policies.		
	Number of Policies.	Sum Assured. (£'000.)	Bonus Additions. (£'000.)	Annual Premiums. (£'000.)	Number of Policies.	Annuities per Annum. (£'000.)	Annual Premiums. (£'000.)
ORDINARY DEPARTMENT.							
New South Wales ..	1,307,623	1,025,370	87,200	33,495	1,885	1,848	484

Tasmania	7,795	891	42
Australian Capital Territory	655	118	6
Australia(b)	280,182	28,886	1,504

(a) Location of register of policies.

(b) Includes Territories of Papua and New Guinea.

(c) Includes the Northern Territory.

NOTE.—Minus sign (—) indicates excess of transfers to registers or other adjustment to number and value of policies.

Policies matured or otherwise discontinued in Australia during each of the years 1955 to 1959 were as shown in the following table.

LIFE ASSURANCE: POLICIES MATURED OR OTHERWISE DISCONTINUED IN AUSTRALIA.

Year.	Assurance and Endowment Policies.			Annuity Policies.		
	Number of Policies.	Sum Assured. (£'000.)	Annual Premiums. (£'000.)	Number of Policies.	Annuities per Annum. (£'000.)	Annual Premiums. (£'000.)
ORDINARY DEPARTMENT.						
1955	164,151	105,883	4,045	1,449	668	228
1956	180,858	119,928	4,534	1,436	878	227
1957	191,520	135,344	4,852	5,498	857	(b)—308
1958	190,970	159,702	5,627	2,217	543	197
1959	207,796	185,917	6,260	6,890	1,106	330
INDUSTRIAL DEPARTMENT.						
1955(a)	277,790	22,799	1,214
1956	275,722	24,907	1,327
1957	296,002	26,383	1,378
1958	285,399	26,960	1,393
1959	280,182	28,886	1,504

(a) Includes policies in existence at beginning of year which were discontinued as a result of the winding up of a company. (b) The negative amount shown is due to an adjustment to the annual premiums on certain annuities which in previous years were treated as single premiums.

The number of policies and sums assured, excluding annuities, discontinued during the years 1955 to 1959 and the causes for discontinuance are given in the following table:—

LIFE ASSURANCE: POLICIES(a) MATURED OR OTHERWISE DISCONTINUED IN AUSTRALIA—CAUSE OF DISCONTINUANCE.

Year.	Death or Maturity.	Surrender.	Forfeiture.	Other.	Total.
ORDINARY DEPARTMENT: NUMBER OF POLICIES.					
1955	48,224	67,929	42,941	5,057	164,151
1956	52,876	72,659	44,073	11,250	180,858
1957	55,923	77,937	42,981	14,679	191,520
1958	58,914	85,211	42,805	4,040	190,970
1959	62,251	92,030	45,413	8,102	207,796
ORDINARY DEPARTMENT: SUM ASSURED. (£'000.)					
1955	16,012	50,065	35,467	4,339	105,883
1956	18,042	53,378	37,766	10,742	119,928
1957	19,475	60,231	41,868	13,770	135,344

1957	174,327	66,940	54,612	123	296,002
1958	159,145	69,878	56,168	208	285,399
1959	155,108	74,069	50,865	140	280,182
INDUSTRIAL DEPARTMENT: SUM ASSURED. (£'000.)					
1955	7,517	6,574	8,675	(b) 33	22,799
1956	7,944	7,828	9,994	— 859	24,907
1957	8,439	8,722	9,186	36	26,383
1958	8,006	9,416	9,478	60	26,960
1959	8,200	10,600	10,023	63	28,886

(a) Excludes annuities.

(b) See note (a) to previous table.

NOTE.—Minus sign (—) indicates excess of transfers to registers or other adjustment to number and value of policies.

6. Premiums and Claims, Australia.—(i) *Premiums.* (a) *Ordinary Business.* Details of revenue from premiums in respect of the ordinary business of all offices doing business in Australia are shown in the following tables for each State and the Australian Capital Territory for the year 1959:—

ORDINARY LIFE ASSURANCE: AUSTRALIAN REVENUE FROM PREMIUMS, 1959.
(£'000.)

State or Territory.(a)	Assurance and Endowment Premiums.		Consideration for Annuities.		Total.
	Single Premiums.	Other Premiums.	Single Premiums.	Other Premiums.	
New South Wales	131	33,413	141	562	34,247
Victoria	204	30,240	196	1,873	32,513
Queensland(b)	125	13,625	28	12	13,790
South Australia(c)	55	9,769	30	13	9,867
Western Australia	22	6,556	31	22	6,631
Tasmania	7	3,347	..	28	3,382
Australian Capital Territory ..	126	4,129	66	591	4,912
Australia(b)	670	101,079	492	3,101	105,342

(a) Location of register of policies.

(b) Includes Territories of Papua and New Guinea.

(c) Includes the Northern Territory.

(b) *Industrial Business.* Details of revenue from premiums in respect of the industrial business of all offices doing business in Australia are shown in the following table for each State and the Australian Capital Territory for the year 1959:—

INDUSTRIAL LIFE ASSURANCE: AUSTRALIAN REVENUE FROM PREMIUMS, 1959.
(£'000.)

State or Territory.(a)	Assurance and Endowment Premiums.		Total.
	Single Premiums.	Other Premiums.	
New South Wales	10	5,755	5,765
Victoria	4	4,720	4,724
Queensland (b)	1,859	1,859
South Australia(c)	1,511	1,511
Western Australia	1	970	971
Tasmania	360	360
Australian Capital Territory	74	74
Australia(b)	15	15,249	15,264

(a) Location of register of policies.

(b) Includes Territories of Papua and New Guinea.

(c) Includes the Northern Territory.

(c) *Ordinary and Industrial Business.* The following table shows, for each of the years 1955 to 1959, the aggregate Australian income from premiums in respect of both ordinary and industrial business of all offices doing business in Australia:—

LIFE ASSURANCE: AUSTRALIAN REVENUE FROM PREMIUMS.
(£'000.)

Year.	Ordinary Department.			Industrial Department.	Ordinary and Industrial Departments Combined.
	Assurance and Endowment Premiums.	Consideration for Annuities.	Total.		
1955	66,811	2,529	69,340	14,614	83,954
1956	74,413	2,700	77,113	15,002	92,115
1957	83,256	3,009	86,265	15,041	101,306
1958	92,126	3,377	95,503	15,184	110,687
1959	101,749	3,593	105,342	15,264	120,606

(ii) *Claims, etc., Paid.* Details of the claims, etc., paid on policies in each State and the Australian Capital Territory during the year 1959 are shown in the following table:—

LIFE ASSURANCE: PAYMENTS TO POLICY-HOLDERS IN AUSTRALIA, 1959.
(£'000.)

State or Territory.(a)	Claims.		Surrenders.	Annuities.	Cash Bonuses.	Total.
	Death or Disability.	Maturity.				
ORDINARY DEPARTMENT.						
New South Wales	5,013	5,210	3,997	201	62	14,483
Victoria	4,424	4,395	3,593	249	261	12,922
Queensland(b) ⁱ	1,886	1,949	1,375	27	18	5,255

1959	10,932	2,066	..	2,495	40	3,833	19,366

8. **Liabilities and Assets.**—(i) *General.* The liabilities of the Australian offices consist mainly of their assurance funds, but in the case of public companies there is a further liability on account of the shareholders' capital. The assets consist chiefly of government and municipal securities, mortgages, loans on policies, landed and house property, etc. Loans on personal security are granted by very few of the Australian offices. Separate details of liabilities and assets in respect of Australian business are not available.

(ii) *Total Liabilities and Assets.* In the two tables which follow, the details of liabilities and assets relate to all business (Australian and overseas) of Australian companies, the life assurance of the two State Government offices, all business of the Provident Life Assurance Co. Ltd. (incorporated in New Zealand) and the Australian business only of the other eight overseas companies operating in Australia. For various reasons, several offices do not attempt the dissection of liabilities and assets between the industrial and ordinary branches, and, therefore, the figures in the following tables relate to the ordinary and industrial branches combined. Details of the total liabilities of life assurance offices for the year 1959 are given in the following table:—

ORDINARY AND INDUSTRIAL LIFE ASSURANCE: TOTAL LIABILITIES, 1959.

(£'000.)

Particulars.	Life Assurance Business.	Other Classes of Business.	Total Liabilities.

(a) State or Territory of location of mortgage, registration of policy, or residence of borrower.
 (b) Includes Territories of Papua and New Guinea. (c) Includes the Northern Territory.

§ 3. Fire, Marine and General Insurance.

1. **General.**—The following statistics, which are in respect of the Australian business of companies operating in Australia and State Government insurance offices, conform to the following definitions and should be interpreted in accordance therewith.

(a) Premiums represent the full amount receivable in respect of policies issued and renewed in the year, less returns, rebates and bonuses paid or credited to policy-holders during the year. They are not adjusted to provide for premiums unearned at the end of the year and consequently the amounts differ from "earned premium income" appropriate to the year. When business is increasing, as in recent years, premiums receivable (as shown in the statistics) are greater than "earned premium income" appropriate to the year. The converse applies when business is declining.

(b) Claims or losses include provision for outstanding claims and represent claims or losses incurred in the year. Salvage and other amounts recoverable have been deducted.

(c) Contributions to Fire Brigades, Commission and Agents' Charges, and Expenses of Management represent mainly charges paid during the year.

(d) Taxation represents mainly payments made during the year, and includes income tax, pay-roll tax, licence fees, stamp duty (where paid by the company), etc. Income tax paid during the year is based on the income of earlier years.

The tables contain selected items of statistics and are not construable as "Profit and Loss" statements or "Revenue Accounts".

In cases where the business is underwritten in one State and the risk is situated in another, the business is included in the State in which the policy was issued.

During 1959–60, revenue from premiums amounted to £180,880,000, and that from net interest on investments, etc., to £8,460,000, a total of £189,340,000. Expenditure on claims amounted to £107,841,000, contributions to fire brigades £4,743,000, commission and agents' charges £17,373,000, expenses of management £29,933,000, and taxation £7,291,000, a total of £167,181,000.

2. **States.**—The following table shows, for each State, the aggregate premium income less reinsurances and returns, and claims or losses less amounts recoverable, for all classes of insurance other than life for the years 1955–56 to 1959–60.

FIRE, MARINE AND GENERAL INSURANCE: PREMIUMS AND CLAIMS—STATES.
(£'000.)

State:	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.

Total	71,846	82,532	87,636	97,229	107,841

(a) Excludes Workers' Compensation in coal-mining industry in New South Wales.

E. RETAIL HIRE PURCHASE OPERATIONS OF FINANCE BUSINESSES.

1. **General.**—Information relating to hire purchase operations in Australia is given in the following tables. Information in more detail may be found in the annual bulletin—*Finance, Part I.—Public and Private Finance* and in monthly statements relating to hire purchase operations.

The statistics relate to businesses which finance the retail sale of goods, but do not retail goods themselves. These businesses cover public and private companies, partnerships and other types of finance businesses. Businesses which finance hire purchase exclusively for their own employees are not included. All types of goods sold to final purchasers are included whether producer goods (such as plant and machinery) or consumer goods.

2. **New Retail Agreements, 1959-60.**—Details of new retail agreements made during the year ended 30th June, 1960, are given in the following table.

**HIRE PURCHASE FINANCE COMPANIES: NEW RETAIL AGREEMENTS,
YEAR ENDED 30th JUNE, 1960.**

1960	163,808	118,493	59,721	42,922	25,169	11,835	421,948

(a) Includes the Australian Capital Territory.

(b) Includes the Northern Territory.

F. NEW CAPITAL RAISINGS BY COMPANIES IN AUSTRALIA.

1. **General.**—Information relating to capital raised by companies in Australia is given in the following tables. More detailed information may be found in the annual bulletin—*Finance Part I.—Public and Private Finance* and in quarterly bulletins dealing with capital raisings

The statistics (the collection of which commenced in July, 1954) relate to capital raised by companies through issues of shares, and in the case of listed companies through the issue of debentures, notes and similar securities and the acceptance of deposits, and in the case of unlisted companies, by way of loans secured over the entire assets of the company. Capital obtained by way of bank overdraft, trade credit, temporary advances, and loans secured over part only of the assets of the company is not included, and, in the case of unlisted companies, capital raised through loans not secured over any of the assets of the company is excluded.

Separate statistics are given for listed and unlisted companies. Listed companies are companies incorporated in Australia or the Australian territories and listed on one or more of the Australian stock exchanges. All other companies incorporated in Australia, including subsidiaries of listed companies, are classified as unlisted companies. Companies incorporated overseas, whether listed on an Australian stock exchange or not, are excluded from the statistics of share issues. However, subsidiaries of overseas companies, if incorporated in Australia, are included. The statistics of new capital raised through issues of debentures, notes, etc., and the acceptance of deposits, include, in addition to capital raised by Australian companies, capital raised in this way from Australian sources by overseas public companies through their Australian offices.

The following are explanatory notes relating to some of the items shown in the tables:—

New Money. This is the net amount of cash transferred from the investing public to the companies. For this purpose, the investing public includes banks and life insurance companies (except when subscribing to issues by associated companies), and government and private superannuation funds, but excludes other Government agencies. Subscriptions by associated companies, whether local or overseas, are excluded. In the tables which follow, the amount of new money is obtained by deducting from the total cash raised the "amount not involving a net transfer of funds from the investing public."

Amounts not involving new money. These amounts include cash subscriptions received by issuing companies from associated companies. Such subscriptions represent inter-company transfers only, and do not involve a receipt of funds from the "investing public". Also included are amounts which, although subscribed by the "investing public" (i.e. subscribers other than "associated companies"), are not retained by the issuing company or its associates, but are used to redeem shares, debentures or unsecured notes, etc., or are used to purchase from individuals existing shares, debentures, etc., in other companies, including existing shares, etc., in associated and subsidiary companies. The funds used in this way are thus returned to another section of the "investing public", and do not represent a net transfer of cash from the "investing public" to the companies. (Besides these purchases of existing shares, etc., from individuals, purchases of existing shares, etc., from companies other than associates of the issuing company might also be included in this item, but the amounts involved are small and separate details have not been collected.)

2. **Listed Companies.**—Details of new capital raised through issues of shares, debentures, or registered notes, or accepting deposits are given in the following table for each of the years 1955-56 to 1960-61:—

LISTED AUSTRALIAN COMPANIES(a): NEW CAPITAL RAISED THROUGH ISSUES OF SHARES, DEBENTURES, OR REGISTERED NOTES, ETC.(b), OR ACCEPTING DEPOSITS(c). (£ million.)

Year.	Share Capital.						Debentures, Registered Notes and Deposits.

G. RURAL ADVANCES OF PASTORAL FINANCE COMPANIES.

The following table is derived from returns supplied to the Reserve Bank by major pastoral finance companies, and shows the total rural advances outstanding at the end of June, 1956 to 1959, and of subsequent quarters to June, 1960.

RURAL ADVANCES OF PASTORAL FINANCE COMPANIES(a).

(Source: Reserve Bank of Australia.)

(£ million.)

At end of—	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia and Tasmania.	Total.
June, 1956 ..	21.1	15.1	15.5	11.8	10.7	74.3
„ 1957 ..	24.0	15.7	14.2	12.8	13.3	80.1
„ 1958 ..	28.4	14.5	20.0	14.4	15.6	92.9
„ 1959 ..	26.5	16.0	21.2	13.4	14.2	91.3
September, 1959 ..	29.9	18.7	22.6	13.6	14.8	99.5
December, 1959 ..	29.1	18.4	23.6	12.3	12.9	96.2
March, 1960 ..	28.7	17.6	23.2	13.2	13.4	96.1
June, 1960 ..	29.6	17.7	24.3	14.9	15.4	101.9

(a) Compiled from returns supplied by major pastoral finance companies. Advances are classified according to the location of the branch holding the advance, which in some cases may differ from the State of residence of the borrower. The statistics refer to the total advances outstanding at the end of the month shown.

H. SHORT TERM MONEY MARKET.

1. General.—For some years prior to 1959, leading stockbrokers had been actively engaged in the acceptance of short term funds against the security of Government securities, but their operations were limited by the absence of suitable short term securities and their liquidity requirements.

In February, 1959, the Commonwealth Bank (now the Reserve Bank) gave official status to the market by announcing that under certain conditions it would act as lender of last resort to authorized dealers in the short term money market.

The form of organization so far developed consists of several companies authorized to act as dealers in the market. These dealers accept loans overnight, at call or for fixed periods in amounts of at least £25,000, and invest the funds in "money market securities", which have been defined as Commonwealth Government securities with currencies not exceeding three years.

Dealers are required to provide for a minimum capitalization and, in addition, to lodge with the Bank part of their capital in the form of money market securities as general backing for their operations. These lodgments which are referred to as "margins" are required to be equivalent on market values to at least:—(a) one per cent. of the total holdings by the dealer of securities maturing in one year; (b) two per cent. of the total holding by the dealer of securities maturing within one to two years; and (c) four per cent. of the total holding by the dealer of securities maturing within two to three years.

The Bank approves for each dealer the maximum portfolio of money market securities which may be carried and establishes a line of credit in favour of the dealer to the extent of that approved maximum portfolio. Under the line of credit, which is subject to renewal from time to time, the dealer may borrow in the last resort from the Bank against lodgment of security.

2. **Selected Assets and Liabilities of Authorized Dealers and Rates of Interest on Loans Accepted.**—In the following table, details of selected assets and liabilities of authorized dealers and the interest rates on loans accepted by dealers are given for each month January to December, 1960:—

SHORT TERM MONEY MARKET: SELECTED ASSETS AND LIABILITIES OF AUTHORIZED DEALERS.

(a) Excludes one Wednesday in December.

I. FRIENDLY SOCIETIES.

1. **General.**—The total membership of friendly societies in Australia is about 450,000, but as certain benefits, such as medical attendance and free medicines, and in many cases funeral expenses, are granted to members' families as well as to members themselves, this figure must be more than doubled to arrive at an estimate of the number of persons who receive some direct benefit from these societies, even when due allowance is made for young and unmarried members. Legislation has conferred certain privileges on friendly societies, but, on the other hand, it insists on their registration, and it is the duty of the Registrars in the various States, prior to registering a new society, to see that its proposed rules conform to the law, and that the scale of contribution is sufficient to provide the promised benefits. Societies are obliged to forward to the Registrar annual returns about their membership and their finances, and reports are published in most of the States dealing with the returns received.

2. **Societies, Members and Revenue.**—The following table sets out the number of societies, members, etc., revenue and expenditure, and funds of registered societies for the year 1958–59. More detailed information is available in the bulletins *Finance, Part I.—Public and Private Finance*, and issue No. 50, 1958–59, contains particulars for the year 1957–58.

(a) Total estates of deceased persons assessed for death duty. (b) Estates dealt with by the Taxation Department. (c) Not available.

K. LOTTERIES AND BETTING.

§ 1. Lotteries.

State Governments operate lotteries in New South Wales, Queensland and Western Australia. Tattersall Lotteries and Tasmanian Lotteries are operated under Government licences in Victoria and Tasmania respectively. In general, revenue derived by the State Governments from these lotteries is used directly or indirectly to provide funds for expenditure on hospitals, charities, etc. For information as to the origin, purpose and method of payment of proceeds or taxes to State revenues *see* Official Year Book No. 46, page 808 and earlier issues of this Year Book.

Details of ticket sales, prizes allotted, and taxes paid and other net contributions to State Government revenues, relating to lotteries drawn during each of the years ended 30th June, 1956 to 1960, are given in the following table.

**LOTTERIES: VALUE OF TICKET SALES, PRIZES ALLOTTED, TAXES PAID
AND OTHER NET CONTRIBUTIONS TO STATE GOVERNMENT REVENUES.**

L. PENSION AND SUPERANNUATION SCHEMES.

§ 1. Government and Semi-Governmental Pension and Superannuation Schemes.

The Commonwealth and all State Governments have established pension or superannuation schemes for their employees. These schemes are operated through funds to which both the Government and the employees make contributions. Employees of semi-governmental authorities are in some cases covered by the Commonwealth or State Government scheme and in other cases by a separate scheme of the authority.

In the following tables, aggregate details are given, for the year 1959–60, of the receipts, expenditure, accumulated funds and number of contributors and pensioners of the Commonwealth and State Government and main semi-governmental schemes. The funds included are:—

- (a) *Commonwealth*.—The Superannuation Fund and Defence Forces Retirement Benefits Fund.
- (b) *New South Wales*.—State Superannuation Fund, Government Railways Superannuation Fund and Police Superannuation and Reward Fund.
- (c) *Victoria*.—The State Superannuation Fund, Police Superannuation Fund, Police Pensions Fund, Melbourne Harbor Trust Superannuation Account, Geelong Harbor Trust Superannuation Fund, Melbourne and Metropolitan Board of Works Superannuation Fund, State Electricity Commission Provident Fund, Gas and Fuel Corporation Superannuation Fund, Metropolitan Fire Brigades Board Superannuation Fund, Country Fire Authority Superannuation Fund, Port Phillip Pilots' Sick and Superannuation Fund, and Married Women Teachers' Pension Fund.
- (d) *Queensland*.—Public Service Superannuation Fund and Police Superannuation Fund.
- (e) *South Australia*.—South Australia Superannuation Fund, Police Pensions Fund and Public Service Superannuation Fund.
- (f) *Western Australia*.—The Superannuation Fund.
- (g) *Tasmania*.—Public Service Superannuation Fund (Old and New Funds), Police Provident Fund and State Teachers' Superannuation Fund.

§ 2. Parliamentary Pension and Superannuation Schemes.

Pension and superannuation schemes have been established for members of the Commonwealth and State Parliaments. Details of these schemes, except for Tasmania, are given in pages 91 to 99 of Official Year Book No. 38. Details of the Tasmanian scheme, are given on page 72 of Official Year Book No. 44. All the schemes are operated through funds to which the members of Parliament and the Commonwealth or States contribute. Details of the receipts, expenditure, funds and number of contributors and pensioners for the year 1959-60 are shown in the following table:—

(a) Including lump sum payments. (b) Not available. (c) Not available—for year 1958-59 contributors to Commonwealth Parliamentary scheme numbered 184 and pensioners 61.

§ 3. Private Pension and Retiring Allowance Schemes.

Special surveys have been conducted by this Bureau on superannuation or pension and retiring allowance schemes conducted under private enterprise, and the results were published in a series of Special Business Surveys, Nos. 7, 9, 11 and 12, relating to the years 1951-52, 1955-56, 1955-56 to 1957-58, and 1955-56 to 1958-59 respectively.

CHAPTER XXI.

PUBLIC FINANCE.

NOTE.—The subject of "Public Finance" is dealt with in this chapter under the two major divisions of Commonwealth Finance and State Finance. The close financial relations between the Commonwealth and States, however, particularly since the Financial Agreement has been in operation, demand also a combination of these two divisions under the heading of Commonwealth and State Finance. Under the Financial Agreement, the Commonwealth assumed the liability to bondholders for the States' Securities existing at the date of the Agreement and now arranges for all borrowings for and on behalf of the Commonwealth or any State and for all conversions, renewals, redemptions and consolidations of such securities. In view of this, it is convenient to deal with the Commonwealth and State Government Securities on Issue in a separate division of this chapter (D, page 853).

The subject of income taxes is also dealt with in a separate division (E, page 871).

For further detailed information on the subjects covered by this chapter, *see* the annual bulletins *Finance, Part I.—Public and Private Finance* and *Part II.—Commonwealth Taxation* published by this Bureau. Current information in summarized form is contained in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, and the *Digest of Current Economic Statistics*.

A. COMMONWEALTH FINANCE.

§ 1. General.

1. **Financial Provisions of the Constitution.**—The main provisions of the Constitution relating to the initiation and development of the financial system of the Commonwealth are contained in Sections 81 to 105A of the Commonwealth Constitution (*see* pp. 17–20 of this Year Book). Two other sections which have a most important bearing on questions of Commonwealth finance are Sections 69 and 51.

Section 69 provides for the transfer from the States to the Commonwealth of certain specified departments, and Section 51, in outlining the powers of the Commonwealth Parliament, implies the transfer or creation of other departments. Sections 87 and 96 deal with the financial relations between the Commonwealth and the States. These matters have been treated in previous issues of the Official Year Book and on pages 829–36 of this issue a summary is given of the present provisions for Commonwealth financial assistance to the States.

The majority of the tables relating to Commonwealth Finance have been compiled from the annual Budget Papers as presented to Parliament by the Treasurer of the Commonwealth.

2. **Accounts of the Commonwealth Government.**—The Commonwealth Government bases its accounts upon three funds, the Consolidated Revenue Fund, the Trust Fund and the Loan Fund.

§ 2. Commonwealth Consolidated Revenue Fund.

A. NATURE OF FUND.

1. **Provisions of the Constitution.**—The provisions made for the establishment of a Commonwealth Consolidated Revenue Fund, and the means to be adopted for operating on the fund, are contained in Sections 81 to 83 of the Constitution (*see* p. 17 of this Year Book).

2. **Annual Results of Transactions.**—In the early 1920's, receipts and expenditure of the Consolidated Revenue Fund each ranged between £60 million and £70 million. After allowing for special appropriations, amounting to one or two million pounds each year,

utilized for a variety of purposes, e.g., for debt redemption, naval construction, main roads, science and industry investigations, prospecting for oil and precious metals, civil aviation, etc., the receipts and expenditure of the Fund were balanced. In the later twenties and early thirties, when receipts and expenditure were each about £70 million or £80 million a year, there were annual deficits which had accumulated to more than £17 million by the end of 1930–31.

In the years 1931–32 to 1938–39, receipts and expenditure each ranged from £70 million to £95 million and were in balance after allowing for special appropriations of up to £3.5 million a year for reduction of the accumulated deficit, non-recurring grants to the States, post office works and the provision of defence equipment. The amount applied towards reduction of the accumulated deficit was approximately £1.5 million and the balance of the deficit (approximately £15.7 million) was funded in 1937–38.

For most of the 1939–45 War years and thereafter, the Consolidated Revenue Fund was balanced, all available revenue after meeting expenditure on ordinary services being used for defence, war and repatriation purposes.

During the years 1955–56 to 1959–60, the Fund was balanced after special payments of £61.6 million, £194.8 million, £104.4 million, £27.9 million and £41.4 million to the Loan Consolidation and Investment Reserve Trust Account. The amounts so transferred were subsequently invested wholly or partly in special loans for State works requirements.

B. REVENUE.

1. General.—The following table shows details of the revenue from each source and the amount per head of population under each of the main headings during the years 1955–56 to 1959–60. Taxation constitutes the main sources of Commonwealth revenue, accounting for 86.9 per cent. in 1959–60.

COMMONWEALTH CONSOLIDATED REVENUE FUND: SOURCES OF REVENUE. (£'000.)

Source:	1955–56.	1956–57.	1957–58.	1958–59.	1959–60.

Cigars and cigarettes	36,516	47,916	51,366	55,824	61,459
Cigarette papers	896	910	862	811	770
Petrol	21,190	37,183	41,711	44,253	49,255
Diesel Fuel	2,770	1,475	2,179
Matches	1,061	1,074	1,084	1,092	1,125
Playing cards	47	48	47	48	52
Coal	566	599	590	578	418
Miscellaneous	499	786	2,227	2,988	4,080
Total	168,264	217,440	231,334	236,254	252,111

(iv) *Other Taxation.* (a) *General.* Taxes other than customs and excise and the various export charges are, in general, assessed and collected by the Commissioner of Taxation. The organization comprises a Head Office in Canberra, an office in each State assessing the returns of taxpayers whose interests are restricted to that State only, and a Central Office situated in Melbourne assessing taxpayers whose interests are in more than one State.

For detailed statistics relating to Commonwealth income taxes, estate duty, gift duty and sales tax, see the annual bulletin *Finance, Part II.—Commonwealth Taxation* issued by this Bureau.

(b) *Sales Tax.* The sales tax was first imposed in August, 1930. The operation of the tax is controlled chiefly by a system of registration of taxpayers whereby all manufacturers and wholesale merchants, who are the taxpayers under the Act in respect of goods sold in Australia, must be registered with the Department. The tax on imports subject to sales tax is collected by the Customs Department at ports of entry.

Since the inception of the tax, certain exemptions have been allowed. These exemptions, which have been extended from time to time, relate mainly to goods of an essential nature or those for use in primary production. The most recent exemptions were those granted from 17th August, 1960.

A general rate of tax is levied on all goods other than those specified in the schedules to the Sales Tax (Exemptions and Classifications) Act 1935-1959. These schedules set out details of goods exempt from sales tax and those subject to special rates. The general and special rates which operated from 27th September, 1951, were:—

Period.	General Rate.	Special Rates.
27th September, 1951, to 6th August, 1952 ..	12½ per cent. ..	20, 25, 33½, 50 and 66⅔ per cent.
7th August, 1952, to 9th September, 1953 ..	12½ per cent. ..	20, 33½ and 50 per cent.
10th September, 1953, to 18th August, 1954 ..	12½ per cent. ..	16⅔ per cent.
19th August, 1954, to 14th March, 1956 ..	12½ per cent. ..	10 and 16⅔ per cent.
15th March, 1956, to 3rd September, 1957 ..	12½ per cent. ..	10, 16⅔, 25 and 30 per cent.
4th September, 1957, to 15th November, 1960 ..	12½ per cent. ..	8½, 16⅔, 25 and 30 per cent.
16th November, 1960, to 21st February, 1961 ..	12½ per cent. ..	8½, 16⅔, 25, and 40 per cent.
From 22nd February, 1961	12½ per cent. ..	8½, 16⅔, 25 and 30 per cent.

For particulars of rates applicable from the inception of Sales Tax in August, 1930, to 26th September, 1951, see Official Year Books No. 37, page 617 and No. 46, page 817.

Particulars of the net amount of sales tax payable, and the sales of taxable and exempt goods in each State for 1959-60, are given in the following table. The figures relate to sales during the period 1st July to 30th June. The figures for sales tax payable differ from those for net collections shown on page 811, because the latter include some adjustments in respect of earlier tax years and include only tax payable on returns lodged during the year, which in general cover sales for the period June to May.

SALES TAX AND AMOUNT OF SALES, 1959-60.

(£'000.)

Sales Tax Payable ..	65,378	52,084	21,890	15,755	9,912	2,757	63	167,839

(a) Includes the Australian Capital Territory.

Sales of taxable and exempt goods and sales tax payable for Australia as a whole are shown in the following table for the years 1955–56 to 1959–60:—

SALES TAX AND AMOUNT OF SALES.

(£'000.)

Year.	Net Sales on which Sales Tax was Payable.	Sales of Exempt Goods by Registered Persons.	Total Sales of Taxable and Exempt Goods.	Sales Tax Payable.
1955–56	798,774	1,856,865	2,655,639	111,469
1956–57	781,250	2,016,828	2,798,078	127,649
1957–58	849,347	2,105,688	2,955,035	138,259
1958–59	890,293	2,152,026	3,042,319	143,296
1959–60	1,020,033	2,354,204	3,374,237	167,839

In the foregoing tables, sales include goods transferred to stock for sale by retail, goods imported by persons other than registered taxpayers, and goods used in the business of the taxpayer. Exempt sales relate to goods exempted from sales tax under the Sales Tax (Exemptions and Classifications) Act 1935–1960. The figures shown do not represent the total sales of all commodities, as vendors trading in exempt goods only are not required to be registered and consequently the volume of their sales is not included in the statistics above. In addition, non-taxable sales (i.e., goods sold by one registered taxpayer to another registered taxpayer) are excluded.

(c) *Land Tax.* Commonwealth Land Tax was levied annually from 1910–11 to 1951–52 on the unimproved value of land. It was abolished from 1st July, 1952. For rates of tax payable from 1942–43 to 1951–52, see Official Year Book No. 40, 1954, page 669.

(d) *Pay-roll Tax.* The Pay-roll Tax Act 1941 and the Pay-roll Tax Assessment Act 1941–1942 imposed a pay-roll tax of 2½ per cent. on all wages and salaries in excess of £20 a week paid by an employer after 30th June, 1941. Employers who are liable for tax are required to register and to furnish a monthly return of all wages paid. These measures formed part of the Commonwealth scheme of child endowment, the revenue from the tax being designed to provide part of the money required. However, the collections now form part of the general revenues of the Commonwealth. For particulars of the present method of financing the National Welfare Fund, out of which Child Endowment is paid, see para. 6, page 826. The exemption was increased to £80 a week (£4,160 per annum) from 1st October, 1953, to £120 a week (£6,240 per annum) from 1st September, 1954, and to £200 a week (£10,400 per annum) from 1st September, 1957.

Receipts from pay-roll tax for the years 1955–56 to 1959–60 were—1955–56, £45,543,000; 1956–57, £48,675,000; 1957–58, £48,552,000; 1958–59, £49,619,000; and 1959–60, £55,162,000.

(e) *Income Taxes.* Details of taxes on income are given in division E of this chapter.

(f) *Wool Sales Deduction.* The Wool Sales Deduction scheme operated from 2nd December, 1950, until 17th November, 1951. For particulars, see Official Year Book No. 46, page 819.

(g) *Estate Duty.* The Commonwealth Estate Duty was first levied in 1914. Particulars of exemptions allowed and the rates imposed prior to November, 1957, are given in earlier issues of the Year Book (see No. 43, p. 758).

Under the Estate Duty Assessment Act 1914–1957, Estate Duty is assessed on the net value of the estate less a statutory exemption determined in accordance with the following formula:—(a) where the whole of the estate passes to the widow, children (including adopted

children, step-children and ex-nuptial children), or grand-children of the deceased, the sum of £5,000 decreasing by £1 for every £3 by which the value exceeds £5,000 and ceasing to apply at £20,000; (b) where no part of the estate passes to the widow, children or grand-children, the sum of £2,500 decreasing by £1 for every £3 by which the value exceeds £2,500 and ceasing to apply at £10,000; and (c) where part only of the estate passes to the widow, children or grand-children, the statutory exemption is to be calculated proportionately under (a) and (b).

An amendment to this Act, assented to on 20th November, 1957, provided for rebates of duty on estates which become liable for duty on two or more occasions within a period of five years.

The rates of duty levied under the Estate Duty Act 1914-1941 increase as the value of the estate increases, as follows:—£1 to £10,000, 3 per cent.; £10,001 to £20,000, 3 per cent. to 6 per cent.; £20,001 to £120,000, 6 per cent. to 26 per cent.; £120,001 to £500,000, 26 per cent. to 27.9 per cent.; over £500,000, 27.9 per cent.

Total collections for the years 1955-56 to 1959-60 were as follows:—1955-56, £10,120,000; 1956-57, £12,712,000; 1957-58, £13,774,000; 1958-59, £13,309,000; 1959-60, £13,753,000.

Particulars of the number and value of estates and duty assessed, for each of the assessment years 1954-55 to 1958-59, are given in the following table:—

ESTATE DUTY ASSESSMENTS.

Particulars.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.
Number of Estates	12,878	11,069	12,784	13,599	11,794
Gross Value Assessed £'000	176,853	178,361	213,253	227,310	202,899
Deductions £'000	30,136	31,281	37,376	39,707	35,589
Statutory Exemption £'000	23,290	23,802	28,661	30,492	26,555
Dutiable Value £'000	123,427	123,278	147,216	157,111	140,755
Duty Payable £'000	10,310	10,882	13,580	13,967	13,013
Average dutiable value £	9,584	11,137	11,516	11,553	11,934
Average duty per estate £	801	983	1,062	1,027	1,103

(h) *Gift Duty.* The Gift Duty Act 1941-1947 and the Gift Duty Assessment Act 1941-1957 impose a gift duty on all gifts made after the 29th October, 1941. A gift has been defined as any disposition of property which is made otherwise than by will without adequate consideration in money or money's worth. There is a liability on both the donor and the donee to furnish a return, and both are jointly and severally liable for payment of the duty.

The following rates of duty are levied under the Gift Duty Act 1941-1947 and relate to the value of all gifts made by the donor within a period of eighteen months:—Not exceeding £2,000, nil; £2,001 to £10,000, 3 per cent.; £10,001 to £20,000, 3 per cent. to 6 per cent.; £20,001 to £120,000, 6 per cent. to 26 per cent.; £120,001 to £500,000, 26 per cent. to 27.9 per cent.; £500,001 and over, 27.9 per cent.

An amendment which operated from 3rd June, 1947, provides that gift duty shall not exceed one-half of the amount by which the value of the gift exceeds £2,000.

Total receipts from gift duty for the years 1955-56 to 1959-60 were as follows:—1955-56, £1,820,000; 1956-57, £1,940,000; 1957-58, £2,205,000; 1958-59, £2,000,000; 1959-60, £2,435,000.

(i) *Entertainments Tax.* The Commonwealth levied an Entertainments Tax from 1st October, 1942, to 30th September, 1953. Details of rates are given in earlier issues of the Official Year Book (see No. 40, pp. 672 and 673).

(j) *Flour Tax.* Particulars of the rates of flour tax which operated from 4th December, 1933, to 21st December, 1947, are given in Official Year Book No. 37, pages 618 and 619. Because of the rise in wheat prices, the rate was declared to be nil as from 22nd December, 1947.

(k) *Wool Levy.* The Wool Tax Act 1936 and Wool Tax Assessment Act 1936 provided for a levy on all wool grown in Australia and shorn on or after 1st July, 1936. Details of this levy are given in earlier issues of the Official Year Book. This levy was suspended from 1st July, 1946, until 30th June, 1952, while the Wool Contributory Charge was imposed.

With the repeal of the Wool Contributory Charge, however, a levy on wool produced in Australia was re-introduced from 1st July, 1952. The Wool Tax Acts (Nos. 1 and 2) of 1952 provided for the payment of a levy of four shillings a bale until 30th June, 1953, after which date the rate of tax could be varied within prescribed limits. There was no variation until 1st July, 1957, when the rate was increased to six shillings a bale. The purpose of the tax is to provide funds for publicity and research previously provided by the Wool Contributory Charge. Collections during 1955–56, 1956–57, 1957–58, 1958–59 and 1959–60 were £851,000, £979,000, £1,328,000, £1,389,000 and £1,542,000 respectively.

(l) *Wool Contributory Charge.* The Wool (Contributory Charge) Act 1945 and the Wool (Contributory Charge) Assessment Act 1945 imposed a charge on all wool produced in Australia and sold, manufactured or exported. Wool sold by the Australian Wool Realization Commission was not liable to the charge. Details of the rate of the charge and collections made were given in earlier issues of the Official Year Book (see No. 40, p. 675).

The various Wool (Contributory Charge) Acts were repealed by the Wool Tax Assessment Act of 1952 and the charge superseded by the wool levy.

(m) *Wheat Export Charge and Wheat Tax.* A summary of the provisions of the Wheat Export Charge Acts 1946, 1948, 1952 and 1954 is contained in previous issues of the Official Year Book (see No. 40, p. 676, No. 41, p. 604 and No. 46, p. 820).

The Wheat Export Charge Act 1958 repealed the 1954 Wheat Export Charge Act and provided for an export charge on wheat and wheat products for the seasons 1958–59 to 1963–64 inclusive. The charge levied is the excess of the export price over the cost of production or 1s. 6d. per bushel whichever is the less. Under the Wheat Industry Stabilization Act 1958, to which the Wheat Export Charge is complementary, the Commonwealth Government guarantees a return to wheat-growers of the ascertained cost of production of up to 100 million bushels of wheat harvested each season exported from Australia. Collections from the wheat export charge are paid into the Wheat Prices Stabilization Fund, out of which payments will be made to the Australian Wheat Board, when required, for the purpose of building up the average export price for any season to the guaranteed price. If the fund is exhausted, additional payments will be made from the Consolidated Revenue Fund.

Collections of the wheat export charge amounted to £4,294,000 in 1955–56, nil in 1956–57, £443,000 in 1957–58, £1,211,000 in 1958–59 and £1,000 in 1959–60.

The Wheat Tax Act of 1957 imposed a tax of $\frac{1}{4}$ d. for each bushel of wheat—

- (a) which has been delivered to the Wheat Board on or after the first day of October, 1956, and before the date of commencement of the Act; or
- (b) which is delivered to the Wheat Board on or after that date.

The Act also provided that where, before the commencement of the Act, a person delivering to the Board wheat upon which tax is imposed by the Act authorized the Board to deduct an amount from the moneys payable to him and to pay the amount so deducted to a person, authority or association for the purposes of soil fertility research or other research likely to benefit the wheat industry, and the Board did so, the tax otherwise payable upon that wheat is to be reduced by the amount so deducted.

The Wheat Research Act 1957 provided for the establishment of a Wheat Research Trust Account to receive moneys payable under the Wheat Act 1957, and for the setting up of a Wheat Industry Research Council to direct the expenditure of moneys from that Trust Account for research, etc., to benefit the Wheat Industry.

Collections of Wheat Tax amounted to £185,000 in 1957–58, £207,000 in 1958–59 and £187,000 in 1959–60, and were paid to the Wheat Research Trust Account.

(n) *Miscellaneous Export Charges.* These consist of charges levied on exports of apples and pears (Apple and Pear Export Charges Act 1938–1960), canned fruits (Canned Fruits Export Charges Act 1926–1959), dairy produce (Dairy Produce Export Charges Act 1924–1937), dried fruits (Dried Fruits Export Charges Act 1924–1929), eggs (Egg

Export Charges Act 1947) and meat (Meat Export Charges Act 1935-1954) and on grapes used in the manufacture of wine (Wine Grapes Charges Act 1929-1954). The collections are paid into special funds to be applied, for the purposes of Export Boards established under various Acts, in controlling the quantity and quality of produce exported.

Collections for the last five years were as follows:—1955-56, £414,000; 1956-57, £375,000; 1957-58, £390,000; 1958-59, £566,000; and 1959-60, £540,000.

(o) *Stevedoring Industry Charge.* The Stevedoring Industry Charge Act 1947 and the Stevedoring Industry Charge Assessment Act 1947 imposed a charge of 4½d. a man-hour on the employer of a waterside worker after 22nd December, 1947.

The amounts received are paid to the Stevedoring Industry Board for the payment of attendance money to waterside workers and for other expenses of the Board.

Since 1947, the charge has been amended as follows:—11th October, 1949, a reduction to 2½d. a man-hour; 11th December, 1951, an increase to 4d. a man-hour; 28th October, 1952, an increase to 11d. a man-hour; 4th May, 1954, a reduction to 6d. a man-hour; 30th October, 1956, an increase to 1s. 7d. a man-hour; and from 21st May, 1957, an increase to 2s. a man-hour.

A further amendment under the Stevedoring Industry Charge Act 1958 which came into operation on 1st April, 1958, provided for an increase of the charge to 3s. a man-hour until 1st July, 1959, and a reduction to 2s. 6d. a man-hour on or after 1st July, 1959.

Collections during the years 1955-56 to 1959-60 were as follows:—1955-56, £973,000; 1956-57, £1,926,000; 1957-58, £3,337,000; 1958-59, £4,572,000; and 1959-60, £3,718,000.

(p) *Gold Tax.* Particulars of the Gold Tax which operated from 15th September, 1939, to 20th September, 1947, are given in Official Year Book No. 39, page 767.

(q) *Tobacco Industry Charge.* The Tobacco Charge Acts (Nos. 1, 2 and 3) 1955 and the Tobacco Charges Assessment Act 1955, which came into operation on 1st January, 1956, provided for charges on tobacco leaf grown in Australia.

The Tobacco Charge Act (No. 1) 1955 imposed a maximum charge of ½d. a pound on all Australian tobacco leaf sold to a manufacturer.

The Tobacco Charge Act (No. 2) 1955 imposed a charge at twice the rate to be levied under the Tobacco Charge Act (No. 1) on all Australian tobacco leaf purchased by a manufacturer.

The Tobacco Charge Act (No. 3) 1955 imposed a charge on all Australian tobacco leaf grown by a manufacturer and appropriated by him for manufacturing purposes. Where the manufacturer grew, in Australia, not less than nine-tenths of the tobacco leaf used by him in manufacturing, the charge was at the rate imposed by the Tobacco Charge Act (No. 1). In other cases, the charge was at twice that rate.

The charges collected under the Tobacco Charges Assessment Act 1955 were paid into the Tobacco Industry Trust Account which was established by the Tobacco Industry Act, 1955. Moneys in this account are used for the promotion of the tobacco industry.

Collections in 1955-56, 1956-57, 1957-58, 1958-59 and 1959-60 amounted to £5,000, £41,000, £61,000, £72,000 and £112,000 respectively.

(r) *Dairy Produce Levy.* The Dairy Produce Levy Act 1958 imposed a levy on the manufacture of butter and cheese for the purpose of financing a research and sales promotion scheme for the dairy industry. The maximum rates of the levy are fixed at three-sixteenths of a penny a pound on butter and three-thirty-seconds of a penny on cheese. In 1958-59 and 1959-60, collections amounted to £151,000 and £334,000.

(s) *Canning Fruit Charge.* The Canning Fruit Charge Act 1959 imposed a levy on apricots, peaches and pears accepted by canneries as of canning quality or for use in the production of canned fruit, for the purpose of promoting the sale of Australian canned fruits both overseas and in Australia. The rate of the charge was ten shillings per ton of fruit delivered to canneries or such lesser rate as may be prescribed from time to time. In 1959-60, collections amounted to £35,000.

3. **Business Undertakings.**—(i) *Postmaster-General's Department.* Particulars of net receipts for each of the financial years 1955-56 to 1959-60 are given in the following table:—

POSTMASTER-GENERAL'S DEPARTMENT: NET RECEIPTS.
(£'000.)

Particulars.	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.
Private boxes and bags	185	240	247	258	276
Commission on money orders and postal notes	935	925	932	956	1,088

Miscellaneous	2,313	2,538	2,745	3,050	3,087
Total	79,341	90,074	96,776	103,467	121,631

Further particulars of the Postmaster-General's Department's receipts to 1959-60 are given in Chapter XIV.—Transport and Communication, of this Year Book (see p. 569).

(ii) *Broadcasting and Television Services.* Following the amendment of the Australian Broadcasting Act 1942-1946 by Act No. 64 of 1948, the Australian Broadcasting Control Board was set up on 15th March, 1949. (See also Chapter XIV.—Transport and Communication; p. 578).

Details of net receipts for the years 1955-56 to 1959-60 are shown in the following table:—

BROADCASTING AND TELEVISION SERVICES; NET RECEIPTS.
(£'000.)

Particulars.	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.
Listeners' Licence Fees ..	3,846	4,866	5,371	5,693	5,656
Broadcasting Station Licence Fees ..	35	66	80	85	88

Total	3,897	5,301	6,876	8,618	10,460

(iii) *Commonwealth Railways.* The Commonwealth Government is responsible for four railways—the Trans-Australian, the Central Australia, the North Australia and the Australian Capital Territory. The following table shows the amounts paid to the credit of the Consolidated Revenue Fund on account of each of these railways for the years 1955-56 to 1959-60:—

COMMONWEALTH RAILWAYS REVENUE.
(£'000.)

Railway.	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.
Trans-Australian	2,545	2,887	2,821	2,927	3,249
Central Australia	1,937	1,390	1,554	1,635	1,601
North Australia	86	130	182	203	272
Australian Capital Territory ..	15	21	19	46	25
Total	4,583	4,428	4,576	4,811	5,147

Further particulars to 1959-60 are given in Chapter XIV.—Transport and Communication (*see pp. 535 and 543*).

4. *Other Sources of Revenue.*—Revenue derived by the Consolidated Revenue Fund from the Territories of the Commonwealth during 1959-60 amounted to £4,198,000 (Australian Capital Territory £2,766,000; Northern Territory £1,426,000; Cocos (Keeling) Islands £6,000). Of other sources of revenue, amounting to £47,060,000, the following are noteworthy:—Interest, £12,504,000; Defence £5,832,000; Net Profit on Australian Note Issue £10,516,000; and Surplus Balances of Trust Accounts, £5,674,000.

For details of the revenue of the Territories *see* Chapter V. of this Year Book.

C. EXPENDITURE.

1. *Details of Expenditure from Consolidated Revenue.*—The following table shows details of expenditure from the Consolidated Revenue Fund during the years 1955-56 to 1959-60. In this table, particulars of interest, debt redemption, superannuation and pension charges are not shown separately, but are included with departmental, etc. expenditure. Separate figures for debt charges are shown in the table on page 820.

COMMONWEALTH CONSOLIDATED REVENUE FUND: EXPENDITURE. (£'000.)

(a) Excludes debt charges, audit charges, pension and superannuation payments and Defence Division of the Department of the Treasury. (b) Excludes audit charges and Government contributions under Superannuation Act.

(c) Includes audit charges relating to Defence and War and Repatriation Services; and excludes payments to the States for Cattle Tick Control, Dairy Industry Extension and Agricultural Advisory Services included under Payments to or for the States.

(d) Excludes expenditure from Capital Works votes on Grants for Railway Standardization included as payments to the States.

(e) Includes payments to States from Departmental votes. *See* footnotes (c) and (d).

Further details of the expenditure in each section are given in paragraphs 2 to 12 following.

A graphical representation of the revenue and expenditure of the Commonwealth Consolidated Revenue Fund appears on page 831. In this diagram, debt charges (interest and debt redemption, etc.) are shown as a separate item, whereas in the table above these charges are included in the section to which they relate.

Details of Commonwealth expenditure on debt charges for 1955-56 to 1959-60 are shown in the following table:—

2. Defence Services.—Details of the expenditure on defence services, including capital works and services, but excluding debt charges, etc., by the Departments of Defence, Navy, Army, Air and Supply are shown in the following table. This table covers expenditure by the service and associated departments only, and includes the cost of maintaining forces in oversea posts.

The figures represent the combined expenditures from Consolidated Revenue and Loan Funds for the years 1955-56 to 1959-60. In previous issues of this Year Book, this table covered expenditure from Trust Funds also, but there has been no expenditure from this source on defence services in recent years.

Grand Total	162,351	150,482	171,833	169,170	179,657

(a) Excludes interest and redemption of War (1914-18) Debt due to the United Kingdom Government, payment of which was suspended in 1931. (b) In addition, £13,400,000 was spent from balance of War Pensions Trust Fund. (c) From Service Departments and Australian Soldiers' Repatriation Trust Account. (d) Excludes International Monetary Fund charges. (e) Munitions stores, etc., supplied to the Government of the United Kingdom and other administrations. Includes repayments and waiver of war-time indebtedness of other administrations.

NOTE.—Minus sign (—) indicates excess of credits or repayments over expenditure.

4. Subsidies and Bounties.—The following table shows details of Commonwealth expenditure from revenue on subsidies, bounties and assistance to primary producers for the years 1955-56 to 1959-60. Expenditure on special relief such as drought, frost, flood and bush fire, etc. is not included here (included under items in table, p. 825), nor is expenditure from the proceeds of certain taxes on primary products and profits from marketing schemes, which have been paid to trust funds for the purpose of price or other stabilization schemes or for distribution to producers (see paragraph 12, p. 836). Payments to the States for Cattle Tick Control, Dairy Industry Extension and Agricultural Advisory Services are also not included under this heading, but under the heading Payments to or for the States (see para. 11, pp. 829-36).

Further information relating to assistance to primary producers is given in Chapter XXII.—Agricultural Production. Details of price stabilization subsidies and of various forms of assistance to primary producers for earlier years may be found on pages 414 and 1014-15, respectively, of Official Year Book No. 38.

SUBSIDIES AND BOUNTIES: COMMONWEALTH EXPENDITURE.
(£'000.)

Item.	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.

(a) Dairy products.

5. Total Cost of Departments.—(i) *Expenditure on Administrative Services, etc.* Expenditure under this heading covers expenditure on administrative services and other activities (i.e., what might be termed “running expenses”) by departments other than the Defence and Repatriation Departments and business undertakings. Miscellaneous expenditure and debt charges, etc., are not included in this table, but in the one following: Expenditure on defence, war and repatriation services, subsidies and bounties, social services paid from the National Welfare Fund, business undertakings, Commonwealth territories, and capital works and services is excluded.

Information on the functions of departments and the Acts administered by the Ministers of departments was published in Official Year Book No. 37, pages 76-86, and particulars of subsequent changes in departmental structure were given in later issues (see No. 43, p. 81).

Total, All Departments ..	41,267	47,734	53,629	73,562	73,429

(a) Includes rent, repairs and maintenance. Pension and superannuation contributions and interest and debt redemption in respect of the various departments are included under the Department of the Treasury. Payments to States from Departmental Miscellaneous Expenditure—Cattle Tick Control, Dairy Industry Extension Grant and Agricultural Advisory Services—are excluded. (b) Unallocated debt charges, in respect of all departments, including defence departments. (c) Includes pensions and superannuation contributions in respect of all departments, including defence departments. (d) Provided under Capital Works and Services votes.

6. **National Welfare Fund.**—The National Welfare Fund was established for the purpose of providing a fund for the payment of Commonwealth social services benefits. During the year 1949-50, an amount equivalent to the total collections of pay-roll tax and social services contribution was paid to the fund from Consolidated Revenue. During 1950-51, the social services contribution was amalgamated with the normal income tax, and it became necessary to base the contributions on another formula. For the year 1950-51, the amount paid to the fund was the total of collections of pay-roll tax and social services contribution plus £30,000,000. In 1951-52, the amount paid to the fund was the amount paid in 1950-51 increased in the same proportion as collections of pay-roll tax increased over the collections of pay-roll tax in 1950-51. By an amendment to the National Welfare Fund Act 1943-1950, the amount to be paid to the fund in 1952-53 and subsequent years was changed to the amount of moneys paid out of the fund. In addition to these payments from Consolidated Revenue, the fund received a small amount of interest from investments.

In the following table, details are given of the income and expenditure of the National Welfare Fund and the balance in the fund at the end of each year for the years 1955-56 to 1959-60. For a detailed account of the establishment of the National Welfare Fund, the services provided and the numbers and amounts of benefits paid, see Chapter XVIII.—Welfare Services.

NATIONAL WELFARE FUND: RECEIPTS, EXPENDITURE AND BALANCES.

(£'000.)

7. *Loan Consolidation and Investment Reserve Trust Account.*—The Loan Consolidation and Investment Reserve Act 1955 established the Loan Consolidation and Investment Reserve Trust Account for the purpose of repurchase or redemption of securities representing portion of the public debt of the Commonwealth.

In 1955-56, the Account was credited with a transfer from the Debt Redemption Reserve Trust Account of £126,422,000. Payments from the Consolidated Revenue Fund were made as follows:—1955-56, £61,613,000; 1956-57, £194,793,000; 1957-58, £104,378,000; 1958-59, £27,947,000; and 1959-60, £41,382,000. Expenditure from the Trust Account on repurchase of securities was £28,701,000 in 1955-56; £43,443,000 in 1956-57; £132,767,000 in 1957-58; £100,046,000 in 1958-59; and £79,885,000 in 1959-60. The major portion of the balance of the Trust Account at 30th June, 1960, was invested in Commonwealth securities in special loans to finance Commonwealth and State works programmes.

8. *Business Undertakings.*—(i) *Postmaster-General's Department.* Details of the expenditure of this Department for the years 1955-56 to 1959-60 are given in the following table:—

POSTMASTER-GENERAL'S DEPARTMENT: EXPENDITURE.

Additional details of the financial operations of the Commonwealth Railways to 1959-60 are given in Chapter XIV.—Transport and Communication (*see* pp. 537-9).

9. *Territories.*—The following table shows the expenditure on account of Commonwealth Territories for the years 1955-56 to 1959-60. The Australian Capital Territory is administered by the Department of the Interior, and the Department of Territories controls the Northern Territory and the external territories. The expenditure has been grouped in one table for convenience. Information in greater detail will be found in Chapter V.—The Territories of Australia, of this Year Book.

10. Capital Works and Services.—In the following table, details are given of Commonwealth expenditure on capital works and services during each of the years 1955-56 to 1959-60. The table covers all expenditure on capital works and services made from the Consolidated Revenue Fund and the Loan Fund. In previous issues of this Year Book, this table covered expenditure from Trust Funds also, but there has been no expenditure on capital works and services from this source in recent years.

11. Payments to or for the States.—(i) *General.* An outline of the provisions of the Constitution requiring the Commonwealth to make payments to the States, and of the

systems which followed, is given in earlier issues of the Official Year Book (see No. 37, pp. 633 to 638). In the following paragraphs, reference is made to the arrangements at present in operation.

(ii) *Amounts Paid.* (a) Year 1959–60. The table below shows particulars of the amounts paid to each of the States as grants for the several purposes referred to in subsequent paragraphs:—

COMMONWEALTH PAYMENTS TO OR FOR THE STATES, 1959–60.(a)

(iii) *Financial Agreement.* Details of the Financial Agreement between the Commonwealth and the States are given in Official Year Book No. 37, pages 685 to 690. Under this Agreement, the Commonwealth undertook to contribute £7,584,912 per annum towards interest payable on the State Loan Securities for a period of 58 years from 1st July, 1927. This amount is to be distributed among the States as follows:—New South Wales, £2,917,411; Victoria, £2,127,159; Queensland, £1,096,235; South Australia, £703,816; Western Australia, £473,432; Tasmania, £266,859.

These amounts are equal to the sums paid by the Commonwealth to each State in the year 1926–27 at the rate of 25s. per head of population, the rate at which the Commonwealth had contributed annually to the States since 1st July, 1910, as compensation for the States relinquishing, after Federation, the right to levy Customs and Excise Duties.

In addition, under the Financial Agreement, the Commonwealth agreed to make certain contributions to the National Debt Sinking Fund for redemption of State Loan Securities. Details of these are given in Division D of this Chapter, § 2, page 853.

(iv) *Special Grants.* The Constitution provides in Section 96 for the granting of special financial assistance to the States. Prior to 1933, financial assistance of varying amounts was granted by the Commonwealth to South Australia, Western Australia and Tasmania. Details of this may be found in earlier issues of the Official Year Book (see No. 40, p. 695).

In 1933, the Commonwealth Government appointed the Commonwealth Grants Commission of three members to inquire into and report upon claims made by any State for a grant of financial assistance and any matters relevant thereto.

Applications have been received from South Australia, Western Australia and Tasmania each year from 1933 onwards and the recommendations of the Commission in respect of the years 1956–57 to 1960–61 are shown in the following table. Commencing with 1949–50, the Commission has divided the grants recommended into two parts. One part is the Commission's estimate of the indispensable need of the claimant State for the year in which the payment is to be made after allowing a sufficient margin for safety. The other part is an adjustment of this estimate for an earlier year after an examination of the audited accounts for that year. Thus the grants for 1960–61 include an estimate of the indispensable need of the claimant State for 1960–61 and an adjustment to the estimated grant for 1958–59. South Australia agreed with the Commonwealth not to apply for special grants in other than exceptional circumstances after 1st July, 1959, when the new financial arrangements under the State Grants Act 1959 came into operation (see sub-para. (v) below).

COMMONWEALTH GRANTS COMMISSION: GRANTS RECOMMENDED.
(£1,000.)

Particulars.	1956–57.	1957–58.	1958–59.	1959–60.	1960–61.

(a) Adjustment to estimated grant paid two years previously.
payment of £1,027,000 in 1959–60.

(b) Includes the final adjusting

(v) *Financial Assistance Grants.* The States Grants Act 1959 repealed the States Grants (Tax Reimbursement) Acts of 1946, 1947 and 1948 and provided for payment to the States of financial assistance in 1959–60 amounting to £244,500,000 to be distributed amongst the States as follows:—New South Wales, £83,450,000; Victoria, £60,625,000;

Queensland, £36,375,000; South Australia, £27,675,000; Western Australia, £25,462,000; Tasmania, £10,913,000. In subsequent years, the financial assistance grant payable to each State is to be determined by increasing its grant for 1959–60 in accordance with a formula which will take into account movements in population in each State and the increases (if any) in the level of average wages per person employed as shown in returns submitted under the Pay-roll Tax Assessment Act 1941–1957.

Details of the States Grants (Income Tax Reimbursement) Act 1942 and the States Grants (Entertainments Tax Reimbursement) Act 1942 are given in earlier issues of the Official Year Book (*see* No. 37, pp. 635 to 637). These Acts provided for grants to the States as compensation for vacating the fields of Income Tax and Entertainments Tax. Grants under these Acts ceased after 1945–46 and were replaced by grants under the States Grants (Tax Reimbursement) Act 1946–1948 which expired after 1958–59. *See* Official Year Book No. 46, pages 837–8.

(vi) *Special Financial Assistance Grants.* During the years 1954–55 to 1958–59, there were heavy additions to the financial needs of the States and special assistance grants amounting to £19,902,000, £15,348,000, £19,405,000, £24,145,000 and £30,437,000 respectively were made. For details of amounts paid to each State *see* earlier issues of the Official Year Book or the annual bulletin *Finance, Part I.—Public and Private Finance.*

(vii) *Additional Financial Assistance.* The States Grants (Additional Assistance) Act 1958 provided for the payment of £5,000,000 from the Consolidated Revenue Fund for financial assistance to the States.

(viii) *Grants for Road Construction.* (a) *Main Roads Development Act 1923–25, Federal Aid Roads Acts 1926, 1931 and 1936, Federal Aid Roads and Works Act 1937, Commonwealth Aid Roads and Works Act 1947–1949, Commonwealth Aid Roads Act 1950, Commonwealth Aid Roads Act 1954, and Commonwealth Aid Roads (Special Assistance) Act 1957.* Details of these Acts are given in earlier issues of the Official Year Book (*see* No. 38, pp. 787–8, No. 41, p. 62 and No. 46, p. 838) and in the annual bulletin *Finance, Part I.—Public and Private Finance.*

(b) *Commonwealth Aid Roads Act 1959.* A new scheme of Commonwealth assistance to the States for roads was established by the Commonwealth Aid Roads Act 1959. Under this Act, which is to operate for a period of five years from 1st July, 1959, the Commonwealth has undertaken to make available up to £250,000,000 to the States for the construction, reconstruction, maintenance and repair of roads.

Of this amount, a total of £220,000,000 will be paid to the States as basic grants for roads over five years. The basic grants are fixed annual amounts which rise progressively by £2,000,000 a year from £40,000,000 in 1959–60 to £48,000,000 in 1963–64. In each year, the grants will be distributed between the States on the basis of 5 per cent. of the total to Tasmania and the balance shared between the other five States, one-third in proportion to their respective populations at the date of the last preceding Census, one-third in proportion to their respective areas and one-third in proportion to the respective number of motor vehicles registered in these States at 31st December preceding the year of payment.

The balance of up to £30,000,000 over the five years will be made available to the States as matching assistance for roads. The total amounts of matching assistance will increase by £2,000,000 a year from £2,000,000 in 1959–60 to £10,000,000 in 1963–64. Up to the limit of its share of the total matching assistance available in any year, each State qualifies for £1 of matching assistance from the Commonwealth for each £1 by which the amount it allocates in that year from its own resources for expenditure on roads exceeds the amount so allocated in 1958–59. The share of each State in the total matching assistance available in any year is determined by the same formula as is used to determine its share of the basic grant in that year.

The full amount of the matching assistance available to each State in any year is being paid during that year on the understanding that the road grants to the State in the following year will be adjusted if it is subsequently found that the State did not qualify in full for the matching assistance paid to it in that year.

The legislation relating to the years 1947–48 to 1958–59 provided for annual allocations to the Commonwealth for expenditure on strategic roads and the promotion of road safety practices. No such provisions are contained in the present legislation, the Commonwealth making separate provision for these purposes.

(ix) *Tuberculosis Act 1948.* The Tuberculosis Act 1948 provided for the reimbursement by the Commonwealth of capital expenditure incurred by the States in the provision of facilities for the diagnosis, treatment and control of tuberculosis, as from 1st July, 1948.

(x) *States Grants (Mental Institutions) Act 1955.* This Act provides for financial assistance to the States for capital expenditure on mental institutions to a maximum amount of £10,000,000. Each State is entitled to one-third of expenditure on buildings or equipment of a mental institution made on or after 1st July, 1955.

(xi) *Other Payments. (a) Western Australian Waterworks.* The Western Australia Grant (Water Supply) Act 1948–57 provides for grants to Western Australia not exceeding an aggregate of £5,000,000 for the development of the Agricultural Areas, Great Southern Towns and Goldfields Water Supply schemes. The amount provided by the Commonwealth is not to exceed half the total expenditure on the scheme.

(b) *Coal Mining Industry—Long Service Leave.* To provide funds for the payment for long service leave in the coal mining industry, the Commonwealth imposed an excise duty of 6d. a ton on coal produced from 1st November, 1949. The rate of duty was raised to 7½d. a ton from 26th August, 1951, and to 8d. a ton from 30th May, 1952. The proceeds of this excise duty are paid to a trust fund out of which the States are reimbursed for expenditure incurred in granting long service leave to employees in the coal mining industry.

(c) *Imported Houses.* Under the States Grants (Imported Houses) Act 1950 the Commonwealth Government undertook to pay to the States a subsidy not exceeding £300 per house for houses imported by a State or a housing authority of a State after 12th October, 1949. Imports of houses under this scheme have now ceased.

(d) *Contribution to South Australia—Port Augusta to Port Pirie Railway.* The Port Augusta to Port Pirie Railway Act 1935–1950 approved an agreement between the Commonwealth and South Australia to provide for the extension of the Trans-Australian Railway by the construction of a railway in South Australia from Port Augusta to Port Pirie. As a contribution towards reimbursing South Australia for the cost of the section to be constructed by the State, and for any additional expense incurred by the State in carrying out the Agreement, the Act provided for a payment by the Commonwealth to the State of South Australia of £20,000 per annum for twenty years, the first payment being made in 1937–38 after the opening of the railway and the final payment in 1956–57.

(e) *Encouragement of Meat Production.* To develop meat production in Queensland and Western Australia, grants are made to these States for the provision and improvement of roads and other facilities for the movement of live-stock. Provision is made for the Commonwealth to meet the cost of the construction and improvement of certain specified roads in both States and the construction of eight cattle loading and unloading points in Queensland. Provision is also made for the Commonwealth to meet half the cost of improving watering facilities on specified stock routes in both States. The amount of the grants for improving watering facilities on stock routes is limited to £75,000 in Queensland and £31,500 in Western Australia. These limits were extended as from 20th April, 1954, to £150,000 in Queensland and £50,000 in Western Australia.

(f) *Grants to Universities.* Payments to the States for universities were first introduced in 1951–52 under the States Grants (Universities) Act 1951, and were continued under similar legislation passed in 1953, 1955, 1956 and 1957. Following on the Government's acceptance of the main recommendations of the Committee on Australian Universities, the provisions of the 1957 Act relating to financial assistance for 1958 were superseded by the States Grants (Universities) Act 1958, which operated from 1st January, 1958.

This new legislation authorized the Commonwealth to make payments to the States for universities of up to £21,400,000 over the three calendar years 1958 to 1960, inclusive, where certain conditions have been satisfied. These payments include increased contributions towards the running expenses of universities, new grants for capital works and equipment and new emergency grants.

(g) *Cattle Tick Control.* Since 1926–27, the Commonwealth has subsidized the cost of eradication and control of cattle tick in New South Wales. From 1950–51, the subsidy was increased on a £1 for £1 basis up to an agreed maximum. The payments are charged to the departmental expenditure of the Department of Health.

(h) *Western Australia Northern Development.* The Commonwealth provides financial assistance of up to £5,000,000 to the State of Western Australia under the Western Australia Grant (Northern Development) Act 1958–59 in respect of developmental expenditure by the State in the area of Western Australia north of the twentieth parallel of latitude during the period of five years commencing on 1st July, 1958. Under the scheme, Commonwealth

assistance is provided in respect of projects, nominated by the State, which the Commonwealth is satisfied will contribute to the development of the area and which could not reasonably be expected to be carried out during the period of five years without the grant of Commonwealth assistance.

Payments to the State during 1959–60 amounted to £484,000, bringing total payments by the Commonwealth in respect of the scheme to £655,000.

(i) *Dairy Industry Extension Grant.* The Commonwealth provides financial assistance with a maximum annual limit of £250,000, to promote improved farm practices in the dairy industry. The grants are charged to the departmental expenditure of the Department of Primary Industry.

(j) *Expansion of Agricultural Advisory Services.* These payments were introduced in 1952–53 to encourage expansion of agricultural advisory services by the State Departments of Agriculture and to promote increased farm efficiency. The payments are charged to the departmental expenditure of the Department of Primary Industry.

(k) *Grants for Railway Standardization.—South Australia.* Under the Railway Standardization (South Australia) Agreement Act 1949, the Commonwealth is providing funds for the conversion of lines in the south-eastern division of the State as an initial step towards eventual standardization of 4' 8½" gauge. The State is to repay three-tenths of the cost of this work over a period of 50 years and is to bear the full cost of subsequent conversion from broad to standard gauge.

Albury to Melbourne. Under the Railway Standardization (New South Wales and Victoria) Agreement Act 1958 the Commonwealth has agreed to provide funds for the construction of a standard gauge rail link between Albury and Melbourne on the basis that the States of Victoria and New South Wales will each bear 15 per cent. of the cost by instalments over a period of 50 years.

The total expenditure on Railway Standardization (the 30 per cent. advances to the States and the 70 per cent. grants to the States) is charged to the Capital Works and Services vote of the Department of Shipping and Transport.

12. **Other Expenditure.**—Expenditure under this item represents the proceeds of special industry taxes and profits from marketing schemes which are paid to trust funds or other authorities for the purposes of the industries concerned. Information relating to the taxes levied is given in sub-section B. Revenue, of this section (see p. 816). Details of expenditure from the trust funds are included in § 3, *Commonwealth Trust Funds*. Details of expenditure from the Consolidated Revenue Fund during the last five years are given in the following table.

§ 4. Commonwealth Loan Fund.

Brief historical notes relating to the Commonwealth Loan Fund are given in earlier issues of the Official Year Book (*see* No. 37, p. 640). In the following table, details are given of the net expenditure from the Commonwealth Loan Fund for the years 1955–56 to 1959–60 and of the aggregate expenditure to 30th June, 1960. The figures shown represent “net” loan expenditure, i.e., after adjustments have been made for refunds of amounts expended in earlier years.

(c) Includes administration and other public buildings, Australian Capital Territory. (d) Payment to National Debt Sinking Fund. (e) Payment to Swiss Loan Trust Account. (f) Payment to Canadian Loan Trust Account.

NOTE.—Minus sign (—) indicates excess of repayments to Loan Fund.

Information relating to the Commonwealth Government Securities on Issue is given in Division D. Commonwealth and State Government Securities on Issue, of this chapter.

B. STATE FINANCE.

§ 1. General.

1. Functions of State Governments.—In comparing the financial returns of the States, allowances must be made for the various functions discharged by the respective Governments, and for local conditions in each case. Direct comparisons of the revenue, expenditure, and debt of the individual States are difficult, owing to the fact that functions which in

one State are assumed by the Central Government are in another delegated to municipal or semi-governmental bodies which are vested with certain defined borrowing powers and whose financial transactions are not included with those of the Central Government. Care, is needed therefore, in making comparisons, and the particulars contained in this chapter should be read with those contained in Chapter XIX.—Local Government. In many respects, moreover, the budgets of the Australian Governments differ materially from those of most European countries, owing to the inclusion therein of the revenue and expenditure of departments concerned with rendering public services, such as railways, tramways, water supply, etc., which in other countries are often left to private enterprise.

2. *Accounts of State Governments.*—The various financial transactions of the States are in each case mainly concerned with one or other of three Funds—the Consolidated Revenue Fund, the Trust Fund, and the Loan Fund. All revenue (except certain items paid into special funds) collected by a State is paid into its Consolidated Revenue Fund, from which payments are made under authority of an annual Appropriation Act passed by the Legislature, or by a permanent appropriation under a special act.

Figures in § 2 below relating to New South Wales represent the transactions of the Consolidated Revenue Fund and the business undertakings included in the annual budget papers. These latter are as follows:—Railways, Tramways and Omnibuses, and Sydney Harbour Trust Section of the Maritime Services Board. Adjustments have been made to the Budget figures, however, in order to eliminate duplications caused by inter-fund payments. Particulars for all other States relate to the transactions of the Consolidated Revenue Fund.

The Trust Fund comprises all moneys held in trust by the Government, and includes such items as superannuation funds, road funds, insurance companies' deposits, etc.

The Loan Fund is debited with all loan moneys raised by the State, and credited with the expenditure therefrom on public works or other purposes.

3. *Inter-relation of Commonwealth and State Finances.*—A statement in some detail, covering the inter-relation of Commonwealth and State finances during the period from the inception of Federation to the passing of the Financial Agreement Act 1928, was published in Official Year Book No. 22, pages 379–380. Changes in the financial relations between the Commonwealth and States since the passing of the Financial Agreement Act have been described in issues of the Official Year Book from year to year (*see also* pp. 853–5).

§ 2. State Consolidated Revenue Funds.

A. REVENUE.

1. General.—The principal sources of State revenue are:—

(a) Taxation; (b) the business undertakings controlled by the State Governments; (c) sale of and rental from crown lands; (d) interest on advances; (e) payments by Commonwealth Government under the Financial Agreement, Special Grants and Financial Assistance Acts, etc.; (f) Commonwealth National Welfare Fund payments; and (g) miscellaneous sources, comprising fines, fees, etc.

Of these sources, that yielding the largest revenue to the Consolidated Revenue Funds for the States as a whole in the year 1959–60 was Commonwealth payments under financial assistance and other grants (37.5 per cent. of the total revenue). Next in magnitude was the group of business undertakings (31.9 per cent.), the principal contributors being the government railways and tramways, followed by taxation receipts (16.7 per cent.). More than one-quarter of the total State taxation collections are not paid into Consolidated Revenue Funds, however, but into special funds (*see para. 3 (ii) (b) following*). Of the remaining sources of revenue, interest (n.e.i.) constituted 3.7 per cent., land revenue 2.1 per cent., and National Welfare Fund payments 1.6 per cent.

2. *Revenue Received.*—The following table shows particulars of the total amounts, and the amounts per head of population, of consolidated revenue received by the several States during the years 1955–56 to 1959–60.

STATE CONSOLIDATED REVENUE.

(a) See § 1, para. 2, p. 839. (b) Tasmanian Transport Services are under separate control of Transport Commission. (c) In all States certain taxation collections are not paid into Consolidated Revenue Fund. For total collections see next page. (d) Excludes Commonwealth payments paid to Trust Funds. (e) Includes payments under Financial Agreement, Special Grants, Financial Assistance, Grants to Universities, etc. (f) Consolidated Revenue Fund receipts only. Excludes payments to Trust Funds.

(ii) *Revenue from Taxation.* (a) *General.* In the tables on taxation collections in these paragraphs, the collections have been grouped according to the nature of the tax rather than the method of collection. For example, stamp duties on betting tickets and bookmakers' licences have been included under "Racing Tax" instead of under "Stamp Duties" and "Licences" respectively.

Prior to federation, customs and excise duties were the principal source of revenue from taxation. Thereafter, until the introduction of the uniform income tax scheme in 1942-43, the most productive State taxes were the various income taxes which, in 1941-42, included unemployment relief, State development and hospital taxes. From 1942-43 to 1958-59, the States were reimbursed by the Commonwealth for the revenue lost by the discontinuance of these taxes. Commencing with 1959-60, however, a new scheme for the payment of financial assistance to the States was instituted (for details *see* C., para. 11 (v), p. 833). Information relating to the State income taxes which were levied prior to 1942-43 may be found in earlier issues of the Official Year Book.

(b) *Net Collections, 1959-60.* The following tables show, for the year 1959-60, details of the collections in each State from the various types of tax in operation, irrespective of whether such moneys have been paid into the Consolidated Revenue Funds or not. For this reason, the particulars hereunder differ from those shown in the tables relating to the Consolidated Revenue Funds and represent a comprehensive statement of all taxation collections by the Government in each State.

Total	25,594	30,574	35,078	39,333	43,859

(iii) *Business Undertakings.* (a) 1959-60. A very large proportion of State gross revenue is made up of receipts from business undertakings under the control of the Governments. The most important of these are railways and tramways, harbour works, water supply and sewerage, and electricity supply, and, in addition, State batteries for the treatment of auriferous ores in Western Australia and various minor revenue-producing services rendered by the Governments of all States are included. For the year 1959-60, the revenue from these sources was £222,853,000 or 31.9 per cent. of the revenue from all sources. Details of revenue are as follows:—

STATE REVENUE FROM BUSINESS UNDERTAKINGS, 1959-60.
(£'000.)

Source.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.(a)	Total.

For further information on the finances of the various types of business undertakings in the States, see Chapters XIV.—Transport and Communication and XIX.—Local Government, of this Year Book.

(iv) *Lands.* The revenue from the sale and rental of Crown lands has, with few exceptions, been treated from the earliest times as forming part of the Consolidated Revenue Funds, and has been applied to meet ordinary expenses. The following table shows the revenue from sales and rentals of Crown lands for the year 1959–60.

STATE LAND REVENUE, 1959–60. (£'000.)							
Source.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Total.
Sales ..	548	247	..	69	56	16	936
Conditional Purchases ..	212	4	166	..	382
Rentals(a) ..	2,590	557	3,411	232	298	37	7,125
Forestry ..	1,354	2,342	919	513	5,128
Other ..	90	133	208	308	..	14	753
Total ..	4,794	3,279	3,619	613	1,439	580	14,324

(a) Includes mining royalties, rents, etc.

The total land revenue for all States for the years 1955-56 to 1959-60 respectively was:—£13,895,000, £15,455,000, £15,050,000, £12,890,000 and £14,324,000.

(v) *Commonwealth Grants.* Commonwealth grants to the States represent a considerable proportion of the States' Revenue. In 1959-60, the total amount (excluding sundry minor items) paid to the Consolidated Revenue Funds of the States was £262,194,000 (37.5 per cent.). Details for 1959-60 were as follows:—Contribution towards interest on States' debts under the Financial Agreement, £7,585,000; special grants to the States of South Australia, Western Australia and Tasmania, £8,326,000; financial assistance, £244,500,000; grants to universities, £1,298,000; and other grants, £485,000.

In addition to these, the States receive a number of other grants which are paid to trust funds. The main items in this class are the contribution to the sinking fund on States' debts (£5,942,000 in 1959-60) paid to the National Debt Sinking Fund; grants for Commonwealth Aid Roads (£43,923,000 in 1959-60), and grants for Universities, £6,330,000 in 1959-60) paid to State trust funds.

More detailed information concerning Commonwealth grants to the States is given on pages 829-36.

(vi) *Commonwealth National Welfare Fund Payments.* The States also receive payments from the Commonwealth in respect of hospital and pharmaceutical benefits, nutrition of children and reimbursement of maintenance expenditure on tuberculosis sanatoria. These receipts are paid into Consolidated Revenue Funds or Trust Funds according to the varying accounting procedures in the States. In 1959-60, the total amount paid to State Consolidated Revenue Funds was £11,457,000 (1.6 per cent.). This amount was made up of hospital benefits, £4,376,000; pharmaceutical benefits, £1,422,000; nutrition of children, £1,287,000; and tuberculosis—reimbursement of maintenance expenditure, £4,372,000.

(vii) *Interest and Miscellaneous.* In addition to the foregoing, there are in each State several miscellaneous sources of revenue, including such items as interest, fines, fees, etc. Interest, mainly from loans to local governing bodies, on public account balances, and for soldier land settlement amounted to £25,574,000 in 1959-60, while "Miscellaneous" revenue, which includes fines of the courts and fees for services, amounted to £45,988,000 in 1959-60.

B. EXPENDITURE.

1. *General.*—The principal heads of State expenditure from Consolidated Revenue Funds are:—

(a) Interest, exchange and debt redemption charges in connexion with public debt; (b) working expenses of business undertakings; (c) education; (d) health and charitable expenditure; (e) justice; (f) police; (g) penal establishments; and (h) all other expenditure, under which heading are included public works, lands and surveys, agriculture and forestry, legislative and general administration, pensions, and miscellaneous.

The working expenses of railways and tramways are the largest item of State Government expenditure. In 1959-60, the working expenses of the railways, tramways and omnibuses were 27.5 per cent. of the total expenditure from the State Consolidated Revenue Funds; next in magnitude were education, 18.6 per cent.; debt charges, 16.6 per cent.; charitable, public health and hospitals, 14.2 per cent.; and law, order and public safety, 5.7 per cent.

As stated at the beginning of this division, figures relating to New South Wales represent the transactions of the Consolidated Revenue Fund and the business undertakings included in the annual budget papers. These latter are as follows:—Railways, Tramways and Omnibuses, and Sydney Harbour Trust Section of the Maritime Services Board. Adjustments have been made to the Budget figures, however, in order to eliminate duplications caused by inter-fund payments. Particulars for all other States relate to the transactions of the Consolidated Revenue Fund.

2. **Total Expenditure.**—The total expenditure from the Consolidated Revenue Funds of the several States and the expenditure per head of population during each of the years 1955-56 to 1959-60 are shown in the following table.

STATE EXPENDITURE : CONSOLIDATED REVENUE FUNDS.

(a) See para. 1, page 845.

NOTE.—Minus sign (-) indicates deficit.

§ 3. State Trust Funds.

In addition to the moneys received as revenue and paid to the credit of the Consolidated Revenue Funds, considerable sums are held in trust for various purposes by the State Governments. The balances of trust funds held at 30th June for each of the years 1956 to 1960 were as follows:—

STATE TRUST FUND BALANCES.

(£'000.)

At 30th June—	N.S.W.(a)	Vic.	Q'land.	S. Aust.	W.Aust.	Tas.	Total.
1956	40,442	29,850	47,165	4,517	13,535	838	136,347
1957	45,392	32,138	48,034	4,718	14,537	1,151	145,970
1958	51,776	34,415	53,921	5,650	14,565	1,560	161,887
1959	55,093	38,635	53,828	5,057	16,569	2,148	171,330
1960	62,686	42,915	56,022	5,742	18,102	1,930	187,397

(a) Special Deposits Account and Special Accounts.

§ 4. State Loan Funds.

1. **General.**—State public borrowing is due mainly to the fact that the State Governments, in addition to ordinary administrative duties, undertake functions such as the construction and operation of the railway systems, which in other countries are usually entrusted to local authorities or left to private enterprise. Loan moneys have also been largely used for improvements to harbours and rivers, and for the construction of roads, water supply and sewerage works. The State debt thus consists chiefly of moneys raised and expended with the object of assisting the development of the resources of the country, and is to a very large extent represented by tangible assets.

Statements relating to "gross" loan expenditure are shown below. The gross expenditure represents the amounts disbursed during each year. Details of "net" loan expenditure, i.e., gross expenditure less any credits to the Loan Fund during the year on account of repayments of advances to local governing bodies, settlers, etc., the sale of assets, and transfers from other funds, may be found in *Finance, Part I.—Public and Private Finance*, Bulletin No. 50, 1959-60. Such moneys are credited to the Loan Fund in the year of repayment irrespective of when the advance was made.

2. **Gross Loan Expenditure.**—(i) 1959-60. Particulars of gross loan expenditure on works, services, etc., are shown in the following table:—

STATE GROSS LOAN EXPENDITURE ON WORKS, SERVICES, ETC., 1959-60.
(£'000.)

(a) Expenditure from Loan Funds and on account of Loans; includes expenditure from Loan Funds, from Treasurer's Advance Account and from State Loans Repayment Fund. (b) Excludes expenditure from Commonwealth Loans under Commonwealth-State Housing Agreement. (c) Included with Advances to Settlers. (d) Includes Rural Finance Corporation, for advances to rural industries, £150,000.

NOTE.—The negative amounts shown for Queensland represent transfers of liability on account of expenditure incurred in earlier years. The amounts involved have been debited against the item Loans and Grants to Local Bodies, and included in the expenditure shown for 1959-60.

(ii) 1955-56 to 1959-60. Particulars of gross loan expenditure on works, etc., for these years are shown in the following table:—

STATE GROSS LOAN EXPENDITURE ON WORKS, SERVICES, ETC.

(a) Includes exchange, discounts and flotation expenses, revenue and general cash deficits.

(b) From Consolidated Revenue Fund.

NOTE.—Minus sign (—) indicates excess of repayments to loan fund.

Information relating to the State Government Securities on Issue is given in division D. Commonwealth and State Government Securities on Issue (see p. 853)

C. COMMONWEALTH AND STATE FINANCE.

1. Revenue and Expenditure.—(i) *Consolidated Revenue Funds*. The following tables show the aggregate revenue and expenditure of the Consolidated Revenue Funds of the Commonwealth and States for each of the years 1955-56 to 1959-60. In these tables, the combined Commonwealth and State totals have been adjusted to exclude major duplications, but the separate Commonwealth and State figures are as shown in other divisions of this chapter. The items excluded from the total figures are:—payments made by the Commonwealth to the States and included in the State Consolidated Revenue Funds on account of tax reimbursements up to 1958-59, and Financial Assistance Grants in 1959-60, interest under the Financial Agreement, special grants, special financial assistance, coal strike emergency grants, price control reimbursements, grants to universities, cattle tick control, tuberculosis capital expenditure, National Welfare Fund payments, and estimated payments of pay-roll tax by the States to the Commonwealth. There are other relatively minor payments for which adjustments have not been made, and the adjusted figures are therefore still slightly overstated.

COMMONWEALTH AND STATES : REVENUE AND EXPENDITURE.

(ii) *Loan Expenditure.* The aggregate gross loan expenditures of the Commonwealth and States on works and services for the years 1955-56 to 1959-60 are shown in the following table:—

COMMONWEALTH AND STATE GROSS LOAN EXPENDITURE: WORKS AND SERVICES.(a)
(£'000.)

Gross Loan Expenditure.	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.
Commonwealth(b)	44,003	44,068	45,174	86,190	59,650
State	177,511	173,776	173,693	188,814	203,235
Total	221,514	217,844	218,867	275,004	262,885

(a) Excludes expenditure on loan flotations, funding deficits, etc. (b) Includes expenditure on Defence, War (1939-45) and Repatriation Services. Excludes payments to the National Debt Sinking Fund from proceeds of the loan from the International Bank for Reconstruction and Development, payments to the Swiss Loan Trust account from proceeds of the Swiss Loan, and payments to the Canadian Loan Trust account from proceeds of the Canadian Loan.

2. *Taxation.*—The following table shows the combined Commonwealth and State taxation, and the amount per head of population, for the years 1955-56 to 1959-60. Taxation collections by the State Governments which are not paid into the Consolidated Revenue Funds are included.

D. COMMONWEALTH AND STATE GOVERNMENT SECURITIES ON ISSUE.

NOTE.—The term “public debt” formerly used to describe the subject matter of this division has been replaced by the term “government securities on issue” for the following reasons:—

Government securities on issue, as set out in the tables in this division, may not be aggregated without adjustment to indicate what is sometimes described as the “public debt” or “net public debt” of the Commonwealth and State Governments.

There are forms of debt not evidenced by the issue of securities. Again, some of the securities included in the tables are held by the Governments themselves. For example, a State Government may hold temporarily, or even for long periods, securities issued by the Commonwealth Government. The Commonwealth Government itself, through such institutions as the National Debt Commission, or through the Trust Funds, holds large investments in securities issued, either directly by itself or on behalf of the States. In addition, some of the securities issued on behalf of the States and held by the Commonwealth Government represent the proceeds of oversea loans, securities for which were issued directly by the Commonwealth Government. From the point of view of the aggregate net debt of the Commonwealth and the States, it would thus involve duplication if the sum of the securities on issue were to be regarded as representing the “net public debt”.

No change has occurred in the content of the subject matter dealt with in this division, and the figures in the following sections are entirely comparable with those shown in previous issues of this Year Book.

§ 1. General.

Under the Financial Agreement between the Commonwealth and the States in 1927, the Commonwealth Government accepted responsibility for the securities of the State Governments then on issue, and was empowered to arrange for all future borrowings on behalf of the Commonwealth and the States and to issue Commonwealth securities for all money borrowed. The Commonwealth is reimbursed by the States for interest, exchange, etc., paid on their behalf, and the securities are redeemed from the National Debt Sinking Fund to which both the Commonwealth and State Governments make contributions.

In the statistical tables relating to Government securities, the units of currency for securities on issue and interest payable, except in § 3, para. 5, are:—Maturing in Australia—£ Australian; Maturing in London—£ Sterling; Maturing in New York—£ (converted from dollars at the rate of \$4.8665 to £1); Maturing in Canada—£ (converted from dollars at the rate of \$4.8665 to £1); Maturing in Switzerland—£ (converted from Swiss francs at the rate of 1,000 Swiss francs = £A.102 1s. 10d.).

The totals shown represent the total “face” or “book” value of the securities without adjustment on account of the difference in currency mentioned above.

In § 3, para. 5 only, details of the securities on issue on account of the Commonwealth and each State are given in Australian currency.

§ 2. The Financial Agreement between the Commonwealth and the States.

1. General.—Full details of the Financial Agreement between the Commonwealth and the States are given in earlier issues of the Official Year Book (*see* No. 37, pp. 685–690). In this issue, a summary of the main provisions only is given.

2. **Australian Loan Council.**—The Australian Loan Council was set up to co-ordinate the borrowings of the Commonwealth and the States. It consists of the Prime Minister of the Commonwealth, or another Minister nominated by him in writing, as Chairman, and the State Premiers, or Ministers nominated by them in writing. Each year, the Loan Council examines the loan programmes of the Commonwealth and the States and determines the total amount to be borrowed during the year. Borrowings by the Commonwealth for defence purposes are not subject to decisions of the Loan Council.

3. **Loan Raisings for the Commonwealth and States.**—Subject to the decisions of the Loan Council, the Commonwealth arranges for all borrowings for or on behalf of the Commonwealth or any State, and for all conversions, renewals, redemptions, and consolidations of the securities issued on behalf of the Commonwealth and of the States.

If the Loan Council unanimously decides, however, a State may borrow outside Australia in its own name, and may issue securities for the amount so borrowed. The Commonwealth then guarantees that the State will fulfil all its obligations to bond-holders in respect of the money so borrowed, and the money is deemed to be borrowed by the Commonwealth for and on behalf of the State.

Subject to any maximum limits decided upon by the Loan Council for interest, brokerage, discount and other charges, the Commonwealth or any State may—

- (i) borrow within its own territory, for any purpose, money from any authorities, bodies, funds or institutions (including Savings Banks) constituted or established under Commonwealth or State law or practice;
- (ii) borrow from the public by means of counter sales of securities; and
- (iii) use any available public moneys.

However, any securities issued for money so borrowed or used must be Commonwealth securities on terms approved by the Loan Council.

4. **Taking over of State Government Securities.**—The Commonwealth took over on 1st July, 1929—

- (a) securities issued by each State existing on 30th June, 1927; and
- (b) all other securities of each State existing on 1st July, 1929, for money borrowed by that State deemed by the Agreement to be money borrowed by the Commonwealth for and on behalf of the State,

and in respect of these securities assumed, as between the Commonwealth, and the States, the liabilities of the States to bond holders.

5. **Transferred Properties.**—In relation to State properties transferred to the Commonwealth under Section 85 of the Constitution, the States as from 1st July, 1929, were discharged from any liability in respect of principal, interest or redemption on so much of the securities bearing interest at 5 per cent. per annum, taken over by the Commonwealth as amounted to the agreed value of these properties, namely £10,924,323.

6. **Payment of Interest.**—For a period of 58 years from 1st July, 1927, the Commonwealth agreed to contribute the sum of £7,584,912 each year towards the interest payable on the State securities. The balance of the interest payable on the State securities is paid to the Commonwealth by the States.

7. *Sinking Fund.*—(i) *State Securities existing at 30th June, 1927.* A sinking fund at the rate of 7s. 6d. per annum for each £100 of the securities of the States existing on 30th June, 1927, and conversions thereof, was established under the terms of the Agreement. The Commonwealth contributes annually from revenue 2s. 6d. per £100 on the securities of the States existing at 30th June, 1927, and each State contributes annually 5s. per £100 on the securities of such State at 30th June, 1927. The payments of the Commonwealth and of all States except New South Wales will continue for a period of 58 years from 1st July, 1927, and those of New South Wales for a similar period from 1st July, 1928.

(ii) *New Borrowings.* On new borrowings after 1st July, 1927 (except those for redemptions or conversions, or funding a State deficit), a sinking fund at the rate of 10s. per £100 per annum was established, and the State and the Commonwealth contribute from revenue equal shares for a period of 53 years from the date of raising. (New South Wales did not commence sinking fund contributions in respect of new loans raised in the financial year 1927–28 until 1st July, 1928.)

(iii) *Loans raised to meet a Revenue Deficit.* In respect of any loan (except any of the loans referred to in para. (iv) below) raised by a State after 30th June, 1927, to meet a revenue deficit accruing after that date, no sinking fund contribution is made by the Commonwealth, but the State makes a sinking fund contribution at the rate of not less than 4 per cent. per annum of the loan for a period sufficient to provide for the redemption of the loan, the contributions being deemed to accumulate at the rate of $4\frac{1}{2}$ per cent. per annum compound interest.

(iv) *Loans raised to meet Revenue Deficits between 30th June, 1927, and 1st July, 1935.* Special contributions are payable in respect of loans raised by a State or by the Commonwealth on behalf of a State, on the security of Commonwealth Treasury Bills, to meet a revenue deficit which accrued after 30th June, 1927, and before 1st July, 1935. Details of these contributions are given in Official Year Book No. 37, pages 688 and 689.

(v) *National Debt Commission.* The sinking funds established are controlled by the National Debt Commission, which may arrange with any State to act as its agent in connexion with payments due to bond holders. Except where the conditions relating to sinking funds, redemption funds, and funds of a like nature held by a State on 30th June, 1929, precluded such transfer, all such funds were transferred to the National Debt Commission.

(vi) *Operation of Sinking Fund.* Sinking fund contributions made in respect of the securities of a State, and funds of that State transferred to the National Debt Commission, are not accumulated, but must be applied, whenever expedient, to the redemption and repurchase of loan securities. When such a loan security is repurchased or redeemed by the National Debt Commission, it is cancelled, and the State, in addition to sinking fund contributions otherwise payable, pays a further annual sinking fund contribution at the rate of $4\frac{1}{2}$ per cent. on the face value of the cancelled security for the balance of the period during which the original contribution is payable in respect of that debt.

(vii) *Oversea Securities on Issue.* Sinking fund contributions in respect of oversea securities shall be calculated at the mint par of exchange prevailing on 1st July, 1927.

8. *Borrowing by Semi-Governmental Authorities.*—It was realized from the inception of the Loan Council that, in the interests of co-ordinated borrowing, the Council should be advised of the borrowing of large amounts by semi-governmental authorities. In May, 1936, all resolutions passed by the Loan Council in connexion with semi-governmental borrowings were consolidated into one set of rules, which superseded all previous resolutions. This set of rules provides, *inter alia*, for the submission of annual loan programmes in respect of semi-governmental authorities proposing to raise £100,000 or more in a year, for the consideration of such programmes in conjunction with the loan programme of the Government concerned, and for the fixing of the terms of individual semi-governmental loans coming within the scope of the annual programme.

§ 3. Commonwealth and State Government Securities on Issue.

1. Government Securities on Issue, Annual Interest Payable and Average Rate of Interest at 30th June, 1960.—In the following table, details are given of the Commonwealth and State Government Securities on Issue, annual interest payable and average rate of interest at 30th June, 1960.

(a) See § 1, p. 853.

In some States, certain public utilities such as tramways, water supply and sewerage, harbour services, etc., are controlled by boards or trusts, which, in addition to receiving advances from the central Government, raise loans by borrowing on their own behalf, while in other States these services are controlled by the central Government. Comparison of the Government securities on issue on account of the States is therefore difficult, but on page 864 figures showing the aggregate securities on issue of the States, including those of local and semi-governmental authorities, are shown for the years 1954–55 to 1958–59.

5. Government Securities on Issue and Interest Payable in Australian Currency.—In the foregoing tables relating to Commonwealth and State securities on issue, the securities maturing in London are expressed in sterling, those maturing in New York and Canada are expressed in pounds converted from dollars at the rate of \$4.8665 to £1, and those maturing in Switzerland are expressed in pounds converted from Swiss francs at the rate of 1,000 Swiss francs = £A.102 ls. 10d. This method of showing the securities on issue does not indicate the amount that the Australian Government would have to find to redeem the securities at current rates of exchange. In the following tables, the securities and the interest payable are shown in terms of Australian currency throughout. Securities maturing in London, New York, Canada and Switzerland have been converted to Australian currency at the selling rate of exchange on 30th June, 1960.

(a) See § 1, p. 853. (b) See § 4 following. (c) Consists of overdue, indefinite and inter-minable securities, securities due at Treasurer's option, and half-yearly drawings.

8. Short-term Securities on Issue.—(i) *Amount.* Particulars of the short-term securities (Treasury Bills and Debentures) of the Commonwealth and States in London and in Australia at intervals from 30th June, 1956, to 30th June, 1960, are shown in the following table. These securities are included in the Government securities on issue as shown elsewhere.

COMMONWEALTH AND STATE SHORT-TERM SECURITIES ON ISSUE.(a)

30th June, 1960 ..	201,000	201,000

(a) Excludes Overdrafts and Internal Treasury Bills.

(ii) *Interest Rates.* (a) *London.* The rates of interest payable on Treasury Bills and Debentures in London during the following periods were: 1938-39—minimum rate, 2 per cent., maximum rate, 2½ per cent.; 1949-50 to 1950-51—minimum rate, 2 per cent., maximum rate, 2½ per cent. On 8th November, 1951, the rates were increased to—minimum rate, 2½ per cent., maximum rate, 2¾ per cent.

(b) *Australia.* The Treasury Bill rates in Australia were as follows:—1¼ per cent. from 1st January, 1935; 1½ per cent. from 1st May, 1940; 1½ per cent. from 1st May 1943; 1 per cent. from 1st March, 1945; ¾ per cent. from 1st May, 1949; 1 per cent. from 1st August, 1952.

(c) *Seasonal Securities.* In November, 1959, the Commonwealth Government issued a new form of short-term Commonwealth security called Seasonal Treasury Notes and Seasonal Inscribed Stock. The 1959-60 issues of seasonal securities, which were readily cashable, transferable and interchangeable at any time, were redeemable at par on maturity at the end of three months, and all such securities were redeemed and cancelled before 30th June, 1960. Seasonal securities were issued in multiples of £1,000 over the minimum subscription of £5,000 at a price of £99 5s. 0d. per cent., and yielded a return of approximately 3 per cent. if held for three months. Such increases in value were taxable, but carried the right of rebate of two shillings in the pound as with Commonwealth loan interest.

9. *Government Securities on Issue on Account of the States, Municipal and Semi-governmental Authority Securities on Issue.*—For the reasons indicated on page 860, direct comparisons of the securities on issue on account of the several States should be made with caution. The table following shows, for 1954-55 to 1958-59, particulars of the securities on issue on account of the States and the securities on issue by municipal and semi-governmental authorities in each State.

(a) Excludes amounts due to the Central Government. Includes bank overdrafts. (b) See § 1, p. 853.

The loans of £92,000,000, £10,000,000 and £55,000,000 raised in June, 1958, 1959 and 1960, respectively, were for the purpose of fulfilling an undertaking given by the Commonwealth that the States would have access to loan funds for their works programmes up to the approved Loan Council borrowing programmes. These programmes totalled £200,000,000 in 1957-58, £210,000,000 in 1958-59 and £220,000,000 in 1959-60. Subscriptions to these special loans for the three years covered came from the Loan Consolidation and Investment Reserve Trust Account, except for £9,600,000 in 1957-58 from the National Debt Commission from investment of Australian currency proceeds from an International Bank Loan.

Finance for the approved Loan Council programmes from 1957-58 to 1959-60 was provided from the following sources:—

LOAN COUNCIL PROGRAMME(a): SOURCE OF FINANCE.

£.			
Source.	1957-58.	1958-59.	1959-60.
Public Loans, domestic raisings, etc.	105,900,000	177,300,000	148,300,000
Oversea Loans and Special Commonwealth Assistance	94,100,000	32,700,000	71,700,000
Total	200,000,000	210,000,000	220,000,000

(a) Excludes amounts provided for War Service Land Settlement, 1957-58, £8,262,000 and for Emergency Wheat Storage, 1958-59, £6,547,000; 1959-60, £6,937,000 and for rehabilitation of the Mount Isa-Townsville-Collinsvale railway line, £20,000,000.

In addition to the new loans raised as shown in the foregoing tables and the redemption and conversion loans shown in the following section, there were other miscellaneous loan operations during 1959-60, namely:—Savings Certificates and War Savings Certificates (Five and Seven Years' Series), a decrease of £2,428,000; War Savings and Savings Stamps, a decrease of £1,000; National Savings Bonds and Stamps, a decrease of £1,000; and "Over the Counter Sales" (small amounts borrowed by the States by virtue of certain statutory rights), £5,326,000. Advance loan subscriptions in hand decreased from £1,663,000 at the end of 1958-59 to £1,558,000 at the end of 1959-60.

(ii) *London.* The following table gives details of cash loans raised in London in October, 1958, and in February, 1960:—

1959-60— February . .	12,000	5½	99	1980	12,000	..

(iii) *New York.* A cash loan was raised in New York in June, 1956. This was the first since May, 1928, except for loans raised from the International Bank for Reconstruction and Development (see para. 4. below). The following table gives details of the loans raised during the period 1957-58 to 1959-60.

§ 4. Commonwealth Loan Raisings.

1. General.—Under the Financial Agreement between the Commonwealth and the States, the Commonwealth is responsible for raising all loan moneys required either by the Commonwealth or by the State Governments. Details of loan transactions given in this section relate, therefore, to all loans raised for the Commonwealth and the States.

2. New Loans Raised, 1957-58 to 1959-60.—(i) *Australia.* The following table shows details of new loans raised in Australia by the Commonwealth during the three years 1957-58 to 1959-60.

1958-59— March ..	20,675	3½	..	20,000	5½	99	{ 1973 1979 }	502

(a) No account has been taken of the cost of issuing the conversion loans at a discount. Exchange calculated at £A. 125.375 = £Stg. 100.

(iii) *New York.* During 1946-47, four loans totalling \$128,000,000 were raised in New York to redeem loans which became due for redemption or which the Commonwealth had the option of redeeming. No further loans were raised in New York for this purpose until December, 1954. The most recent loan raised in New York for this purpose was in March, 1957, and amounted to \$17,114,000, at 5 per cent. interest, issued at par, maturing in 1972. No loans were raised for this purpose in 1957-58, 1958-59 or 1959-60.

4. International Bank for Reconstruction and Development Loans.—To provide dollar funds for the purchase of certain types of capital equipment and plant which were indispensable to the furtherance of development in Australia and which could be obtained only in the United States of America or Canada, the Commonwealth Government arranged six loans from the International Bank for Reconstruction and Development between August, 1950, and December, 1956, amounting to \$317,730,000, repayable over periods of from 10 to 25 years, at rates of interest of from 4½ to 4¾ per cent. The proceeds of the latest of these loans were finally drawn in March, 1959.

The capital equipment and plant purchased from the proceeds of these loans are made available to Commonwealth and State Government departments and agencies and private firms and individuals for use in the development of Australian resources. The goods are imported and distributed through normal channels and payment made through the Australian banking system.

5. Swiss Loan.—To foster industrial development in Australia and to stimulate trade relations between the two countries, the Commonwealth Government arranged for the issue in Switzerland in November, 1953, February, 1955, and March, 1960, of three public loans each of 60,000,000 Swiss francs. The loans were underwritten by a Swiss banking group headed by the Swiss Bank Corporation, the Credit Suisse and the Union Bank of Switzerland. Certain Swiss taxes connected with the issue and servicing of the loan were paid on an agreed basis by the Australian Government.

The first loan was for a period of 15 years with an option on the part of the Australian Government to repay the loan in full or in part after 12 years. The rate of interest was 4 per cent. and the issue price £99. Bondholders have the option of requiring payment either in Australian pounds or in the foreign currency equivalent of Australian pounds.

The second Swiss loan was for a period of 15 years with an option to redeem after 10 years. The rate of interest was 3¾ per cent. and the issue price £99 10s. Bonds and interest are payable only in Swiss francs. The third Swiss loan was for a period of fifteen years with an option to redeem after 10 years. The rate of interest was 4½ per cent. and the issue price £99. Payments of interest and repayments of principal are to be made only in Swiss francs.

The loans were fully subscribed, and Swiss franc proceeds, after deducting borrowing expenses, were sold by the Commonwealth Government to the Commonwealth Bank in return for an equivalent amount of Australian currency.

6. Canadian Loan.—In October, 1955, the Commonwealth Government arranged for the issue in Canada of a public loan of 15,000,000 Canadian dollars raised to assist Australia's development programme. The loan was underwritten by Wood, Gundy & Company Limited of Toronto, Canada.

The loan was for a period of 15 years with an option on the part of the Australian Government to repay the loan in full or in part at any time prior to 1st November, 1970. The rate of interest was 4 per cent. payable half-yearly and the issue price \$98.50. Bonds and interest are payable in Canadian dollars.

The loan was fully subscribed, and the net Canadian dollar proceeds were sold to the Commonwealth Bank for Australian currency.

7. Summary of Loan Transactions, 1955-56 to 1959-60.—The following table contains a summary of loan transactions on behalf of the Commonwealth and State Governments during the five years 1955-56 to 1959-60.

COMMONWEALTH LOAN TRANSACTIONS: SUMMARY.

Details.	Year ended 30th June—				
	1956.	1957.	1958.	1959.	1960.
New Loans—					
New Loans (a) raised in—					
Australia £A.'000.	193,919	196,854	195,238	184,683	201,678
London £Stg.'000.	15,000	12,000
New York (b) \$'000.	50,355	23,536	65,091	58,351	60,400

E. TAXES ON INCOME.

1. *General.*—A description of the development of income taxes in Australia appeared in Official Year Book No. 35, page 926. Since July, 1942, the Commonwealth, under the uniform tax arrangement, has been the only authority imposing taxes on income. Taxes on income are assessed and imposed under the Income Tax and Social Services Contribution Assessment Act 1936-1959 and the Income Tax and Social Services Contribution Act 1959. The latter Act is an annual measure and its primary purpose is to declare the rates of tax and contribution payable for the financial year. The rates for the financial year are levied, in the case of individuals, on the income of that year and, in the case of companies, on the income of the preceding year. Thus tax for the financial year 1960-61 is levied on the income of individuals in 1960-61 and on the income of companies in 1959-60.

2. *Present Taxes.*—For individuals, a single tax known as the Income Tax and Social Services Contribution is levied. All companies are liable for primary income tax and, in addition, private companies are subject to tax on undistributed income.

3. **Assessable Income.**—Income taxes in Australia are levied, primarily, on all income derived from Australian sources by any person, rather than on income derived from all sources by Australian residents. Thus a non-resident is taxed on income derived in Australia, while a resident is, in general, not taxed on income other than dividends derived from overseas, if the income is taxed in the country in which it is derived.

Certain types of Australian income are exempt from tax in Australia, the more important being (i) pensions, child endowment and other payments under the Social Services Act 1947–1958 and the Tuberculosis Act 1948, (ii) income from gold-mining and uranium mining, (iii) twenty per cent. of certain mining profits, (iv) dividends paid out of exempt mining profits, and (v) income received from a scholarship, bursary or other education allowance.

No amount is included in assessable income on account of a house occupied by its owner. Profits derived from the sale of property are not assessable income if such property was not purchased with a view to resale at a profit.

Expenses incurred in earning income, certain subscriptions to business associations, and trade union dues, are allowable deductions. Losses incurred in previous years may be carried forward as a deduction.

Because of uncongenial climatic conditions, isolation, and high cost of living, taxpayers living in certain areas are allowed an additional deduction. Two zones have been prescribed, and the allowances are:—Zone A, £270 plus an amount equal to one half of the total deductions allowable to the taxpayer for the maintenance of dependants; and Zone B, £45 plus an amount equal to one twelfth of the deductions allowable to the taxpayer for the maintenance of dependants. A deduction equal to the deduction allowed to residents of Zone A is also allowed to members of the defence forces serving for more than one half of the year of income at declared localities outside Australia. The boundaries of Zones A and B are as defined in the Second Schedule, Income Tax and Social Services Assessment Act 1936–1960.

Income Tax and Social Services Contribution is levied on the taxable income remaining after making these deductions and the concessional deductions to which reference is made in the following paragraph.

4. **Concessional Deductions.**—Concessional allowances for dependants, medical expenses, life assurance and superannuation contributions, etc., are made by way of a deduction from income. The maximum deduction allowed for each dependant, for a parent or parent-in-law, or for a housekeeper employed by the taxpayer, for the financial year 1960–61, is shown in the following table.

CONCESSIONAL DEDUCTIONS FOR DEPENDANTS, ETC.(a)

(£.)

Dependant, etc. (Resident).	Maximum Deduction.
Spouse	143
Daughter-housekeeper (b)	143
Housekeeper (b) having care of taxpayer's children under 16 years of age	143
Parent or Parent-in-law	143
One child under 16 years of age	91
Other children under 16 years of age	65
Invalid relative(c)	91
Child 16 to 21 years receiving full-time education (d)	91

(a) These deductions are allowed only if the dependant, parent or parent-in-law is a resident of Australia. If the dependant is maintained for part only of the year, a partial deduction is allowed. (b) Of a widower or widow. (c) Child, step-child, brother or sister over 16 years of age. The amount of the deduction is reduced by any invalid pension received. (d) The amount of the deduction is reduced by the value of any assistance provided by the Commonwealth or a State.

When the dependant or person maintained derives separate income, the amount of the concessional deduction allowable is reduced as follows:—

In the case of a spouse or daughter-housekeeper, by £2 for every £1 by which the separate net income exceeds £65; for each parent or parent-in-law maintained, by £1 for each £1 of separate income; and for each dependent child or invalid relative, by £2 for every £1 by which the separate net income exceeds £52.

For the 1960–61 financial year, medical expenses paid by a taxpayer who is a resident, in respect of himself or dependants, including children under 21 years of age, up to £150 for each person, are allowed as a concessional deduction. Medical expenses include payments made to a legally qualified medical practitioner, nurse or chemist, or to a hospital, in respect of an illness or operation, payments for dental services not exceeding £30 for any one person, payment for therapeutic treatment and eye tests, expenditure on medical or surgical appliances, artificial limbs or eyes, hearing aids and spectacles, and the remuneration of an attendant of a person who is blind or confined to bed or invalid chair.

Other concessional deductions allowed to resident taxpayers include, (i) payments of life, etc., insurance premiums and contributions to superannuation funds and friendly societies, not exceeding an aggregate of £400, (ii) payments to medical or hospital benefits funds, (iii) funeral expenses of a dependant not exceeding £30 and (iv) expenditure incurred for the full-time education of children or dependants who are less than 21 years of age (maximum £100 per child or dependant).

In addition to concessional deductions, all taxpayers (residents and non-residents) are allowed a deduction from income of rates and taxes on land which are annually assessed, gifts to charitable, benevolent or patriotic funds and one-third of amounts paid as calls to certain mining, forestry and oil-prospecting companies. Resident taxpayers only are allowed a deduction from income of the full amount paid as calls and as application and allotment moneys to certain companies engaged in the search for oil in Australia and New Guinea.

5. Effective Exemption from Tax.—For the financial years 1950–51 to 1960–61, resident taxpayers without dependants were exempt from Income Tax and Social Services Contribution if their income did not exceed £104. The effect of the deductions for dependants was to exempt taxpayers up to the incomes shown hereunder.

RESIDENT TAXPAYERS: EFFECTIVE EXEMPTIONS FROM TAX.
(£.)

Taxpayer with—				Income Tax and Social Services Contribution— Financial Years 1950–51 to 1952–53.	Income Tax and Social Services Contribution— Financial Years 1953–54 to 1956–57.	Income Tax and Social Services Contribution— Financial Years 1957–58 to 1960–61.
No dependants	104	104	104
Wife	208	234	247
Wife and one child	286	312	338
„ „ two children	338	364	403
„ „ three children	390	416	468
„ „ four children	442	468	533

For the 1960–61 financial year, an aged person (i.e., a man who has attained the age of 65 years or a woman who has attained the age of 60 years) is exempt from Income Tax and Social Services Contribution if his net income (i.e., gross income less expenses of earning that income) does not exceed £429. A married couple both of whom qualify by age for the concession, are exempt from tax if their combined net incomes do not exceed £858.

6. Rates of Income Tax and Social Services Contribution on Individuals.—The following table shows the rates of income tax and social services contribution for the financial years 1953–54 to 1960–61.

16,000	upwards	9,157	5 10	8,417	18 4

(a) For the 1959-60 financial year, provision was made for a rebate to reduce by 5 per cent. the income tax and social services contribution otherwise payable. This rebate was abolished for 1960-61 financial year.

For primary producers, the rate of Income Tax and Social Services Contribution for the current year is determined by the average of the taxable incomes for the five years up to and including the current year. A taxpayer may elect not to have these averaging provisions applied to his assessment, but the election, once made, is irrevocable. The application of the averaging provisions is limited to that part of the taxable income which does not exceed £4,000, and when the taxable income exceeds £4,000, the balance is taxed at the ordinary rates applicable to that part. When the taxable income is less than £4,000, the rate of tax for averaging purposes is limited to the rate on a taxable income of £4,000.

Commencing with 1953-54, the taxable income, including any abnormal receipts, of actors, artists, composers and inventors, is taxed at the rate appropriate to the normal taxable income plus one-third of the abnormal receipts.

Interest on Commonwealth Loans issued prior to 1st January, 1940, is subject to the condition that it shall not be taxed at rates higher than those for 1930-31. Interest on Commonwealth Loans issued after 1st January, 1940, and interest on certain State semi-governmental loans issued free of State income tax are subject to a rebate of 2s. for each £1 included in the taxable income.

The minimum amount of Income Tax and Social Services Contribution payable is 10s. and the amounts payable and rebates are calculated to the nearest shilling.

7. **The Income Tax (International Agreements) Act 1953.**—This Act provided for relief from double taxation of incomes flowing between Australia and the United States of America. It also provided similar relief in respect of the United Kingdom, which had been covered by the Income Tax Assessment Act since 1947.

8. **Taxes on Specified Incomes.**—The following table shows the Income Tax and Social Services Contribution payable by taxpayers, with various incomes and numbers of dependants, on income derived in each year from 1953–54 to 1960–61:—

COMMONWEALTH TAXES ON INCOME.

(a) Provision was made for a rebate to reduce by 5 per cent. the amount of income tax and social services contribution otherwise payable.

9. *Pay-as-you-earn.*—(i) *Salary and Wage Earners.* Salary and wage earners are subject to instalment deductions for payment of tax at current rates out of weekly (or fortnightly) earnings. Employers are required to deduct tax and contribution from each payment of wages or salary to an employee at the appropriate rate, in accordance with a prescribed instalment scale. This scale shows the amount to be deducted according to the income and number of dependants of the employee.

Under the group scheme of deduction, which covers most employers of more than ten persons, the amount deducted is remitted to the Taxation Department, and after 30th June each year each employee is given a group certificate by his employer showing the amount of deductions made during the year. This certificate is forwarded to the Taxation Department with the employee's return of income for the year. If the tax assessed on the basis of this return is less than the amount shown on the group certificate, a refund is forwarded to the employee with his assessment. If the tax assessed is greater than the amount shown on the group certificate, the employee is required to pay the balance.

Under the stamp scheme used by small employers, a stamp deduction sheet in two parts is used. Each four weeks, the employer purchases stamps (also in two parts) for the amount of the deductions made each pay day and sticks one part on each half of the sheet. At the end of the year, the employer gives the employee one half of the sheet and sends the other half to the Taxation Department. The employee's half is then used in the same way as a group certificate.

(ii) *Taxpayers with Income other than Salary and Wages.* These taxpayers pay provisional tax in respect of income other than salary and wages. Collection of tax and contribution for the current year are made at the same time as collection and assessment for the previous year are adjusted. The notice of assessment shows an amount of provisional tax and contribution for the current year. This provisional amount is an approximation to the tax and contribution which will be payable after the return of income for the current year has been lodged. It is ascertained by assuming that the income of the current year will be the same as that for the previous year (for which a return has already been lodged), but the rates for the current year are applied to the income and not the rates for the year in which it was derived. The assessment notice shows the provisional tax and contribution paid in the previous year as a credit against the tax and contribution assessed on the basis of the return for that year. On receipt of his assessment, the taxpayer may elect to substitute his own estimate of income for the current year and pay tax on the basis of this estimate. To protect the revenue, a penalty is imposed if the taxpayer elects to pay provisional tax on an estimate of income more than 20 per cent. lower than the income of the previous year and he underestimates his income by more than 20 per cent.

An employee with income of £100 or more from sources other than salaries or wages is required to pay provisional tax in respect of that income.

10. *Lodgment of Returns and Assessment of Tax.*—All persons with assessable income in excess of £104 are required to lodge returns by 31st July each year (31st August for business incomes). The Income Tax and Social Services Contribution payable is assessed, and assessment notices showing the amounts payable are issued, during the year following the year of income (in most cases from September to June following the lodgment of the return). The approximate amount payable, however, has already been collected during the income year—from employees by deductions from wages and from non-employees by a provisional tax. The amount shown on the assessment notice is therefore adjusted against the amount already paid and any difference either collected or refunded.

11. *Company Income Taxes.*—(i) *General.* For taxation purposes, companies are divided into two main groups—public and private. A private company is defined as a company in which all the issued shares are held by not more than twenty persons or which is capable of being controlled by not more than seven persons, and which is not a company in which the public is substantially interested or a subsidiary of a public company. All other companies are regarded as public companies. Both public and private companies pay primary Income Tax and Social Services Contribution assessed on a taxable income ascertained on the same principles as for individuals.

Dividends received are assessable income, but resident companies receive a rebate at the average rate on the amount of dividends included in the taxable income. This rebate is not allowed to non-resident companies.

(ii) *Rates of Tax.* The rates of Primary Tax, in the case of public companies, and Primary and Additional Tax for private companies, for the financial years 1953–54 to 1960–61 are shown in the table below.

Super Tax and Undistributed Income Tax ceased to be levied on public companies in the 1951–52 financial year and Additional Income Tax and Social Services Contribution ceased in the 1953–54 financial year. For details, see Official Year Book No. 39, page 846 and No. 40, page 743.

RATES OF TAX: COMPANIES, 1953-54 TO 1960-61 FINANCIAL YEARS.

Interest paid to a Non-Resident(e)	84	84	96	96	90	90	..

(a) Incomes not exceeding £104 are exempt from tax. (b) Where the taxable income does not exceed £208 (1953–54 to 1955–56), £228 (1956–57) or £231 (1957–58 to 1960–61) the tax may not exceed one half (1953–54 to 1955–56, 1957–58 to 1960–61) or eleven-twentieths (1956–57) of the amount by which the taxable income exceeds £104. (c) The rate of 72d. (1953–54 to 1955–56), 84d. (1956–57) or 78d. (1957–58 to 1960–61) is levied on the amount by which the £5,000 exceeds the mutual income. (d) For non-resident companies dividends included in this part of the taxable income are taxed at 60d. (1953–54 to 1955–56), 72d. (1956–57) and 66d. per £1 (1957–58 to 1960–61). (A resident company is allowed a rebate of tax in respect of dividends received.) (e) If the non-resident is not a company, tax is paid only on income in excess of £104.

A private company incurs liability for additional tax on its undistributed income if it fails to make a sufficient distribution of income within a specified period after the close of the year of income. The tax is levied on the undistributed amount which, for practical purposes, is the taxable income less—

- (a) Primary income tax and social services contribution payable;
- (b) Retention allowance (i.e., the proportion of the reduced distributable income which a company may retain without incurring liability for undistributed income tax); and
- (c) Certain dividends paid by the company.

For the financial years 1953–54 to 1958–59, the retention allowance was the following proportion of the reduced distributable income:—

- On the first £1,000 or part, 50 per cent.
- On the next £1,000 or part, 40 per cent.
- On the next £1,000 or part, 35 per cent.
- On the next £1,000 or part, 30 per cent.
- On the balance, 25 per cent., and
- Ten per cent. of distributable income from property, except dividends from other private companies.

For 1959-60 and 1960-61, the minimum retention allowance in relation to business profits has been increased to 35 per cent. The new rates are as follows:—

- On the first £1,000 or part, 50 per cent.
- On the next £1,000 or part, 40 per cent.
- On the balance, 35 per cent.

The retention allowance in respect of distributable income from property, except dividends from other private companies, is unchanged at 10 per cent.

For the financial years 1953-54 to 1960-61, the reduced distributable income is calculated by deducting from the taxable income the primary tax payable and the amount of all property income included in taxable income. The additional tax on undistributed income was imposed at a flat rate of 10s. in the £1 on the undistributed amount.

12. Yield of Income Taxes.—(i) *Collections from Income Taxes.* The following table shows the collections of taxes imposed on income for the years 1955-56 to 1959-60:—

INCOME TAX COLLECTIONS.

(£'000.)

Year.	Total.		
	Common-wealth.(a)	State.(b)	Total.
1955-56	573,988	74	574,062
1956-57	620,298	23	620,321
1957-58	650,419	33	650,452
1958-59	608,660	15	608,675
1959-60	671,294	8	671,302

(a) Includes Social Services Contribution, War Time (Company) Tax, Super Tax, Undistributed Profits Tax and Wool Deduction. (b) Amounts shown are arrears of State income taxes existing prior to the introduction of the uniform tax arrangement.

(ii) *Commonwealth Income Tax Assessed.* The amounts of Commonwealth Taxes assessed on the income of recent years are shown in the following table. The amounts are shown under the year in which most of the assessments were made, i.e., the year following the income year. Income taxes assessed on income for past years and for the years shown after the close of the normal assessing period, are not included.

CHAPTER XXII.

AGRICULTURAL PRODUCTION.

NOTE.—Values of Australian oversea trade shown throughout this chapter are expressed as £A. f.o.b. port of shipment, except where otherwise indicated.

For greater detail on the subjects dealt with in this chapter, see the annual bulletins *Primary Industries, Part I.—Rural Industries* and *Part II.—Non-Rural Industries and Value of Production* published by this Bureau. For advance information on these subjects, the following mimeograph statistical bulletins should be consulted—*Rural Land Use and Crop Statistics* (annual), *Value of Production and Indexes of Price and Quantum of Farm Production* (annual), *Wheat Industry* (usually two per year), *Fruit Growing Industry* (annual), *Size Classification of Rural Holdings, 1955–56*, *Tractors on Rural Holdings* (annual), and *New Tractors: Receipts, Sales and Stocks* (quarterly). The annual mimeograph *Report on Food Production and the Apparent Consumption of Foodstuffs and Nutrients in Australia* contains details of the production, distribution and apparent consumption of foodstuffs obtained from the agricultural industry.

§ 1. Introductory.

In general, statistics in this chapter relating to agricultural production are derived from "census" returns supplied by approximately 250,000 farmers who utilize one acre or more of land for agricultural or pastoral purposes, and the latest figures available are those for the year 1959–60. The returns are collected on a substantially uniform basis in all States at 31st March, each year, and relate to areas sown and crops produced in the previous twelve months. Where harvests are not completed by March (e.g. potatoes), provision is made in some States for a special collection after the harvest is completed and in others for the inclusion of the total estimated yield expected from the complete harvest. In cases where additional data are available from marketing authorities or other sources, these are used in conjunction with the "census" returns. The statistics published in this chapter are therefore shown in "agricultural" years. For most purposes, there will be little error involved in considering them as applying to years ending on 30th June.

§ 2. Progress of Agriculture.

1. *Early Records.*—In an "Account of Live Stock and Ground under Crop in New South Wales, 19th August, 1797", Governor Hunter gives the acreage of crops as follows:—Wheat, 3,361 acres; maize, 1,527 acres; barley, 26 acres; potatoes, 11 acres; and vines, 8 acres.

The following details of crops were collected in 1808:—Wheat, 6,874 acres; maize, 3,389 acres; barley, 544 acres; oats, 92 acres; peas and beans, 100 acres; potatoes, 301 acres; turnips, 13 acres; orchards, 546 acres; and flax and hemp, 37 acres.

A brief reference to the attempts at cultivation by the first settlers in New South Wales and to the discovery of suitable agricultural land on the Parramatta and Hawkesbury Rivers prior to the year 1813 and west of the Blue Mountains thereafter is contained in early issues of the Official Year Book. (See No. 22, p. 670.)

By the year 1850, the area of crops had increased to 491,000 acres, of which 198,000 acres were cultivated in what is now the State of New South Wales, and 169,000 acres in Tasmania. At the end of 1850, the area under cultivation in Victoria, which was then the Port Phillip District of New South Wales, was 52,190 acres.

The gold discoveries of 1851 and subsequent years had at first a very disturbing effect on agricultural progress, the area of crops declining from 491,000 acres in 1850 to 458,000 acres in 1854. The demand for agricultural products occasioned by the large influx of population was, however, soon reflected in the increased area cultivated, for at the end of 1858 the land under crop in Australia exceeded a million acres.

2. **Progress of Cultivation.**—The following table shows the area of crops in each of the States and Territories of Australia at decennial intervals since 1860–61 and during each of the eleven seasons 1951–52 to 1959–60. On page 897 there is a graph showing the area of crops in Australia from 1900–01 onward.

(a) Not available.

The progress of agriculture was practically uninterrupted from 1860–61 to 1915–16, when, as the result of a special effort to raise wheat during the 1914–18 War, 18.5 million acres were cultivated in Australia. There was a temporary set back in later war years, but after the termination of hostilities the area continued to expand and rose steadily to the record area of 25.2 million acres in 1930–31. Thereafter, the slump in wheat prices seriously depressed the agricultural industry and the area of crops receded to just under 20 million acres in 1935–36.

By 1938–39, the industry had recovered from the depression and the total area under cultivation reached the high level of 23.5 million acres. Thereafter, as a result of war-time man-power shortages and shipping difficulties, the area declined to less than 16 million acres in 1943–44. After 1943–44, production gradually increased again until, in 1947–48, 22.3 million acres were sown to crops. This upward trend was reversed after 1948–49, largely because, as a result of the high prices of wool, many primary producers transferred from agricultural to pastoral production. Since 1951–52, when the area sown was 20.0 million acres, the area under wheat has increased steadily, except for 1956–57 when excessively wet conditions in the eastern States caused a drop in the area sown, until it reached the record level of 26.1 million acres in 1959–60. As the area under wheat in Australia constitutes a large proportion of the total area cropped (42 per cent. during the five years ended 1959–60), fluctuations in the latter follow broadly the same pattern as changes in wheat areas.

3. **Area under Sown Pastures.**—In all States, there are considerable areas of grasses, mainly sown on land from which scrub has been cleared or on land which it is desired to rest from cultivation. These areas have expanded from about 5.3 million acres in 1929–30 to about 33.3 million acres in 1959–60.

4. **Australian Agricultural Council.**—Arising out of a conference of Commonwealth and State Ministers on agricultural and marketing matters, held at Canberra in December, 1934, a permanent organization known as the Australian Agricultural Council was formed. The Council consists of the Commonwealth Ministers for Primary Industry and Territories and the State Ministers of Agriculture, with power to co-opt the services of other Commonwealth and State Ministers as required. The principal functions of the Council are:— (i) the promotion of the welfare and development of agricultural industries generally; (ii) exchange of information on agricultural production and marketing; (iii) the improvement

of the quality of agricultural products and the maintenance of high grade standards; (iv) to ensure, as far as possible, balance between production and available markets; and (v) organized marketing, etc.

In addition, a permanent Standing Committee on Agriculture was formed to advise the Council, to secure co-operation and co-ordination in agricultural research, to advise State and Commonwealth Governments on the initiation and development of agricultural research, and to secure co-operation between all Governments in respect of quarantine measures against pests and diseases of plants and animals.

§ 3. Distribution, Production and Value of Crops.

1. Area of Crops in States and Territories.—The following table shows the areas in the several States, the Northern Territory and the Australian Capital Territory of each of the crops for the season 1959–60.

Total ..	22,973	19,962	22,177	25,631	26,103

4. **Size Classification of Principal Crops.**—A special series of tabulations relating to rural holdings in Australia was compiled for 1955-56 and published in full detail in a series of mimeographed bulletins, *Size Classification of Rural Holdings, 1955-56*. Condensed tables also appear in the bulletin *Primary Industries—Part I.—Rural Industries*, No. 51. The tables show a classification by area of holding and area of crop for wheat, oats, barley, sugarcane, tobacco, potatoes, other vegetables for human consumption, vineyards, and fruit, also a classification of holdings growing major crops and carrying livestock. Similar tabulations are being compiled for 1959-60, but details are not yet available.

5. **Weights and Measures.**—Details of the weights and measures used in recording production of agricultural commodities appear in the introduction to the bulletin *Primary Industries—Part I.—Rural Industries*.

6. **Production of Crops in States and Territories.**—The following table shows production of crops in the various States and Territories for the season 1959-60.

PRODUCTION OF CROPS, 1959-60.

Hay	34,807	30,524	39,277	46,503	34,433
Green Fodder (d)	5,950	5,897	8,571	6,966	7,572
Industrial Crops—					
Cotton, Unginned	307	224	213	249	556
Hops (d)	1,102	857	1,137	1,273	1,159
Sugar-cane	35,786	40,718	47,346	47,276	44,774
Tobacco (Dried leaf)	3,200	4,503	6,202	7,920	10,517
Vegetables for Human Consumption—					
Onions	1,973	2,516	1,274	1,920	2,841
Potatoes	25,895	17,955	9,969	13,109	13,460
Other vegetables for human consumption	27,993	30,190	25,359	25,243	26,611
Grapes	10,511	15,406	18,337	18,496	14,698
Fruit and Nuts	48,349	49,898	59,150	54,025	51,763
All other Crops	15,736	16,877	14,573	19,197	20,710
Total Gross Value ..	384,937	352,148	340,846	459,892	410,354

(a) Includes amounts paid as bounty, relief, etc. (b) Incomplete, excludes Northern Territory.
(c) Includes payment of £3,022,000 by the Commonwealth Government. (d) Incomplete, excludes Western Australia.

10. **Value of Production and Indexes of Price and Quantum of Production.**—(i) *Gross and Net Values, 1959-60.* Values of agricultural production for each State are shown for 1959-60 in the following table. A more detailed reference to the value of production of agriculture and other industries in Australia as well as a brief explanation of the terms used will be found in Chapter XXX.—Miscellaneous.

In computing the net value of production, no deduction has been made for the cost of maintenance of farm buildings and fences, nor for the depreciation of farm plant; consequently, the figures are overstated to that extent.

GROSS, FARM AND NET VALUES OF AGRICULTURAL PRODUCTION, 1959-60.
(£'000.)

State.	Gross Production valued at Principal Markets.	Marketing Costs.	Gross Production valued at Farm.	Value of Materials Used in Process of Production.	Net value of Production. (a)
New South Wales	109,465	23,496	85,969	(b) 7,451	78,518
Victoria	92,411	13,281	79,130	10,218	68,912
Queensland	91,677	10,595	81,082	15,725	65,357
South Australia	35,546	3,780	31,766	7,520	24,246
Western Australia	65,525	8,840	56,685	12,641	44,044
Tasmania	15,489	2,962	12,527	1,882	10,645
Northern Territory	79	..	79	..	79
Australian Capital Territory	162	5	157	7	150
Australia	410,354	62,959	347,395	55,444	291,951

(a) No deduction has been made for depreciation and maintenance. (b) No allowance has been made for costs of power, power kerosene, petrol and other oils.

(ii) *Net Values, 1955-56 to 1959-60.* In the following table, the net value of agricultural production and the net value per head of population are shown by States for the years 1955-56 to 1959-60.

NET VALUE OF AGRICULTURAL PRODUCTION.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
NET VALUE.(a) (£'000.)									
1955-56	63,647	66,465	55,361	41,271	37,350	15,170	42	149	279,455

(a) No deduction has been made for depreciation and maintenance.

(iii) *Indexes of Quantum and Price of Agricultural Production.* Indexes of quantum and price of agricultural production are shown in the following table. The quantum indexes relate to gross output of farm products valued at constant prices. The quantities of each farm product produced each year have been re-valued at the unit gross value for the period 1936-37 to 1938-39. The price indexes relate to average "prices" of farm products realized at the principal markets of Australia. Average quantities of each product marketed in the period 1946-47 to 1950-51 have been used as fixed weights. Further details on weights used, etc., are to be found in Chapter XXX.—Miscellaneous.

INDEXES OF QUANTUM(a) AND PRICE OF AGRICULTURAL PRODUCTION. (Base : Average 3 years ended June, 1939 = 100.)

Particulars.	1955-56.	1956-57.	1957-58.	1958-59	1959-60.
Quantum Produced—					
Wheat	119	82	59	131	121
Other Crops	144	144	141	187	152
<i>Total, All Crops</i>	<i>134</i>	<i>120</i>	<i>109</i>	<i>165</i>	<i>140</i>
Total per Head of Population	99	86	77	114	94
Price—					
Wheat	319	347	339	337	350
Other Crops	339	327	333	310	313
<i>Total, All Crops</i>	<i>330</i>	<i>336</i>	<i>336</i>	<i>322</i>	<i>329</i>

(a) Indexes of value at constant prices, i.e. quantities revalued at average unit values of the base years (1936-37 to 1938-39).

§ 4. Wheat.

1. *Royal Commission on the Wheat Industry.*—A Royal Commission was appointed in January, 1934, to inquire into and report upon the economic condition of the industries of growing, handling and marketing wheat, and the manufacturing, distributing and selling of flour and bread. A searching inquiry was made by the Commission and the results of its investigations were submitted in a series of five reports. The first and second reports covered the wheat-growing industry, the third that of baking, the fourth the flour-milling industry, while the fifth, completed in February, 1936, dealt with the history of the Commission's investigations and traversed the principal recommendations submitted.

2. **Licensing of Areas Sown to Wheat, and Acreages Sown.**—Details of the operations of the Wheat Stabilization Board in licensing wheat grown during the seasons 1941–42 to 1948–49 will be found in Official Year Book No. 38, pages 940–41. The Board ceased to function on 31st December, 1948.

3. **Legislation relating to Wheat Industry.**—(i) *Stabilized Marketing.* A detailed survey of legislation relating to stabilization of the wheat industry, including controls exercised during the 1914–18 and 1939–45 Wars and legislation establishing the Wheat Stabilization Plan in 1948, is given in the Appendix to Official Year Book No. 37, pages 1295–99.

(ii) *The Australian Wheat Board.* The Australian Wheat Board was constituted in September, 1939, under National Security (Wheat Acquisition) Regulations, to purchase, sell, or dispose of, wheat or wheat products, manage and control all matters connected with the handling, storage, protection, shipment, etc. of wheat acquired, and such other matters as were necessary to give effect to the regulations.

The Board was reconstituted for five years, with similar powers, under the Commonwealth Wheat Stabilization Act 1948, to administer the stabilization plan. The new Board commenced to function on 18th December, 1948. The Board has been continued in existence by the Commonwealth Wheat Industry Stabilization Acts of 1954 and 1958 for the purpose of administering the second and third five-year stabilization plans.

(iii) *Wheat Stabilization Plans.* (a) 1947–48 to 1952–53. Details of the Wheat Stabilization Plan which operated during the seasons 1947–48 to 1952–53 inclusive were published in Official Year Book No. 40, pages 841 and 842, and previous issues.

(b) 1953–54 to 1957–58. Details of the plan which operated during the seasons 1953–54 to 1957–58 inclusive were published in Official Year Book No. 44, page 861, and previous issues.

(c) 1958–59 to 1962–63. Following negotiations during 1958, a new wheat industry stabilization plan was enacted by the Commonwealth and the States towards the end of that year. The new plan follows the lines of the two earlier ones. Details of the plan are as follows.

- (i) *Period of the Plan.* The plan will operate for five years. It will commence with the 1958–59 wheat crop and will end with the marketing of the 1962–63 crop.
- (ii) *Commonwealth Guarantee.* The Commonwealth will guarantee a return of 14s. 6d. a bushel to growers on up to 100 million bushels of wheat exported from the crop in the first year of the plan. The guaranteed return of 14s. 6d. is based on the findings of the recent survey of the economic structure of the wheat industry conducted by the Bureau of Agricultural Economics. It will be adjusted in each of the following years of the plan on up to 100 million bushels in accordance with the movements in costs based on a cost index established from the survey. The first two five-year Wheat Stabilization Plans each guaranteed a similar quantity of 100 million bushels exported.
- (iii) *Australian Wheat Board.* The Australian Wheat Board will be maintained as the sole constituted authority for the marketing of wheat within Australia and for the marketing of wheat and flour for export from Australia for the period of the plan.
- (iv) *Stabilization Fund*—
 - (a) *Export Tax.* A tax will be collected on wheat exported which will be equivalent to the excess of the returns from export sales over the guaranteed return. However, the maximum rate of export tax will be 1s. 6d. a bushel.
 - (b) *Size of Fund.* The ceiling of the Stabilization Fund is established at £20 million; any excess beyond this figure will be returned to growers on the “first-in-first-out” principle.
 - (c) *Balance in Present Wheat Stabilization Fund.* The balance remaining in the Fund at the termination of the present plan will be carried forward to the new plan as the nucleus of a new stabilization fund.
 - (d) *Use of the Stabilization Fund.* When the average export realizations fall below the guaranteed return, the deficiency will be made up first by drawing upon the stabilization fund in respect of up to 100 million bushels of wheat from each crop. When the fund is exhausted, the Commonwealth will meet its obligations under the guarantee.

- (v) *Home Consumption Price.* The home consumption base price for 1958–59, the first year of the plan, has been established as 14s. 6d. a bushel, bulk basis, f.o.r. ports plus 2d. a bushel loading to cover the cost of transporting wheat to Tasmania as outlined in (vi) below. There is provision in the plan for annual adjustments in the following years in accordance with the guaranteed price as outlined in (ii) above.
- (vi) *Freight on Wheat to Tasmania.* Provision is made for a loading on the price of all wheat sold for consumption in Australia to the extent necessary to cover the cost of transporting wheat from the mainland to Tasmania in each season of the plan.
- (vii) *Premium on Western Australian Wheat.* A premium will be paid from export realizations on wheat grown in Western Australia and exported from that State in recognition of the natural freight advantage enjoyed by Western Australia owing to its proximity to the principal overseas markets for wheat. The premium will be 3d. a bushel.

By agreement between the parties concerned, the Australian Wheat Growers' Federation, the States and the Commonwealth, a poll of growers as to acceptance of the plan was not considered necessary. The earlier plans had been approved by polls of growers.

The cost of production of wheat, which for the first season of the plan, 1958–59, was fixed at 14s. 6d. a bushel by the legislation, rose to 14s. 10d. a bushel for the 1959–60 season and to 15s. 2d. a bushel for the 1960–61 season. The guaranteed price for the seasons 1959–60 and 1960–61 was therefore 14s. 10d. and 15s. 2d. a bushel respectively, while the home consumption price, in each case including a loading of 2d. a bushel to cover costs of shipment of wheat to Tasmania, became 15s. and 15s. 4d. a bushel respectively.

(iv) *Wheat Industry Research.* In 1957, the Commonwealth Parliament passed legislation providing for a levy of a farthing a bushel on wheat handled by the Australian Wheat Board. This money, contributed by the growers, is to be spent by the Wheat Research Committees set up in the wheat growing States. These Committees, which consist of representatives of wheatgrowers, universities and State Departments of Agriculture, also received a total of £284,000 under the provisions of the Wheat Acquisition (Undistributed Moneys) Act 1958.

The Commonwealth Government has undertaken to supply additional funds for research (with a maximum of £1 for £1 against the growers' contribution) and has set up the Wheat Industry Research Council to make recommendations on the appropriate expenditure of the Commonwealth contribution.

The Council at its inaugural meeting in February, 1958, considered that possible avenues of research would include the breeding of better varieties, cereal chemistry, soil fertility, mechanization, the industry's cost structure and marketing problems.

The Council and the State Committees have incurred an estimated expenditure of £619,578 up to the end of June, 1960, including grants to the Commonwealth Scientific and Industrial Research Organization, State Departments of Agriculture, Universities and Agricultural Colleges.

4. *Marketing of Wheat.*—(i) *Wheat Acquired and Disposed of.* (a) *Wheat Acquired.* Particulars of wheat acquired by the Australian Wheat Board from the 1955–56 to 1959–60 harvests are shown in the following table:—

AUSTRALIAN WHEAT BOARD : WHEAT ACQUIRED, 1955-56 TO 1959-60.
(’000 Bushels.)

Pool.			Harvest.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	Australia.
19	1955-56	51,789	39,079	14,098	26,107	49,649	39	180,761
20	1956-57	24,014	32,931	5,837	29,154	28,171	22	120,129
21	1957-58	4,617	29,547	5,247	12,535	29,306	74	81,326
22	1958-59	59,990	41,216	15,206	29,548	53,348	82	199,390
23	1959-60	67,067	37,095	11,832	9,112	54,132	91	179,329

(b) *Wheat Disposal.* Details relating to the disposal of wheat during the years ended 30th November, 1956 to 1960, are shown in the following table.

AUSTRALIAN WHEAT BOARD : DISPOSAL OF WHEAT, 1956 TO 1960.(a)
(*'000 Bushels.*)

Particulars.	1956.	1957.	1958.	1959.	1960.
Sold for export as wheat	95,399	66,972	34,399	70,940	97,645
Sold for export as flour (b)	34,950	32,334	16,868	25,248	26,147
Sold for local consumption as flour	39,832	41,162	39,213	40,174	42,713
Sold for other purposes	17,090	21,459	16,894	13,484	16,635

(a) Years ended 30th November.

(b) Includes wheat equivalent of manufactured wheat products exported.

(ii) *Finance.* The Wheat Acquisition Regulations empowered the Minister to arrange with the Commonwealth Bank for advances to the Board, the advances being guaranteed by the Commonwealth Government. The Wheat Industry Stabilization Act 1948 included similar provisions for advances to the reconstituted Board established under that Act and these provisions have been continued in the subsequent legislation.

AUSTRALIAN WHEAT BOARD : FINANCIAL OPERATIONS, POOLS Nos. 19 to 23.
(*£'000.*)

(a) Complete. (b) Incomplete. (c) Subject to additional £1,010,000 withdrawn from Wheat Prices Stabilization Fund. (d) Includes £1,589,000 paid to Wheat Prices Stabilization Fund and £125,000 to Wheat Industry Research Fund. (e) Subject to additional £397,000 withdrawn from Wheat Prices Stabilization Fund and payment of £85,000 to Wheat Industry Research Fund. (f) Subject to additional £6,532,000 withdrawn from Wheat Prices Stabilization Fund and payment of £207,000 to Wheat Industry Research Fund. (g) Subject to additional £8,024,000 (of which the Commonwealth Government provided £3,022,000) withdrawn from the Wheat Prices Stabilization Fund and payment of £187,000 to Wheat Industry Research Fund.

NOTE.—Details of earlier pools will be found in previous issues of the Year Book.

(iii) *Advances to Growers.* Each year the size of the first advance to growers is announced by the Minister for Primary Industry before the commencement of the season. Additional payments are made as sufficient funds become available to the Board from sales realizations. Details of advances made to wheat growers in respect of the various pools are published in the Statistical Bulletin: *The Wheat Industry, Australia*, last issued in April, 1961.

(iv) *Stabilization Fund.* Particulars of the most recent legislative provisions for this fund are given in para. 3 (iv) on page 891.

In accordance with the provisions of the second Stabilization Plan, amounts of £9,160,000 and £1,589,000 were paid into the Stabilization Fund from the export charge on exports from the 1953-54 and 1956-57 crops. There were withdrawals from the Fund in respect of the years 1954-55, 1955-56 and 1957-58 amounting to £189,000, £1,010,000 and £397,000 respectively. The balance of the Fund including interest from its investment amounting to over £10 million was carried forward as the nucleus of the Fund for the third Stabilization Plan commencing with the 1958-59 season.

Under the third Stabilization Plan an amount of £6,532,000 (7.88d. per bushel) has been withdrawn from the Fund to raise export realizations from the 1958-59 harvest. The balance of the Fund with accrued interest, together amounting to £5,002,000, was withdrawn to raise export realizations from the 1959-60 harvest. In addition, an amount of £3,022,000 was contributed by the Commonwealth Government in accordance with the guarantee.

5. *International Wheat Agreements.*—Details of the first and second International Wheat Agreements operative from 1st August, 1949, to 31st July, 1953, and from 1st August, 1953, to 31st July, 1956, respectively, were published in Official Year Book No. 42 (see pp. 840-1) and previous issues.

A third International Wheat Agreement covering a period of three years from 1st August, 1956, to 31st July, 1959, came into force on 1st August, 1956. The 1956 Agreement was substantially the same in form as the 1949 and 1953 Agreements, although amendments were made to many of the more important provisions.

The annual quota of 395 million bushels determined by the 1953 International Wheat Agreement was reduced in the 1956 Agreement by almost a quarter to 303 million bushels. The quotas were varied slightly during the course of the Agreement, and in 1958–59 the total quota was 295.3 million bushels of which Australia's share was fixed at 29.5 million bushels.

Particulars of guaranteed sales and purchases by individual countries under the 1956 Agreement for 1958–59 and earlier years are shown in previous Year Books.

Following ratification by the required number of wheat exporting and importing countries, a fourth International Wheat Agreement came into force on 1st August, 1959. The Agreement covers the three year period from 1st August, 1959, to 31st July, 1962.

The new Agreement, negotiated at an international conference convened by the United Nations, continues the arrangements covered by previous Agreements, with some important variations. The Agreement seeks to obtain an element of stability in world wheat marketing by providing that a significant proportion of wheat entering international trade will be bought and sold at prices within a prescribed range. The member exporting countries compete to supply at prices within the agreed price range, which is from 190 cents (Canadian Currency) or about 17s. 6d. Australian to 150 cents or about 13s. 6d. a bushel. These prices are used in the following manner:—Maximum price is based on the price of Canada's No. 1 Northern Manitoba wheat in bulk in store at Fort William/Port Arthur, and the minimum price shall be each exporter's f.o.b. price equivalent to the c.i.f. price in the United Kingdom of the minimum price of Canada's No. 1 Northern Manitoba wheat in bulk in store Fort William/Port Arthur, using currently prevailing transportation costs and exchange rates.

Member importing countries have undertaken to buy each year from member exporting countries a stated percentage of their total commercial requirements at prices within the agreed range instead of a fixed quota as under previous Agreements. In the first year of the Agreement, ending 31st July, 1960, all member countries with one exception exceeded their stated percentages. Transactions between member importing and exporting countries totalled 555.7 million bushels, of which Australia's share was 79.1 million, equivalent to 14.2 per cent. In the final year of the third Agreement (Crop Year 1958–59), sales recorded totalled 191 million bushels of which Australia's share was 15.8 million (8.3 per cent). Total commercial purchases of wheat by importing, exporting and non-participating countries reported to the International Wheat Council were 633.8 million bushels of which Australia's share was 128.3 million (20.2 per cent.).

The new Agreement empowers the International Wheat Council to make an annual review of the world wheat situation, including the international implication of national policies in respect to wheat production, stocks and marketing, and the disposal of wheat surpluses on non-commercial terms.

Provision has also been made for a right of appeal against excessive discounts from the minimum price on the basis of differences in quality between the basic wheat—Canada's No. 1 Manitoba Northern Wheat—and the wheat supplied by the other member importing countries.

The provision in the previous Agreements by which the individual exporting countries had separate guaranteed quantities that they would call upon the member importing countries to buy at the minimum price has not been retained.

Member countries of the fourth International Wheat Agreement are:—

Exporters—Argentina, Australia, Canada, France, Italy, Mexico, Spain, Sweden and the United States of America.

Importers—Austria, Belgium and Luxembourg, Brazil, Costa Rica, Cuba, Dominican Republic, El Salvador, Federal Republic of Germany, Greece, Guatemala, Haiti, Honduras Republic, Iceland, India, Indonesia, Ireland, Israel, Japan, Korea, The Netherlands, New Zealand, Norway, Panama, Peru, The Philippines, Portugal, Federation of Rhodesia and Nyasaland, Saudi Arabia, Switzerland, Union of South Africa, United Arab Republic, United Kingdom, Vatican City, and Venezuela.

6. Wheat Farms.—(i) *Number.* Particulars of the number of farms growing 20 acres and upwards of wheat for grain during each of the years 1955–56 to 1959–60, are shown in the following table. It should be noted that a farm worked on the share system or as a partnership is included as one holding only.

NUMBER OF FARMS GROWING 20 ACRES AND UPWARDS OF WHEAT FOR GRAIN.

State.	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.
New South Wales	14,086	10,197	12,111	14,997	16,798
Victoria	9,714	7,674	8,856	9,074	10,561
Queensland	4,186	3,131	3,665	4,791	4,555
South Australia	8,571	7,852	7,515	7,774	7,869
Western Australia	7,962	7,943	7,957	8,060	8,444
Tasmania	78	45	95	104	141
Australian Capital Territory	9	4	10	19	24
Australia	44,606	36,846	40,209	44,819	48,392

(ii) *Size Classifications of Wheat Holdings.* See § 3, para. 4, page 887.

7. *Area, Production and Yield per Acre.*—(i) *Area.* Wheat is the principal crop grown in Australia, and its progress since 1860-61 has been almost continuous, although the area sown has been at a lower level during the past decade. Prominent features in its early development were the increase in population following the discovery of gold and the redistribution of labour after the surface gold had been won. The economic depression of 1893 interrupted its progress, but its subsequent recovery was assisted by the invention of mechanical appliances, the use of superphosphates as an aid to production, and the introduction of new and more suitable varieties of wheat for Australian conditions. The establishment of closer settlement schemes and the settling of returned soldiers and others on the land were additional factors in its expansion.

The area, production and yield per acre of wheat for grain in each State are shown below for the years 1955-56 to 1959-60 in comparison with the averages for the three-year periods ended 1938-39, 1948-49, and 1958-59:—

WHEAT FOR GRAIN : AREA, PRODUCTION AND YIELD PER ACRE.

1957-58	4.7	17.5	14.5	11.2	11.2	26.1	8.9	11.0
1958-59	20.9	23.6	22.9	22.8	17.5	25.4	28.1	20.7
1959-60	19.1	17.2	19.8	7.7	15.8	22.0	26.8	16.3

(a) 60 lb. per bushel.

A graph showing the area sown to wheat for grain in Australia since 1900-01 appears on page 898 while a map showing the distribution of areas growing wheat for grain throughout Australia in 1954-55 appeared on page 833 of Official Year Book No. 43. Similar maps showing the distribution of wheat areas in 1924-25, 1938-39 and 1947-48 appeared respectively in Official Year Books No. 22, page 695, No. 34, page 451 and No. 39, pages 977-8.

(ii) *Production.* Apart from the variations in the area sown, the size of the wheat harvest in Australia is largely determined by the nature of the season, resulting in considerable year-to-year fluctuations in production.

The main wheat-producing States of Australia are New South Wales, Victoria, South Australia and Western Australia. Queensland production normally approaches local demands, but Tasmania imports wheat from the mainland to satisfy its needs, though it exports flour made from local wheat which is particularly suitable for biscuits. Normally the production of wheat greatly exceeds Australian requirements, and from half to two-thirds of the crop is exported.

Following a near record wheat harvest of 215.1 million bushels in 1958-59, production was 8 per cent. less in 1959-60.

(iii) *Yield per Acre.* Short-term variations in yield per acre are due chiefly to seasonal influences. The best yields per acre for single seasons since 1901 were obtained in 1920-21, 16.1 bushels; in 1942-43, 16.8 bushels; in 1949-50, 17.8 bushels; in 1952-53, 19.1 bushels; in 1953-54, 18.4 bushels; in 1955-56, 19.2 bushels; in 1958-59, 20.7 bushels (a record); and in 1959-60, 16.3 bushels.

(iv) *Decennial Averages, 1861-70 to 1951-60.* The following table shows the average area, production and yield per acre for decennial periods since 1861.

WHEAT FOR GRAIN: AVERAGE AREA AND PRODUCTION, AUSTRALIA.

Period.	Area.	Production.	Yield per Acre.
	'000 Acres.	'000 Bushels.	Bushels.
1861-70	831	10,622	12.8
1871-80	1,646	17,711	10.8
1881-90	3,258	26,992	8.3
1891-1900	4,087	29,934	7.3
1901-10	5,711	56,058	9.8
1911-20	8,928	95,480	10.7
1921-30	11,291	135,400	12.0
1931-40	14,176	177,758	12.5
1941-50	11,358	145,599	12.8
1951-60	10,164	173,622	17.1

It should be noted that with improved farming methods, including the proper tillage of the soil, rotation of crops, the growing of suitable varieties and the application of fertilizers, the average yield per acre has shown a continued improvement in each decade since 1901.

8. *Varieties of Wheat Sown.*—(i) *General.* The breeding of wheat suitable to local conditions has long been established in Australia. Farrer (1845-1905) did invaluable work in pioneering this field and the results of his labour and the continued efforts of those who have followed him have proved of immense benefit to the industry. Their efforts

AREA OF CROPS: AUSTRALIA, 1900-01 TO 1959-60

WHEAT (GRAIN): AREA, PRODUCTION AND YIELD PER ACRE

AUSTRALIA, 1900-01 TO 1959-60

PRODUCTION OF OATS, BARLEY, MAIZE, RICE AND HAY

AUSTRALIA, 1900-01 TO 1959-60

have resulted in the development of disease-resistant varieties, better average yields, and a greater uniformity of sample, with which have accrued certain marketing advantages, as well as an improvement in the quality of wheat grown. More than 1,000 different varieties of Australian wheats have been catalogued by the Commonwealth Scientific and Industrial Research Organization, but the number of principal varieties grown during each season is restricted to about 45.

(ii) *States.* 1959-60. The principal varieties of wheat sown and the percentage of each to the total area sown in the five main producing States during 1959-60 were as follows:—New South Wales, Glenwari (21.1), Bencubbin (12.4), Gabo (12.1); Victoria, Insignia (42.6), Pinnacle (25.0), Olympic (13.7); Queensland, Festival (39.3), Spica (23.6); South Australia, Insignia (22.1), Gabo (22.0), Dirk (15.7); Western Australia, Gabo (36.2), Bungulla (13.1), Insignia (12.1). A detailed table of wheat varieties sown in these five States appears in the annual bulletin *Primary Industries—Part I.—Rural Industries*.

9. *F.A.Q. Standard of Wheat.*—Until the 1957-58 season, the Chambers of Commerce in each of the four main wheat-producing States determined the "f.a.q." (fair average quality) standard for each season's crop. This standard is used as a basis for sales of each crop and it varies from year to year and from State to State.

Samples of wheat are obtained each year by the Chambers of Commerce from the different wheat districts and mixed to give a representative sample of the whole crop. From this representative sample the f.a.q. weight is determined by the use of the Schopper 1-litre scale chondrometer. Commencing with the 1958-59 season, the f.a.q. standard has been determined by State committees comprising representatives of the Australian Wheat Board, the silo authorities, the growers and the State Departments of Agriculture. "F.a.q." is an Australian term, and the method of selling differs from that of other countries which sell according to sample, or (as in Canada) according to grades which are fixed and do not vary from year to year.

The f.a.q. weight of a bushel of wheat in each of the four main wheat-producing States for the 1960-61 season's crop was as follows:—New South Wales, North, 64 lb., South and West, 62 lb.; Victoria, 64½ lb.; South Australia, semi-hard, 64 lb., soft, 64½ lb.; and Western Australia, 64 lb.

10. *Price of Wheat.*—(i) *Home Consumption.* The price charged by the Australian Wheat Board for wheat sold to millers for gristing into flour for consumption in Australia and for wheat sold as stock feed was as follows:—Year ended 30th November, 1955, 14s. 1½d.; 1956, 13s. 5½d.; 1957, 13s. 9½d.; 1958, 14s. 4d.; 1959, 14s. 8d.; 1960, 15s. 0d.; 1961, 15s. 4d. These prices include an amount used to meet freight charges incurred on wheat shipped to Tasmania (1½d. from 1955 to 1957; 2d. in subsequent years). The figure quoted for 1958 does not apply to New South Wales and Queensland where, because of the necessity of meeting the extra cost of importing wheat from Canada and Western Australia, the prices, during the greater part of the year, were 18s. 4½d. and 16s. 9½d. respectively.

(ii) *Export Wheat Prices—Australian Wheat Board's Basic Selling Price.* The monthly average of the Wheat Board's basic export selling prices for f.a.q. bulk wheat f.o.b. basis was 13s. 5½d. for the season ended 31st July, 1957, 14s. 6d. for the season ended 31st July, 1958, 13s. 10d. for the season ended 31st July, 1959, and 13s. 4d. for the season ended 31st July, 1960, both for wheat sold under the International Wheat Agreement and for "free" wheat sold on the open market. Actual selling prices have been lower than the basic prices in some cases, particularly where other exporting countries enjoy a geographical freight advantage.

The maximum and minimum prices fixed under the 1956 International Wheat Agreement are expressed in terms of "Canadian currency per bushel, at the parity of the Canadian dollar determined for the purposes of the International Monetary Fund for No. 1 Manitoba Northern wheat in bulk in store Fort William—Port Arthur." The maximum price was set at 200 cents a bushel and the minimum at 150 cents for f.a.q. wheat. Under the current 1959 Agreement operative from 1st August, 1959 (see paragraph 5, p. 894), the agreed price range is between 190 cents and 150 cents. Directly converted into Australian currency these limits are approximately 17s. 6d. and 13s. 6d. a bushel respectively.

Details of export wheat prices in previous years, including those received for wheat sold under the terms of the 1949-1953 International Wheat Agreement, are given in Official Year Book No. 40, pages 849-50, and Statistical Bulletin: *The Wheat Industry, Australia*, No. 95 of April, 1959, and in previous issues of these publications.

11. *Value of the Wheat Crop.*—The estimated gross value of the wheat crop in each State and in Australia during the season 1959-60 and the value per acre are shown below.

10538/60.—28

WHEAT FOR GRAIN: VALUE OF CROPS (a), 1959-60.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	51,975	26,743	9,461	8,248	41,181	125	29	137,762
Value per Acre £	13.2	11.8	13.8	5.3	11.1	15.1	16.6	11.3

(a) Gross value of total crop, including wheat used for seed and for stock feed on farms. Also includes payment of £3,022,000 by the Commonwealth Government.

12. **Production and Disposal of Wheat in Australia.**—In the following table, details are given of the production of wheat and its disposal during each of the years ended 30th November, 1956 to 1960. The particulars for local consumption are based on sales made by the Australian Wheat Board, whilst those relating to exports represent actual shipments. (For particulars of production and yield from 1900-01 see graph, p. 898.)

WHEAT : PRODUCTION AND DISPOSAL, AUSTRALIA.
(Million Bushels.)

Particulars.	Year ended 30th November—				
	1956.	1957.	1958.	1959.	1960.
Opening stocks (including flour as wheat)	95.0	84.2	41.5	16.5	65.4
Production	195.4	134.5	97.6	215.1	198.5
Imports	1.5
<i>Total Available Supplies</i> ..	<i>290.4</i>	<i>218.7</i>	<i>140.6</i>	<i>231.6</i>	<i>263.9</i>
Exports—					
Wheat	93.7	69.3	33.6	71.7	98.1
Flour as wheat(a)	36.8	36.6	17.5	26.8	26.7
Breakfast foods and other products(b) ..	1.4	1.6	0.6	0.4	0.6
Local Consumption—					
Flour as wheat	39.8	41.2	39.2	40.2	41.3
Stock feed	15.3	19.6	15.0	11.6	14.7
Seed	7.9	9.1	11.1	12.0	13.0
Breakfast foods and other products(b) ..	1.7	1.9	1.9	1.9	1.9
Balance retained on farm (excluding seed)	6.7	5.3	6.1	3.7	6.2
Closing stocks (including flour as wheat) ..	84.2	41.5	16.5	65.4	60.7
<i>Total Disposals</i>	<i>287.5</i>	<i>226.1</i>	<i>141.5</i>	<i>233.7</i>	<i>263.2</i>
Excess (+) or Deficiency (–) of Disposals in respect of Available Supplies(c) ..	–2.9	+7.4	+0.9	+2.1	–0.7

(a) Includes wheatmeal and sharps. (b) In terms of wheat. (c) Includes allowance for unrecorded movements in stocks, gain or loss in out-turn, etc.

13. **Imports of Wheat.**—Owing to drought conditions in 1957-58, wheat supplies, particularly in New South Wales, were insufficient for local requirements. As a result, 1,136,000 bushels were imported from Canada during March, April and May, 1958, and a further 349,000 bushels in July, 1958. No wheat has been imported since this period.

Wheat and flour have been imported in substantial quantities on only two previous occasions since 1900; in 1902-3 the wheat harvest was only 12,378,000 bushels, and wheat and flour representing 12,468,000 bushels of wheat were imported, while an equivalent of 7,279,000 bushels was imported in 1914-15 to supplement the yield of 25 million bushels produced in that season.

14. **Exports of Wheat and Flour.**—(NOTE: Statistics in this paragraph relate to years ended 30th June.) (i) *Quantities.* The following table shows particulars of the exports of wheat and flour and total of both, in terms of wheat, for each of the years 1955-56 to 1959-60. For the sake of convenience, flour has been expressed at its equivalent in wheat, 1 ton of flour being taken as equal to 46.3 bushels of grain.

WHEAT AND FLOUR : EXPORTS FROM AUSTRALIA.

Year.			Quantity.				Value.		
			Wheat.	Flour.		Total as Wheat.	Wheat.	Flour.	Total.
				As Flour. (a)	As Wheat. (b)				
			'000 bushels.	Tons. (2,000 lb.)	'000 bushels.	'000 bushels.	£'000.	£'000.	£'000.

1960	19,878	16,639	451	2,203	20,995	535	60,701

(a) Held by the Australian Wheat Board at mills, sidings, ports and depots.
flour is taken as equivalent to 46.3 bushels of wheat.

(b) One ton of

16. **Bulk Handling and Storage of Wheat in Australia.**—(i) *Description and Development of the Bulk Handling System.* A detailed description of the bulk handling system, including its advantages and disadvantages compared with other methods of handling, appears on pages 954–8 of Official Year Book No. 39.

New South Wales, Victoria and Western Australia have operated bulk handling systems for a number of years, and, in more recent years, other States have also introduced bulk systems.

(ii) *Bulk Handling and Storage in the States.* Particulars of the operation of the bulk handling and storage systems and projected extensions in the States concerned are set out below:—

(a) *New South Wales.* Bulk handling facilities are operated by the Grain Elevators Board of New South Wales. The capacity of storages in the country for the 1960–61 season totalled 61,740,000 bushels and comprised 182 elevators (26,290,000 bushels), 13 horizontal type concrete and steel storages (3,230,000 bushels), 4 sub-terminals (16,500,000 bushels), 69 bulkheads (7,020,000 bushels) and 12 bulk depots (8,700,000 bushels). In addition, port terminal facilities provided storage for 4,200,000 bushels at Newcastle and 7,500,000 bushels at Sydney, making a total capacity of 73,440,000 bushels for the State.

(b) *Victoria.* The Victorian Grain Elevators Board operates 201 elevators with a storage capacity of 28,457,000 bushels and a terminal elevator at Geelong with a capacity of 4,250,000 bushels. Storages for 18,000,000 bushels, adjacent to the permanent terminal, have been constructed at Geelong.

Temporary measures for extending bulk handling facilities have been adopted and sub-terminals constructed or acquired at Dunolly, Murtoa and Warracknabeal with a capacity of 22,750,000 bushels. Temporary bulkheads have also been used and in the 1960–61 season there were 28 available for use with a total capacity of 2,364,000 bushels.

(c) *Queensland.* Bulk storages in this State are controlled and operated by the State Wheat Board. The capacity in the country for the 1960–61 season totalled 5,518,000 bushels. This total is composed of 12 silos (3,250,000 bushels) and 18 bulkheads (2,268,000 bushels).

The terminal bulk storage at Pinkenba commenced receiving wheat in July, 1959, with a storage capacity of 1,300,000 bushels.

(d) *South Australia.* Since the formation of the South Australian Co-operative Bulk Handling Ltd. in 1955, steady progress has been maintained in the expansion of the system.

The present capacity of bulk storages is 14,290,000 bushels; comprising 1,030,000 bushels at Ardrossan; 1,510,000 at Wallaroo; 1,250,000 at Port Lincoln; and 10,500,000 in country areas.

For the 1960-61 season, wheat was received in bulk at 30 installations in country areas in addition to the terminals at Ardrossan, Wallaroo and Port Lincoln.

For the 1961-62 season, the completion of a further seven silos will increase the capacity by 1,990,000 bushels, which will give the South Australian Co-operative Bulk Handling Ltd. capacity to handle 16,280,000 bushels of wheat in bulk, including a 750,000 bushel terminal at Thevenard.

(e) *Western Australia.* The bulk handling system is operated by Co-operative Bulk Handling Ltd., which is a company controlled by growers. In 1960-61, there were 292 sidings equipped with bulk handling facilities and the whole of the marketable harvest was received in bulk.

The system of storage at country stations in Western Australia comprises fixed installations of galvanized iron bins and iron and timber horizontal bulkheads. In addition, a type of temporary roofed bulkhead consisting of timber and iron is used. This latter type of storage can be transferred to suit operational requirements, and therefore lends flexibility to the system. Terminal installations comprise concrete silos and timber and iron horizontal bulkheads, with the exception of one port which is equipped with iron silos instead of concrete. Plans are in hand to increase the number of vertical concrete cell type storages at the main ports.

The total storage capacity for 1960-61 season was 104,517,000 bushels, comprising 78,867,000 bushels in the country and 25,650,000 bushels at ports, including 3,200,000 bushel capacity scheduled for completion during 1961.

(f) *Tasmania.* In order to meet the change to bulk handling of wheat in the mainland exporting States, the Tasmanian Government has constructed grain elevators at Hobart, Launceston and Devonport, each with a capacity of 300,000 bushels, for storage of bulk wheat shipments from the mainland.

17. *World Area and Production of Wheat.*—The figures in the following table of the world area and production of wheat by principal countries and by continents have been compiled from the statistics published by the Food and Agriculture Organization of the United Nations. The harvests shown for countries in the Northern Hemisphere are those reaped during the period March to October whilst those for the Southern Hemisphere cover the period November to February following.

(c) Totals (estimates) include allowances for any missing data for countries shown and for producing countries not shown. (d) Not available. See footnote (c).

18. Exports—Principal Countries.—The following table shows the quantities of wheat exported from the chief exporting countries for the years 1957 to 1959, based on statistics recently published by the Food and Agriculture Organization of the United Nations.

While Australia's production of wheat averages less than 3 per cent. of the world's total, its exports account for a much higher proportion of the total quantities shipped. In 1959, Australia's share of world wheat exports amounted to 8.2 per cent.

(a) Includes flour expressed in terms of wheat.

§ 5. Oats.

1. **Area, Production and Yield per Acre.**—Oats is usually next in importance to wheat among the grain crops cultivated in Australia, but while wheat grown for grain in 1959–60 accounted for 47 per cent., oats grown for grain represented only 12 per cent. of the area of all crops. The area, production and yield per acre of oats in each State are shown below for the years 1955–56 to 1959–60 in comparison with the averages for the three year periods ended 1938–39, 1948–49, and 1958–59.

OATS FOR GRAIN : AREA, PRODUCTION AND YIELD PER ACRE.

(a) Less than 500 acres.

(b) 40 lb. per bushel.

(c) Less than 500 bushels.

Graphs showing the area sown to oats, and production of oats appear on pages 897 and 899 respectively.

In 1958–59, extremely favourable seasonal conditions for all cereal crops were experienced, and production of oats reached an all-time high at 86,905,000 bushels, the previous record being 56,487,000 bushels in 1955–56. Production reverted to a more normal level in 1959–60, when 46,841,000 bushels were harvested.

The average yield of 15.5 bushels an acre in 1959–60 was 29 per cent. below the yield of 21.9 bushels an acre in 1958–59, the highest yield in recent years. The previous highest yield in recent years was 19.3 bushels an acre in the 1947–48 season which was the highest since 1920–21. The yield per acre recorded in the abnormally dry season 1944–45, 4.4 bushels, was the lowest ever recorded for Australia.

2. **Price of Oats.**—The average wholesale price in the Melbourne market for oats of good milling quality was 7s. 9d. a bushel in 1959–60. This represents an increase of approximately 12 per cent. on the price in 1958–59 (6s. 11d.).

3. **Value of Oat Crop.**—The estimated gross value of the oat crop in each State for the 1959–60 season and the value per acre were as follows:—

OATS : VALUE OF CROP, 1959–60.

Particulars.		N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value	£'000	4,079	4,797	197	1,061	7,965	295	2	18,396
Value per acre..	£	7.2	7.1	9.2	2.1	6.4	13.4	8.7	6.1

4. **Exports.**—The production of oats in Australia is sufficient to allow for a regular export trade. The quantities and values of oats exported from Australia during the years 1955–56 to 1959–60 are shown hereunder:—

OATS : EXPORTS, AUSTRALIA.

Particulars.		1955–56.	1956–57.	1957–58.	1958–59.	1959–60.
Quantity '000 bus.	9,608	8,165	2,296	17,557	11,969
Value £'000	3,578	2,972	1,064	6,512	5,031

In 1959–60, the principal countries of destination were the Federal Republic of Germany (8,155,400 bushels), the Netherlands (1,719,100 bushels), Italy (1,028,200 bushels) and the United Kingdom (579,000 bushels). Imports of oats into Australia are not recorded separately.

5. **Oatmeal, etc.**—In 1959–60, the production of oatmeal was 15,672 tons for porridge and 10,092 tons for other purposes. This was equivalent to about 2,900,000 bushels of oats.

6. **World Production.**—The world's production of oats for the year 1959, according to figures released by the United States Department of Agriculture, amounted to 3,720 million bushels, harvested from 111.2 million acres, representing an average yield of 33.5 bushels per acre. This compared with an estimated production in the previous year of 4,260 million bushels from an area of 116.7 million acres and an average yield of 36.5 bushels an acre.

§ 6. Maize.

1. **States Growing Maize.**—Maize is grown for grain chiefly in Queensland and New South Wales, the area so cropped in these States during the 1959–60 season being 181,541 acres, or 98 per cent. of the total for Australia. In all States except South Australia, the crop is grown to some extent for green fodder, particularly in connexion with the dairying industry.

2. **Area, Production and Yield per Acre.**—Although maize for grain is grown extensively in other countries, the area sown to maize for grain in Australia has averaged only 179,507 acres during the five years ended 1959–60. The area in 1959–60 was 184,928 acres, a slight increase on the previous year, but considerably less than the comparatively large areas of 414,914 and 400,544 acres sown in 1910–11 and 1927–28 respectively.

There has been a considerable increase in recent years in the growing of maize from hybrid strains of seed. Varieties have been developed which are capable of producing yields per acre considerably in excess of the older open pollinated types. The expansion in areas sown to hybrid maize has led to a parallel development in the specialized industry of growing hybrid strains for seed.

The area, production and yield per acre of maize for grain in each State for the years 1955-56 to 1959-60 compared with the averages for the three three-year periods ended 1938-39, 1948-49 and 1958-59 are given in the following table. Separate details for hybrid and other varieties are shown for New South Wales, Victoria and Queensland for 1959-60.

(a) Not available for publication. (b) Includes 3 acres in the Northern Territory. (c) 56 lb. per bushel. (d) Less than 500 bushels.

The average yield for Australia for the five-year period ended 1959-60 was 30.6 bushels per acre. Among principal producing countries during 1959, the United States of America averaged 51.5 bushels per acre and Italy 48.6 bushels.

3. Price of Maize.—The average wholesale price of maize in the Melbourne market in 1959-60 was 16s. 1d. a bushel compared with 15s. 4½d. in 1958-59.

4. Value of Crop.—The estimated gross value of the crop in each State for the 1959-60 season and the value per acre were as follows:—

MAIZE FOR GRAIN : VALUE OF CROP, 1959-60.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
Aggregate value .. £'000	1,688	131	2,210	4,029
Value per acre .. £	32.6	38.7	17.0	21.7

5. Exports of Maize and Maize Products.—Details of exports of maize for the five years ended 1959-60 are shown below.

MAIZE : EXPORTS, AUSTRALIA.

Particulars.	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.
Quantity .. '000 bus.	185	32	48	15	22
Value £'000	119	26	30	10	15

Imports of maize into Australia are not recorded separately.

Exports of cornflour, which prior to the 1939-45 War were very small, increased considerably during the war years, the principal country of destination being New Zealand. In 1959-60, however, only 48,000 lb., valued at £1,482, were exported. It should be noted that these figures include some quantities of "cornflour" made from wheat. Imports of cornflour into Australia are not recorded separately.

6. World Production.—According to preliminary figures released by the United States Department of Agriculture, world production of maize in the year 1959 amounted to 7,955 million bushels, harvested from 260 million acres, giving an average yield per acre of 30.7 bushels. This compared with production in the previous year of 7,395 million bushels from 246 million acres, and an average of 30.1 bushels per acre.

The United States of America is the most important maize-producing country in the world and during the three years ended 1959 the area sown to maize in that country averaged 77 million acres or 31 per cent. of the world total. During the same period, production averaged 3,861 million bushels or about 53 per cent. of the world total. These figures are not strictly comparable with those for other countries included in the above-mentioned world totals, as the area and an estimate of grain equivalent of maize used as green fodder are included.

A graph showing the production of maize in Australia appears on page 899.

§ 7. Barley.

1. Area, Production and Yield per Acre.—The area sown to barley for grain expanded considerably during the ten years preceding the 1939-45 War—from 383,000 acres in 1930-31 to 836,000 acres in 1939-40. This increase was followed by a decline to 443,000 acres in 1943-44, but the area sown has increased in succeeding years and in 1958-59 reached the record level of 2,381,000 acres. Victoria was originally the principal barley-growing State, but since 1913-14 its place has been taken by South Australia which accounted for 55 per cent. of the Australian acreage in 1959-60. There has been a substantial increase in the acreage sown in most States in recent years, particularly in Western Australia and Queensland. Small areas of barley are sown for hay, and larger quantities are sown for green forage, but these are not included in this section. The production of barley for grain in Australia in 1958-59 was a record at 62,976,000 bushels. The previous highest recorded production occurred in 1956-57 when 49,279,000 bushels were produced. The area, production and yield per acre of barley for grain in the several States for the years 1955-56 to 1959-60, compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59 are shown in the following table:—

(a) Less than 500 acres. (b) Not available. (c) 50 lb. per bushel. (d) Less than 500 bushels.

For Australia (excluding Tasmania), 79 per cent. of the area of barley for grain in 1959-60 was sown with malting, or 2-row, barley, while the remainder consisted of 6-row, or feed, varieties. The proportion, however, varied considerably in the several States. The utilization of barley during the season ended November, 1959, was as follows:—exports, 37,644,000 bushels; malting and distilling, 8,175,000 bushels; pearl barley, 143,000 bushels; seed and stock feed, 14,697,000 bushels.

The following table sets out the acreage and production of malting and other barley in Australia during the seasons 1955-56 to 1959-60 and the averages for the three years ended 1938-39, 1948-49 and 1958-59.

(a) 50 lb. per bushel.

(b) Excludes Tasmania.

A graph showing the production of barley appears on page 899.

2. **Australian Barley Board.**—Following the outbreak of war in 1939, the Australian Barley Board, representative of the whole industry, was formed, and the Commonwealth Government acceded to its request to acquire the entire 1939–40 barley crop, which was placed under the control of the Board. A pool was established, from which proceeds were distributed with appropriate margins for different grades of barley. The Board was responsible for the marketing and storage of barley, and, like the Australian Wheat Board, appointed licensed receivers to receive grain on its behalf.

Following the decision of the Commonwealth Government not to acquire barley in the smaller producing States after 1941–42, the pooling of barley in Queensland reverted to the control of the Queensland Barley Board (originally established in 1930), and in Western Australia a State Barley Board was established to control marketing.

The Commonwealth Government ceased to acquire barley altogether after the 1947–48 crop, and the Victorian and South Australian Governments formed a joint board under the same name as the former Commonwealth board to market the 1948–49 and subsequent crops of the two States. Details for the seasons from 1954–55 to 1959–60 are shown in the table below.

AUSTRALIAN BARLEY BOARD : BARLEY RECEIVED, SOLD, ETC.

Pool.			Quantity Received.	Quantity Sold.(a)	Total Advances made per Bushel on 2-row No. 1 Grade less freight.	Total Net Payments to Growers.
			'000 bushels.	'000 bushels.	s. d.	£
No. 16 (1954–55 Crop)	20,679	20,709	12 10.92	11,953,430
„ 17 (1955–56 „)	29,357	29,454	10 3.441	12,990,173
„ 18 (1956–57 „)	39,029	39,102	10 2.541	16,965,609
„ 19 (1957–58 „)	18,023	18,195	11 9.61	9,151,748
„ 20 (1958–59 „)	42,550	42,560	10 10.1	19,616,789
„ 21 (1959–60 „)	11,772	11,772	(b) 9 0.0	4,290,271

(a) Includes surplus in out-turn except for No. 20 Pool for which this surplus has not yet been determined. (b) As at 31st December, 1960. At that date, it was estimated that the amount still to be paid to growers was 1s. 0.529d. per bushel.

3. **Prices.**—The average wholesale price for 2-row English malting barley in the Melbourne market during 1959–60 was 14s. 7d. compared with 13s. 9d. in 1958–59.

4. **Value of Barley Crop.**—The estimated gross value of the barley crop in each State for the 1959–60 season and the value per acre are shown in the following table:—

BARLEY FOR GRAIN : VALUE OF CROP, 1959-60.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia.
Aggregate value .. £'000	1,583	2,643	3,240	5,500	3,379	278	16,623
Value per acre .. £	13.3	9.5	12.5	4.3	8.0	22.4	7.0

5. **Exports.**—Exports of barley during the five years ended 1959–60 averaged 24,801,000 bushels. South Australia was the principal exporting State, and Japan, the Federal Republic of Germany, the Netherlands and the United Kingdom were the principal countries to which barley was shipped. Particulars of Australian exports for the years 1955–56 to 1959–60 are shown in the following table:—

BARLEY : EXPORTS, AUSTRALIA.

Particulars.	1955–56.	1956–57.	1957–58.	1958–59.	1959–60.
Quantity '000 bus.	21,065	26,501	21,501	29,924	25,013
Value £'000	10,471	12,745	9,474	16,898	11,541

Imports of barley into Australia are not recorded separately.

In addition to exports of barley grain, there are also exports of Australian pearl and Scotch barley, the total for 1959-60 amounting to 229,390 lb., valued at £10,999, consigned mainly to Malaya.

6. Malt.—(i) *Production.* Details of the quantity of grain used and the production of barley malt are given in the following table:—

BARLEY MALT : GRAIN USED AND MALT PRODUCED, AUSTRALIA.

Particulars.	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.
Grain used . . '000 bus. <i>a</i>	7,803	7,855	8,494	8,198	8,539
Malt produced . . '000 bus. <i>b</i>	7,782	7,895	8,197	8,108	8,435

(a) 50 lb. per bushel.

(b) 40 lb. per bushel.

(ii) *Exports.* Since 1952-53, the production of malt in Australia has been sufficient to meet local requirements and to provide a margin for export. Exports amounting to 1,225,139 bushels (value £1,167,631) and 1,103,927 bushels (value £1,046,693) were recorded in 1958-59 and 1959-60 respectively.

7. *World Production.*—In comparison with the barley production of other countries, that of Australia is extremely small. The main producers in 1959 were the United States of America, France and Canada. China is also normally a major producer, but details for 1959 are not available. Australian production in that year was approximately one per cent. of the world total.

According to estimates made by the United States Department of Agriculture, world production of barley in the year 1959 amounted to 3,285 million bushels harvested from 136.6 million acres, equivalent to a yield per acre of 24.0 bushels. This compared with the production of 3,310 million bushels in the previous year from 135.8 million acres, and a yield per acre of 24.4 bushels.

§ 8. Rice.

The principal rice-growing areas of the world are confined almost entirely to Asia although limited quantities are grown in other countries. In Australia, rice was first cultivated at the Yanco Experimental Farm in New South Wales, but it was not grown commercially until 1924-25, when 16,240 bushels were produced from 153 acres. Favoured by high average yields and protected by tariff, rice culture made rapid progress in the Murrumbidgee Irrigation Area until local requirements were met and a surplus became available for export. The acreage sown in this area is controlled, as the quantity of water available is limited.

The area sown in New South Wales in 1959-60 was 48,950 acres, which was below the 1956-57 record of 50,477 acres. However, production in 1959-60 amounted to a record of 6,732,053 bushels, which was 113,120 bushels more than the previous highest, recorded in 1958-59.

A graph showing the production of rice appears on page 899.

The bulk of Australia's exports of rice in 1959-60 was shipped to Papua and New Guinea, the Pacific Islands, the United Kingdom and New Zealand.

Details relating to area, production and exports for the years 1955-56 to 1959-60, are shown in the following table:—

RICE : AREA, PRODUCTION AND EXPORTS, AUSTRALIA.(a)

Season.	No. of Holdings Growing Rice.(b)	Area.	Production (Paddy Rice).		Average Yield (Paddy) per Acre.	Exports.(d)	
			Quantity.	Gross Value.		Un-cleaned.	Cleaned.
		Acres.	'000 Bushels. (e)	£'000.	Bushels.	Cwt.	Cwt.
1955-56 ..	620	41,182	4,725	3,406	114.7	179,297	678,929
1956-57 ..	652	50,477	4,262	3,069	84.4	177,123	408,634
1957-58 ..	743	46,774	5,658	4,045	121.0	211,426	430,928
1958-59 ..	775	47,054	6,619	4,731	140.7	182,583	704,381
1959-60 ..	848	48,950	6,732	4,450	137.5	265,640	1,055,861

(a) Until recently rice-growing in Australia has been practically confined to New South Wales with very small acreages only being sown in Queensland and Western Australia. Production commenced in the Northern Territory in 1956-57 but details, which are confidential, are not included in the table. (b) Twenty acres or more in area. (c) Excludes the value of straw. (d) Imports into Australia are not recorded separately. (e) 42 lb. per bushel.

In 1956, the Commonwealth Government entered into an agreement for the development of large scale rice-growing in the Northern Territory. The agreement, which was made with a company financed by American and Australian interests, granted a 30 year lease over 750,000 acres of sub-coastal plains east of Darwin and provided for the development of 500,000 acres of land for rice-growing within 15 years. Production of rice commenced in 1956-57 but, as only one company is involved, details of area and production are confidential and not available for publication.

§ 9. Sorghum for Grain.

The growing of sorghum for grain on an extensive scale is a recent development in Australia. No details of the area and production of this cereal are available prior to 1939-40, but the output was of little importance. The climatic conditions of Queensland and northern New South Wales are particularly suited to the growing of sorghum and so far development has been restricted mainly to these areas, and more particularly to Queensland which accounts for the greater portion of the area sown. The grain produced is fed to livestock and has become an important source for supplementing other coarse grains for the feeding of livestock. Other sorghums are grown in Australia mainly as green fodder, hay and silage (sweet sorghums and Sudan grass) and for the production of brush for broom manufacture (broom millet). Particulars of the area and production of sorghum grown for grain are given in the following table.

GRAIN SORGHUM : AREA, PRODUCTION AND YIELD PER ACRE, AUSTRALIA.

Season.	Area.			Production.(a)			Yield per Acre.(a)		
	N.S.W.	Q'land.	Total.	N.S.W.	Q'land.	Total	N.S.W.	Q'land.	Total.
	Acres.	Acres.	(b)	Bushels.	Bushels.	(b)	Bushels.	Bushels.	(b)
1955-56 ..	23,697	155,527	179,298	662,973	3,960,195	4,624,273	28.0	25.5	25.8
1956-57 ..	34,585	171,705	206,659	671,331	4,243,227	4,919,247	19.4	24.7	23.8
1957-58 ..	47,017	166,979	214,442	521,325	3,885,567	4,407,500	11.1	23.3	20.6
1958-59 ..	41,899	210,371	252,419	943,359	6,365,880	7,309,645	22.5	30.3	29.0
1959-60 ..	51,195	220,094	271,553	1,451,967	6,630,369	8,086,405	28.4	30.1	29.8

(a) 60 lb. per bushel.

(b) Includes small areas sown and quantities produced in other States.

§ 10. Potatoes.

1. **Area, Production and Yield per Acre.**—Victoria possesses particular advantages for the growing of potatoes, as the rainfall is generally satisfactory and the climate is unfavourable to the spread of Irish blight; consequently, the crop is widely grown. The principal areas of that State are the central highlands and the south-western and Gippsland districts. Until 1958–59, Tasmania came next in order of acreage sown, although the production exceeded that of Victoria in some of the war years. In 1958–59 and 1959–60, New South Wales, which had previously occupied third position, supplanted Tasmania as the second most important State in area sown. Tasmanian production, however, is still larger than that in New South Wales. The areas sown in these three States accounted for 77 per cent. of the total for Australia in 1959–60.

The area sown, production and yield per acre of potatoes in each State during the years 1955–56 to 1959–60 and the averages for the three-year periods ended 1938–39, 1948–49 and 1958–59 are shown hereunder:—

POTATOES : AREA, PRODUCTION AND YIELD PER ACRE.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust. (a)

1957–58 ..	3.85	5.04	3.92	7.98	5.92	4.68	4.57	4.88
1958–59 ..	4.83	5.62	4.05	8.20	6.68	5.31	1.69	5.49
1959–60 ..	4.28	5.00	4.18	8.33	8.04	6.31	5.37	5.34

(a) Includes Northern Territory.

After the outbreak of war in the Pacific in December, 1941, the area sown to potatoes increased rapidly and reached a maximum of 241,803 acres in 1944-45. Areas sown in subsequent seasons were considerably less, however, and the figure for 1959-60 was 108,404 acres.

The average yield in Australia for 1959-60 was 5.34 tons per acre, only slightly less than the record yield of 5.49 tons obtained the previous season.

2. **Gross Value of Potato Crop.**—The estimated gross value of the potato crop of each State for the 1959-60 season and the value per acre are shown in the following table:—

POTATOES : VALUE OF CROP, 1959-60.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	1,682	5,808	1,275	1,009	1,740	1,938	8	13,460
Value per acre £	88	120	104	171	250	125	119	124

3. **Consumption.**—The annual consumption of potatoes in Australia during each of the three years 1957-58 to 1959-60 amounted to 515,700 tons, 511,900 tons and 514,600 tons respectively, or 118.5 lb., 115.2 lb. and 113.3 lb. respectively per head of population. These figures exclude the quantities used for seed, which averaged about 54,000 tons annually over this period. New South Wales, Queensland and, in some seasons, South Australia do not produce the quantities necessary for their requirements and must import from Tasmania and Victoria, which have a surplus.

4. **Marketing.**—Commonwealth control of potato marketing under war-time legislation ceased at the end of 1948 with the completion of sales of the 1947-48 crop.

Potato Marketing Boards were subsequently established in all States under separate State legislation. The life of the Queensland Board was not extended when its term ended in 1954, and the New South Wales Board was voted out by growers in 1956. As the Victorian Board does not acquire the State crop, potato marketing is now conducted chiefly on an open marketing system.

5. **Exports.**—Prior to the 1939-45 War, small quantities of potatoes were exported, principally to the Pacific Islands and Papua. After the war, the export trade expanded considerably. It reached a peak of 37,570 tons in 1952-53, but then fell sharply. Details showing exports for the years 1955-56 to 1959-60 are given in the following table:—

POTATOES : EXPORTS, AUSTRALIA.

Particulars.	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.
Quantity tons	3,478	3,958	7,410	4,489	4,742
Value £'000	225	263	227	152	134

Imports of potatoes into Australia in 1959-60 amounted to 1 cwt. only, valued at £1.

§ 11. Onions.

1. **Area, Production and Yield per Acre.**—Australia's supply of onions comes chiefly from Victoria, which accounted for 43 per cent. of the total area and 49 per cent. of the quantity produced in 1959-60. Queensland was next with 38 per cent. of the area and 26 per cent. of the production. The Victorian crop consists almost entirely of brown onions of good keeping qualities, and the bulk of the crop is grown in a small section of the Western Division of the State, where soil conditions have been found to be particularly suitable for onion growing on a commercial scale. Details of the area, production and yield per acre are given in the following table for the years 1955-56 to 1959-60 together with averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

ONIONS : AREA, PRODUCTION AND AVERAGE YIELD.

Year—								
1955-56 ..	5.53	6.08	3.69	9.37	11.05	6.36	5.25	5.69
1956-57 ..	5.02	5.95	4.38	9.23	10.76	4.07	6.40	5.78
1957-58 ..	4.70	7.58	4.34	8.57	10.00	5.03	8.44	6.36
1958-59 ..	5.58	7.17	3.98	8.83	12.70	4.62	8.15	6.22
1959-60 ..	5.25	6.96	4.14	8.80	12.32	4.66	3.25	6.10

2. **Gross Value of Onion Crop.**—The estimated gross value of the onion crop and the value per acre are shown in the following table for the 1959-60 season:—

ONIONS : VALUE OF CROP, 1959-60.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	174	1,012	1,101	319	229	6	..	2,841
Value per acre £	249	253	310	498	584	207	..	305

3. **Consumption.**—The annual consumption of onions in Australia averaged 61,500 tons or 13.9 lb. per head of population during the three years ended 1959-60. These figures exclude an estimated wastage which averaged 3,000 tons per annum.

4. **Exports.**—Onions are the only root crop, other than potatoes, in which any considerable overseas trade is carried on by Australia. In 1959-60, exports amounted to 1,124 tons, valued at £70,052, and were shipped mainly to New Caledonia and Australian Territories. The quantity of exports in 1958-59 was 1,998 tons, valued at £61,793. Imports of onions, while not recorded separately prior to 1959-60, amounted to 2,061 tons, valued at £72,195 in that year.

§ 12. Hay.

1. General.—(i) *Area and Production.* As already stated, the chief crop in Australia in terms of area, is wheat grown for grain. Up to and including 1946–47, hay was next, but in recent years it has dropped in relative importance. In 1959–60, the areas sown to green fodder, oats for grain, and barley (two and six row) for grains were larger than that sown to hay.

In 1959–60, the hay area represented 8.1 per cent. of the total area cropped. A graph showing the area sown to hay crops since 1900–01 appears on page 897. In most European countries, hay consists almost entirely of meadow and other grasses, but in Australia a very large proportion consists of oats, lucerne and wheat. The area, production and yield per acre of hay of all kinds in the several States during the years 1955–56 to 1959–60 and the averages for the three-year periods ended 1938–39, 1948–49 and 1958–59 are shown below:—

HAY : AREA, PRODUCTION AND YIELD PER ACRE.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.

1956–57 ..	538	1,423	96	453	289	238	6	3,043
1957–58 ..	535	1,413	122	304	386	205	4	2,969
1958–59 ..	1,183	2,299	169	672	455	302	10	5,090
1959–60 ..	779	1,351	179	207	433	221	7	3,177
YIELD PER ACRE (TONS).								
Average for three years ended—								
1938–39 ..	1.14	1.05	1.40	1.09	0.99	1.48	1.00	1.09
1948–49 ..	1.20	1.54	1.80	1.38	1.12	1.65	1.33	1.38
1958–59 ..	1.35	1.75	2.02	1.42	1.24	1.92	1.75	1.56
Year—								
1955–56 ..	1.51	1.74	2.17	1.41	1.42	1.91	2.08	1.62
1956–57 ..	1.47	1.82	2.12	1.52	1.19	1.94	1.81	1.63
1957–58 ..	0.96	1.62	1.77	1.05	1.14	1.86	1.39	1.33
1958–59 ..	1.58	1.79	2.17	1.60	1.37	1.96	1.98	1.69
1959–60 ..	1.62	1.59	2.21	0.84	1.36	1.75	2.15	1.51

For a number of reasons, particularly the variations in the relative prices of grain and hay and the favourableness or otherwise of the season for a grain crop, the area of hay is apt to fluctuate considerably. The area under hay in Australia during the season 1915–16, 3,598,000 acres, was the largest on record, while the area recorded in 1958–59, 3,018,000 acres, was the largest since 1938–39. The area in 1959–60 was only 2,105,000 acres.

A graph showing the production of hay appears on page 899.

(ii) *Varieties Grown.* Information regarding areas cut for hay in 1959–60 is given in the following table.

HAY : AREA OF VARIOUS KINDS GROWN, 1959-60.
(Acres.)

State.	Wheaten.	Oaten.	Lucerne.	Other.	Total
New South Wales	82,429	58,722	166,926	174,039	482,116
Victoria	41,708	207,351	61,443	537,046	847,548
Queensland	7,049	2,713	65,785	5,272	80,819
South Australia	52,076	118,149	21,174	53,900	245,299
Western Australia	53,399	176,565	755	88,767	319,486
Tasmania	2,069	15,843	1,088	107,544	126,544
Northern Territory	326	326
Australian Capital Territory ..	24	754	1,267	1,014	3,059
Australia	238,754	580,097	318,438	967,908	2,105,197

For all States and the Territories combined, the proportions of the areas sown to the principal kinds of hay in 1959-60 were 28 per cent. for oaten, 15 per cent. for lucerne, 41 per cent. for wheaten, and 46 per cent. for other hay. In that year, oaten hay predominated in South Australia and Western Australia, lucerne in Queensland, and meadow and grass hay in the remaining States.

2. **Value of Hay Crop.**—The following table shows the estimated gross value, and the value per acre, of the hay crop of the several States for the 1959-60 season:—

HAY : VALUE OF CROP, 1959-60.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	7,334	14,583	3,033	3,403	3,877	2,104	93	(a) 34,433
Value per acre £	15.2	17.2	37.5	13.9	12.1	16.6	30.4	16.4

(a) Includes £6,000 in the Northern Territory.

3. **Farm Stocks of Hay.**—Particulars of stocks so held at 31st March in each year 1956 to 1960 are given in the table below.

STOCKS OF HAY HELD ON FARMS.
(Tons.)

31st March—	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Australia.
1956 ..	830,619	1,870,214	149,187	474,456	306,586	270,138	7,778	3,908,978
1957 ..	775,464	2,008,678	156,599	555,681	222,941	296,257	7,617	4,023,237
1958 ..	553,691	1,643,876	89,897	384,143	211,069	256,199	3,492	3,142,367
1959 ..	1,463,334	2,464,050	166,657	679,003	290,988	311,825	9,323	5,385,180
1960 ..	1,535,252	1,766,857	203,675	304,227	292,086	255,471	10,778	4,368,346

4. **Exports.**—Under normal conditions, hay, whether whole or in the form of chaff, is somewhat bulky for oversea trade, and consequently does not figure largely among the exports of Australia. During 1959-60, exports amounting to 1,822 tons, valued at £35,007 were made principally to Singapore, the Federation of Malaya and Hong Kong. Imports of hay were 4 tons valued at £70 in 1959-60.

§ 13. Green Fodder.

1. **Nature and Extent.**—Considerable areas are devoted to the growing of green fodder, mainly in connexion with the dairying industry. In the 1959-60 season, green fodder ranked second to wheat in area of crops throughout Australia. A graph showing the area sown to green fodder appears on page 897. The areas recorded in respect of green fodder include areas of crops cut for feeding to live-stock as green fodder, or ensilage, together with areas fed off to stock as green forage. Included with the latter are areas which may have been sown with the intention of harvesting for grain, but which, owing to adverse conditions, showed no promise of producing grain or even hay and were fed off to live-stock. The principal crops cut for green fodder are oats, wheat and lucerne, while small quantities

of barley, sorghum, maize, rye and sugar-cane are also used in this way. In 1959-60, the area under green fodder (4,094,094 acres) consisted of oats (1,810,284 acres), lucerne (1,475,492 acres), wheat (163,693 acres), barley (141,033 acres), sorghum (122,595 acres), maize (34,847 acres), rye (22,492 acres), sugar cane (1,652 acres) and other crops (322,006 acres). Particulars concerning the area of green fodder in the several States during each of the years 1955-56 to 1959-60 are given in the following table.

GREEN FODDER : AREA.
(Acres.)

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
1955-56	826,789	345,723	689,469	583,559	666,398	54,401	..	970	3,167,309
1956-57	813,642	333,115	640,316	657,967	752,072	48,435	2	772	3,246,321
1957-58	993,039	465,009	714,048	748,089	770,739	54,094	4	1,032	3,746,054
1958-59	1,238,314	319,150	638,667	550,366	769,199	61,322	273	667	3,577,958
1959-60	1,578,759	422,237	725,155	595,713	708,793	62,229	240	968	4,094,094

2. Value of Green Fodder Crops.—The value of these crops is variously estimated in the several States, but the Australian total, excluding Western Australia, may be taken as approximately £7,000,000 for the 1958-59 season and £7,600,000 for the 1959-60 season.

§ 14. Sugar-cane.

1. Area.—Sugar-cane growing appears to have commenced in Australia in or about 1862, and is confined to New South Wales and Queensland. A brief outline of the development of the industry was included in earlier issues of the Official Year Book (*see* No. 38, page 985). The area of sugar cane in Australia for the seasons 1955-56 to 1959-60 and the averages for the three year-periods ended 1938-39, 1948-49 and 1958-59 are shown in the following table:—

SUGAR-CANE : AREA.(a)
(Acres.)

Season.	New South Wales.			Queensland.			Australia.			Total.
	Area crushed.	Area of stand-over and newly-planted cane.	Area cut for plants.	Area crushed.	Area of stand-over and newly-planted cane.	Area cut for plants.	Area crushed.	Area of stand-over and newly-planted cane.	Area cut for plants.	
Average for three years ended—										
1938-39	10,468	10,366	(b)	247,632	89,690	(b)	258,100	100,056	(b)	(b)
1948-49	7,687	8,666	338	230,905	90,448	12,891	238,592	99,114	13,229	350,935
1958-59	11,094	9,462	619	360,709	110,786	12,596	371,803	120,248	13,215	505,266
Year—										
1955-56	7,522	8,728	670	365,252	104,782	12,111	372,774	113,510	12,781	499,065
1956-57	9,182	9,419	522	360,932	106,734	12,450	370,114	116,153	12,972	499,239
1957-58	10,734	9,241	720	364,985	107,424	12,946	375,719	116,665	13,666	506,050
1958-59	13,368	9,727	616	356,210	118,200	12,391	369,578	127,927	13,007	510,512
1959-60	14,248	10,510	392	299,732	151,114	11,039	313,980	161,624	11,431	487,035

(a) Excludes areas cut for green fodder.

(b) Not available.

2. Productive and Unproductive Cane.—The areas shown in the preceding table do not include the small acreage cut for green fodder, which in 1959-60 amounted to 1,652 acres. The whole area planted is not cut for crushing during any one season, there being always a considerable amount of young and "stand-over" cane as well as a small quantity required for plants. Thus the season in which the highest acreage is recorded may not show the greatest area of cane cut for crushing. In 1959-60, a considerably larger area than that actually cut was available for crushing but because of restrictions on production (*see* para 8, page 923) remained as standover cane. As a result the area of standover cane was much higher than normal in 1959-60.

3. Production of Cane and Sugar.—For Queensland, statistics of the production of sugar-cane are not available for seasons prior to 1897-98. In that season, the total for Australia was 1,073,883 tons, compared with 9,002,258 tons in the 1959-60 season. The record production of 10,212,593 tons was achieved in 1958-59.

In the following table, production data relating to cane and raw sugar are shown for the seasons 1955–56 to 1959–60 and averages for the three-year periods ended 1938–39, 1948–49 and 1958–59:—

SUGAR-CANE : PRODUCTION OF CANE AND SUGAR.
(Tons.)

Season.	New South Wales.		Queensland.		Australia.	
	Cane.	Sugar.(a)	Cane.	Sugar.(a)	Cane.	Sugar.(a)
Average for three years ended—						
1938–39	324,531	43,419	5,215,217	760,994	5,539,748	804,413
1948–49	283,613	35,444	4,767,291	700,053	5,050,904	735,497
1958–59	356,324	43,881	9,221,497	1,260,564	9,577,821	1,304,445
Year—						
1955–56	284,539	36,028	8,616,163	1,135,685	8,900,702	1,171,713
1956–57	294,087	35,918	8,978,081	1,171,879	9,272,168	1,207,797
1957–58	303,086	36,854	8,945,617	1,256,271	9,248,703	1,293,125
1958–59	471,798	58,870	9,740,795	1,353,543	10,212,593	1,412,413
1959–60	574,527	70,677	8,427,731	1,217,803	9,002,258	1,288,480

(a) Raw sugar at 94 net titre.

The production of raw sugar in Australia in 1959–60 amounted to 1,288,480 tons manufactured from 9,002,258 tons of cane.

Official annual data are not available regarding the total number of persons engaged in the sugar industry in New South Wales and Queensland. However, according to data obtained from the population census of 30th June, 1954, the number of persons engaged in the sugar-cane industry in New South Wales and Queensland comprised 20,185 males and 431 females, a total of 20,616 persons, of whom 4,245 were employers and 5,118 were self-employed.

The number of separate holdings growing 5 acres or more of cane was 7,273 in 1959–60.

4. Average Production of Cane Sugar.—Owing to climatic variations, comparison between the average yields of cane per productive acre in Queensland and New South Wales cannot be made accurately except on an annual basis. In New South Wales, the crop matures in from 20 to 24 months, whereas in Queensland a period of from 12 to 14 months is sufficient. The average yields of cane and sugar per acre for the years 1955–56 to 1959–60 and for the three-year periods ended 1938–39, 1948–49 and 1958–59 are shown below. Allowance should be made in interpreting these figures for the disparity in maturing periods noted above.

SUGAR-CANE AND SUGAR : YIELD PER ACRE.
(Tons.)

Season.	New South Wales.			Queensland.			Australia.		
	Cane per acre Crushed.	Sugar per acre Crushed.	Cane to each ton of Sugar.	Cane per acre Crushed.	Sugar per acre Crushed.	Cane to each ton of Sugar.	Cane per acre Crushed.	Sugar per acre Crushed.	Cane to each ton of Sugar.
Average for three years ended—									
1938–39	31.00	4.15	7.47	21.06	3.07	6.85	21.46	3.12	6.89
1948–49	36.90	4.61	8.00	20.65	3.03	6.81	21.17	3.08	6.87
1958–59	32.12	3.96	8.12	25.57	3.49	7.32	25.76	3.52	7.34
Year—									
1955–56	37.83	4.79	7.90	23.59	3.11	7.59	23.88	3.14	7.60
1956–57	32.03	3.91	8.19	24.87	3.25	7.66	25.05	3.26	7.68
1957–58	28.24	3.43	8.22	24.51	3.44	7.12	24.62	3.44	7.15
1958–59	35.29	4.40	8.01	27.35	3.80	7.20	27.63	3.82	7.23
1959–60	40.32	4.96	8.41	28.12	4.06	6.92	28.67	4.10	6.99

5. **Quality of Cane.**—The quantity of cane required to produce a ton of sugar varies with the variety planted, the district, and the season. In 1959–60, a record yield of 4.10 tons of sugar per acre was achieved.

The Bureau of Sugar Experiment Stations in Queensland is rendering useful service to the sugar industry by advocating and demonstrating better methods of cultivation and the more scientific use of fertilizers, lime, etc., and by producing and distributing improved varieties of cane.

6. **Production and Utilization.**—Details of the production and utilization of raw sugar for the years 1955–56 to 1959–60 are shown below. It should be noted that the details of sugar production refer to the annual periods shown, without regard to the season in which the sugar was produced. Consumption is shown in terms of refined sugar, including that consumed in manufactured products.

RAW SUGAR : PRODUCTION AND UTILIZATION, AUSTRALIA.

Year.	Changes in Stocks.	Pro- duction.	Exports. (a)	Miscel- laneous Uses.(b)	Consumption in Australia.(a)	
					Total.(c)	Per Head. (c)
	'000 tons.	'000 tons.	'000 tons.	'000 tons.	'000 tons.	lb.
1955–56	+40.5	1158.0	617.0	21.7	478.8	115.1
1956–57	+21.1	1217.7	698.7	20.0	477.9	112.3
1957–58	–21.1	1222.2	733.8	29.4	480.1	110.3
1958–59	+10.3	1353.4	827.4	18.4	497.3	111.9

(a) Includes sugar content of manufactured products.
in refining.

(b) Includes industrial uses and losses

(c) In terms of refined sugar.

7. **Consumption in Factories.**—The quantity of refined sugar used in factories in 1959–60 amounted to 293,822 tons compared with 274,575 tons in 1958–59 and 278,764 tons in 1957–58. Particulars of sugar used in establishments not classified as factories are not available, and consequently these quantities are deficient to that extent. In 1959–60, consumption by factories engaged in the production of jams, jellies and preserved fruit amounted to 82,231 tons, by those producing confectionery, ice cream, etc., to 60,033 tons, by breweries to 43,775 tons and by factories producing aerated waters, cordials, etc. to 44,565 tons.

8. **Control of Cane Production in Queensland.**—Agreements between the Commonwealth and Queensland Governments have fixed the wholesale price of sugar and sugar products from time to time. Details of prices are shown in para. 14 of this section (see page 925).

The Queensland Government acquires the whole of the sugar production of that State and of New South Wales by legislation and private agreement respectively. The net proceeds of all sugar sold are pooled and a uniform price paid to mills.

Sugar production barely met local requirements in 1923, but increased rapidly until 1925 when approximately 44 per cent. of the production was exported. Steps were taken by the Government to restrict planting of new areas and production was fairly stable until 1929. In that year, the pool was reorganized and mills received the full pool price for sugar up to the amount of their previous maximum production, further output being acquired at export prices.

Between 1929 and 1939, production rose by more than 70 per cent. despite the restrictions above-mentioned and the fact that export prices were generally less than half the pool price.

In 1939, following the International Sugar Agreement, which limited exports, the Queensland Government limited the pool (mill peaks) to 737,000 tons in respect of Queensland production. Mill quotas were allotted on the understanding that mills would allot quotas to individual growers. Mill peaks have been raised since 1939, following the negotiation of the Commonwealth Countries Sugar Marketing Agreement of 1949, which allowed the Queensland Government to initiate a planned expansion of the industry. In 1959, they were 1,213,500 tons and in 1960, 1,214,600 tons.

9. **Sugar Agreement in Australia—Embargo on Imports, etc.**—Reference was made in Official Year Book No. 37, pages 940–41, to the agreement operating between the Commonwealth and Queensland Governments in respect of the sugar industry in Australia. Briefly, the agreement places an embargo on sugar importations and fixes the price of sugar consumed in Australia. The current agreement operates for a five year period from 1st September, 1956, to 31st August, 1961. On 28th November, 1960, the Commonwealth Government appointed a Committee of Enquiry to investigate all facets of the sugar and canned fruits industries. At the end of May, 1961, the Committee had concluded its hearings, but had not submitted a report.

10. **International Sugar Agreement.**—The International Sugar Agreement of 1937 was superseded by the International Sugar Agreement of 1953 which came into force on 1st January, 1954. Details of the 1937 Agreement were given in Official Year Book No. 40, pages 881 and 882, and previous issues.

The 1953 agreement, which was amended by protocol from 1st January, 1957, was for the five year period ended 31st December, 1958.

In October, 1958, a new agreement was negotiated at a conference held in Geneva under the auspices of the United Nations. The new agreement, which follows the lines of the 1953 agreement, is for five years commencing 1st January, 1959, with provision for a review during the third year. It is designed to assure supplies of sugar to importing countries and markets for sugar to exporting countries at equitable and stable prices, to facilitate a steady increase in the consumption of sugar and a corresponding increase in the supply of sugar, and, in general, to further international co-operation in connexion with world sugar problems. Basic export quotas of exporting countries are established and provision is made for adjustment of quotas according to fluctuations in the world sugar price. A number of price levels are stipulated at which the International Sugar Council may or must take action. The Council has considerable discretion to adjust quotas during the quota year.

Under the 1953 agreement, the British Commonwealth, as a whole, was granted an export quota of 2,375,000 tons rising to 2,500,000 tons in 1958. Under the 1958 agreement, the quota remains at 2,500,000 tons for 1959 but is increased by 75,000 tons to 2,575,000 tons in 1960 and 1961. This quota is not subject to the fluctuations mentioned above. The allocation of the total quota among exporting members of the British Commonwealth is a matter for internal arrangement by those countries and territories themselves. Australia's quota for 1960 and 1961 was approximately 651,000 tons.

Details of the marketing arrangements for Australian sugar are given in paragraph 15 below.

11. **Net Return for Sugar Crop.**—Details of the disposal of the crop, net value of exports and the average price realized during each of the years 1955–56 to 1959–60 are shown in the following table:—

RAW SUGAR(a): NET RETURNS, AUSTRALIA.

Year.		Proportion Exported. (b)	Net Value of Exports per Ton. (b)			Average Price per Ton for Whole Crop.	Estimated Value of Crop.
		Per cent.	£	s.	d.	£ s. d.	£'000.
1955–56	53.46	38	11	4	42 9 0	49,727
1956–57	56.01	41	6	5	46 14 3	56,403
1957–58	57.44	45	16	8	49 7 6	63,829
1958–59	60.53	39	8	2	45 9 11	64,263
1959–60	55.42	40	6	2	47 9 11	61,131

(a) 94 net titre.

(b) As supplied by the Queensland Sugar Board.

The estimated value of the raw sugar produced has been based upon details taken from the audited accounts of the Queensland Sugar Board. The values stated represent the gross receipts from sales in Australia and overseas, less refining costs, freight, administrative charges, etc., and export charges, but including concessions to the fruit industry and other rebates which in 1959–60 amounted to £662,207. The value thus obtained represents the net market value of all raw sugar sold, which, less the rebates, is divided between the growers and millers in the approximate proportions of 70 per cent. and 30 per cent. respectively.

12. **Exports of Sugar.**—Particulars of the exports of cane sugar (raw and refined) for each year from 1955–56 to 1959–60 are as follows:—

SUGAR : EXPORTS, AUSTRALIA.

Particulars.	1955–56.	1956–57.	1957–58.	1958–59.	1959–60.
Quantity tons	592,229	675,282	707,806	802,971	701,319
Value £'000	24,723	28,780	34,996	32,163	26,671

13. **Sugar By-products.**—Large quantities of molasses are produced as a by-product in the sugar mills. Details for a series of years of the quantities produced and the amounts used for distilling, fuel, manure and other purposes will be found in Chapter VI.—Manufacturing Industry.

Other by-products include industrial chemicals and building boards. These boards are made from the residue of crushed fibre after removal of the sugar content from sugar-cane and possess high insulating and sound-absorbing properties which make them particularly suitable for use in walls and ceilings.

14. **Sugar Prices.**—The prices of sugar in Australia, from 1952 to 1959 in the case of raw sugar, and from 1952 to 1961 in the case of refined sugar (as determined under the Sugar Agreement in Australia—see para. 9 above), are shown in the following table:—

SUGAR : PRICES IN AUSTRALIA.

Year.	Raw Sugar, 94 Net Titre.			Refined Sugar.		
	Average Return per Ton Received by Millers and Growers for—			Date of Determination.	Wholesale Price to Retailer per Ton.	Retail Price, Capital Cities per lb.
	Home Consumption.	Exports.(a)	Whole Crop. (a)			
	£ s. d.	£ s. d.	£ s. d.		£ s. d.	d.
1952 ..	44 3 0	41 2 0	42 12 9	24.3.52 to 12.10.52	65 12 10	8
1953 ..	47 18 6	38 13 9	42 10 8	13.10.52 to 13.5.56	73 16 11	9
1954 ..	47 1 0	37 8 0	41 6 11	14.5.56 to 15.5.60	82 1 0	10
1955 ..	46 18 0	38 11 6	42 9 0	16.5.60 to 31.8.61	90 5 2	11
1956 ..	53 11 6	41 6 5	46 14 3			
1957 ..	54 3 0	45 16 8	49 7 6			
1958 ..	54 15 0	39 8 2	45 9 11			
1959 ..	56 8 6	40 6 2	47 9 11			

(a) Including "Excess" Sugar.

15. **Marketing Arrangements.**—From 1939 to 1952, the British Ministry of Food purchased Australia's surplus raw sugar at prices negotiated annually and varying from £stg.11 5s. in 1939 to £stg.38 10s. a ton in 1952 including tariff preference (for prices in other years see earlier issues of the Year Book).

On 1st January, 1953, the British Commonwealth Sugar Agreement became effective. This agreement, which has been extended to 1965, provides for Australia to export a maximum of 600,000 tons per annum, subject to annual review. Of the 600,000 tons, 315,000 tons is purchased by the United Kingdom Government at an annually negotiated price and the balance is sold at world market prices plus tariff preferences where applicable. The negotiated prices for 1959 and 1960 were £stg.45 2s. and £stg.43 16s. 8d. In 1960 and 1961, Australia has an additional quota of 51,000 tons as her share of the increased allocation to Commonwealth exporters under the current International Sugar Agreement. This tonnage will not receive the benefit of tariff preferences.

The Sugar Bill introduced into the House of Commons on 5th July, 1955, provided for the reversion of dealings in sugar in the United Kingdom to a trader to trader basis as from 1st January, 1957. However, under the Bill, a Sugar Board was created which is responsible for the purchase of the negotiated price sugar which the United Kingdom Government has contracted to take under the British Commonwealth Sugar Agreement.

16. Fruit Industry Sugar Concession Committee and Sugar Rebates.—The Fruit Industry Sugar Concession Committee was established by agreement between the Commonwealth and Queensland Governments and administers a fund contributed by the Queensland Government on behalf of the sugar industry.

Until 15th May, 1960, a rebate of £2 4s. per ton of refined sugar used in processing approved fruit products was paid to Australian manufacturers, provided they bought the fresh fruit at prices not lower than those declared by the Committee as reasonable. This was increased to £5 per ton from 16th May, 1960.

An export sugar rebate is also paid by the Committee to exporters of approved fruit products to ensure that manufacturers do not pay higher prices for Australian sugar than the price for which the cheapest imported sugar could be landed duty free in Australia.

Under the Supplementary Sugar Agreement for 1956–1961, the Queensland Government contributes to the fund £264,000 annually and also reimburses the Committee for the actual expenditure on export sugar rebates. Any money remaining in the fund after the payment of rebates and administrative expenses may be used by the Committee for the promotion of the use and sale of fruit products, or for scientific research for the purpose of increasing the yield per acre of Australian fruit.

17. Bulk Handling of Sugar.—The conversion of the Australian sugar industry to bulk handling and mechanized loading and unloading of raw sugar is well advanced. About 80 per cent. of raw sugar in Australia is now handled in bulk without being bagged at any stage.

Terminals for the bulk loading of sugar were opened at Mackay in 1957, at Lucinda and Bundaberg in 1958, at Townsville in 1959, and at Moorilyan in 1960.

Bulk receiving facilities are in operation, or in the course of construction, at all Australian refineries.

§ 15. Vineyards.

1. Progress of Cultivation.—(i) *Area of Vineyards.* Since the early days of Australian settlement, the expansion of the cultivation of vines has been most rapid in Victoria and South Australia, the area under vineyards in the 1959–60 season in these two States comprising 78 per cent. of the total area. The purposes for which grapes are grown in Australia are (a) for wine-making, (b) for table use and (c) for drying. The total area of vines in the several States during each of the years 1955–56 to 1959–60 and the averages for the three-year periods ended 1938–39, 1948–49 and 1958–59 are shown in the following table:—

VINEYARDS : AREA.

(Acres.)

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Aust.(a)
Average for three years ended—						
1938–39	16,824	42,071	2,670	57,185	6,197	124,947
1948–49	16,482	44,114	3,099	58,971	9,965	132,631
1958–59	17,210	44,823	2,926	57,199	8,967	131,125
Years—						
1955–56	18,099	44,817	2,916	59,862	9,107	134,801
1956–57	17,394	44,902	2,916	57,409	8,996	131,617
1957–58	16,984	44,767	2,821	57,439	9,023	131,034
1958–59	17,252	44,801	3,041	56,749	8,881	130,724
1959–60—						
Wine	6,896	4,515	285	43,488	3,602	58,786
Table	2,599	2,065	2,798	272	1,496	9,230
Drying	7,741	37,549	..	13,093	3,853	62,236
Total	17,236	44,129	3,083	56,853	8,951	130,252

(a) Excludes particulars for Australian Capital Territory and Northern Territory.

NOTE.—There are no vineyards in Tasmania.

(ii) *Wine Production, Bounties, etc.* The total production of wine (beverage and distillation) in Australia has shown a marked increase in recent years, rising from 14.3 million gallons in 1938-39 to 28.4 million gallons in 1959-60. In the same period, consumption of beverage wine in Australia has increased from 4.5 million gallons (0.7 gallons per head of population) to 11.7 million gallons (1.16 gallons per head of population). For many years prior to the 1939-45 War, a bounty was paid from the Wine Export Encouragement Account on wine shipped overseas under the provisions of the Wine Export Bounty Act 1930. Details of the bounty, payment of which was discontinued in 1947, may be found in Official Year Book No. 39, page 992.

(iii) *Wine Research Trust Fund.* Under the Wine Research Act of 1955, the sum of £500,000 was made available from a Wine Industry Assistance Account (established by the Wine Export Bounty Act of 1947) for the establishment of the Australian Wine Research Institute, which is a limited liability company established under the Companies Act of South Australia. When the Export Bounty on wine was abolished in 1947, there remained £1.1 million in the Wine Export Encouragement Account, referred to in (ii), above. This sum had been collected from an additional Excise duty on spirit used in fortifying wine, which was also abolished in 1947.

The quantity of wine produced in the several States during the 1955-56 to 1959-60 seasons, together with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59, are shown in the following table:—

WINE : PRODUCTION.(a)
(’000 Gallons.)

Season.	N.S.W.	Victoria.	Q’land.	S. Aust.	W. Aust.	Australia.
Average for three years ended—						
1938-39	2,712	1,359	31	14,021	396	18,519
1948-49	4,178	3,040	31	25,906	689	33,844
1958-59	3,974	2,435	36	25,190	743	32,378
Years—						
1955-56	2,327	1,342	37	18,403	786	22,895
1956-57	3,412	2,369	38	24,038	886	30,743
1957-58	4,150	2,583	21	26,400	700	33,854
1958-59	4,360	2,354	49	25,131	644	32,538
1959-60	3,835	2,147	37	21,576	801	28,396

(a) Net factory and farm production of beverage and distillation wine excluding the liquid gallage of spirits added in wine fortifying.

2. Imports and Exports of Wine.—(i) *Imports.* Imports for 1959-60 amounted to 60,029 gallons valued at £130,265 compared with 51,812 gallons valued at £121,599 in the previous year.

During 1959-60, Italy supplied 20,208 gallons valued at £24,558, France supplied 19,864 gallons valued at £67,776, and the Federal Republic of Germany supplied 5,327 gallons valued at £12,918. The bulk of the sparkling wines were obtained from France.

(ii) *Exports.* Exports in 1959-60 totalled 1,745,347 gallons, of which the United Kingdom received 1,312,999 gallons, New Zealand 54,791 gallons, Canada 269,520 gallons, and other countries 108,037 gallons.

Exports for the five years ended 1959-60 are shown in the following table:—

WINE : EXPORTS FROM AUSTRALIA.

Year.	Quantity (Gallons).			Value (£).		
	Sparkling.	Other.	Total.	Sparkling.	Other.	Total.
1955-56.. ..	5,997	1,197,995	1,203,992	19,833	714,235	734,068
1956-57.. ..	6,701	1,743,648	1,750,349	23,737	1,108,314	1,132,051
1957-58.. ..	4,872	1,484,656	1,489,528	18,194	978,616	996,810
1958-59.. ..	5,203	1,742,046	1,747,249	10,989	1,141,036	1,152,025
1959-60.. ..	6,480	1,738,867	1,745,347	19,898	1,245,755	1,265,653

3. **Oversea Marketing of Wine.**—(i) *The Wine Overseas Marketing Act 1929–1954.* This Act was introduced to place the oversea marketing of surplus wine on an orderly basis. The Australian Wine Board (formerly The Wine Overseas Marketing Board), consisting of representatives from wineries and distilleries, grape-growers and the Commonwealth Government, supervises the sale and distribution of Australian wine exported and recommends conditions under which export licences should be issued. The Board also contributes to wine publicity and trade promotion activities both in Australia and overseas. A London office is maintained by the Board.

(ii) *The Wine Grapes Charges Act 1929–1957.* This Act provides for the imposition of a levy on all grapes used in Australia for the manufacture of wine or spirit used for fortifying wine. The proceeds of the levy are used to defray the administrative and other expenses of the Board, and provision is made for such exemptions from the levy as the Board may recommend.

4. **Other Viticultural Products.**—(i) *Table Grapes.* Grapes for table use are grown in all States except Tasmania, but the area of this type was only about 7 per cent. of the productive area of vines in 1959–60. The quantities of table grapes produced during the season 1959–60 in each State are shown in § 3 of this chapter. (See p. 887.)

(ii) *Raisins and Currants.* The quantities of raisins (including sultanas and lexias) and currants dried during each of the seasons 1955–56 to 1959–60 and the averages for the three-year periods ended 1938–39, 1948–49 and 1958–59 are shown in the following table:—

RAISINS(a) AND CURRANTS : PRODUCTION.

(Tons.)

Season.	N.S. Wales.		Victoria.		South Aust.		Western Aust.		Australia.	
	Raisins.	Currants.	Raisins.	Currants.	Raisins.	Currants.	Raisins.	Currants.	Raisins.	Currants.
Average for three years ended—										
1938–39 ..	5,464	1,163	39,810	8,953	13,215	9,009	723	2,179	59,212	21,304
1948–49 ..	5,429	994	40,027	7,380	8,811	5,243	580	3,179	54,847	16,796
1958–59 ..	10,300	705	53,178	4,294	11,115	4,432	118	1,746	74,711	11,177
Year—										
1955–56 ..	4,313	725	29,417	5,150	11,699	5,009	95	2,463	45,524	13,347
1956–57 ..	9,380	585	50,085	3,954	9,716	3,941	148	2,048	69,329	10,528
1957–58 ..	10,608	674	56,742	4,153	11,306	4,824	111	2,136	78,767	11,787
1958–59 ..	10,914	856	52,707	4,776	12,323	4,531	94	1,055	76,038	11,218
1959–60 ..	7,722	462	44,764	3,331	9,192	2,844	73	1,402	61,751	8,039

(a) Including sultanas and lexias.

5. **Production and Disposal of Dried Vine Fruit.**—As the production of dried vine fruit is far in excess of Australia's requirements, considerable quantities are available for export. Total production during the 1959–60 season amounted to 69,790 tons, while exports for the 12 months ended December, 1960, were 47,728 tons, leaving an estimated 22,062 tons available for Australian consumption from that season's production. Australian consumption includes amounts delivered to biscuit manufacturers, bakeries, etc., as well as retail sales for household consumption.

The following table shows the oversea exports of raisins and currants during each of the years 1955-56 to 1959-60:—

RAISINS AND CURRANTS(a) : EXPORTS, AUSTRALIA.

Year.	Raisins.		Currants.		Total Raisins and Currants.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	Tons.	£'000.	Tons.	£'000.	Tons.	£'000.
1955-56..	51,734	6,224	9,561	1,151	61,295	7,375
1956-57..	38,496	5,377	6,521	831	45,017	6,208
1957-58..	52,297	8,019	7,398	938	59,695	8,957
1958-59..	68,245	11,215	7,585	1,051	75,830	12,266
1959-60..	45,634	7,726	4,540	637	50,174	8,363

* (a) Excludes quantities exported as mincemeat.

The chief countries importing Australian raisins and currants are the United Kingdom, Canada and New Zealand, the quantities exported thereto in 1959-60 being 25,663 tons, 15,257 tons and 5,302 tons respectively.

6. Oversea Marketing of Dried Fruits.—(i) *The Dried Fruits Export Control Act 1924-1953.* This Act was passed to organize oversea marketing of Australian dried vine fruits. The Dried Fruits Control Board, consisting of growers' representatives, members with commercial experience in marketing dried fruits and a Government representative, controls the sale and distribution of dried fruit exports, recommends the licensing of exporters and contributes to dried vine fruits publicity activity overseas.

In conjunction with its London agency, the Board has improved dried fruit marketing overseas by its system of appraisement, regulation of shipments and advertising.

(ii) *Dried Fruits Export Charges Act 1924-1929:* This Act provides for a levy on exports of dried fruits to defray costs and expenses incurred by the Board. Provision is made for exemption from the levy upon recommendation by the Board.

(iii) *Post-war Contracts.* For details of the agreements which were negotiated between the Governments of the United Kingdom and Australia during the period 1946-1953, see Official Year Book No. 40, page 888. From 1st December, 1953, exports have been made on a trader to trader basis.

§ 16. Orchards and Fruit Gardens.

1. Area.—The largest area of orchards and fruit-gardens prior to the 1939-45 War was 281,899 acres, which was attained in 1933-34. Since then, the acreage has varied but has not fallen below 260,000 acres. It reached 290,000 acres in 1947-48 but declined somewhat in subsequent years, rising again to 289,000 acres in 1959-60.

ORCHARDS AND FRUIT-GARDENS: AREA.

(Acres.)

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
1955-56	93,482	65,214	41,253	32,998	21,943	23,795	104	118	278,907

2. **Varieties of Crops.**—The varieties of fruit grown differ in various parts of the States, ranging from pineapples, papaws and mangoes in the tropics, to strawberries, raspberries and currants in the colder parts of the temperate zone. In New South Wales, citrus fruits (oranges, lemons, etc.) and bananas are the principal crops, although apples, peaches, plums, pears and cherries are grown extensively. The principal varieties grown in Victoria are apples, peaches, pears, oranges and apricots. In Queensland, pineapples, apples, bananas, oranges, mandarins, peaches and plums are the varieties most largely cultivated. In South Australia, in addition to apples, oranges, apricots, peaches and pears, almonds and olives are grown extensively. In Western Australia, apples, oranges, pears and plums are the chief varieties. In Tasmania, apples occupy over three-quarters of the fruit-growing area, but small fruits, such as currants, raspberries and gooseberries are grown extensively, the balance of the area being mainly taken up with pears, apricots and plums. The following table shows the acreage—bearing and non-bearing—of the principal kinds of fruit, and the quantities produced.

ORCHARDS AND FRUIT-GARDENS, 1959-60.

4. **Production of Jams and Jellies and Preserved Fruit.**—In Australia, considerable quantities of fruit are used in the production of jams and jellies and for preserving. During 1959-60, output of jams, conserves, fruit spreads, etc. amounted to 84,702,000 lb. while output of preserved fruit amounted to 344,294,000 lb. Of the latter figure, pears accounted for 111,891,000 lb., peaches 96,457,000 lb. and pineapples 47,198,000 lb.

The recorded consumption of fruit in factories for all purposes, including that used for juice and cordial manufacture and for drying, was 248,069 tons in 1959-60.

5. **Consumption of Fruit and Fruit Products.**—Details of the estimated consumption of fruit and fruit products per head of population for a series of years ending 1959-60 are shown in Chapter XXX.—Miscellaneous, of this Year Book.

6. **Imports and Exports of Fruit.**—(i) *General.* The imports of fresh fruit into Australia are negligible, while those of dried fruit consist mainly of dates.

A considerable export trade in both fresh and dried fruit is carried on by Australia with overseas countries. The values of the shipments in 1959-60 amounted to £9,293,783 and £9,065,956 respectively. Apples constitute the bulk of the fresh fruit exported, although exports of pears and citrus fruit are considerable.

(ii) *Fresh Fruit.* Particulars of the Australian export trade in fresh and frozen fruit for each of the years 1955-56 to 1959-60 are shown in the following table:—

FRESH AND FROZEN FRUIT : EXPORTS, AUSTRALIA.

Year.	Apples.		Pears.		Citrus.		Total.(a)	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	'000 bus.	£'000.	'000 bus.	£'000.	'000 bus.	£'000.	'000 bus.	£'000.
1955-56	5,023	6,513	1,012	1,470	585	869	6,689	9,138
1956-57	3,969	5,582	1,020	1,731	613	926	5,670	8,585
1957-58	5,892	9,076	1,448	2,755	572	882	7,961	13,062
1958-59	4,948	6,625	1,100	1,783	415	664	6,559	9,413
1959-60	4,885	6,123	1,328	1,970	589	918	6,892	9,294

(a) Total, including exports of all other fresh and frozen fruit.

(iii) *Dried Tree Fruit.* The quantity and value of oversea imports and exports of dried fruit, other than raisins and currants, for the years 1955-56 to 1959-60 are shown below. Normally, the bulk of the imports consists of dates obtained almost entirely from Iraq.

DRIED TREE FRUIT(a): IMPORTS AND EXPORTS, AUSTRALIA.

Year.	Imports.(b)		Exports.	
	Quantity.	Value.	Quantity.	Value.
	'000 lb.	£'000.	'000 lb.	£'000.
1955-56	8,627	204	3,681	428
1956-57	7,052	158	2,887	378
1957-58	8,683	209	1,366	186
1958-59	8,411	203	3,352	482
1959-60	10,791	310	6,221	703

(a) Excludes raisins and currants referred to separately under Vineyards (see p. 929).
of dates and figs only.

(b) Imports

(iv) *Jams and Jellies.* Exports of jams and jellies reached large proportions immediately following the 1939-45 War and in 1946-47 amounted to 65,434,000 lb., compared with the average for the five years ended 1938-39 of 7,118,000 lb. Since 1949-50, when exports totalled 65,229,000 lb., there has been a marked decline and in 1959-60 exports amounted to only 6,512,838 lb., valued at £470,417. Imports of jams and jellies are negligible.

(v) *Preserved Fruit.* The total quantity of fruit preserved in liquid, or partly preserved in liquid, or pulped, imported into Australia during 1959-60 was 660,173 lb. valued at £137,240. Large quantities of fruit preserved in liquid are normally exported from Australia, the quantity recorded in 1959-60 being 199,944,662 lb. valued at £12,385,091. Exports in 1959-60 were principally made up of pears (89,980,557 lb.), peaches (53,624,956 lb.), apricots (14,133,784 lb.) and pineapples (30,314,381 lb.). In addition, the exports of pulped fruits during 1959-60 amounted to 5,294,606 lb. valued at £376,586.

7. Marketing of Apples and Pears.—(i) *Apple and Pear Organization Act 1938-1960.* This Act, which was passed by the Commonwealth Parliament at the request of the apple and pear industry, provides for the establishment of an Australian Apple and Pear Board comprising representatives of growers, exporters, employees and the Commonwealth Government. An oversea representative has also been appointed by the Board.

The function of the Board is the organization and control of exports of fresh apples and pears, and it has the power to regulate shipments, determine export quotas, allocate consignments from each State and recommend the licensing of exporters. The Board contributes to apple and pear publicity activities overseas.

(ii) *Apple and Pear Export Charges Act 1938-1960.* This Act provides for an export levy to meet the expenses of the Board.

(iii) *Apple and Pear Acquisition.* Exports of apples and pears were seriously curtailed during the war and the 1940 to 1948 crops were acquired and marketed under National Security and Defence Regulations. Details of the acquisition scheme will be found on pages 1003 and 1004 of Official Year Book No. 38 and in earlier issues.

8. Marketing of Canned Fruit.—(i) *The Canned Fruits Export Control Act 1926-1959.* This legislation was introduced with the object of organizing the oversea marketing of canned fruit. The Australian Canned Fruits Board, comprising members representing the Commonwealth Government, canners of apricots, peaches, pears, pineapples and fruit salad, and a representative of the growers of canning apricots, peaches and pears, was appointed to organize the oversea marketing of canned fruit and also to recommend the licensing of exporters. The Board establishes terms and conditions of sale overseas and contributes to overseas publicity connected with the canned fruit industry.

The system of marketing adopted by the Board has resulted in the satisfactory disposal of the exportable surplus of canned fruits.

(ii) *The Canned Fruits Export Charges Act 1926-1956.* This Act provides for a levy on exports to meet the Board's expenses. Provision has been made for certain exemptions when recommended by the Board.

(iii) *The Australian Canned Fruit Sales Promotion Committee.* This Committee was established in 1959 to promote the sale of canned deciduous fruits on the home market and overseas. The operations of the Committee are financed by a levy on fruit accepted by the canneries for the production of canned fruit. The Committee comprises representatives of growers and processors of canning fruit and a representative of the Commonwealth Government.

§ 17. Vegetables for Human Consumption.

1. *Area and Production of Fresh Vegetables.*—Details of the areas planted and production of individual kinds of vegetables, excluding potatoes and onions referred to in §§ 10 and 11 of this chapter, are shown below for the seasons 1957–58 to 1959–60.

FRESH VEGETABLES(a) FOR HUMAN CONSUMPTION: AUSTRALIA.

Vegetable.	1957–58.		1958–59.		1959–60.

Parsnips	1,530	12,426	1,342	11,349	1,441	12,185
Peas, Blue	7,323	3,860	2,571	1,342	3,226	2,148
Peas, Green	47,988	51,714	46,388	52,298	45,130	54,309
Tomatoes	17,096	119,964	16,382	118,819	15,865	126,171
Turnips, Swede and White	4,670	18,701	4,214	20,044	1,886	12,345
All Other	33,739	..	31,640	..	30,992	..
Total	163,551	..	152,864	..	147,326	..

(a) Excludes potatoes and onions.

(b) Incomplete, excludes New South Wales.

2. *Production of Processed Vegetables.*—Total production of canned vegetables in 1959–60 amounted to 83,167,000 lb., which was considerably higher than pre-war production, but only about 70 per cent. of the peak war-time production of 119,149,000 lb. recorded in 1944–45. The principal canned vegetables produced in 1959–60 were green peas (including mint-pro peas) 23,087,000 lb., green beans 3,010,000 lb., baked beans (including pork and beans) 24,573,000 lb., asparagus 6,922,000 lb., beetroot 8,480,000 lb., and mushrooms 3,166,000 lb.

The production of dehydrated vegetables, which was initiated by the Commonwealth Government during the 1939–45 War, rose to a maximum of 22,000,000 lb. in 1945–46, but in 1959–60 it was only 807,000 lb. Production of potato crisps, chips and flakes, which has increased substantially in recent years, amounted to 8,001,000 lb. in 1959–60.

There has been rapid development in the quick-frozen vegetable industry. Data were collected for the first time in 1957–58, when 13,846,000 lb. of frozen vegetables were produced, made up primarily of 10,131,000 lb. of peas and 2,540,000 lb. of beans. In 1959–60, production had risen to 22,899,000 lb., of which 16,962,000 lb. were peas and 4,150,000 lb. were beans.

3. *Imports and Exports of Vegetables.*—The quantity and value of oversea exports of pulse and fresh vegetables during 1959–60 were respectively:—pulse, 8,008 tons, £307,079; onions, 1,124 tons, £70,052; potatoes, 4,748 tons, £133,669; other vegetables, 2,955 tons, £223,043. Imports of pulse amounted to 5,246 tons, valued at £428,829, while imports of fresh vegetables in total were 2,556 tons, valued at £196,722.

In 1959–60, exports of vegetables preserved in liquid consisted of:—Asparagus, 717,629 lb. (£96,532); Beans (including baked), 104,658 lb. (£6,938); Peas, 155,743 lb. (£13,336); Tomatoes, 58,656 lb. (£4,709); Other Vegetables, 385,902 lb. (£45,192).

4. *Consumption of Vegetables.*—Details of the estimated consumption of vegetables for a series of years ending 1959–60 are shown in Chapter XXX.—Miscellaneous, of this Year Book.

§ 18. Tobacco.

1. *States, Area and Production.*—Tobacco has been grown in Australia for a considerable number of years. As early as the season 1888–89, the area of this crop amounted to 6,641 acres, of which 4,833 were in New South Wales, 1,685 in Victoria and 123 in Queensland. Thereafter, the industry fluctuated for many years, reaching a peak in 1932–33 when 26,272 acres were planted. After the 1939–45 War the area fell to below 4,000 acres, but it has increased again largely as a result of the beneficial effect of improved varieties and techniques on average yields and of the protection to Australian growers given by the tariff (*see also* (vi) Tobacco Factories, p. 935).

In 1959–60, the area planted was 19,654 acres. This exceeded the highest post-war level of 15,151 acres, reached in 1958–59, by 4,503 acres, or 30 per cent. The production of dried leaf in 1959–60 at 19,068,000 lb. was also a record.

In the following table, particulars of the area and production of tobacco are given by States for each of the seasons 1955–56 to 1959–60, together with averages for the three-year periods ended 1938–39, 1948–49 and 1958–59.

TOBACCO : AREA AND PRODUCTION.

1959–60 ..	1,438	7,401	9,149	..	1,080	19,068

(a) Less than half an acre.

(b) Less than 500 lb.

2. *The Tobacco Industry.*—(i) *Marketing.* In the early days, purchase of the leaf at the farms was the usual practice, but towards the end of the 1930's the auction system was introduced by arrangement between the growers' associations and the manufacturers.

On 9th May, 1941, the Australian Tobacco Board was constituted under the National Security (Australian Tobacco Leaf) Regulations for the purpose of facilitating and regulating the marketing of Australian grown tobacco leaf. All leaf was under the control of the Board, the growers being paid on the valuation as appraised by the Board. The Board ceased to function on 24th September, 1948, and subsequent crops have been marketed at open auction in the respective States. Queensland has had its own Tobacco Leaf Marketing Board since 1948. Growers in New South Wales voluntarily submit their leaf to the Queensland Board for sale at auction. Leaf from Victoria is sold at auction in Melbourne for the Victoria Tobacco Growers' Association. In Western Australia, the leaf is sold in Perth for the Western Australian Tobacco Growers' Association (Inc.).

(ii) *Central Tobacco Advisory Committee.* The Australian Agricultural Council formed the Standing Advisory Committee on Tobacco during 1950. This Committee consisted of representatives of tobacco growers, tobacco manufacturers and the Commonwealth and State Governments. Its main functions were to review the industry and make recommendations on its problems.

The Committee was reconstituted by the Agricultural Council during 1952-53 and its terms of reference are as follows:—

"To report annually to the Agricultural Council, through the Standing Committee on Agriculture and also to the Commonwealth Minister for Customs and Excise, through the Chairman of the Council, on the following:—

- (i) The percentage of Australian tobacco which should be incorporated in locally manufactured tobacco under Customs regulations, having regard to the anticipated volume of Australian production of usable leaf available for absorption by the manufacturing industry;
- (ii) The progress of the industry during the year with particular reference to—
 - (a) marketing problems encountered,
 - (b) a review of prices being paid to farmers in relation to quality of leaf,
 - (c) such other problems as may be retarding the progressive development of the industry, such as the volume of importation of manufactured tobacco and cigarettes."

(iii) *Industry Inquiries.* The tobacco industry has been the subject of a number of investigations during the past 30 years. The Tariff Board inquired into the industry in 1923, 1926, 1931 and 1940 and reports were issued in respect of the last three inquiries.

(iv) *Commonwealth Grants.* Details of the recommendations by the Tobacco Inquiry Committee and grants periodically approved by the Commonwealth Government up to 30th June, 1953, are given in Official Year Book No. 40, pages 895, 896 and in previous issues.

(v) *Research and Investigations.* The Commonwealth Scientific and Industrial Research Organization has been investigating many fundamental problems connected with tobacco culture. One of the major achievements of this organization was the development in the mid-1930's of a technique to control blue mould in the seed bed. State Departments of Agriculture are also carrying out investigations over a wide range of problems, being concerned mainly with variety trials, irrigation, disease and pest control, crop rotation and cultural practices. The New South Wales Department of Agriculture has developed a commercial blue mould resistant hybrid.

In 1955, the Central Tobacco Advisory Committee formulated a programme for increased research and advisory activities. The capital costs of establishing this programme were estimated at £168,000, of which the Commonwealth Government and tobacco manufacturers each agreed to contribute half. Annual contributions are made to the fund by the Commonwealth and State Governments, tobacco growers and manufacturers. A Tobacco Industry Trust Account was established to receive these contributions. This programme commenced in 1956.

During the first four years of the operation of the Trust Account, £628,402 was paid to State and Commonwealth departments. The allocation for 1960-61 is £217,915.

(vi) *Tobacco Factories.* Manufacturers of Australian cigarettes and tobacco are granted a lower rate of duty on imported tobacco leaf, provided it is blended with a prescribed minimum percentage of Australian leaf. These percentages rose from 3 per cent. for cigarettes and 5 per cent. for tobacco in November, 1946, to 28½ per cent. and 24½ per cent. respectively from 1st July, 1960. The percentages to apply from 1st July, 1961, when most of the 1960 tobacco crop will be used in manufacture, are 35 per cent. and 32 per cent. respectively. In 1959-60, the quantity of cured leaf used in tobacco factories in Australia amounted to 49.8 million lb., of which 11.6 million lb. was of local origin. The balance was imported, chiefly from the United States of America.

3. *Oversea Trade.*—Imports of tobacco and manufactures thereof into Australia during 1959-60 were valued at £13.8 million, including 37.0 million lb. of unmanufactured tobacco valued at £13.7 million. Exports of tobacco and tobacco manufactures during 1959-60 were valued at £354,049.

§ 19. Hops.

Hop-growing in Australia is practically confined to Tasmania and some of the cooler districts of Victoria, the total area for 1959-60 being 1,927 acres, of which 1,461 acres were in Tasmania, and 466 acres in Victoria. A small area was also under hops in Western Australia, but the details are not available for publication. The Tasmanian area, though still small, has increased during the present century, the total for 1901-2 being 599 acres. The cultivation of hops was much more extensive in Victoria some 70 years ago than at present, the area in 1883-84 being 1,758 acres.

The production of hops in Australia is insufficient to meet local requirements, and additional supplies are imported to meet the needs of the brewing industry. In the following table, details of the production and imports of hops and the quantity of hops used in breweries are shown for each of the years 1955–56 to 1959–60. Exports of hops are not recorded separately, but are negligible.

HOPS : PRODUCTION AND DISPOSAL, AUSTRALIA.

Year.	Production.		Imports.	Net Available Supplies. (a)	Quantity used in Breweries.
	Quantity.	Gross Value.			
	Cwt.	£'000.	Cwt.	Cwt.	Cwt.
1955–56	34,374	1,102	16,880	51,254	43,638
1956–57	25,230	857	3,074	28,978	40,250
1957–58	32,710	1,137	4,502	37,212	39,370
1958–59	36,499	1,273	8,471	44,970	38,664
1959–60	31,790	1,159	..	31,790	40,357

(a) Disregards movements in stocks.

The Tariff Board conducted an inquiry into the hop-growing industry and issued its report on 12th June, 1945.

§ 20. Flax.

1. **Flax for Fibre.**—During the 1914–18 and 1939–45 Wars, there was an acute shortage of flax fibre and the expansion of production was encouraged by the Commonwealth Government, the area sown reaching a maximum of more than 61,000 acres in 1944–45.

In recent years, the growing of flax for fibre has been confined to Victoria, South Australia and Western Australia. In Victoria and South Australia, production has been directed and controlled by the Flax Commission, which took over the Commonwealth flax undertakings from the Flax Production Committee on 1st November, 1954. In Western Australia, the industry is carried on by a co-operative company.

In November, 1957, the Government approved a three-year extension of bounty assistance to flax producers and decided that the Commonwealth should withdraw from flax fibre production. One important factor which influenced the Government in making this decision was the view expressed by the defence authorities that the industry no longer has the same defence significance as it had when the Flax Commission was first established.

In accordance with the decision, growing of flax under contract to the Flax Commission was discontinued in 1959, all of the Commonwealth mills ceasing to operate before the end of the year. Western Australia is now the only producing State, the mill at Boyup Brook being the only flax mill left in production.

Many former growers of flax for fibre in Victoria are now growing flax for linseed.

Details of the area under flax and the production of straw are given in the following table:—

FLAX FOR FIBRE : AREA AND PRODUCTION.

Season.					Victoria.	S. Aust.	W. Aust.	Australia.
AREA (ACRES).								
1955–56					2,550	526	1,594	4,670
1956–57					2,196	1,864	1,757	5,817
1957–58					5,550	1,410	1,002	7,962
1958–59	2,015	2,015
1959–60	1,307	1,307
PRODUCTION (TONS OF STRAW).								
1955–56					4,637	1,150	1,875	7,662
1956–57					4,013	4,606	2,051	10,670
1957–58					9,923	3,077	1,246	14,246
1958–59	3,665	3,665
1959–60	2,723	2,723

2. **Flax for Linseed.**—Prior to 1948–49, the growing of flax for linseed oil had not been developed extensively in Australia. Since then, however, action has been taken to develop this industry, the ultimate objective being the production of sufficient linseed to meet Australia's total oil requirements. Development of the industry proceeded rapidly until 1951–52 when 53,741 acres were sown. In 1952–53, there was a decline in the acreage and a further decline in 1953–54 when 6,343 acres only were sown. Since then, an increase in the guaranteed price to £70 per ton, f.o.r. ports, which is notified to growers by the crushers early in each season, has led to an increase in the area sown. A record 99,493 acres of flax for linseed were sown in 1959–60, yielding 26,799 tons of linseed, also a record.

The question of assistance to the industry was investigated by the Commonwealth Tariff Board in 1953 and their conclusions are contained in their Report on *Linseed and Linseed Products* dated 23rd October, 1953.

Details of the area and production of flax for linseed are shown in the following table for the seasons 1955–56 to 1959–60:—

FLAX FOR LINSEED : AREA AND PRODUCTION.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
AREA (ACRES).							
1955–56	1,817	580	45,202	128	47,727
1956–57	2,404	1,143	86,265	290	90,102
1957–58	2,251	4,091	90,255	221	549	..	97,367
1958–59	4,622	8,817	22,839	703	244	..	37,225

1957–58	36	1,149	7,279	49	68	..	8,581
1958–59	1,196	2,769	6,510	151	42	..	10,668
1959–60	2,922	7,391	16,247	191	48	..	26,799

§ 21. Peanuts.

The production in Australia of peanuts, or groundnuts, is mainly confined to Queensland, although small quantities are grown in New South Wales, Western Australia and the Northern Territory. Details of the area and production are given in the table below.

PEANUTS : AREA AND PRODUCTION.

Season.	Area (Acres).				Production (Tons).			
	N.S.W.	Q'land.	N.T.	Aust.(a)	N.S.W.	Q'land.	N.T.	Aust.(a)
1955–56	414	31,493	544	32,451	174	8,633	40	8,847
1956–57	419	25,017	208	25,644	234	8,676	17	8,927
1957–58	686	34,739	156	35,581	401	18,326	15	18,742
1958–59	867	59,279	211	60,357	581	31,084	121	31,786
1959–60	837	41,547	388	42,772	532	18,016	215	18,763

(a) Excludes Western Australia for which details are not available for publication.

The gross value of the 1959–60 crop (excluding the small crop in Western Australia) was £1,782,000, which was approximately £1,738,000 less than in 1958–59.

Formerly, considerable quantities of peanut kernels were imported, chiefly from India, for the extraction of oil. These imports were suspended from 1946 to 1949, but have since been resumed on an increasing scale. Total supplies available for consumption in Australia in 1959–60 were 25,224 tons (shell equivalent), after allowing for an increase in stocks held by the Peanut Marketing Board of 5,378 tons. Supplies were made up of 27,494 tons from Australian production received into store by the Board and 3,108 tons imported.

§ 22. Cotton.

1. **General.**—The production of cotton in Australia has been, until recently, restricted to Queensland, where cultivation began in 1860. Cotton has been grown experimentally in some other States in recent years and the first commercial crop outside Queensland was grown in Victoria in the 1959-60 season. Details of areas sown for years prior to 1930 and of Government financial assistance to growers up to 1940 appear in Official Year Book No. 39 and earlier issues.

Australia produces only a small part of its requirements of raw cotton, the balance in 1959-60 being obtained chiefly from the United States of America and Mexico. Since the 1939-45 War, efforts have been directed towards increasing production by an extension of area, the introduction of irrigation methods and payment of bounties. These have met with some measure of success, although production has not reached the 1939-40 level of 17,550,000 lb. of seed cotton. Cotton spinning and weaving industries are referred to in Chapter VI.—Manufacturing Industry.

The Raw Cotton Bounty Act 1940 provided an extension, until 31st December, 1946, of assistance previously granted by way of bounty. The Act was amended in August, 1946, to provide a guaranteed net average return to cotton-growers of 15d. per lb. of raw cotton for five years from 1st January, 1947. It was superseded by the Cotton Bounty Act 1951, which guaranteed a net average return of 9½d. per lb. of seed cotton for five years from 1st January, 1951. The 1951 Act was amended in 1952 to provide for a guaranteed return of 14d. per lb. of seed cotton for the 1953 crop, and for variation by regulation of the guaranteed return, in succeeding seasons, with a minimum of 9½d. per lb. The Act, as amended in 1952 and 1957, was extended in 1958 to cover production up to 31st December, 1963. The guaranteed return has remained at 14d. per lb. of seed cotton since the 1953 season.

2. **Area and Production.**—The area under cultivation and the production in Queensland for the years 1955 to 1959 are shown hereunder. Details of the production of ginned cotton are derived from published statistics of the Queensland Cotton Marketing Board.

COTTON: AREA AND PRODUCTION IN QUEENSLAND.

Season ended December—	Area Sown.	Production of Cotton.				Average Yield per Acre Sown.	
		Unginned.		Ginned.	Ginned— Equiv- alent in Bales. (a)	Unginned.	Ginned.
		Quantity.	Gross Value.				
	Acres.	'000 lb.	£'000.	'000 lb.	Bales.	lb.	lb.
1955	13,290	5,359	307	2,164	4,386	403	163
1956	11,338	3,809	224	1,460	3,046	336	129
1957	10,364	3,390	213	1,341	2,845	327	129
1958	10,493	4,004	249	1,492	3,073	382	142
1959	20,229	9,463	556	3,592	7,621	468	178

(a) Bales of approximately 500 lb.

3. **Consumption of Raw Cotton.**—The following table shows details of the availability and actual consumption of raw cotton in Australian factories, during the last five years:—

RAW COTTON: PRODUCTION, IMPORTS AND CONSUMPTION, AUSTRALIA.
(’000 lb.)

Year.	Production.	Imports.	Total.	Consumption of Raw Cotton.
1955-56	2,164	37,614	39,778	45,262
1956-57	1,460	47,805	49,265	46,699
1957-58	1,341	42,578	43,919	49,054
1958-59	1,492	43,984	45,476	47,323
1959-60	3,592	41,519	45,111	51,689

§ 23. Financial Assistance to Primary Producers.

NOTE.—See also Chapter XXI.—Public Finance, page 822.

Direct financial assistance to primary producers by the Commonwealth Government takes the form of bounties, subsidies and other financial assistance. Brief details of some of the more important payments are given below:—

(i) *Cotton Bounty*. The Cotton Bounty Act provides for payment of a bounty on seed cotton delivered by growers to processors. The present rate of bounty is designed to give growers an average return of 14d. per lb. The total payment in 1958–59 was £139,454 and in 1959–60 it was £214,456.

(ii) *Dairy Products Bounty*. Under the provisions of the Dairy Industry Act 1952, a subsidy was paid to dairymen to ensure them a return based upon the estimated cost of production for a specified quantity equal to local consumption plus twenty per cent. The Dairy Industry Act 1957 provided for continuation of the scheme for a further five years. A new feature, however, was that any subsidy made available under the scheme would be determined before the commencement of each season and would be on the basis of a fixed amount in any dairying year. In 1960–61, total payments amounted to £13,500,000, the same as in each of the previous four years.

(iii) *Flax Fibre Bounty*. From 1954 to 1958, a bounty was paid on scutched flax fibre produced from flax grown in Australia. In 1957, the Act was amended to provide for the calculation of the bounty payable on the basis of fibre sold, in lieu of fibre produced. In 1957–58, payments amounted to £62,348. Expenditure in 1958–59 was £93,167 and in 1959–60, £82,676. The period covered by the bounty terminated on 31st October, 1960.

Other forms of financial assistance to primary producers include payments for Cattle Tick Control, the Dairy Industry Extension Grant, Flood, Drought and Bush Fire Relief, Food Production, Expansion of Agricultural Advisory Services and Assistance to the Tobacco Industry.

§ 24. Fertilizers.

1. *General*.—In the early days of settlement in Australia, scientific cultivation was little understood. It was common, as in other new countries, for the land to be cropped continuously to a degree of exhaustion. This practice is very much less in evidence now than in the early days of Australian agricultural development. Under the guidance of the State Departments of Agriculture and the relevant Commonwealth authorities, such as the Bureau of Agricultural Economics and the Commonwealth Scientific and Industrial Research Organization, scientific farming is now much more widely practised. The importance of fallowing, crop rotation, and the application of suitable fertilizers in adequate quantities is now appreciated by farmers. The introduction of the modern seed-drill, acting also as a fertilizer-distributor, has greatly facilitated the use of artificial manures and much land formerly regarded as useless for cultivation has now been made productive. With the rapid increase in the area of sown pastures, particularly since the 1939–45 War, large quantities of artificial fertilizers have been used. Fertilizer is generally applied at the time of sowing, and periodical (usually annual) top-dressings are carried out afterwards to keep the pastures in good condition. In addition, increasing areas of native pastures have been top-dressed in recent years. In 1959–60, pastures accounted for almost 60 per cent. of both the total area fertilized and the total quantity of fertilizers used. The application of fertilizers from aircraft, particularly to pastures, has become a feature of modern farm technique, and has enabled the artificial fertilization of some areas which would not be readily accessible to ground machinery. Details of the area treated and quantity of fertilizer used by both aerial and ground methods of application in total are shown in para. 3, below, while further details on aerial top-dressing are given in § 25.

In order to protect the users of artificial fertilizers, legislation has been passed in each of the States regulating the sale and prohibiting the adulteration of fertilizers. A list of these Acts and their main features are given in Official Year Book No. 12, page 378.

2. *Imports and Exports*.—The Australian output of prepared fertilizers is derived chiefly from imported rock phosphate and is sufficient for local requirements.

The chief sources of Australia's supplies of rock phosphate are Nauru, Christmas Island (Indian Ocean) and the Gilbert and Ellice Islands. Sodium nitrate is obtained chiefly from Chile.

The imports of artificial fertilizers during the five years ended 1959-60 are shown in the following table:—

ARTIFICIAL FERTILIZERS : IMPORTS INTO AUSTRALIA.

Fertilizer.		1955-56.	1956-57.	1957-58.	1958-59.	1959-60.
Ammonium Sulphate	tons	9,466	28,251	20,945	19,979	11
	£'000	228	624	522	497	(a)
Potash Salts ..	tons	39,099	38,246	53,570	43,912	36,204
	£'000	652	638	882	740	499
Rock Phosphate ..	tons	1,418,527	1,321,607	1,273,766	1,353,739	1,322,173
	£'000	2,828	2,804	3,325	3,750	3,654
Sodium Nitrate ..	tons	14,102	11,219	14,430	7,505	6,837
	£'000	323	252	354	152	139
Other	tons	506	785	4,619	16,951	24,119
	£'000	16	20	125	497	519
Total	tons	1,481,700	1,400,108	1,367,330	1,442,086	1,389,344
	£'000	4,047	4,338	5,208	5,606	4,811

(a) Less than £500.

Exports of fertilizers (practically all of which were manufactured locally) amounted to 20,900 tons valued at £313,000 in 1959-60 compared with 14,059 tons valued at £442,000 in 1958-59.

3. **Quantities Used Locally.**—Information regarding the area treated with artificial fertilizers and the quantity of artificial fertilizers (superphosphate, bonedust, nitrates, etc.) used in each State during the 1959-60 season is given in the following table. Details of the area fertilized with natural manure (stableyard, etc.) are no longer collected.

AREA FERTILIZED AND QUANTITY OF ARTIFICIAL FERTILIZERS USED, 1959-60.

State or Territory.	Area Fertilized ('000 Acres).			Fertilizers Used (Tons).		
	Crops.	Pasture Lands.	Total.	Crops.	Pasture Lands.	Total.
New South Wales	3,353	5,043	8,396	139,079	261,623	400,702
Victoria	4,079	9,153	13,232	217,319	522,716	740,035

1957-58 ..	337,865	739,322	114,681	418,539	539,192	99,042	156	3,189	2,251,986
1958-59 ..	344,490	730,863	111,741	410,896	560,091	102,280	144	2,724	2,263,229
1959-60 ..	400,702	740,035	101,641	391,628	581,231	105,966	150	2,533	2,323,886

4. **Local Production.**—Complete information regarding local production of fertilizers is not available. The number of firms engaged in the manufacture of chemical fertilizers in Australia for the year 1959–60 was 49, made up as follows:—New South Wales, 14; Victoria, 5; Queensland, 8; South Australia, 9; Western Australia, 6; and Tasmania, 7. The production of superphosphate in Australia during 1959–60 amounted to 2,380,000 tons.

§ 25. Aerial Agriculture.

During recent years, aircraft have been used for top dressing and seeding (principally of pastures) and for spraying and dusting of crops and pastures. During the year ended 31st March, 1960, the total area treated by aircraft was 3,668,828 acres—2,594,167 acres were top-dressed and/or seeded, 960,788 acres were sprayed or dusted with insecticides, fungicides or herbicides, and 113,873 acres were baited for rabbit destruction. For 1956–57 (the first year for which data are available), the total area treated was 1,465,959 acres. The following table shows details of area treated and materials used for each State for the year ended 31st March, 1960. The information was collected by the Department of Civil Aviation.

AERIAL AGRICULTURE : OPERATIONS DURING 1959–60.

Item.	Unit.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Total (a)
<i>Top-dressing and Seeding—</i>

(a) Areas treated with more than one type of material in one operation are counted once only.

(b) Includes 4,500 acres baited for rabbit destruction.

(c) Includes 109,373 acres baited for rabbit destruction.

§ 26. Ensilage.

1. **Government Assistance.**—The several State Governments devote a considerable amount of attention to the education of the farming community with regard to the value of ensilage. Monetary aid is afforded in the erection of silos, and expert advice is supplied in connexion with the design of the silos and the cutting and packing of the ensilage.

2. **Quantity Made and Stocks Held on Farms.**—Information regarding production and farm stocks of ensilage for the years ended 31st March, 1957 to 1960, are given in the following table.

ENSILAGE : PRODUCTION AND FARM STOCKS.

(Tons.)

(a) Not available.

The drought of 1902-3 drew increased attention to the value of stocks of ensilage, and in the following seasons there was an increase both in the number of holdings on which ensilage was made and in the quantity produced. The accumulated stocks proved of great value during the 1914 drought. In recent years, there has been an increasing tendency to produce more ensilage. From 117,000 tons in 1950-51, the quantity produced rose fairly uniformly to 464,000 tons in 1956-57 and subsequently to a record level of 830,000 tons in 1958-59. Output in 1959-60 at 685,000 tons was 17 per cent. less than the previous year.

§ 27. Agricultural Colleges and Experimental Farms.

Agricultural colleges have been established in all States except Tasmania. The primary function of these colleges is the training of students in the various phases of agricultural work and livestock husbandry. Students are required to undertake a considerable amount of practical work in addition to lectures and theory. A secondary function of the colleges is agricultural research and experimentation. To a lesser degree, they carry out extension work in the form of public field days. Upon graduation, students receive diplomas in agriculture, dairying, etc., according to the course undertaken.

Experimental farms have been set up by State Departments of Agriculture in all States. They are primarily concerned with agricultural research and experimentation, each farm concentrating on problems specific to the district in which it is located. The results of the work undertaken are passed on to farmers at field days, which are held at regular intervals, through publication in various agricultural or scientific journals and through the agricultural extension officers of the State Departments of Agriculture.

The Commonwealth Scientific and Industrial Research Organization has field stations in many parts of Australia, and sometimes undertakes research jointly with the appropriate State authorities. It also has regional laboratories in several States, conducting research into agronomic problems as they occur in each particular region. The State Departments of Agriculture study problems of particular significance within their own boundaries. In addition, the universities carry out valuable work on their experimental farms.

§ 28. Tractors on Rural Holdings.

The growth of mechanization in agriculture is indicated by the increase in the number of tractors on rural holdings from 41,943 in 1939 to 242,348 in 1960. The annual increase in numbers reached its peak in 1951-52 when over 20,000 additional tractors were enumerated on holdings. The rate of increase has declined in more recent years and over the last five years averaged only about 11,000 per annum.

The table below sets out the number of wheeled and crawler type tractors by States or the five years ended 1960.

§ 29. Number and Area of Rural Holdings and Employment Thereon.

1. Number and Area.—A holding in Australia has been defined by statisticians on a more or less uniform basis and discrepancies which exist are not of sufficient importance to vitiate comparisons. For the purpose of these statistics, a holding may be defined as land of one acre or more in extent, used in the production of agricultural produce, the raising of livestock or the products of livestock.

There are considerable fluctuations from time to time in the numbers of very small holdings and it is very difficult to determine in some cases whether or not they are rural holdings within the definition.

In addition, in the very dry parts, such as the far west of New South Wales and Queensland and the remoter parts of South Australia and Western Australia, there are large areas of marginal lands sporadically occupied under short-term lease or other arrangement, and the areas so occupied tend to fluctuate with the seasons. Similarly, there are rugged areas in the mountain country of some States which are also occasionally occupied.

The following table shows the recorded number and area of the holdings in each State for the seasons 1955–56 to 1959–60.

RURAL HOLDINGS : NUMBER AND AREA.

2. *Special Tabulation Relating to Rural Holdings.*—(i) *Classification by Size.* Some of the information obtained from the 1955-56 Agricultural and Pastoral Census was classified by size, and the results of these tabulations are shown in detail in *Primary Industries, Part I.—Rural Industries*, Bulletin No. 51, and in summarized form in Official Year Book No. 44, page 913. Similar tabulations are being undertaken for 1959-60, but the results are not yet available.

(ii) *Classification by Type.* An experimental classification of holdings by type was carried out for New South Wales for 1955-56 in conjunction with the classification by size referred to above. An outline of the methods used and the results obtained are shown on page 914 of Official Year Book No. 44. The methods used in the 1955-56 experimental classification have been used as the basis for an Australia-wide classification of holdings by type being carried out for the 1959-60 season in conjunction with the classification of certain characteristics by size for that year.

3. *Employment on Rural Holdings.*—The following table shows, for each State, the recorded number of males working on rural holdings as at 31st March, 1960. Additional particulars relating to the number of males employed in agriculture are available up to 1941-42 in Official Year Book No. 36, page 852, and previous issues. Similar details for later years are not available.

MALES(a) ENGAGED ON RURAL HOLDINGS AT 31st MARCH, 1960.

(a) Australian totals for 1959 and 1960 are not available.

CHAPTER XXIII.

PASTORAL PRODUCTION.

NOTE.—All values of Australian oversea trade shown throughout this chapter are expressed as f.o.b., Australian currency, port of shipment, except where otherwise indicated. All export tables relate to exports of Australian produce only.

For greater detail on the subjects dealt with in this chapter, see the annual bulletins *Primary Industries, Part I.—Rural Industries* and *Part II.—Non-Rural Industries and Value of Production* published by this Bureau. For advance information on these subjects, the following mimeograph statistical bulletins should be consulted—*Livestock Numbers* (annual), *Meat Industry* (monthly), *Value of Production and Indexes of Price and Quantum of Farm Production* (annual), *Wool Production* (annual), *Wool Production and Utilization* (annual), and *Size Classification of Rural Holdings*, 1955–56. The annual mimeograph *Report on Food Production and the Apparent Consumption of Foodstuffs and Nutrients in Australia* contains details of the production, distribution and apparent consumption of foodstuffs obtained from the pastoral industry. Current information on meat and wool production is available in the *Monthly Review of Business Statistics* and the *Digest of Current Economic Statistics* (monthly).

§ 1. Initiation and Growth of the Pastoral Industry.

1. *Livestock Numbers.*—A detailed account of the various enumerations of livestock in Australia made prior to 1860 was given in previous issues of the Year Book. Since 1860, annual enumerations have been made, based, with few exceptions, on actual collections made through the agency of the State police or by post. Particulars concerning the numbers of each of the principal kinds of livestock in Australia at decennial intervals from 1860 to 1950, and from 1956 onwards in single years, are given in the following table, and are shown continuously on the graph on page 965.

LIVESTOCK : AUSTRALIA.

('000.)

Year.	Horses.	Cattle.	Sheep.	Pigs.	Year.	Horses.	Cattle.	Sheep.	Pigs.
1860 ..	432	3,958	20,135	351	1940 ..	1,699	13,080	119,305	1,455
1870 ..	717	4,276	41,594	543	1950 ..	1,057	14,640	112,891	1,123

1930 ..	1,793	11,721	110,568	1,072	1960 ..	640	16,503	155,174	1,424

While livestock numbers (particularly sheep) have increased substantially since 1860, marked fluctuations have taken place during the period, mainly on account of droughts which have from time to time left their impression on the pastoral history of Australia. These occurred in 1868, 1877, 1883–4, 1892, 1893, 1895, 1901–2, 1912, 1914, 1918, 1919, 1922–23, 1925–26, 1927–28, 1929–30, 1940–41 and 1944–45 to 1946–47.

The years in which the numbers of livestock attained their maxima are as follows:—Horses, 1918 (2,527,000); cattle, 1957 (17,257,000); sheep, 1960 (155,174,000); and pigs, 1941 (1,797,000).

The distribution throughout Australia of beef cattle, dairy cattle, sheep and pigs as at 31st March, 1955, is shown in the maps on pages 909–12 of Official Year Book No. 43.

The numbers of horses, beef cattle and sheep in each State and Territory are shown later in this chapter; similar information for dairy cattle and pigs appears in Chapter XXIV.—Farmyard, Dairy and Bee Products.

2. **Carrying Capacity of Pastoral Holdings.**—The carrying capacity of pastoral holdings has been increased in recent years, due in some measure to the succession of good seasons experienced since 1946 (with the exception of the 1957–58 season, when prevailing dry conditions caused a slight decline in cattle and sheep numbers). Other important factors contributing to the progressive increase over this period have been the increased attention to pasture improvement and the reduction of rabbit infestation.

There was a considerable decline in the number of rabbits following the introduction in 1950 of the disease myxomatosis, which spread rapidly. The number of rabbits has also been kept at a low level in recent years by the use of poison baits, etc.

Statistics of the area under sown grasses and clovers which have been collected on a uniform basis in all States since 1952–53 reveal that the area sown has been considerably increased. In 1959–60, the area under sown grasses and clovers (excluding native grasses) totalled 33.3 million acres, a decrease of 0.3 million acres (1 per cent.) compared with 1958–59 but an increase of 12.6 million acres (61 per cent.) over 1952–53, the earliest year for which this comparison is available. In recent years, the sowing and top-dressing of pastures has been facilitated by the increasing use of aircraft in these operations, an area of 2.6 million acres being sown and/or top-dressed in the year ended March, 1960.

3. **Size Classification of Cattle Herds and Sheep Flocks.**—A special series of tabulations relating to rural holdings in Australia was compiled for 1955–56 and published in full detail in a series of mimeographed bulletins, *Size Classification of Rural Holdings, 1955–56*. Condensed tables also appear in *Primary Industries, Part I*, Bulletin No. 51. The tables relating to beef and dairy cattle and sheep show classifications according to size of herd or flock, area of holding, area of wheat for grain and area of sown pastures. Similar details are being compiled for 1959–60, but details are not yet available.

4. **Value of Pastoral Production.**—(i) *Gross, Local and Net Values, 1959–60.* Values of pastoral production for each State are shown for 1959–60 in the following table. Further details of the source of the information and an explanation of the terms used in this compilation will be found in Chapter XXX.—Miscellaneous. Maintenance costs have not been computed in all States and depreciation has not been deducted; consequently the net values are inflated to the extent of these costs.

GROSS, LOCAL AND NET VALUES OF PASTORAL PRODUCTION, 1959-60.

(£'000.)

State.	Gross Production Valued at Principal Markets.	Marketing Costs.	Gross Production Valued at Farm.	Value of Materials used in Process of Production.	Net Value of Production. (a)
New South Wales	229,653	17,840	211,813	(b) 13,433	198,380

(a) No deduction has been made for depreciation and maintenance. Excludes payments to wool-growers of profits from the war-time wool disposal plan. (b) No allowance has been made for costs of power, power kerosene, petrol and other oils. (c) Includes Northern Territory and Australian Capital Territory.

5. Indexes of Quantum and Price of Pastoral Production, 1955-56 to 1959-60.—The quantum indexes relate to gross output of farm products valued at constant prices. The quantities of each farm product produced each year have been re-valued at the unit gross value for the period 1936-37 to 1938-39. The price indexes relate to average "prices" of farm products realized in the principal markets of Australia. Average quantities of each product marketed in the period, 1946-47 to 1950-51 have been used as fixed weights. For further details of the methods of calculating these indexes and of the weights used, see Chapter XXX.—Miscellaneous.

INDEXES OF QUANTUM(a) AND PRICE OF PASTORAL PRODUCTION:
AUSTRALIA.

(Base: Average 3 years ended June, 1939 = 100.)

Particulars.	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.
<i>Quantum(a) produced—</i>					
Wool	146	164	148	164	172
Other products	123	128	134	152	153
<i>Total Pastoral</i>	136	148	142	159	163
<i>Total per Head of Population</i>	100	106	100	109	110
<i>Price—</i>					
Wool	468	607	473	370	440
Other products	424	427	377	435	500
<i>Total Pastoral</i>	451	536	435	396	464

(a) Index of value at constant prices, i.e., quantities revalued at average unit values of base years, 1936-37 to 1938-39.

§ 2. Horses.

1. **Distribution throughout Australia.**—About 80 per cent. of the total number of horses in Australia are in the States of New South Wales, Queensland and Victoria. In the following table, figures are shown for each State and Territory for the years 1956 to 1960.

HORSES: NUMBER.
(‘000.)

Year.	N.S.W.	Vic.	Q’land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
1956 ..	247	119	261	44	46	15	37	1	770
1957 ..	235	108	255	41	45	14	38	1	737
1958 ..	221	98	243	35	44	13	39	1	694
1959 ..	214	91	240	33	41	12	39	1	671
1960 ..	204	81	234	30	41	11	38	1	640

The number of horses in Australia reached its maximum during 1918, when a total of 2,527,149 was recorded. The United States of America recorded its highest number in the same year and Canada in 1921. The number in Australia has declined considerably since 1918 owing to the mechanization of transport and farming. During the period 1918 to 1960, the decrease in numbers has averaged 45,000 per annum.

A graph showing the number of horses in Australia from 1860 onwards appears on page 965.

The percentage distribution of the number of horses in each State and Territory for 1960 was:—New South Wales, 32; Victoria, 13; Queensland, 36; South Australia, 5; Western Australia, 6; Tasmania, 2; and Northern Territory, 6.

2. **Oversea Trade in Horses.**—The export of horses from Australia during the early years of this century was fairly considerable, averaging about 15,000 head per annum between 1901 and 1920, exclusive of those used for war purposes during the 1914–18 War, but has since declined. The 1959–60 exports amounted to 1,994 horses, valued at £635,755 (Australian produce 1,927 for £487,000; re-exports 67 for £149,000), made up of horses for breeding (111 valued at £131,506), horses for racing (555 valued at £283,678, shipped principally to New Zealand) and horses for other purposes (1,328 valued at £220,571, shipped principally to Hong Kong and India).

The few horses imported into Australia are mainly stud animals from the United Kingdom and racehorses from New Zealand. The total number imported in 1959–60 was 567 valued at £557,846.

§ 3. Cattle.

1. **Purposes for which Raised.**—Cattle-raising is carried out in all the States, the main object in certain districts being the production of stock suitable for slaughtering purposes, and in others the raising of profitable dairy herds. The great impetus which the development of the export trade in Australian butter gave to the dairying industry led to a considerable increase in numbers and an improvement in quality of the dairy herds in the coastal districts of Victoria, New South Wales and southern Queensland in particular, the portion of Australia in the temperate zone which is best adapted to this industry. On the other hand, beef cattle are more widely distributed, particularly in the eastern States, and are raised in areas unsuitable for dairy cattle, such as the tropical area of northern Queensland, the Northern Territory, and the Kimberley district in the north of Western Australia.

2. **Distribution throughout Australia.**—Until 1880, New South Wales was the principal cattle-raising State, but in that year Queensland took the leading position, which it has since maintained. There was a very rapid increase in the number of cattle in Australia up to the year 1894, when 12,312,000 head were depastured. The effects of droughts and the ravages of tick fever subsequently reduced the number to 7,063,000 in 1902. Following the disastrous drought which terminated in the latter year, the herds were gradually built up,

and, despite recurring droughts, they continued to increase up to 14,441,000 in 1921. Numbers fluctuated in succeeding years, but from 1947 to 1957 there was a general upward movement to a record level of 17,257,000 in the latter year. Drought conditions together with a very high level of slaughtering in subsequent years have resulted in a reduction in numbers since then, but some recovery was made in 1960 when they increased to 16,503,000. A graph showing the number of cattle in Australia from 1860 onwards appears on page 965.

The numbers of cattle (beef and dairy) in the several States and Territories in each year 1956 to 1960, compared with the averages of the three-year periods ended 1939, 1949, and 1959 are shown below.

CATTLE: NUMBER.

('000.)

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Terr.	Aust. Cap. Terr.	Aust.
Average for three years ended—									
1939 ..	3,040	1,861	6,002	324	767	260	882	8	13,144
1949 ..	3,122	2,153	5,971	443	830	244	1,006	9	13,778
1959 ..	3,770	2,722	7,177	598	985	367	1,173	10	16,802
Year—									
1956 ..	3,678	2,616	7,331	566	897	332	1,028	9	16,457
1957 ..	3,911	2,765	7,462	621	957	354	1,176	11	17,257
1958 ..	3,736	2,750	7,187	597	997	371	1,244	10	16,892
1959 ..	3,664	2,651	6,884	576	1,000	374	1,099	9	16,257
1960 ..	3,840	2,624	7,012	500	1,030	375	1,111	11	16,503

Although the proportion was not as high as it has been in some previous years, Queensland was carrying almost 43 per cent. of the cattle in Australia in 1960. The percentage in each State and Territory during that year was:—New South Wales, 23; Victoria, 16; Queensland, 43; South Australia, 3; Western Australia, 6; Tasmania, 2; and Northern Territory, 7.

Maps showing the distribution of beef and dairy cattle in Australia have been published in previous issues of the Official Year Book (see No. 43, pp. 909–10, for 1955; No. 39, pp. 905–6, for 1948; No. 34, pp. 453–4, for 1938–39; and No. 22, p. 660, for 1924–25).

3. Classification of Cattle According to Purpose.—Of the total number of cattle in Australia in 1960, 11,626,000 or 70 per cent. were classified as beef cattle. The numbers classified as beef cattle in the several States and Territories, during the years 1956 to 1960, compared with averages for the three-year periods ended 1949 and 1959, are shown in the following table:—

BEEF CATTLE: NUMBER.

('000.)

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Terr.	Aust. Cap. Terr.	Aust.
Average for three years ended—									
1949 ..	1,832	686	4,592	171	604	100	1,006	6	8,997
1959 ..	2,462	1,023	5,882	341	763	165	1,173	7	11,816
Year—									
1956 ..	2,341	954	5,946	302	673	148	1,028	6	11,398
1957 ..	2,577	1,044	6,087	356	733	158	1,176	8	12,139
1958 ..	2,429	1,026	5,917	338	771	167	1,244	6	11,898
1959 ..	2,382	998	5,643	328	784	171	1,099	6	11,411
1960 ..	2,562	946	5,757	260	814	168	1,111	8	11,626

Particulars relating to dairy cattle numbers will be found in Chapter XXIV.—Farm-yard, Dairy and Bee Products.

4. **Size Classification of Cattle Herds.**—See § 1, para. 3, page 948 for information available.

5. **Comparison with other Countries.**—The following table shows the number of cattle in Australia and in some of the principal cattle-raising countries of the world for the years 1936-40 and at the latest available date. The figures relate to areas embraced by post-war boundaries, but do not in all cases cover identical areas for the two periods.

CATTLE: NUMBER IN VARIOUS COUNTRIES.

(Sources: Publications of United States Department of Agriculture and of Food and Agriculture Organization of United Nations.)

('000.)

Country.	Average, 1936-40.(a)	Year and Month.	Number.
India(b)	180,000	1956 (May) ..	203,629
United States of America	66,706	1960 (January) ..	101,520
U.S.S.R.	59,800	1960 (January) ..	74,100
Brazil	40,807	1958 (December) ..	71,420
China	25,600	1957 (December) ..	44,600
Argentina	33,762	1960 (June) ..	41,000
Pakistan(b)	33,000	1956 (December) ..	37,569
Mexico	11,716	1960 (Spring) ..	21,000
Ethiopia	18,000	1960 (estimate) ..	20,000
France	15,504	1959 (October) ..	18,671
Australia	13,285	1960 (March) ..	16,503
Colombia	8,010	1959 (October) ..	15,100
Turkey(b)	8,611	1959 (November) ..	13,479
Germany, Federal Republic of	12,114	1959 (December) ..	12,465
Union of South Africa	11,636	1959 (August) ..	12,000

(a) In some cases census for a single year, and in others an average for two to four years.
(b) Includes buffaloes.

6. **Imports and Exports of Cattle.**—The products of the cattle-raising industry figure largely in the export trade of Australia, although until recently the export of live cattle has never been large. In 1958-59, most of the cattle exported went to the Philippines for slaughter. However, in 1959-60, 10,343 head valued at £239,426 were exported to Hong Kong, while only 929 head, valued at £41,842 were exported to the Philippines. The number of cattle imported is small, and as in the case of horses, consists mainly of valuable animals for stud purposes. Since June, 1958, an embargo has been imposed on the import of cattle in order to prevent the possible introduction of the disease, blue-tongue. Details for the years 1955-56 to 1959-60 are shown in the following table:—

CATTLE: IMPORTS AND EXPORTS, AUSTRALIA.

Year.	Imports.		Exports.	
	No.	Value.	No.	Value.
		£'000.		£'000.
1955-56	304	229	8,025	475
1956-57	145	123	18,360	754
1957-58	272	174	23,933	932
1958-59	37	62	13,900	493
1959-60	13,602	456

The average value per head of the cattle imported during the last five years was £776 while the average value per head of the cattle exported during the same period was £40.

7. **Cattle Slaughtered.**—The numbers of cattle slaughtered during each of the years ended June, 1956 to 1960, compared with averages for the three-year periods ended June, 1939, 1949 and 1959, are shown in the following table:—

CATTLE (INCLUDING CALVES) SLAUGHTERED.

('000.)

Period.	Slaughterings passed for Human Consumption.									Total Slaughtering including Boiled Down.
	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.

1958–59 ..	1,894	1,397	1,883	287	249	128	24	10	5,872	5,960
1959–60 ..	1,499	1,277	1,527	238	243	145	24	9	4,962	5,024

8. **Production of Beef and Veal.**—Details of the production of beef and veal during each of the years ended June, 1956 to 1960, compared with averages for the three-year periods ended June, 1939, 1949 and 1959 are shown in the following table:—

PRODUCTION OF BEEF AND VEAL (CARCASS WEIGHT): AUSTRALIA.

('000 tons.)

Period.	N.S.W.	Vic.	Qld.	S. Aust.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Average for three years ended—									
1938–39 ..	181	123	199	26	28	10	1	1	569
1948–49 ..	160	106	206	27	30	9	3	1	542
1958–59 ..	248	176	305	41	41	19	5	2	837
Year—									
1955–56 ..	222	139	292	38	38	15	5	2	751
1956–57 ..	236	159	317	40	38	18	5	2	815
1957–58 ..	233	181	270	41	39	20	5	2	791
1958–59 ..	275	189	328	42	45	20	5	2	906
1959–60 ..	217	159	267	33	46	23	5	2	752

9. **Consumption of Beef and Veal.**—Since the 1939–45 War, consumption per head of beef and veal has been at a somewhat lower level than in the pre-war period (an average of 144 lb. carcass equivalent per head per annum for the three years ended 1938–39). For the three years 1946–47 to 1948–49, the average annual consumption per head was 112.5 lb. or 22 per cent. below the immediate pre-war level. There was a considerable recovery during the ensuing years to a post-war peak of 132.7 lb. per head in 1956–57. With the buoyant overseas market for beef and the high prices ruling in Australia, during the following three years consumption per head fell substantially and in 1959–60 amounted to only 100.0 lb. consisting of 97.5 lb. of carcass meat and 2.5 lb. (carcass equivalent) of canned meat. There was a marked substitution of mutton and lamb for beef in Australia during this period.

The figures quoted in the paragraph above include the consumption of canned beef and veal, and differ on that account from the figures shown in the last column of the next table.

In the following table, details of the production and disposal of beef and veal are shown for the years 1955-56 to 1959-60, compared with the averages for the three years ended 1938-39, 1948-49 and 1958-59.

**PRODUCTION AND DISPOSAL OF BEEF AND VEAL (CARCASS WEIGHT):

1957-58	+ 4	791	155	88	544	125.1
1958-59	+ 8	906	296	80	522	117.5
1959-60	- 11	752	266	55	442	97.5

(a) Includes carcass equivalent of boneless beef exported and ships' stores. (b) Not available.

10. Exports of Frozen Beef and Veal.—The quantity and value of frozen beef and veal exported in each year 1955-56 to 1959-60 are shown in the following table. The figures in this table represent actual weight shipped, not carcass equivalent.

EXPORTS OF FROZEN AND CHILLED BEEF AND VEAL: AUSTRALIA.

Year.	Exports of Frozen and Chilled Beef.		Exports of Frozen Veal.	
	Quantity.	Value.	Quantity.	Value.
	'000 lb.	£'000.	'000 lb.	£'000.
1955-56	318,059	22,936	4,689	495
1956-57	331,253	22,863	3,391	408
1957-58	276,607	20,961	5,397	609
1958-59	499,371	54,154	10,869	1,331
1959-60	414,749	54,568	6,827	897

Prior to 1959-60, the largest purchaser of Australian beef and veal was the United Kingdom. Exports to the United States of America have been growing in recent years, and in 1959-60 exceeded those to the United Kingdom. The total value of beef and veal exports to these two countries in 1959-60 were: United States of America, £29,944,000; United Kingdom, £20,192,000.

The export of frozen meat from Australia dates from about 1881, but because of the preference overseas for chilled beef, the Australian beef industry was at a serious disadvantage until investigations proved that beef could be successfully transported from Australia to the United Kingdom in a chilled condition. Trial shipments began in 1932-33 and exports in subsequent years increased to a maximum of 58,963,000 lb. in 1938-39. However, the 1939-45 War seriously affected the export trade in chilled beef, which declined to a negligible amount after 1939-40. In 1959-60, chilled beef exports were 2,926,000 lb. valued at £326,000, whilst frozen beef exports amounted to 411,823,000 lb. valued at £54,242,000.

Both quantity and value of exports of beef and veal reached a record level during 1958-59 and, while there was some reduction in quantity during 1959-60, the value remained at about the same level in that year.

While beef and veal were previously shipped largely in carcass form, there has been in recent years a substantial increase in the amount of boneless beef exported. In 1958-59 and 1959-60, the quantity of boneless beef shipped exceeded that exported in carcass form. The trade in boneless beef has been developed principally with the United States of America.

11. Research.—*Cattle and Beef Research Scheme.* In May, 1960, legislation was enacted to provide for a Commonwealth scheme for an expanded programme of research into the scientific, technical and economic problems connected with the Australian beef industry.

Funds are raised by a levy on all cattle weighing over 200 lb. dressed which are slaughtered for human consumption, and the Commonwealth provides a matching contribution on a £1 for £1 basis to meet expenditure on new research. The scheme is administered by the Australian Cattle and Beef Research Committee, whose main function is to formulate plans for projects on which the funds may be expended. The actual research work is undertaken by existing bodies such as the universities, C.S.I.R.O. and State Departments of Agriculture.

The three Acts covering research arrangements are the Cattle and Beef Research Act 1960, Cattle Slaughter Levy Act 1960 and Cattle Slaughter Levy Collection Act 1960.

At its first meeting in June, 1960, the Committee agreed to recommend to the Minister for Primary Industry that the levy be fixed at the maximum provided in the Act, namely 2s. per head. The levy was operative from 1st July, 1960.

§ 4. Sheep.

1. Movement in Sheep Numbers in Australia.—Fluctuations in the number of sheep recorded in Australia for each year from 1860 onwards may be seen from the graph on page 965. Up to 1945, there were five marked periods of decline, but the losses were made up rapidly. In each of the years 1925 to 1945, the sheep flocks exceeded 100 million, reaching 125.2 million in 1942. During the three years ended 1947, however, a sharp decline to 95.7 million occurred. This was largely attributable to the severe drought conditions experienced during 1944, 1945 and 1946. The passing of the drought and consequent re-stocking resulted in a steady increase in sheep numbers, and although dry seasonal conditions were responsible for a slight decline at 31st March, 1958, a record level of 155.2 million was reached at 31st March, 1960.

The following table shows the approximate movement in sheep numbers in Australia in each year 1955-56 to 1959-60.

SHEEP AND LAMBS : ANALYSIS OF MOVEMENT IN NUMBERS, AUSTRALIA.
(‘000.)

Season.	Lambs Marked.	Excess of Exports.	Sheep and Lambs Slaughtered.	Estimated Number of Deaths from Disease, Drought, etc.(a)	Number at 31st March.	Annual Net Increase (+) or Decrease (—)
1955-56.. ..	36,914	97	21,180	7,362	139,124	+ 8,275
1956-57.. ..	39,902	122	19,503	9,599	149,802	+ 10,678
1957-58.. ..	(b) 36,850	120	24,417	12,800	149,315	— 487
1958-59.. ..	38,748	136	26,963	8,279	152,685	+ 3,370
1959-60.. ..	44,150	226	32,084	9,351	155,174	+ 2,489

(a) Balance figure.

(b) Excludes Northern Territory prior to 1957-58.

2. **Distribution throughout Australia.**—With the exception of a short period in the early eighteen-sixties, when the flocks of Victoria outnumbered those of New South Wales, the latter State has occupied the premier position in sheep-raising, depasturing nearly one-half of the sheep of Australia.

Maps showing the distribution of sheep in Australia have been published in previous issues of the Official Year Book (see No. 43, p. 911, for 1955; No. 39, p. 907, for 1948; No. 34, p. 432, for 1938–39; and No. 22, p. 659, for 1924–25).

The numbers of sheep in the several States and Territories at 31st March of each year 1956 to 1960 compared with average numbers for the three-year periods ended 1939, 1949 and 1959 are shown in the following table:—

SHEEP : NUMBER.

('000.)

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Terr.	Aust. Cap. Terr.	Australia.
Average for three years ended—									
1939 ..	51,202	17,845	21,889	8,916	8,972	2,460	23	251	111,558
1949 ..	46,525	17,900	16,442	8,793	10,368	2,060	24	227	102,339
1959 ..	67,006	26,615	22,537	15,285	15,609	3,259	25	265	150,601
Year—									
1956 ..	62,988	23,343	22,116	13,585	14,128	2,673	33	258	139,124
1957 ..	67,670	25,831	23,190	14,984	14,887	2,943	30	267	149,802
1958 ..	65,410	27,090	22,274	15,236	15,724	3,298	27	256	149,315
1959 ..	67,936	26,925	22,148	15,634	16,215	3,536	19	272	152,685
1960 ..	71,000	26,597	23,332	14,025	16,412	3,494	15	299	155,174

Except when affected by drought, the relative numbers of sheep in the different States have remained fairly constant in recent years. Numbers in South Australia and Victoria were adversely affected by very dry conditions during 1959–60.

The percentage distribution in 1960 was:—New South Wales, 46; Victoria, 17; Queensland, 15; South Australia, 9; Western Australia, 11; and Tasmania, 2.

3. **Classification of Sheep According to Age, Sex and Breed.**—In the following table, numbers of sheep in Australia are classified according to age and sex at 31st March of the years 1956 to 1960.

SHEEP : AGE AND SEX, AUSTRALIA.

('000.)

Description.	1956.	1957.	1958.	1959.	1960.
Rams, 1 year and over ..	1,721	1,830	1,883	1,919	1,898
Breeding ewes (including ewes intended for mating) ..	62,483	66,844	66,059	69,470	68,455
Other ewes, 1 year and over ..	7,553	8,447	9,795	8,295	9,276
Wethers, 1 year and over ..	39,142	41,573	43,688	43,578	43,046
Lambs and hoggets, under 1 year ..	28,225	31,108	27,890	29,423	32,499
Total, Sheep and Lambs.	139,124	149,802	149,315	152,685	155,174

Particulars relating to the principal breeds of sheep at 31st March, 1959, the latest date for which these data are available (details are collected on a triennial basis only), are shown in the following table:—

SHEEP : PRINCIPAL BREEDS, 31st MARCH, 1959.

('000.)

Breed.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
Merino ..	52,467	11,410	21,725	13,112	14,921	325	19	245	114,224
Other recognized breeds ..	6,037	6,118	72	1,061	542	1,841	..	12	15,683
Merino comebacks(a) ..	3,408	3,422	70	312	146	466	..	2	7,826
Crossbreds(b) ..	6,024	5,975	281	1,149	606	904	..	13	14,952
Total ..	67,936	26,925	22,148	15,634	16,215	3,536	19	272	152,685

(a) Merino comeback is the progeny of a crossbred merino ewe and a merino ram, i.e., finer than half-bred.

(b) Half-bred and coarser.

4. Numbers of Sheep on Rural Holdings.—See § 1, para. 3, page 948, for information available.

5. Comparison with other Countries.—Australia has long occupied a leading position amongst the sheep-raising countries of the world in respect of the size of its flocks and the quantity and quality of wool produced. In 1959–60, Australian flocks numbered 155 million sheep, compared with an estimate of 239 million for the U.S.S.R., China, and Eastern Europe combined, about 50 million in New Zealand, and about 49 million in Argentina. The total world sheep numbers were estimated at about 917 million in 1959–60. These figures relate to woolled sheep only, non-woolled sheep accounting for about 5 per cent. of the world total of all types of sheep. Further details of sheep numbers in the principal wool producing countries of the world for 1957–58 to 1959–60 are given in the table on page 964.

6. Imports and Exports of Sheep.—As in the case of cattle, the overseas exports of live sheep from Australia are of comparatively little importance. On 27th November, 1929, the export of stud merino sheep was prohibited, except with the approval of the Minister for Primary Industry. Exports of sheep are now principally for slaughter overseas. Consignments for this purpose in recent years were made chiefly from Western Australia, to Singapore although in 1959–60 there were also substantial shipments from New South Wales to the United States of America. Since June, 1958, an embargo has been imposed on the import of sheep in order to prevent the possible introduction of the disease, blue-tongue. The following table shows the imports and exports of all sheep for the years 1955–56 to 1959–60.

SHEEP : IMPORTS AND EXPORTS, AUSTRALIA.

Year.	Imports.		Exports.	
	No.	Value.	No.	Value.
		£'000.		£'000.
1955–56	4,437	89	101,897	332
1956–57	7,445	212	129,480	482
1957–58	2,256	'90	122,628	466
1958–59	5	1	135,720	393
1959–60	225,757	'805

7. **Sheep Slaughtered.**—The following table shows the numbers of sheep slaughtered in the several States during each of the years ended June, 1956 to 1960, compared with averages for the three-year periods ended June, 1939, 1949 and 1959:—

SHEEP (INCLUDING LAMBS) SLAUGHTERED.

(‘000.)

Period.	Slaughterings Passed for Human Consumption.									Total Slaughterings including Boiled Down.

1948-49 ..	109,084	111,677	18,587	34,772	23,846	7,214	64	839	306,083
1958-59 ..	135,256	164,580	25,845	50,415	35,373	14,077	77	1,240	426,863
Year—									
1955-56 ..	120,615	146,228	23,020	44,339	32,759	11,778	59	1,333	380,131
1956-57 ..	121,947	131,253	23,866	42,563	33,303	12,607	49	1,198	366,786
1957-58 ..	127,800	169,107	24,381	53,681	31,942	13,221	90	1,254	421,476
1958-59 ..	156,020	193,379	29,286	55,001	40,875	16,403	93	1,269	492,326
1959-60 ..	184,600	223,519	35,886	62,760	44,385	20,780	111	1,269	573,310

9. **Consumption of Mutton and Lamb.**—Civilian consumption of mutton and lamb (in carcass equivalent weight, including canned mutton) rose substantially during the 1939-45 War, but fell again in 1946-47, and up to 1951-52 was lower than in pre-war years (an average of 74.8 lb. carcass equivalent per head per annum for the three years ended 1938-39). It rose during succeeding years to 78 lb. per head in 1952-53, and except for slight drops in 1955-56 and 1956-57, this level was maintained up to 1957-58. There was a sharp rise in 1958-59 to 89 lb. per head, and in 1959-60 a level of 105 lb. per head was reached. In 1959-60, consumption of mutton and lamb exceeded that of beef and veal for the first time on record. Figures quoted in this paragraph include the consumption of canned mutton, and differ on that account from the figures in the last column of the table following.

The following table gives details of the production and disposal of mutton and lamb:—

**PRODUCTION AND DISPOSAL OF MUTTON AND LAMB (CARCASS WEIGHT):
AUSTRALIA.**

1938-39	118	72	..	46	15.0
1948-49	— 1	130	45	..	86	25.2
1958-59	159	31	..	128	29.3
Year—						
1955-56	+ 1	146	36	..	109	26.2
1956-57	+ 1	143	24	..	118	27.7
1957-58	— 1	152	29	..	124	28.4
1958-59	— 1	182	41	..	142	31.9
1959-60	203	26	..	177	38.9

(a) Includes carcass equivalent of boneless mutton exported.

10. Exports of Frozen Mutton and Lamb.—The export trade in mutton and lamb preserved by cold process has not since attained the level of 205 million lb. shipped in 1913, although in 1942-43 it almost reached this level again. In earlier years, shipments consisted mainly of frozen mutton, but commencing with 1923-24 lamb has subsequently predominated in almost every year.

The quantities and values of exports of frozen mutton and lamb in each year 1955-56 to 1959-60 are shown in the following table:—

EXPORTS OF FROZEN MUTTON AND LAMB: AUSTRALIA.

Year.	Exports of Frozen Mutton.		Exports of Frozen Lamb.		Exports of Frozen Mutton and Lamb.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	'000 lb.	£'000.	'000 lb.	£'000.	'000 lb.	£'000.
1955-56.. ..	34,657	1,885	81,626	7,867	116,283	9,752
1956-57.. ..	23,012	1,322	53,262	4,773	76,274	6,095
1957-58.. ..	42,270	2,253	64,352	6,132	106,622	8,385
1958-59.. ..	74,650	5,851	91,192	8,151	165,842	14,002
1959-60.. ..	71,763	4,719	59,264	4,389	131,027	9,108

As with beef, the principal customer in this trade has normally been the United Kingdom, although the United States of America has become a major buyer of mutton in recent years. In 1959–60, exports of mutton and lamb to the United Kingdom represented 29 per cent. and 71 per cent., respectively, of the total quantities exported. Forty-five per cent. of the mutton exported went to the United States of America, largely in the form of boneless meat, and the proportion of lamb exported to that country was nine per cent.

§ 5. Consumption and Marketing of Meat.

1. **Consumption of Meat.**—The quantity of meat (including cured and canned meat) in terms of carcass weight and edible offal available for consumption in Australia in 1959–60 was 1,025,809 tons. This is equivalent to 237.6 lb. per head of population compared with 244.9 lb. per head in 1958–59, and an average of 253.0 lb. during the years 1936–37 to 1938–39. The latest data published by the Food and Agricultural Organization of the United Nations in its *Food Balance Sheets* show that of the countries for which information was available, Australia occupies a leading position in terms of consumption of meat per head. Details of consumption per head of all types of meat including poultry, rabbits and hares taken from the latest *Food Balance Sheets* are set out below for Australia in comparison with a number of other countries. Australian consumption per head is slightly greater than that of other principal meat exporting countries (Uruguay, New Zealand, Argentina), and is almost 40 per cent. greater than in the United States of America and Canada, and 76 per cent. greater than that of the United Kingdom.

MEAT CONSUMPTION PER HEAD OF POPULATION IN VARIOUS COUNTRIES. (lb. per annum.)

Period Covered.	Country.	Quantity Consumed.
Average—		
Three years ended 1956–57	Australia	247.8
1954 and 1955	Uruguay	233.7
Three years ended 1956	New Zealand	232.1
1954 and 1955	Argentina	226.9
Three years ended 1956	United States of America	179.7
” ” ” 1956–57	Canada	177.7
” ” ” 1956–57	United Kingdom	140.4

2. **Marketing of Meat.**—(i) *General.* The Australian Meat Board, consisting of representatives of producers, processors, exporters and the Commonwealth Government, is responsible for the control of all exports of Australian meat and meat products. Further information on the powers, etc., conferred on the Board under the Meat Export Control Act 1935–1960 is given on page 801 of Official Year Book No. 40.

(ii) *United Kingdom Long-term Purchase Agreements.* Details of the long-term meat contracts with the United Kingdom Government from the outbreak of the 1939–45 War up to 30th June, 1952, and of the Fifteen Year Meat Agreement (1952–67) are given on page 710 of Official Year Book No. 41 and in earlier issues.

The Fifteen Year Meat Agreement (1952–67) between the United Kingdom and Australian Governments has as its objectives the promotion of meat production in Australia enabling increased exports to be made to the United Kingdom and the provision of a satisfactory market in the United Kingdom for such meat. It covers beef and veal, and mutton and lamb.

(iii) *Cessation of Bulk Purchasing.* Following the announcement in September, 1953, that the United Kingdom Ministry of Food would cease bulk purchasing of meat, arrangements were made between the Australian Meat Board and the Ministry for the reversion to private trading in the United Kingdom. The main features of the arrangements are:—

(a) Mutton and lamb exported after 1st July, 1954, and beef, veal and pigmeat exported after 1st October, 1954, direct to United Kingdom importers are to be sold on the open market under methods similar to those which applied pre-war.

- (b) The following minimum prices (f.o.b. port of shipment), to operate until 30th September, 1955, were agreed upon:—Beef and veal, 13.18d. stg. per lb.; lamb, 13.61d. stg. per lb.; and mutton, 6.05d. stg. per lb., these minimum prices to be reviewed for subsequent years.
- (c) In the event of market prices for the various classifications of meat averaging below the minimum, the Ministry is to make a payment to the Australian Government corresponding to the amount of the deficiency. So as to determine the extent of any deficiency, a procedure designed to measure as accurately as possible the weighted average level of wholesale prices of Australian meat on the United Kingdom market has been agreed upon.

(iv) *Private Trading.* As part of the negotiations which have taken place in Australia and the United Kingdom at various times since 1954, minimum prices have been reviewed periodically. The result has been a general reduction in minimum prices, and up to the 1960–61 season this had amounted to 5 per cent. in the case of beef and veal and lamb, and about 25 per cent. in the case of mutton, compared with 1954–55 minimum prices. At the same time, however, Australia has been permitted to export increasing quantities of all types of meat to destinations other than the United Kingdom and the Colonies. For the years 1957–58 to 1960–61, the beef export “free quota” was set at a maximum of 7,500 tons a year of 1st and 2nd quality beef, without restriction as to the quantity of lower grades that may be exported to these other destinations.

Minimum beef prices for the three years to 1963–64 were fixed during the 1958 negotiations at 9 per cent. below the 1960–61 level.

After eight months of open trading, the Australian Meat Board estimated that a deficiency payment would be received in respect of beef for the first year. In order to make arrangements for this anticipated payment to be passed on to the producer, the Meat Agreement (Deficiency Payments) Act was passed by the Commonwealth Government in May, 1955. Payments were to be made on the understanding that they were, or would be, reflected in the price paid to producers. To make provision for recoupment by the Board of any overpayment, the Meat Export (Additional Charge) Act was also passed in May, 1955.

Because of a rise in beef prices in the United Kingdom, the deficiency payments made by the Board during the year ended 30th September, 1955, exceeded the sum received from the United Kingdom for the same period. In an endeavour to recoup some of this overpayment, under the terms of the Meat Export (Additional Charge) Act, a levy of one-eighth of a penny per lb. was imposed on certain classes of beef exported to the United Kingdom out of stocks placed into store from 1st February to 16th April, 1956.

From 1st October, 1955, until April, 1958, beef prices in the United Kingdom were consistently below the level of the guarantee and consequently Australia “earned” deficiency payments which enabled the Australian Meat Board to make substantial bounty payments on beef exported to the United Kingdom. The rates of payment made during the 1954–55 and 1955–56 seasons are given on pages 888–9 of Official Year Book No. 43 and on pages 920–1 of Official Year Book No. 44 for 1956–57. No deficiency payments have been received since 1956–57.

In 1958, a new “chiller” grade of export beef was introduced. Beef of the new grade, whether exported in the chilled or frozen form, received a bounty of 5d. per lb. The bounty on bone-out piece beef was increased from 4d. to 5d. per lb., and on certain classes of bone-in piece beef from 3d. to 5d. per lb. The basic rate of 3d. per lb. was maintained for other 1st and 2nd quality quarter beef. The bounty payments were discontinued on 27th December, 1958, on account of the relatively high prices being obtained in the United Kingdom.

During the 1958–59 season, as in previous years, the heaviest volume of beef exports went to the United Kingdom. However, with the new free quota arrangements which operated from 1st October, 1958, Australian exporters were able to take advantage of the market for boneless manufacturing meat in the United States, and a substantial quantity of lower-grade beef, including drought-stricken stock, etc., which otherwise might not have been marketed at all, was disposed of to American manufacturers. During 1959–60, the United States market eclipsed the United Kingdom for the first time as the principal market for Australian beef exports.

§ 6. Wool.

1. **General.**—Australia is the leading wool-growing country in the world. With about one-sixth of the world's woolled sheep, Australia produces more than one-quarter of the world's wool (30 per cent. in 1959–60) and about 55 per cent. of the total fine-quality merino wool. The bulk of the production is exported, mainly as greasy wool, although substantial amounts of scoured and carbonized wool, wool on sheep skins and small quantities of semi-manufactured wool are also shipped. The remainder, which is used by Australian manufacturers, has amounted to only five per cent. of the total production (greasy basis) in recent years.

The important position held by Australia among the principal sheep and wool producing countries of the world is shown in the table on page 964.

2. **Greasy and Scoured Wool.**—Comparisons between the wool clips of different seasons and of different countries are seriously affected according to whether the weight of the clip is expressed as "in the grease" or as "clean". The quantity of grease and other matter in a fleece differs, not only between countries, but between districts in the same country. It fluctuates with the vagaries of the season, and with the breed and the condition of the sheep.

From 1946–47 to 1952–53, the Australian Wool Realization Commission, and from 1953–54, the Wool Statistical Service, has assessed annually the clean yield of the Australian wool clip. The yield of clean wool from greasy wool has shown an almost uninterrupted increase during the period of assessment up to 1956–57, when it reached 57.7 per cent. It has remained almost stationary at about 56.7 per cent. during the three following years.

Wool scoured, washed and carbonized in Australia before export, however, has a clean yield somewhat lower than for the whole clip, because the grade of greasy wool treated locally for export as scoured, washed or carbonized includes a large proportion of dirty and low-grade wool. In recent years, it has approximated 54 per cent. The quantity of this wool exported during 1959–60 was about 13 per cent. of the total raw wool exports (excluding wool exported on skins) in terms of greasy.

For the clean yield of Australian scoured wools, a standard factor of 93 per cent. is taken.

3. **Production.**—The production of wool in the States and Territories varies broadly in accordance with the number of sheep depastured and with seasonal conditions (*see* 4. below). In general, however, South Australia obtains from its large-framed Merinos a much heavier fleece per sheep than the Australian average, while Tasmania obtains from its predominantly non-Merino flocks a much lighter fleece per sheep. In addition, as a result of better management (improved pastures, fodder conservation, better breeding, control of diseases, etc.), the long-term trend has been towards higher fleece weights.

The following table shows details of total wool (i.e., shorn, dead and fellmongered, and exported on skins) produced by each of the States and Territories during the years 1955–56 to 1959–60 compared with averages for the three-year periods ended 1938–39, 1948–49 and 1958–59.

PRODUCTION OF WOOL (IN TERMS OF GREASY).
(*000 lb.)

The bulk of the Australian wool production (about 93 per cent. in recent years) is shorn from live sheep. The remainder is obtained by fellmongering (about 2 per cent.), or is exported on skins (about 5 per cent.). The following table shows details of total wool production according to method of obtaining wool, and also the gross value of wool produced. Gross value is based, for shorn wool, upon the average price realized for greasy wool sold at auction, and, for skin wools, on prices recorded by fellmongers and skin exporters.

**QUANTITY (IN TERMS OF GREASY) AND VALUE OF WOOL PRODUCED:
AUSTRALIA.**

Period.	Shorn (incl. Crutchings).	Dead and Fell- mongered.	Exported on Skins.	Total Production.	
				Quantity.	Value.
	'000 lb.	'000 lb.	'000 lb.	'000 lb.	£'000.
Average of three years ended—					
1938-39.. ..	889,338	49,280	57,983	996,601	53,425
1948-49.. ..	902,007	50,660	60,265	1,012,932	152,536
1958-59.. ..	1,411,424	36,804	81,490	1,529,718	394,145
Year—					
1955-56.. ..	1,303,944	44,051	69,377	1,417,372	354,064
1956-57.. ..	1,457,387	37,724	69,144	1,564,255	507,615
1957-58.. ..	1,319,941	30,894	83,019	1,433,854	363,406
1958-59.. ..	1,456,759	41,795	92,308	1,590,862	311,415
1959-60.. ..	1,529,362	38,894	111,744	1,680,000	389,761

In comparing successive clips, allowance must be made for the circumstance that, owing to climatic or other conditions, the time of shearing may be so far delayed in some areas that one clip may include almost thirteen months' growth of wool, while the succeeding one may include little more than eleven months' growth.

4. **Average Weights of Fleeces Shorn.**—The average weights of sheep and lamb fleeces shorn in each of the States of Australia and in the Australian Capital Territory are shown in the following table for each season 1955-56 to 1959-60.

**AVERAGE WEIGHT OF SHEEP AND LAMB FLEECES SHORN.

(a) Excludes Northern Territory.

5. **Wool classified according to Quality.**—The following table provides a detailed analysis of wool sold at auction, according to quality, for the years 1955-56 to 1959-60. These data are compiled by the Wool Statistical Service on the basis of catalogues of auction sales. "Quality" ("64's, 60's, 58's," etc.) is a measure of the fineness and texture of wool for spinning purposes. Broadly, it means the maximum number of hanks of yarn, each of 560 yards length, which can be spun from 1 lb. of combed wool. For instance, wool of 64's quality is of a fineness and texture which will produce 64 hanks, each of 560 yards, from 1 lb. of tops (combed wool) of that particular wool.

(a) All greasy wool sold at auction except "wool re-offered account buyer".

6. **World Sheep Numbers and Wool Production.**—The following table shows particulars of the woolled sheep numbers and total production of wool, in terms of greasy, in the principal wool-producing countries of the world, together with estimates of world production of merino, crossbred and carpet type wool for the latest available years.

In 1959-60, Australia produced 30 per cent. of the world total of all types of wool, the share of all British Commonwealth countries combined representing approximately 50 per cent. The principal wool producers, other than Australia, were New Zealand with 10 per cent. of the world total, Argentina, 8 per cent., United States of America, 6 per cent., and Union of South Africa, 6 per cent. Production in the U.S.S.R., China, and Eastern European countries together amounted to 19 per cent. World production of wool (all types) in 1959-60 exceeded the average for 1934-38 by approximately 1,800 million lb. or 50 per cent.

Australia's wool clip is predominantly merino. New Zealand and Argentina produce mainly crossbred wool, while the clip of the U.S.S.R. is largely of the carpet type. World production of merino wool in 1959-60 was 45 per cent. above the average for 1934-38, and the production of crossbred types has risen by about 64 per cent. Carpet wool production has risen by about 32 per cent.

SHEEP NUMBERS AND WOOL PRODUCTION: AUSTRALIA

1870 TO 1959-60

7. *War-time Contracts.*—(i) *Wool.* Details of the contract entered into between the Governments of Australia and the United Kingdom for the purchase of the surplus wool clip of Australia for the duration of the war and one full clip thereafter (1939–40 to 1945–46) will be found in Official Year Book No. 36, page 1106.

(ii) *Sheepskins.* Details of the war-time contract arrangements for the period April, 1940, to June, 1946, between the Australian and United Kingdom Governments for the purchase of Australia's exportable surplus of woolled sheepskins will be found in Official Year Book No. 37, page 875.

8. *Australian Wool Realization Commission.*—The Australian Wool Realization Commission was the Australian subsidiary of a Joint Organization (commonly referred to as "J.O.") set up by the Governments of the United Kingdom, the Commonwealth of Australia, the Dominion of New Zealand and the Union of South Africa, under the title of "U.K.—Dominion Wool Disposals Limited" to dispose of accumulated war-time stocks of Dominion wool held by the United Kingdom Government at the end of the war. Details of the work and operations of these organizations appear in earlier issues of the Year Book, particularly No. 38, pages 919–923.

By the end of 1951, the Joint Organization had disposed of all stocks of wool held and shortly afterwards it went into voluntary liquidation. Liquidation proceedings were completed on 15th February, 1954.

Australia's share of the profits arising from the operations of J.O. amounted to approximately £93 million (including interest). The task of distributing the profits to growers was entrusted to the Australian Wool Realization Commission. Owing to some protracted litigation, known as the "Poulton Case" (see Official Year Book No. 45, p. 947), final distribution was not effected until 1959.

A residue of £2.4 million, representing unclaimed moneys, was paid to the Wool Research Trust Fund, under the terms of the Wool Realization (Distribution of Profits) Act, 1957.

9. *Australian Wool Bureau.*—(i) *General.* The Australian Wool Bureau was constituted under the Wool Use Promotion Act 1953 and replaced the Australian Wool Board which was established in 1936. The Bureau's main function is to promote the use of wool by publicity and other means in Australia and overseas.

The Bureau consists of seven members appointed by the Governor-General for a term of three years. Of the seven members, three represent the Australian Wool and Meat Producers' Federation, three the Australian Woolgrowers' and Graziers' Council and the other member is nominated by the Commonwealth Government.

(ii) *Wool Use Promotion.* The Wool Use Promotion Act 1953–1957 defines the powers and functions of the Australian Wool Bureau as including measures for promoting, by publicity or other means, the use of wool in Australia or in other countries.

The Bureau is also authorized to take measures for improving the production of wool in Australia and encouraging research directed to the promotion of the use of wool.

The Bureau is associated with the New Zealand Wool Board and the South African Wool Board in maintaining the International Wool Secretariat, which was established in 1937 with head-quarters in London and with branches in fourteen countries. The function of the Secretariat is to promote the use of wool through a broad programme of publicity, education and research.

The activities of the Australian Wool Bureau are financed from the Wool Use Promotion Fund, into which are paid the proceeds of the Wool Levy and contributions from the rental income of the wool stores, as mentioned in (iv) below.

(iii) *Wool Statistical Service.* The Wool Statistical Service, formerly conducted by the Australian Wool Realization Commission, was taken over by the Australian Wool Bureau on 23rd October, 1953. The Statistical Service is responsible for the preparation and publication of statistical material relating to the Australian wool market and the composition of the Australian clip and other special statistical work which may be assigned to it.

It is financed out of the income received by the Australian Wool Bureau from wool stores under its control and from an annual contribution by the Commonwealth Government.

A Statistical Service Committee, consisting of representatives of the Australian Wool Bureau, the Commonwealth Government, wool buyers, wool growers and wool selling brokers' organizations, acts in an advisory capacity to the Australian Wool Bureau.

(iv) *Wool Stores.* Some three hundred wool stores, formerly the property of the Joint Organization and purchased from it by the Commonwealth Government, were transferred to the ownership of the Australian Wool Bureau by virtue of the Wool Stores Act 1953. The Bureau formally assumed control of these stores on 11th January, 1954, and at the same time received a substantial sum of money representing accumulated rentals and receipts from sales which had come to hand while the stores were held by the Commonwealth Government. Under the Act, the Bureau may dispose of these stores only with the permission of the Minister for Primary Industry and, in the event of war, may be required to return the stores without compensation to the Commonwealth Government. The stores are let by the Wool Bureau as a commercial proposition. The rental income is used to meet the expenses of maintaining, managing and insuring the stores, to defray the cost of operating the Wool Statistical Service and to help finance the wool promotion activities of the Bureau.

(v) *The Contributory Charge.* Associated legislation, namely, the Wool (Contributory Charge) Act 1945, subsequently replaced by the Wool (Contributory Charge) Act (No. 1) 1950-1951 and the Wool (Contributory Charge) Act (No. 2) 1950-1951, and the Wool (Contributory Charge) Assessment Act 1945-1951 provided for a contributory charge to be imposed on woolgrowers on all shorn wool produced in Australia and sold after a date fixed by proclamation. The passage of amending Wool Tax legislation in June, 1952, made it possible to cease collection of the contributory charge at 30th June, 1952, and the legislation under which it was imposed was repealed. Further particulars of the Wool Contributory Charge and the amounts collected appear in Year Book No. 40, pages 675 and 819.

(vi) *The Wool Levy.* While the contributory charge legislation, mentioned above was in force, the Wool Levy, which was imposed by the Wool Tax Act 1936-1945 and the Wool Tax Assessment Act 1936, was temporarily suspended. When the Wool Levy was first imposed in 1936, the rate of tax on woolgrowers was 6d. a bale on all shorn wool produced in Australia and sold. The proceeds were paid into the Wool Publicity and Research Fund administered by the Australian Wool Board.

When collection of the contributory charge ceased (i.e., from 1st July, 1952), the Wool levy again became operative but at a higher rate. This rate was provided for in the Wool Tax Acts (Nos. 1 and 2) of 1952, under which a rate was prescribed between limits of 2s. and 5s. a bale on shorn wool produced in Australia and sold.

From 1952-53, the rate prescribed was 4s. a bale. The Wool Tax Acts (Nos. 1 and 2) of 1952 were repealed in May, 1957, and replaced by the Wool Tax Acts (Nos. 1 and 2) of 1957. The 1957 Acts maintained the levy on woolgrowers for wool promotion within the limits of 2s. to 5s. a bale on shorn wool produced in Australia and sold. In addition, provision was made under the 1957 Acts for woolgrowers to be levied at a maximum rate of 2s. a bale for wool research. Until 18th August, 1960, the operative rates prescribed were 4s. a bale for wool promotion purposes and 2s. a bale for wool research. On this date, the promotion levy was raised to 5s. a bale, which is the maximum permissible under current legislation.

10. *Marketing of Wool.*—(i) *Minimum Reserve Price Plan.* Details of the minimum reserve price plan which was completed by the Governments of Australia, New Zealand, South Africa and the United Kingdom in May, 1951, and which was rejected at a referendum of woolgrowers in Australia in September, 1951, will be found in Official Year Book No. 39, page 925.

(ii) *Subsidy on Woollen Goods, 1950-51.* Details of the subsidy paid on woollen goods manufactured for consumption in Australia from wool sold during the 1950-51 season will be found in Official Year Book No. 41, page 727.

11. Wool Research.—Until 1945, the Australian Wool Board was responsible for the supervision of economic and scientific research, but in that year the Commonwealth Scientific and Industrial Research Organization was made responsible for scientific, technical and biological research into sheep raising and wool production, as well as wool textile research. Economic wool research is the responsibility of the Bureau of Agricultural Economics, a division of the Commonwealth Department of Primary Industry. The economic research work falls into two main categories, namely, farm production economics dealing with economics of wool growing and sheep-station management generally, and commodity research dealing with the economic aspects of the wool industry in Australia and of wool as a commodity in world trade.

To finance the research programme, the Wool Research Trust Account was established under the Wool Use Promotion Act in 1945. Originally, a sum equal to the amount raised by the Wool Levy was paid annually by the Commonwealth Government into this account from Consolidated Revenue. The Wool Use Promotion Act 1953 fixed the rate of contribution at 2s. for each bale of shorn wool produced in Australia as from 1st July, 1952.

In addition, finance was available for research from the Wool Industry Fund. This Fund was established in 1946 from various moneys accumulated by the Central Wool Committee in war-time.

Under the Wool Research Act 1957, these sources of income, together with an increased Government contribution totalling 4s. a bale, effective from 1st July, 1957, and a contribution of 2s. a bale from woolgrowers, effective from 1st July, 1957, collected under the Wool Tax Acts 1957, were combined into one fund known as the Wool Research Trust Fund. The use of this Fund is limited to sheep and wool research and expenditure therefrom is based on the recommendations of the Wool Research Committee. This committee comprises representatives of the C.S.I.R.O., the Universities, the Department of Primary Industry, Wool-growers' Organizations, the Australian Wool Bureau, and Textile Manufacturers.

Opportunity is afforded for co-operation with State Departments of Agriculture and other organizations in research and extension activities, by the inclusion on the Committee of a representative of the Australian Agricultural Council in the capacity of an observer.

The Australian Wool Testing Authority. The Australian Wool Testing Authority Act 1957, assented to on 12th September, 1957, constituted the Australian Wool Testing Authority, composed of representatives of woolbuyers, wool selling brokers, wool processors, the Australian Wool Bureau, the C.S.I.R.O. and the Commonwealth Government. It is intended that ultimately the Authority should be self-financing, but during the preliminary stages the Commonwealth Government is providing the initial capital by way of a loan.

The function of the Authority is to provide a service in Australia for carrying out various tests on wool and wool products, particularly with regard to the moisture content of scoured and carbonized wool. Testing on a commercial basis commenced in September, 1958.

In February, 1959, the Authority was notified by the International Wool Textile Organization that it would be included in the organization's list of official wool testing establishments. This is the standard of international recognition for wool testing houses and gives the Australian Wool Testing Authority the same standing as similar organizations in other countries.

Wool Marketing Committee of Enquiry. On 25th January, 1961, the names of the members and terms of reference of a Committee to inquire into Australian wool marketing methods was announced. The terms of reference are—

- (a) to inquire into the present systems of marketing and of promoting the sale of the Australian wool clip and matters relating thereto, and to report upon the efficacy of these systems;
- (b) to report upon the results of any other systems or of modifications of the present systems which may be advocated to the Committee of Enquiry or which the Committee itself considers would be of long-term benefit to the wool-growing industry and in the best interests of the nation.

12. Consumption of Wool.—(i) *Consumption of Raw Wool.* Statistics of raw wool consumption published in recent years for the purposes of broad international comparisons are based on the quantities of scoured or carbonized wool used on the woollen and worsted systems (mill consumption), plus quantities used in such processes as felting. Consumption

estimates compiled on this basis have obvious defects, as they disregard overseas trade in semi-processed wool (e.g., tops and yarns) as well as woollen goods. They are, however, comparatively simple to calculate and are useful in providing an approximate indication of trends in wool consumption. Estimates of raw wool used on the woollen and worsted systems and by felt manufacturers in Australia are shown in the following table for the years 1955-56 to 1959-60.

ESTIMATED CONSUMPTION OF RAW WOOL IN AUSTRALIA.

('000 lb.)

Year.	Greasy Basis.			Clean Basis.		
	Used on Woollen and Worsted Systems.	Used for Felt Manufacture (including Hats).	Total.	Used on Woollen and Worsted Systems.	Used for Felt Manufacture (including Hats).	Total.
1955-56	92,374	7,586	99,960	54,847	3,603	58,450
1956-57	108,255	5,218	113,473	65,504	2,479	67,983
1957-58	103,704	4,480	108,184	63,153	2,128	65,281
1958-59	103,180	3,992	107,172	62,834	1,896	64,730
1959-60	123,529	5,092	128,621	75,226	2,419	77,645

(ii) *Consumption of Locally Processed Wool.* As considerable quantities of tops, noils and yarn are exported from Australia, the series on raw wool consumption shown above is over-stated to this extent. The series entitled "Consumption of Locally Processed Wool" provides a more reliable indication of wool consumption in Australia, as allowance has been made for exports of wool in semi-processed form. This series is shown in the following table for the years 1955-56 to 1959-60. Briefly, the series measures consumption of wool in terms of yarn used in Australian mills and other factories to produce woollen cloth and other woollen goods, yarn used for hand knitting purposes, and scoured wool used for felt manufacture. No allowance has been made for overseas trade in woollen piece goods, clothing, etc., because of the obvious difficulties of estimating accurately the wool content of these products.

ESTIMATED CONSUMPTION OF LOCALLY PROCESSED WOOL IN AUSTRALIA.

13. **Exports of Wool.**—(i) *Quantities.* (a) *Greasy.* Prior to the 1939-45 War, Australian greasy wool exported overseas was sent principally to the United Kingdom and other European countries. During the 1939-45 War, exports to the United States of America showed great expansion but have since dwindled to about 2 per cent. Of the total shipments in 1959-60, 26 per cent. went to Japan, 21 per cent. to the United Kingdom, 13 per cent. to France, 10 per cent. to Italy and 8 per cent. to Belgium-Luxembourg. The following table shows the quantities of greasy and slipe wool exported, and the principal countries of consignment.

(ii) *Total Value of Exports.* The value of wool (other than wool on sheepskins) exported from Australia during the five years ended 1959–60 averaged 45 per cent. of the total value of exports of merchandise of Australian origin, and during 1959–60 the proportion was 43 per cent. The value for the five years ended 1959–60, together with the principal countries to which wool was exported, is shown in the following table.

VALUE OF WOOL EXPORTS.(a)

(£'000.)

Country of Consignment.	1955–56.	1956–57.	1957–58.	1958–59.	1959–60.

<i>Total</i>	<i>337,508</i>	<i>483,704</i>	<i>373,397</i>	<i>302,211</i>	<i>386,142</i>

(a) Excludes wool exported on sheepskins.

14. Stocks of Wool.—Stocks of raw wool held in Australia at 30th June, 1960, amounted to 244.9 million lb. (as in the grease) of which 65.3 million lb. (42.2 million lb. as greasy and 23.1 million lb. as scoured and carbonized) were held by woollen mills, wool scourers and fellmongers, and 179.6 million lb., assumed to be all greasy, were held by brokers. Of the wool held by brokers, 54.1 million lb. were unsold wool and 125.5 million lb. were sold wool held awaiting shipment. These stocks exclude wool on skins, since this wool is not recorded as production until fellmongered in Australia or exported on skins.

15. Price.—Wool is the chief factor in the pastoral wealth of Australia, and the nation's prosperity is largely dependent upon its satisfactory sale. Auction sales are conducted at Sydney, Goulburn, Newcastle, Albury, Melbourne, Geelong, Ballarat, Brisbane, Adelaide, Perth, Albany, Hobart and Launceston, and are attended by buyers representing manufacturers and merchants in the United Kingdom, France, the United States of America, Japan, U.S.S.R. and many other countries. More than 95 per cent. of the Australian wool clip is now disposed of at auction in Australia. During the five years ended 1959–60, the price of greasy wool sold in the selling centres of Australia averaged 62.0d. per lb. compared with the average selling price of 11.5d. per lb. during the ten years ended 1938–39. The average for the nine years ended 1928–29 was 18d. per lb., and for the seven years ended 1913–14, 9d. per lb.

As indicated in para. 7 above, the price of wool during the 1939–45 War was determined by the British Government wool contract. With the return to auction sales since 1945–46, the average price of greasy wool sold rose rapidly from the contract price of 15.45d. per lb. applicable in 1945–46 to the unprecedented level of 144.19d. per lb. in 1950–51. This was followed by a sharp fall, and prices in the years 1951–52 to 1957–58 fluctuated in the range 61d. to 82d., while in 1958–59 they fell to 48.6d., the lowest for ten years. This was followed by a recovery to 57.8d. in 1959–60.

The prices quoted above, except for United Kingdom contract prices, are as compiled by the National Council of Wool Selling Brokers and represent the average price realized for all greasy wool, of whatever type or quality, marketed during the years indicated.

16. Value.—Fluctuation in Australian wool prices has a marked effect on the nation's rural income. In 1945–46, the gross value of wool production was £58,597,000, representing 17.4 per cent. of the gross value of all rural industries, while in 1950–51, when prices reached a peak, wool was valued at £651,902,000 or 55.6 per cent. of the total for all rural industries. The value of wool production fell in subsequent years even though the quantity produced increased substantially, and in 1959–60 was £389,761,000.

Details of the value of wool production for the years 1955–56 to 1959–60 are shown in the following table:—

ESTIMATED GROSS VALUE OF TOTAL WOOL PRODUCTION.(a)

(£'000.)

Season.	N.S.W.	Vic.	Qld.	S. Aust.	W.Aust.	Tas.	N.T.(b)	A.C.T.	Aust.

(a) Greasy, Slipe, Washed and Scoured, and Carbonized.

Australian wool represented 41 per cent. of the total quantity imported into the United Kingdom during 1960. New Zealand supplied 25 per cent. and South Africa 7 per cent., while the total quantity received from British Commonwealth countries constituted 79 per cent. of all United Kingdom imports of wool.

18. **Principal Importing Countries and Sources of Supply.**—The following table, prepared from information published by the Commonwealth Economic Committee, furnishes, in respect of the principal importing countries, details of their production and imports of wool for 1959 together with the chief sources of supply. The quantities imported refer to the actual weight of wool, without distinguishing between greasy and scoured, except in the case of the United States of America where estimated clean content of raw wool is quoted.

WOOL: PRINCIPAL IMPORTING COUNTRIES AND SOURCES OF SUPPLY, 1959.

Japan	(c)	302.5	18.8	11.3	18.3	18.1	369.0
United States of America(d)	316	34.5	66.6	23.1	69.8	98.1	292.1

(a) As in the grease, 1959-60. (b) Actual weight of greasy and scoured wool. (c) Not available. (d) Imports are in terms of estimated clean content of greasy and scoured wool. Actual weight of total United States of America imports was 395.7 million lb.

As a considerable transit trade exists between continental countries, it must not be assumed that the whole of the imports recorded by these countries is retained for their own consumption. The countries chiefly concerned with the transit trade are the United Kingdom (8 per cent. of total imports re-exported in 1959) and Belgium.

§ 7. Oversea Trade in Hides and Skins.

1. **Extent of Trade.**—In addition to the hides and skins treated locally, considerable quantities are exported. The value of cattle and horse hides, sheep and other skins, and skin pieces, sent overseas during 1959–60 amounted to £31,727,000, compared with a total of £23,525,000 in 1958–59 and £25,353,000 in 1957–58.

2. **Export of Sheepskins.**—(i) *With Wool.* Of the total exports of sheepskins with wool, amounting to 167,734,000 lb. valued at £23,238,000 during 1959–60, 123,518,000 lb. valued at £16,980,000 were shipped to France, 14,251,000 lb. valued at £2,314,000 to Italy, and 14,399,000 lb. valued at £1,799,000 to the United Kingdom. In the previous year, France obtained about three-quarters (by value) of all sheepskins with wool exported and the United Kingdom about 9 per cent. The exports of sheepskins with wool during each of the years 1955–56 to 1959–60 were as follows:—

EXPORTS OF SHEEPSKINS WITH WOOL: AUSTRALIA.

Particulars.	1955–56.	1956–57.	1957–58.	1958–59.	1959–60.
Number '000	14,891	14,239	19,441	20,180	25,560
Value £'000	15,268	19,438	20,219	14,768	23,238

(ii) *Without Wool.* Up to 1943–44, sheepskins without wool were exported chiefly to the United States of America. During 1943–44, that country accounted for 97 per cent. of the total shipments. In subsequent years, however, there has been a decline in the proportion shipped to the United States of America. In 1958–59, the United States received 66 per cent., and in 1959–60 only 28 per cent. In the latter year, France was the main importer, taking 30 per cent. (value, £112,551), while the United Kingdom purchased 25 per cent. (value, £92,758). In 1959–60, a total of 1,486,000 sheepskins without wool were exported valued at £372,000. Since 1954–55, the number exported has exceeded two million only once (in 1958–59), and the value has fluctuated about £400,000.

3. **Hides.**—(i) *Exports.* The export trade in cattle hides and calfskins during 1959–60 was distributed amongst the main importing countries as follows:—Japan, £2,469,000; Germany (Federal Republic), £702,300; Italy, £571,800; Netherlands, £532,900; United States of America, £352,100. The total quantity exported was 56,357,000 lb., valued at £5,752,000.

(ii) *Imports.* The imports of cattle hides and calfskins are fairly substantial, the chief sources of supply being New Zealand and the Pacific Islands. The quantity of cattle hides, including calfskins, imported into Australia during the year 1959–60 amounted to 1,589,000 lb. valued at £153,000, the highest figures attained since 1953–54.

4. **Furred Skins.**—The exports of furred skins in 1959–60 were valued at £1,755,000, of which rabbit and hare skins constituted £1,156,000. This is the highest total value recorded since 1955–56 (£2,013,000), when rabbit and hare skins accounted for £1,711,000. In 1958–59, they accounted for £1,288,000 out of a total of £1,477,000.

Skins were shipped principally to the United States of America, the United Kingdom, Belgium and Luxembourg, the values shipped to each in 1959–60 being:—United States of America, £1,207,200; United Kingdom, £333,700; and Belgium-Luxembourg, £64,400.

5. **Marketing of Hides and Skins.**—(i) *Sheepskins with Wool.* Details of the agreement between the United Kingdom and Commonwealth Governments for the purchase by acquisition of the “exportable surplus” of woolled sheepskins in Australia during the 1939–45 War were given in Official Year Book No. 37, page 886. The contract expired on 30th June, 1946, and sheepskins have since been marketed mostly at open auction.

(ii) *Sheep and Lamb Pelts.* Details of the marketing control of sheep and lamb pelts were given in Official Year Book No. 38, page 930. Pelts have since reverted to open marketing without export restrictions.

(iii) *Hides and Leather.* A hide acquisition and marketing scheme operated from November, 1939, to August, 1954. The Australian Hide and Leather Industries Board, which administered the scheme, acquired all cattle hides and yearling and calf skins produced in Australia at set prices and allocated them to tanners at these prices. Further details of the war-time operations of the scheme will be found in Official Year Book No. 37, page 887, and Official Year Book No. 38, pages 930–1.

Pre-war, about 40 to 45 per cent. of Australian production of cattle hides and calf skins was exported but, with the development of the local tanning industry, the proportion is now approximately 30 per cent.

(iv) *Rabbit Skins.* A marketing control scheme for rabbit skins was introduced under the National Security (Rabbit Skins) Regulations on 10th June, 1940, and terminated in April, 1949. Details of the scheme will be found in Official Year Book, No. 38, page 931.

§ 8. Tallow.

1. **Consumption of Tallow in Factories.**—Details of consumption are collected from the principal factories using tallow. Consumption of inedible tallow in these factories (soap and candle, chemical and woolscouring works) for the five years 1955–56 to 1959–60 was as follows:—1955–56, 1,210,694 cwt.; 1956–57, 1,207,578 cwt.; 1957–58, 1,280,984 cwt.; 1958–59, 1,216,668 cwt.; 1959–60, 1,277,542 cwt. These figures are, however, deficient to the extent that no allowance has been made for small unrecorded amounts used in other types of establishments. Details of edible tallow consumed in factories are not available.

2. **Exports of Tallow.**—Particulars of exports of edible and inedible tallow are shown in the following table for the five years 1955–56 to 1959–60:—

TALLOW: EXPORTS, AUSTRALIA.
(cwt.)

Particulars.	1955–56.	1956–57.	1957–58.	1958–59.	1959–60.
Edible	127,275	120,194	116,986	74,053	118,848
Inedible	829,403	936,951	878,060	1,022,844	1,533,734
Total	956,678	1,057,145	995,046	1,096,897	1,652,582

3. **Marketing of Tallow.**—Until 30th September, 1952, the bulk of Australia's exportable surplus tallow, other than collar white mutton tallow, was sold to the United Kingdom Ministry of Food under a series of annual contracts. The 1951–52 contract was not renewed and on 9th November, 1952, tallow export control was removed following termination of the industry's equalization pool arrangement and price de-control in most States.

§ 9. Exports of Principal Pastoral Products.

The quantities and values of the principal pastoral products of Australia exported for the years 1957–58 to 1959–60 were as follows:—

EXPORTS OF PASTORAL PRODUCTS: AUSTRALIA.

Product.	Unit of Quantity.	Quantity.			Value (£'000.)		
		1957–58.	1958–59.	1959–60.	1957–58.	1958–59.	1959–60.
Animals (living)—

Scoured, Tops, Noils, Waste	"	115,140	127,240	136,086	47,251	37,721	48,748

(a) Includes chilled beef.

CHAPTER XXIV.

FARMYARD, DAIRY AND BEE PRODUCTS.

NOTE.—Values of Australian oversea trade shown throughout this chapter are expressed as £A f.o.b. port of shipment, except where otherwise indicated.

For further detail on subjects dealt with in this chapter, reference should be made to the annual printed bulletins *Primary Industries, Part I.—Rural Industries, Part II.—Non-rural Industries and Value of Production* and *Secondary Industries* (butter, cheese, etc., factories) issued by this Bureau. The following mimeograph publications also contain considerable detail on the particular subjects dealt with, and are issued as soon as possible after the information has been compiled:—*The Dairying Industry* (monthly and half-yearly), *Manufacturing Industries No. 21.—Butter, Cheese and Condensed, Concentrated, etc., Milk* (annual), *Livestock Numbers* (annual), *Bee-farming* (annual), *Milking Machines on Rural Holdings* (annual), and *Value of Production and Indexes of Price and Quantum of Farm Production* (annual). The mimeograph annual *Report on Food Production and the Apparent Consumption of Foodstuffs in Australia* contains information on the production and utilization of farmyard, etc., products; the series *Size Classification of Rural Holdings, 1955–56*, shows particulars of rural holdings classified according to size, nature and area of crops, and numbers of livestock, and also according to number of milking machine stands. Current information on commodities produced is obtainable in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, and the *Monthly Bulletin of Production Statistics*.

§ 1. Introduction.

1. **General.**—The introduction of cattle into Australia and the early history of the dairying industry are referred to in some detail in earlier issues of this Year Book. It may be noted here that an increased and improved milk supply has resulted from the crossing of imported stud cattle with the original stock and from the further judicious crossing of strains. In Australia, dairy cattle thrive in the open throughout the year, local climatic conditions demanding no protection other than tree plantations for shelter and, in certain districts, rugging in the coldest weather. Indigenous and imported grasses furnish food during the greater part of the year, and winter fodder, when necessary, is given to the cattle in the fields. With the wider application of scientific methods in the treatment of animals and pastures and in the processes of manufacture, coupled with herd testing and effective State supervision, the dairying industry has shown rapid expansion. It has been demonstrated that Australian production and marketing methods do not adversely affect the vitamin content of the butter and that the loss during cold storage even for as long as two years is insignificant.

2. **Mixed Farming.**—Apart from specialized dairy farms, dairying is carried on fairly extensively on mixed farms. Originally, dairying on mixed farms was conducted mainly in conjunction with agriculture, but in more recent times it has been carried on also in conjunction with various types of grazing. In non-coastal regions, it is generally carried on in association with agriculture and sheep-raising, sufficient fodder being grown to carry the cattle through the winter months. The extent to which dairy cattle were run in conjunction with beef cattle, sheep, and pigs in 1955–56 is shown in the relevant tables published in a series of mimeograph bulletins *Size Classification of Rural Holdings, 1955–56*, and also in summarized form in *Primary Industries, Part I.—Rural Industries, 1956–57, Bulletin No. 51*. Similar tabulations are being compiled for 1959–60, but details are not yet available.

3. **Employment.**—Persons who described themselves at the population census as being engaged in dairy farming comprised 96,508 males and 10,018 females, a total of 106,526 persons at the Census of 30th June, 1947, and 100,553 males and 11,004 females, a total of 111,557 persons at the Census of 30th June, 1954. Similar details from the Census of 30th June, 1961, are not yet available.

4. **Growth of the Dairying Industry.**—The following table gives some indication of the growth of the dairying industry since 1916–17.

DAIRYING INDUSTRY: AUSTRALIA.

Period.	Number of Dairy Cows at 31st March.			Production of—			Milking Machines (No. of Stands). (a)
	In Milk.	Dry.	Total.	Whole Milk for all Purposes.	Butter (Factory and Farm).	Cheese (Factory and Farm).	
Average for three years ended—				Million Gallons.	Tons.	Tons.	
1918-19..	1,281,820	569,611	1,851,431	565.1	84,043	11,403	(b)
1928-29..	1,689,887	626,180	2,316,067	791.2	122,750	13,159	(b)
1938-39..	2,552,092	658,232	3,210,324	1,142.0	190,827	24,848	(b)
1948-49..	2,278,043	855,223	3,133,266	1,153.2	157,064	42,343	135,137
1958-59..	2,333,147	1,032,243	3,365,390	1,330.9	187,393	41,567	213,555
Year—							
1955-56..	2,393,870	1,009,637	3,403,507	1,402.0	208,911	38,700	204,298
1956-57..	2,354,301	1,097,149	3,451,450	1,357.9	192,854	45,216	210,664
1957-58..	2,281,571	1,080,003	3,361,574	1,264.4	175,757	35,976	213,716
1958-59..	2,363,569	919,578	3,283,147	1,370.2	193,568	43,509	216,287
1959-60..	3,243,472		3,243,472	1,406.5	197,552	44,517	221,260

(a) "Number of Stands" indicates the number of cows that can be milked simultaneously—i.e., the cow capacity of installed milking machines. (b) Not available.

5. **Official Supervision of Dairying Industry.**—Dairy experts of the various State Agricultural Departments give instruction in approved methods of production, and inspect animals, buildings and marketable produce, with the result that a high standard of cleanliness prevails.

The export trade is regulated by the terms of the Commonwealth Customs Act 1901-1954 and the Commonwealth Commerce (Trade Descriptions) Act 1905-1950, and regulations thereunder. This legislation requires that the true trade description, etc., be marked on all produce intended for export, while official inspection ensures the maintenance of purity and quality. Upon request of the exporter, the goods are given a certificate by the inspector.

6. **Australian Agricultural Council.**—General information on the constitution and functions of the Australian Agricultural Council is given on page 884 of Chapter XXII.—Agricultural Production.

§ 2. Value of Farmyard, Dairy and Bee Production and Indexes of Price and Quantum of Production.

1. **Gross Value of Farmyard, Dairy and Bee Production, 1955-56 to 1959-60.**—The following table shows the gross value of recorded farmyard and dairy production at the principal markets in Australia:—

GROSS VALUE OF FARMYARD, DAIRY AND BEE PRODUCTION: AUSTRALIA. (£'000.)

Particulars.	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.
Whole Milk used for—					
Butter(a)	78,559	66,991	61,252	66,328	72,615
Cheese(a)	8,585	9,398	7,399	10,120	10,124
Condensing, Concentrating, etc. . .	8,908	8,901	9,540	9,230	10,340
Other purposes	52,465	55,393	58,179	59,887	61,768
Subsidy Paid on Whole Milk for Butter and Cheese	14,499	13,500	13,500	13,500	13,500
<i>Total Whole Milk (including Subsidy)</i>	<i>163,016</i>	<i>154,183</i>	<i>149,870</i>	<i>159,065</i>	<i>168,247</i>
Pigs Slaughtered	25,543	25,948	25,032	25,553	30,121
Dairy Cattle Slaughtered	9,269	8,280	10,425	15,721	14,228
Eggs	42,137	43,567	42,320	40,397	45,249
Poultry	11,666	11,432	13,150	14,380	14,588
Honey	1,801	2,371	1,794	1,803	2,390
Beeswax	132	157	115	105	155
Total.	253,564	245,938	242,706	257,024	275,078

(a) Excludes Commonwealth subsidy which is shown separately below.

2. **Gross and New Values, 1959-60.**—The values of dairy, poultry and bee farming production on gross, local and net bases are shown in the following table. Further information on values, including definitions of the terms used, is given in Chapter XXX.—Miscellaneous.

GROSS, LOCAL AND NET VALUE OF FARMYARD, DAIRY AND BEE PRODUCTION 1959-60.

(£'000.)

State.	Gross Production Valued at Principal Markets.	Marketing Costs.	Gross Production Valued at Farm.	Value of Materials Used in Process of Production. (a)	Net Value of Production. (b)
New South Wales	96,073	13,208	82,865	(c) 13,580	69,285
Victoria	95,162	4,865	90,297	27,764	62,533
Queensland	40,677	2,432	38,245	8,666	29,579
South Australia	18,654	854	17,800	6,888	10,912
Western Australia	12,348	792	11,556	6,991	4,565
Tasmania	11,699	627	11,072	(c) 3,580	7,492
Northern Territory	114	6	108	15	93
Australian Capital Territory	351	22	329	111	218
Total	275,078	22,806	252,272	67,595	184,677

(a) No allowance has been made for costs of materials used in the process of production in the Poultry (for States other than Queensland) and Bee-farming Industries. (b) No deduction has been made for depreciation and maintenance. (c) No allowance has been made for costs of power, power kerosene, petrol and other oils.

3. **Net Value of Production, 1955-56 to 1959-60.**—In the following table, the net values of farmyard, dairy and bee production (total and per head of population) are shown by States.

NET VALUE OF FARMYARD, DAIRY AND BEE PRODUCTION. (a)

Year.	N.S.W. (b)	Vic.	Q'land.	S. Aust.	W. Aust.	Tas. (b)	Australia. (c)
NET VALUE. (£'000.)							
1955-56	63,000	67,329	28,630	15,320	4,885	7,333	186,841
1956-57	57,852	60,945	25,836	14,496	4,610	7,372	171,448
1957-58	55,511	60,463	19,150	9,572	4,203	7,342	156,516
1958-59	65,077	57,362	26,113	11,351	3,549	7,108	170,909
1959-60	69,285	62,533	29,579	10,912	4,565	7,492	184,677

NET VALUE PER HEAD OF POPULATION. (£ s. d.)

1955-56	17	17	7	26	5	1	21	3	4	18	7	2	7	6	0	22	19	6	20	1	3
1956-57	16	2	6	23	1	8	18	14	4	16	16	7	6	14	8	22	12	0	17	19	8
1957-58	15	3	5	22	6	8	13	12	11	10	16	0	6	0	4	21	19	6	16	1	3
1958-59	17	9	4	20	13	4	18	6	3	12	10	3	4	19	1	20	16	7	17	3	6
1959-60	18	5	4	21	18	8	20	8	6	11	13	9	6	5	11	21	11	5	18	3	2

(a) No deduction has been made for depreciation and maintenance or for costs of materials used in the process of production in the Poultry (for States other than Queensland) and Bee-farming Industries. (b) No deduction has been made for costs of power, power kerosene, petrol and other oils. (c) Includes Northern Territory and Australian Capital Territory.

4. **Indexes of Quantum and Price of Farmyard, Dairy and Bee Production, 1955-56 to 1959-60.**—For details of the methods of calculating these indexes and of the weights used see Chapter XXX.—Miscellaneous.

INDEXES OF QUANTUM^(a) AND PRICE OF FARMYARD, DAIRY AND BEE PRODUCTION: AUSTRALIA.

(Base: Average 3 years ended June, 1939 = 100.)

Particulars.	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.
<i>Quantum(a) of Production—</i>					
Milk	123	119	111	120	123
Other Products	115	114	120	118	122
<i>Total Farmyard and Dairy ..</i>	<i>120</i>	<i>117</i>	<i>114</i>	<i>119</i>	<i>123</i>
Total per Head of Population	89	84	80	82	83
<i>Price—</i>					
Milk	380	365	375	372	383
Other Products	423	438	399	421	450
<i>Total Farmyard and Dairy ..</i>	<i>392</i>	<i>386</i>	<i>382</i>	<i>386</i>	<i>402</i>

(a) Indexes of value at constant prices, i.e., quantities revalued at average unit values of base years (1936-37 to 1938-39).

§ 3. Dairy Cattle and Dairy Products.

1. **Dairy Herds.**—Lack of uniformity in the schedules used by the various States in the collection of livestock statistics makes it impossible to measure with complete accuracy the growth of dairy herds prior to 1943. Statistics of dairy cows—which form the largest part of herds—are, however, available on a comparable basis for a series of years. From 1,326,524 in 1902, their numbers rose gradually, with frequent reversals in trend, to a peak of 3,292,048 in 1936. This level was not reached again until 1956, when the number recorded was 3,403,507, and 1957, when the record level of 3,451,450 in March, 1957, was attained. In the last three years, however, numbers have declined gradually to 3,243,472 in 1960.

There is a preponderance of dairy cattle in Victoria and Tasmania, while in New South Wales and South Australia the proportion of dairy to all cattle is high. In Queensland, the Northern Territory, and Western Australia, other cattle predominate, the main use of cattle in these areas being for the production of beef. The numbers of dairy cattle in Australia classified according to age and sex are shown in the following tables for the average of the three-year periods ended March, 1939, 1949 and 1959, and for the years 1956 to 1960.

NUMBER OF DAIRY CATTLE: AUSTRALIA.

Period.	Dairy Cows (in milk and dry).	Dairy Heifers 1 year and over.	Dairy Calves under 1 year.	Dairy Bulls.	Total Dairy Cattle.
<i>Average for three years ended</i>					
31st March—					
1939	3,210,324	(a)	(a)	(a)	(a)
1949	3,133,266	827,609	712,688	107,708	4,781,271
1959	3,365,390	839,048	670,956	110,656	4,986,050
<i>Year ended 31st March—</i>					
1956	3,403,507	846,204	694,968	114,069	5,085,748
1957	3,451,450	835,620	716,321	114,759	5,118,150
1958	3,361,574	851,407	667,836	112,892	4,993,709

Total ..	4,348	19,264	8,492	10,593	1,454	366	..	44,517

(a) Includes 6,031,000 gallons of milk, the produce of New South Wales, sent as cream to factories in Victoria and Queensland. (b) Includes 1,443,000 gallons of milk, the produce of Victoria, sent as cream to New South Wales. (c) Includes 542,000 gallons of milk, the produce of Queensland, sent as cream to New South Wales. (d) Includes butter made from cream, the produce of Victoria and Queensland. (e) Includes butter made from cream, the produce of New South Wales. (f) Includes cheese made in establishments not classified as factories.

4. **Whole Milk.**—(i) *Production and Utilization.* During the three years ended 1938–39, approximately 78 per cent. of Australia's milk supply was used for making butter, 5 per cent. for cheese manufacture, 3 per cent. for condensery products and 14 per cent. for fluid consumption and other purposes. There has since been a considerable decline in the proportion of milk used for butter-making, with corresponding increases in the quantities used for other purposes. For the average of the three years ended 1958–59, 65 per cent. of the total milk supply was used for butter, 7 per cent. for cheese, 6 per cent. for condensery products and 22 per cent. for other purposes.

Details of the production of whole milk for various purposes are shown in the following table for each of the years 1955–56 to 1959–60 compared with the averages for the three-year periods ended 1938–39, 1948–49 and 1958–59:—

PRODUCTION AND UTILIZATION OF WHOLE MILK: AUSTRALIA.

('000 Gallons.)

Period.	Total Production.	Quantity used for—			
		Butter (Factory and Farm).	Cheese (Factory and Farm).	Condensery Products.	Other purposes. (a)
Average for three years ended—					
1938–39	1,142,006	891,742	54,934	33,226	162,104
1948–49	1,153,248	738,377	91,642	78,739	244,490
1958–59	1,330,853	865,347	90,561	79,687	295,258
Year—					
1955–56	1,402,012	962,397	84,021	71,324	284,270
1956–57	1,357,942	890,833	98,233	78,123	290,753
1957–58	1,264,421	811,583	78,550	79,864	294,424

1959–60	1,406,501	912,271	100,856	82,636	310,738

(a) Principally fluid milk for domestic purposes.

In the following table, particulars of the production of whole milk in the several States are shown for the years 1955–56 to 1959–60 compared with the averages for the three years ended 1938–39, 1948–49 and 1958–59. Victoria is the principal milk-producing State and in 1959–60 the output from that State, 598.3 million gallons, represented 43 per cent. of total production. Output from New South Wales in that year was 348.4 million gallons, or 25 per cent. of the total, and that of Queensland 252.6 million gallons (18 per cent.). Production in the remaining States accounted for 14 per cent. of the total Australian output.

TOTAL PRODUCTION OF WHOLE MILK.

('000 Gallons.)

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.

(ii) *Production per Cow.* The quantity of milk produced by a dairy cow can be as high as 1,000 gallons a year, varying greatly with breed, locality and season. For the whole of Australia, for all dairy cows and for all seasons prior to 1916, production averaged considerably less than 300 gallons per annum. In later years, not only has there been an improvement in the quality of the cattle, but the application of scientific methods has been continually extended, and the 300-gallon average has been exceeded in each year since 1924. More than 400 gallons per cow has been obtained in four of the last six years. In 1959-60, the average yield was 431 gallons. The annual average yields per cow shown in the following table are obtained by dividing the total production of whole milk for the year ended June by the mean of the number of dairy cows (in milk and dry) at 31st March of that year and of the preceding year. They are, in effect, based on the approximate number of dairy cows which were in milk during any part of the year. The average shown is, therefore, less than that for cows which were yielding during the greater part of the year, but it may be accepted as sufficiently reliable to show the general trend:—

AVERAGE MILK PRODUCTION PER DAIRY COW.

(Gallons.)

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Average for three years ended—								
1938-39	315	439	298	442	353	349	349	354
1948-49	310	506	267	565	370	419	328	371
1958-59	324	521	267	513	407	537	420	393
Year—								
1955-56	355	551	301	538	444	554	391	419
1956-57	314	538	267	541	424	560	424	396
1957-58	302	505	233	488	398	529	383	371
1958-59	355	520	302	510	398	521	453	412
1959-60	382	544	301	504	452	554	447	431

5. *Factory System.*—(i) *General.* Cream separation and butter-making are often carried on together under the co-operative system. The establishment of large central butter factories, either on the co-operative system or on an independent basis, has resulted in a considerable reduction in the cost of manufacture. The product is also of a more uniform quality, and whereas formerly the average quantity of milk used per pound of hand-made butter was about 3 gallons, factory butter requires about 2½ gallons. In addition, subsidy payments by the Commonwealth Government are made only on factory-produced butter. As a result, the production of farm-made butter has declined substantially, and in 1959-60 represented only about 1.3 per cent. of all butter made. A similar position exists in the cheese-making industry where a negligible amount is now made on farms.

(ii) *Number of Factories.* In 1959-60, factories in Australia engaged in the processing of milk into butter or cheese or the various condensery products numbered 363 and were distributed among the States as follows:—New South Wales, 77; Victoria, 131; Queensland, 75; South Australia, 39; Western Australia, 19; and Tasmania, 22. More details regarding numbers of factories, output, etc., are given in Chapter VI.—Manufacturing Industry.

6. *Butter Production.*—There was a steady increase in the annual output of butter for many years prior to the 1939-45 War. Following the record output of 211,987 tons in 1939-40, the general trend of butter production declined until 1946-47, when 143,308 tons were produced. Output increased again in subsequent years and in 1955-56 was 208,911 tons, the highest figure recorded in post-war years. Production in 1959-60, 197,552 tons, was the highest since 1955-56. The foregoing figures include butter produced on farms which has shown a decline from 8,714 tons in 1938-39 to 2,545 tons in 1959-60.

The following table shows production of butter in factories and on farms in each State for the years 1955-56 to 1959-60 compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

BUTTER PRODUCTION IN FACTORIES AND ON FARMS.

(Tons.)

(a) Includes small quantities produced in the A.C.T.

7. Cheese Production.—Prior to 1937-38, the annual production of cheese in factories and on farms had not reached 20,000 tons. From then on, it increased, but with frequent reversals of trend, to an output of 49,057 tons in 1953-54. Production has fluctuated in succeeding years between 35,000 and 45,000 tons, 44,517 tons being recorded in 1959-60.

The following table shows production of cheese in factories and on farms in each State in the years 1955-56 to 1959-60 compared with the averages for the three years ended 1938-39, 1948-49 and 1958-59 :—

(a) Northern Territory and Australian Capital Territory: nil.

8. *Condensed, Concentrated and Powdered, etc., Milk Production.*—The manufacture of these products expanded greatly after 1938–39 to meet the needs of the Services during the 1939–45 War and for export purposes since the War. The average output of condensed, concentrated and evaporated full cream milk (sweetened and unsweetened) for the three years ended 1958–59 was three and a half times as high as the average for the three years ended 1938–39, while that of powdered milk (full cream and skim) was more than five times as high. Over the same period the quantity of whole milk used in the manufacture of the products shown below increased from 33.2 million gallons to 79.7 million gallons or by 138 per cent. These products are manufactured mainly in Victoria, which produced 64 per cent. of the total (in terms of whole milk equivalent) in 1959–60. New South Wales accounted for 20 per cent. and the remaining States for 16 per cent.

The following table shows details of the output of condensed, concentrated, powdered, etc., milk during the years 1955–56 to 1959–60, compared with the averages for the three years ended 1938–39, 1948–49 and 1958–59.

(a) Includes mixtures of full cream and skim milk and mixtures of full cream, skim and buttermilk. (b) Includes Coffee and Milk. (c) Includes malted milk and milk sugar (lactose). (d) Not available separately—included in condensed, concentrated and evaporated full cream milk. (e) Not available separately—included in powdered full cream milk. (f) Excludes powdered whey.

9. *Local Consumption of Butter and Cheese.*—In the last year of the war-time and post-war rationing of butter, 1949–50, consumption was 25.3 lb. per head per annum compared with an average of 32.9 lb. during the years 1936–37 to 1938–39. Following the cessation of rationing, consumption rose sharply to 31.2 lb. in 1951–52, and until 1955–56, fluctuated between 29 lb. and 31 lb. per head per annum. It has since declined to 26.2 lb. per head in 1959–60.

Cheese consumption rose considerably during the period of butter rationing, from 4.4 lb. per head pre-war to 6.3 lb. per head in 1947–48. Consumption has fluctuated considerably since then between a minimum of 5.2 lb. in 1948–49 and a maximum of 6.8 lb. in 1957–58.

The following table shows details of the production and disposal of butter and cheese for each of the years 1955–56 to 1959–60 compared with the averages for the three years ended 1938–39, 1948–49 and 1958–59.

(a) Includes allowance for movements in stocks other than those held in main cold stores.
 (b) Figures for butter include ghee expressed as butter as well as butter shipped as ships' stores. Figures for cheese include ship's stores after allowance for a small quantity of cheese imported.

10. **Butter and Cheese Equalization Schemes.**—During the period from January, 1926, to April, 1934, a voluntary scheme for equalizing returns to all participating factories from their sales of butter, known as the "Paterson Plan" was in operation. This had the effect of stabilizing the price of butter in Australia. Details of this scheme may be found on page 1028 of Official Year Book No. 38 and in earlier issues.

On 1st May, 1934, the "Paterson Plan" was superseded by a compulsory price equalization plan, details of which are shown on page 1029 of Official Year Book No. 38 and earlier issues. This compulsory plan was invalidated in 1936 by the decision of the Privy Council which declared in the James (Dried Fruits) Case that the Commonwealth had no power under the Constitution to regulate trade between the States.

Since 1936, the butter price equalization scheme has operated by voluntary action based on agreements between manufacturers and the Commonwealth Dairy Produce Equalization Committee Ltd. The Committee, which comprises members of the State Dairy Products Boards and other persons representing the industry, enters into agreements with manufacturers to secure to them equal rates from sales of butter and cheese, and for this purpose may fix basic prices at which these products sold in Australia or abroad are to be taken into account. The effect is that local and export trade are distributed in equitable proportions among the manufacturers by means of quotas. The Committee fixes basic prices and equalizes returns to factories through an Equalization Fund. The States originally participating in the scheme were New South Wales, Victoria, Queensland and Tasmania in respect of both butter and cheese, and South Australia in respect of cheese. South Australia and Western Australia entered the scheme in respect of butter on 1st April, 1946, and Western Australia extended its participation to include cheese in January, 1947.

Details are given in para. 15 on page 990 of the returns realized on local and overseas sales and of the average equalization rate for the years ended June, 1956 to 1960. Details are also given in para. 12 of the wholesale prices of butter and cheese for home consumption as fixed by State Prices Authorities or as determined by the Dairy Produce Equalization Committee.

11. Casein Equalization Scheme.—A similar equalization scheme to that for butter and cheese has been operated by the Commonwealth Dairy Produce Equalization Committee Ltd. for casein since 1952. Average realizations under the scheme were 180s. 9.9d. per cwt. in 1955–56, 184s. 6.6d. in 1956–57, 185s. 3.6d. in 1957–58, 171s. 7.9d. in 1958–59 and 175s. 7.5d. in 1959–60.

12. Wholesale Price of Butter and Cheese in Australia.—Since 20th September, 1948, when the Commonwealth Government ceased to exercise price control, the fixation of the wholesale prices of butter and cheese has been a matter for State Prices Authorities. At present, however, the power to fix prices is being exercised in only two States, Queensland and South Australia, the prices in all other States being determined by the Commonwealth Dairy Produce Equalization Committee Ltd. Details of prices operating in each of the States since 1st July, 1952, are shown in the following table.

(a) Maximum prices fixed by State Prices Authorities or as determined by the Commonwealth Dairy Produce Equalization Committee Ltd., for choicest grade bulk butter and cheese.

13. Marketing of Dairy Products.—(i) *The Dairy Produce Export Control Act 1924–1958.* Introduced at the request of the dairying industry, this Act was passed by the Commonwealth Parliament with the object of organizing the overseas marketing of Australian dairy produce. A Dairy Produce Control Board was appointed and was in existence from 1924 to 1935. The Board regulated shipments to ensure regularity of supply in the London market, controlled forward selling, obtained reductions in overseas freights and insurance rates, and participated in an advertising campaign in the United Kingdom.

Prior to the appointment of the Dairy Produce Control Board, a voluntary body—the Australian Dairy Council—was established to advise and make recommendations to the Governments on problems connected with the production, manufacture and quality of dairy produce, pasture improvements and diseases of dairy cattle.

Following a recommendation by the Australian Agricultural Council, the functions of these bodies were combined by an amending Act of 1935 under the Australian Dairy Produce Board and provision was made for the allocation of money from the Board's funds for research and investigation into pastures, diseases of dairy cattle and the quality of butter. The functions of the Board were later extended to enable it to advise the Government in connexion with the transport of dairy produce, the securing of new markets, the expansion of existing markets and other matters.

The Australian Dairy Produce Board was re-constituted in 1947 by an amendment to the Dairy Produce Export Control Act, its membership being reduced from seventeen to twelve. The functions of the Board were extended to enable it to purchase and sell, on behalf of the Commonwealth, dairy produce intended for export, and to control all matters concerning the handling, storage, protection, treatment, transfer and shipment of the produce so purchased or sold. In 1953, the direct dairy farmer representation on the Board was increased from two to three members, thus raising the total membership from twelve to thirteen.

In April, 1954, the Act was further amended to prepare for the implementation of an export marketing plan to follow the expiration of the United Kingdom-Australia Butter and Cheese Contract. The amendment enabled the Board to purchase dairy produce intended for export to the United Kingdom and to sell such produce on behalf of the dairying industry in lieu of its previous function of selling on behalf of the Commonwealth Government. In the interests of the stability of the industry, the Act provides that the Board may be the sole Australian exporter of butter and cheese to the United Kingdom.

The Dairy Produce Export Control Act was again amended in 1958, principally to increase the membership of the Board by one to a total of 14 members. The additional member, designated the Administrative Member, is charged with the task of executing the Research and Sales Promotion campaign.

(ii) *The Dairy Produce Export Charges Act 1924-1937.* This Act provides for the imposition of a levy on all butter and cheese exported from Australia to cover the administrative expenses of the Board and for advertising and other purposes. The rate of the levy is fixed by regulation.

(iii) *Butter and Cheese Contracts.* Details of the war-time contracts arranged between the United Kingdom and Australian Governments, whereby the former undertook to purchase Australia's surplus butter and cheese, were shown on pages 985 and 986 of Official Year Book No. 37. The purchase of butter and cheese from 1944-45 to 1954-55 was covered by the Long-term Purchase Agreement. Details of this Agreement and of the prices paid for various grades of butter and cheese each year under the Agreement were given in pages 943 and 944 of Official Year Book No. 42 and in earlier issues.

14. Commonwealth Subsidies and Stabilization Plans.—(i) *Butter, Cheese and Processed Milk Products.* Under the provisions of the various Dairy Industry Assistance Acts, the first of which was passed in 1942, the Commonwealth Government has provided subsidies on milk supplied for the manufacture of butter, cheese and processed milk products. Subsidies were paid on a seasonal basis prior to 1st April, 1946, but from that date have been on a flat rate basis. Subsidies are distributed by the Commonwealth Dairy Produce Equalization Committee Ltd. through factories to milk producers by payments on butter, cheese and processed milk products manufactured. Subsidy on milk supplied for the manufacture of processed milk products was discontinued from 1st July, 1948, to 30th June, 1949, and again from 1st July, 1952.

The first of the two five-year stabilization plans came into operation on 1st July, 1952. Under this plan, the Commonwealth Government, with the approval of the States, determined the ex-factory prices of butter and cheese, guaranteed to dairy farmers a return, based upon costs of efficient production, in respect of quantities of butter and cheese sold within the Commonwealth, plus an additional 20 per cent. (if produced), and agreed to make available an amount by way of subsidy to lift the return on that part of output covered by the guarantee to the guaranteed level. The second five-year stabilization plan, which came into operation on 1st July, 1957, continued all the important features of the first plan. A new feature, however, was that any subsidy made available under the scheme should be on the basis of a fixed amount in any dairying year.

The actual amount of subsidy paid by the Commonwealth Government was in excess of its original commitment in 1955-56, when, to assist in offsetting a fall in export returns, the Government agreed to increase subsidy payments to a fixed figure of £14,500,000. In each of the years 1956-57 to 1960-61, a fixed amount of £13,500,000 was provided.

In 1958, following a period of low incomes due to drought and low export returns, the Government decided to give additional support to the dairy industry. This support took the form of underwriting a final equalization payment to factories on total production of butter and cheese for the 1958-59 season. The amount underwritten for butter was 40d. per lb. commercial butter basis. The Government also decided that it would consider applying the same principle of underwriting a final equalized return at levels determined by it each year, after an examination of all relevant factors for the remaining period of the 1957-62 five-year stabilization plan. For the 1959-60 and 1960-61 seasons, the underwriting of a final minimum return of 40d. per lb. commercial butter was again determined. The principal value underlying this guarantee is that it enables the Commonwealth Dairy Produce Equalization Committee Ltd. to make a higher initial payment to factories than would otherwise be possible without risk of over-payment.

Following representations by industry organizations, the Commonwealth Government established the Joint Dairy Industry Advisory Committee in November, 1946, comprising a chairman nominated by the Government, four representatives of Commonwealth Government Departments and four industry representatives from the several States. The Committee's functions, broadly, were to advise and assist in conducting cost and other surveys of dairy farm production and to act as an advisory body to the Government in these matters. From 1st April, 1947, to 30th June, 1952, the rates of overall return to milk producers determined by the Commonwealth Government for the purpose of subsidy payments were based on recommendations made by the Committee following surveys of production costs in the dairy industry.

Early in 1953, the Dairy Industry Investigation Committee, an independent body consisting of three members, was appointed to advise the Commonwealth Government on the guaranteed return to producers during 1953-54. The Committee was re-established in March, 1954, to advise the Government on the guaranteed return for each year of the remaining three-year period of the Stabilization Plan. For the current five-year plan, the Committee has been re-appointed to determine the cost of efficient production of butter-fat only.

Amounts realized on exports of butter and cheese in excess of the f.o.b. equivalent of the guaranteed return have been credited to the Dairying Industry Stabilization Fund, which was established in July, 1948, for the purpose of stabilizing returns from exports. During 1951-52, the Stabilization Fund met the deficiency in respect of all exports which did not return sufficient to meet the basic return to the factory. From 1st July, 1952 to 30th June, 1957, it was available to the industry to be used, in whatever manner it considered desirable, to make good any deficiency in respect of all exports other than the 20 per cent. provided for under the Commonwealth Government's Five-year Stabilization Plan. The Act was amended in 1957 to enable the Board to use the fund for such other purposes as are approved by the Minister for Primary Industry. After allowing for outstanding debits, the amount standing to the credit of the Dairying Industry Stabilization Fund at 30th June, 1960, totalled approximately £1,620,497.

(ii) *Whole Milk.* In addition to the subsidies referred to above, the Commonwealth Government subsidized the production of whole milk consumed directly from 1943-44 to 1948-49. Details of the amounts distributed during each year will be found in Official Year Book No. 38, page 1031.

15. Average Returns from Butter and Cheese Sold and Assessed Farm Production Costs.—The first of the two following tables shows, in respect of butter and cheese, particulars of the rates realized on local, interstate and overseas sales and the average equalization and subsidy rates in operation for the years ended June, 1956 to 1960. The second table shows the distribution between factory and farm of the overall return to manufacturers for butter. The assessed farm production cost for commercial butter is also shown for comparison with the average returns to dairy farmers.

1960.. ..	51.531	4.965	46.566	53.00

(a) Up to 1956-57, the figures shown are the guaranteed returns as recommended by the Dairy Industry Investigation Committee and accepted by the Commonwealth Government: from 1957-58, they represent the cost of production as found by the Dairy Industry Investigation Committee.

16. **Dairy Industry Extension Grant.**—An annual grant of £250,000, to be expended by State Governments for the purpose of promoting improved farming practices in the dairying industry, was first made by the Commonwealth Government for the five years from 1st July, 1948. This assistance was continued by the Commonwealth Government for a further period of five years from 1st July, 1953, again by means of annual grants of £250,000, and similarly for a further five years from 1st July, 1958, at the same rate.

17. **Dairy Industry Research and Sales Promotion.**—At the request of the Australian Dairy Industry Council, legislation was enacted in 1958 to provide for a sales promotion campaign for butter and cheese in Australia and also for research into industry problems.

The legislation provides for a statutory levy (the Dairy Produce Levy) to be imposed on all butter and cheese manufactured in Australia. The maximum rates of levy are $\frac{7}{8}$ d. per lb. on butter and $\frac{5}{8}$ d. per lb. on cheese, but the initial rates which commenced in November, 1958, were $\frac{3}{8}$ d. per lb. on butter and $\frac{1}{8}$ d. per lb. on cheese. The proceeds from the levy were divided equally between research and sales promotion. The rates of levy operative from November, 1959, were increased to the maximum provided under the Act, the increase being utilized solely for the purposes of intensifying the sales promotion campaign.

The Commonwealth Government agreed to contribute one half of the costs incurred on approved projects included in the programme of research, with a maximum contribution of £1 for £1 against funds raised by way of levy and allocated to research. The sales promotion programme is financed solely by the levy. The levy has yielded £699,469 to 31st January, 1961. An amount of £425,790 has been allocated to sales promotion and £273,679 to research. Research funds have benefited by the Commonwealth's contribution of an amount equal to half the actual expenditure from levy funds for research.

The scheme is administered by the Australian Dairy Produce Board, which, in respect of research, is advised by a statutory committee—the Dairy Produce Research Committee.

18. Oversea Trade in Butter, Cheese and Milk.—(i) *General.* The production of butter and cheese in Australia is considerably in excess of local requirements and consequently a substantial surplus is available for export overseas. In normal circumstances, the extent of this surplus is chiefly dependent upon seasonal conditions. Exports of butter averaged 69,700 tons during the three years ended 1958–59, compared with 75,900 tons for the three years ended 1948–49 and 90,000 tons for the three years ended 1938–39. Exports of cheese for the same periods were 13,100 tons, 24,300 tons and 11,500 tons respectively.

During 1938–39, 96,900 tons of butter (95 per cent. of all butter exported) were shipped to the United Kingdom. With the decline in total exports, there was also a substantial reduction in the amount shipped to the United Kingdom up till 1954–55. This increased again to 72,400 tons (88 per cent.) in 1955–56, but has fallen consistently since then to 59,400 tons in 1959–60 (77 per cent.).

In 1938–39, exports of cheese totalled 16,000 tons, of which 15,500 tons or 97 per cent. were exported to the United Kingdom. Of the total of 18,500 tons exported in 1959–60, 15,300 tons or 83 per cent. were shipped to the United Kingdom.

Total quantities and values of exports of Australian origin of butter, cheese and condensed, concentrated, etc., milk and cream are shown on page 999.

(ii) *Butter and Cheese Exports graded according to Quality.* All butter and cheese exported comes under the provisions of the Exports (Dairy Produce) Regulations and is subject to the supervision, inspection and examination of officers appointed for that purpose. These commodities are graded according to quality which has been fixed by regulation as follows:—Flavour and aroma, 50 points; texture, 30 points; and condition, 20 points. Butter and cheese graded at 93 to 100 points is of choicest quality; at 90 to 92 points, first quality; at 86 to 89 points, second quality; and at 80 to 85 points, pastry or cooking quality or, in the case of cheese, third quality.

In the following table, particulars are given of the relative proportions of butter and cheese graded for export according to quality. Further details, which include actual quantities by States, are to be found in *Primary Industries, Part I.—Rural Industries*, 1958–59, Bulletin No. 53.

BULK BUTTER AND CHEESE GRADED FOR EXPORT: AUSTRALIA.
(Per Cent.)

Grade.	Butter.			Cheese.		
	1957–58.	1958–59.	1959–60.	1957–58.	1958–59.	1959–60.

§ 4. Pigs and Pig Products.

1. **Pigs.**—The number of pigs in Australia first reached a million in 1905, while the record level of 1,797,340 was attained in 1941. At 31st March, 1960, 1,423,796 pigs were recorded, representing a 10 per cent. increase on numbers a year earlier. The number of pigs in each State and Territory for each of the five years 1956 to 1960 compared with the averages for the three-year periods ended March, 1939, 1949 and 1959, are given in the following table:—

NUMBER OF PIGS.

Period.	N.S.W.	Vic.	Qld.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust- ralia.
Average for three years ended—

A long-term comparison of pig numbers is given in Chapter XXIII.—Pastoral Production. Maps showing the distribution of pigs in Australia at 31st March, 1955 and 1948, appear on page 912 of Official Year Book No. 43 and on page 908 of Official Year Book No. 39, respectively.

2. **Size of Pig Herds.**—For information on the size of pig herds *see* references to bulletins *Size Classification of Rural Holdings*, 1955–56 in § 1, para. 2, page 977, and in the note at the beginning of this chapter.

3. **Pigs Slaughtered.**—The number of pigs slaughtered during each of the years 1955–56 to 1959–60, compared with the averages for the three-year periods ended 1938–39, 1948–49 and 1958–59, is shown in the following table:—

PIGS SLAUGHTERED.

(a) Excludes trimmings from baconer carcasses.

(ii) *Consumption.* As in the case of most other meats, pork was subject to rationing during the 1939-45 War and immediate post-war years, and consumption was at a much lower level than pre-war. In 1954-55, consumption of pigmeat (as pork or smallgoods) reached 10.2 lb., only slightly below the immediate pre-war average, but after falling to 8.7 lb. per head in 1956-57, has since risen to between 10 and 11 lb. per head. In the following table, details of the production and disposal of pigmeat are shown for the years 1955-56 to 1959-60 compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

1959-60 ..	+0.8	100.6	0.4	52.2	47.2	10.4

5. *Bacon and Ham.*—(i) *Production.* As in the case of pork, the increased demand for bacon and ham during the 1939-45 War stimulated production to a level not previously attained. Production reached its peak in 1944-45 when 56,246 tons of bacon and ham were cured. This was followed by a decline in output in each succeeding year to 36,628 tons in 1951-52. Production has been maintained at about this level in subsequent years, 36,582 tons being recorded in 1959-60. Details of production are shown by States in the following table for each year 1955-56 to 1959-60, compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

PRODUCTION OF BACON AND HAM (CURED CARCASS WEIGHT).(a)

(a) Pressed and canned bacon and ham have been converted to cured carcass weight for periods subsequent to 1948-49.

(ii) *Consumption.* Consumption per head declined in the early stages of the 1939-45 War from the pre-war average of 10.2 lb. per annum, but subsequently increased to 12.7 lb. in 1946-47. It has declined to about 7 lb. per head in recent years. Details of production and disposal of bacon and ham for the years 1955-56 to 1959-60, compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59 are shown in the following table:—

PRODUCTION AND DISPOSAL OF BACON AND HAM (CURED CARCASS WEIGHT)(a): AUSTRALIA.

(a) Pressed and canned bacon and ham have been converted to cured carcass weight.

6. *Oversea Trade in Pigs and Pig Products.*—Total quantities and values of exports of Australian origin of pigs and pig products (bacon and ham, lard and frozen pork) for the years 1957-58 to 1959-60 are shown on page 999.

§ 5. Poultry-farming.

1. *General.*—Poultry-farming has been carried on in Australia for many years, and the State Departments of Agriculture have encouraged its development by appointing experts to advise on the care and management of poultry and by conducting egg-laying competitions. Originally the industry was conducted in conjunction with other branches of rural activity,

mainly dairying, but it is now a specialized and distinct industry and it is from this source that the bulk of the commercial production is obtained. Practically all farms keep poultry for the purpose of supplying their own domestic requirements and in many cases some supplies from this source are also marketed. In addition, many private homes keep small numbers of fowls in backyard runs to satisfy domestic needs or to help towards this object. Because of the incompleteness of data available on poultry throughout Australia, details of poultry numbers are not published.

2. **Recorded Production and Disposal of Eggs.**—(i) *Shell Eggs.* Available statistics of the production and disposal of eggs in Australia are restricted to those recorded by the Egg Boards of the several States. Details of production in the respective States as recorded by these authorities for the years 1955–56 to 1959–60 are shown in the following table:—

SHELL EGGS: PRODUCTION(a) RECORDED BY EGG BOARDS.
(*000 Dozen.)

State.	1955–56.	1956–57.	1957–58.	1958–59.	1959–60.
New South Wales	51,635	52,334	49,168	45,221	53,495
Victoria	24,985	24,874	25,956	23,447	26,521
Queensland	7,848	8,848	7,894	8,692	10,007

(a) Receipts from consignors and sales by producer agents.
Tasmania.

(b) Not available.

(c) Excludes

(ii) *Egg Pulp and Egg Powder.* Prior to the 1939–45 War, production of egg pulp was about 7 million lb. per annum. This was used almost entirely for the manufacture of cakes, pastry and biscuits, only negligible quantities being exported. Production was expanded greatly during the war years to meet the requirements of the Armed Services and was increased further in post-war years to supply a large export market and also a substantially increased home consumption. During recent years, however, production has been at a somewhat lower level. The production of dried egg powder, established in Australia in 1942 as a war-time measure for export purposes, was continued for some time after the war, but has since declined to negligible proportions.

Particulars of the production of whole egg pulp as recorded by the Egg Boards in the several States are shown in the following table:—

LIQUID WHOLE EGG: PRODUCTION RECORDED BY EGG BOARDS.
(*000 lb.)

State.	1955–56.	1956–57.	1957–58.	1958–59.	1959–60.
New South Wales	14,649	18,755	13,198	9,808	17,791
Victoria	6,879	6,245	6,591	3,473	6,460
Queensland	2,901	3,302	1,658	2,011	2,767
South Australia	5,991	4,501	4,461	2,495	3,210
Western Australia	1,532	2,024	2,855	1,600	1,122
Tasmania	236	133	(a)	(a)	(a)
Total	32,188	34,960	(b) 28,763	(b) 19,387	(b) 31,350

(a) Not available.

(b) Excludes Tasmania.

In addition to liquid whole egg, production was also recorded of liquid egg whites and liquid egg yolks. Output in 1959–60 amounted to 1,268,000 lb. and 815,000 lb. respectively, compared with 631,000 lb. and 337,000 lb. respectively in the previous year. These figures exclude small quantities produced in Tasmania for which details are not available.

3. **Production and Consumption of Eggs.**—Because of the operations of producers in areas outside the control of the Egg Boards and the extent of “back-yard” poultry-keeping, for which no statistics are collected, figures relating to total egg production must be accepted with some reserve. The production shown in the following table, together

with details of exports and consumption, is based upon the records of Egg Boards of production from areas under their control, plus estimates of production from uncontrolled areas and from "back-yard" poultry-keepers.

**ESTIMATED PRODUCTION AND DISPOSAL OF EGGS IN SHELL(a):
AUSTRALIA.**

4. **Marketing of Eggs.**—(i) *Markets.* Details of the annual contracts entered into between the United Kingdom and Australian Governments up to 1952-53 and of the results of trading under free market conditions in the four years following appear in earlier issues of the Official Year Book.

Because of the United Kingdom policy of expanding egg production, the United Kingdom's importance as a market for Australian shell eggs has been declining. In both 1958-59 and 1959-60, the United Kingdom took 28 per cent. of Australia's exports of shell eggs, compared with 86 per cent. in 1952-53.

The United Kingdom remains virtually the only export market for egg pulp. Australian exports of pulp thereto were approximately 3,700 tons in 1958-59 and 3,800 tons in 1959-60.

The main outlets for Australian eggs in 1959-60, other than the United Kingdom, were Saudi Arabia (588,000 dozen) and Singapore (458,000 dozen).

(ii) *Egg Export Control Act 1947.* Following the termination of Commonwealth control over the production and marketing of eggs on 31st December, 1947, functions relating to the local marketing of eggs reverted to State Egg Boards, which became responsible for stabilizing prices and marketing of eggs produced in the respective States. In order to assist in marketing Australia's surplus production of eggs under the Long-term Purchase Agreement with the United Kingdom, the Commonwealth established the Australian Egg Board under the Egg Export Control Act 1947. The Board, which commenced operating on 1st January, 1948, was empowered to buy and sell, on behalf of the Commonwealth Government, eggs and egg products intended for export which comply with the provisions of the Export (Dairy Produce) Regulations. In addition, the Board was authorized to deal with all matters relating to the export of eggs and egg products from Australia, to make such experiments as are likely to lead to the improvement of the quality of Australian eggs and to promote their sale overseas. The Board consisted of ten members, including six representatives of egg producers and one representative of the Commonwealth Government.

Owing to the discontinuance of inter-governmental trading in eggs and egg products, the Egg Export Control Act was amended in April, 1954, to provide for the reconstruction of the Australian Egg Board and the implementation of an egg export marketing scheme. The new Board, established on 17th June, 1954, comprises nine members including a representative of the Commonwealth Government and representatives from each State Egg Marketing Board (except Tasmania). The Board is empowered to act as a trading authority selling eggs and egg pulp as agent for State Egg Boards. However, any State Board desiring to export on its own account may do so, subject to general terms and conditions as laid down by the Australian Egg Board.

5. *Oversea Trade in Poultry Products.—(i) Exports.* The Australian overseas export of poultry products has been confined in the past chiefly to eggs in shell and egg contents, which are consigned mainly to the United Kingdom. In 1949-50, exports of eggs in shell reached the record level of 23 million dozen. Shipments were at a lower level in subsequent years, being 5.0 million dozen in 1958-59 and 2.8 million dozen in 1959-60.

Prior to the 1939-45 War, exports of egg contents were small and in 1939-40 there was an excess of imports. During the war years and for some years thereafter, exports expanded greatly, but there has been a decline in subsequent years and in 1959-60 16.2 million lb. only were exported compared with 37.9 million lb. in 1953-54.

After 1945, there was a considerable increase in the exports of frozen poultry, which in 1955-56 amounted to 1,486,000 lb. They have, however, since been much lower.

Total quantities and values of exports of Australian origin of poultry products (live poultry, frozen poultry, eggs in shell, egg pulp and powder) for the years 1957-58 to 1959-60, are shown on page 999.

(ii) *Imports.* Imports of poultry products have hitherto been negligible. However, during 1960-61, approximately 3 million lb. of canned chicken, valued at £0.3 million, were imported from the United States of America. A consequence of this development was that Australian producers have sought tariff protection from the imported product.

§ 6. Bee-farming.

1. *Production of Honey and Bees-wax.*—Although practised as a separate industry, bee-farming is also carried on in conjunction with other branches of farming. In recent years, there has been considerable growth in the number of itinerant apiarists operating on a large scale with mobile equipment. Some of these apiarists move as far afield as from Victoria to Queensland in an endeavour to provide a continuous supply of nectar from suitable flora for their bees. The returns of honey from productive hives during 1959-60 showed an average of 126 lb. per hive and the average quantity of wax was 1.7 lb. per productive hive.

The number of hives and the production of honey and bees-wax during the year 1959-60 are shown in the following table.

BEEHIVES, HONEY AND BEES-WAX, 1959-60.

State or Territory.	Beehives.			Honey Produced.		Bees-wax Produced.	
	Pro- ductive.	Unpro- ductive.	Total.	Quantity.	Gross Value.	Quantity.	Gross Value.
	'000.	'000.	'000.	'000 lb.	£'000.	'000 lb.	£'000.
New South Wales ..	143	51	194	18,682	1,129	257	70
Victoria ..	86	19	105	9,661	600	113	29

Aust. Cap. Territory ..	1	(a)	1	34	2	1	(b)
Australia ..	362	103	465	45,562	2,390	607	155

(a) Less than 500.

(b) Less than £500.

The production of honey and bees-wax fluctuates considerably and is determined mainly by the flow of nectar from flora, particularly the eucalypts, which varies greatly from year to year. Compared with pre-war, there has been a pronounced upward trend in the output of honey, and a record production of 53,200,000 lb. was obtained in 1948-49. The production in 1959-60, 45,600,000 lb., was the highest since that year.

The table below shows the production of honey and bees-wax for periods from 1938-39 to 1959-60.

HONEY AND BEES-WAX PRODUCTION.

1959-60 ..	257	113	59	106	67	4	607

(a) Includes Australian Capital Territory and Northern Territory.

2. Oversea Trade in Bee Products.—Prior to the 1939-45 War, the production of honey exceeded Australian requirements and a small quantity was available for export. In 1948-49, the record quantity of 32.1 million lb., was exported. Exports amounted to 11.2 million lb. in 1958-59 and 13.7 million lb. in 1959-60, about two thirds going to the United Kingdom and most of the remainder to the Federal Republic of Germany.

The quantity of bees-wax imported generally exceeded that exported up to 1945-46, but since 1946-47, with the exception of 1951-52, local production has been higher and exports have exceeded imports by substantial margins. In 1959-60, exports exceeded imports by an amount of about 200,000 lb.

Total quantities and values of exports of honey and bees-wax for the years 1957-58 to 1959-60 are shown in § 7 below.

§ 7. Exports of Australian Farmyard, Dairy and Bee Products.

The quantities and values of Australian farmyard, dairy and bee products exported during the years 1957-58 to 1959-60 are shown below.

EXPORTS OF FARMYARD, DAIRY AND BEE PRODUCTS : AUSTRALIA.

§ 8. Imports of Dairy and Farmyard Products into the United Kingdom.

(Source: Board of Trade Accounts relating to Trade and Navigation of the United Kingdom.)

NOTE.—Values of imports in this section are expressed in £ sterling c.i.f. at the landed point.

1. Summary, Principal Products.—The following table shows the quantities and values of the principal dairy products imported into the United Kingdom during the years 1958, 1959 and 1960.

DAIRY PRODUCTS: IMPORTS INTO UNITED KINGDOM.

Product.	Unit of Quantity.	1958.		1959.		1960.	
		Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
			£'000.		£'000.		£'000.
Butter	'000 cwt.	8,454	97,397	8,014	134,312	8,167	122,985
Cheese	"	2,372	23,575	2,726	38,387	2,653	32,224
Milk, powdered and preserved	"		5,230		9,631		7,121
Bacon and ham	'000 cwt.	7,272	96,860	7,584	100,330	8,838	117,296
Pork(a)	"	370	3,401	280	3,206	436	4,903
Eggs in shell	'000 doz.	14,854	2,192	12,769	1,594	35,135	4,653
Eggs not in shell, liquid or frozen	'000 cwt.	473	5,445	251	3,536	306	3,987

(a) Excludes pork in airtight containers.

2. **Butter.**—Until 1950, Australia had regularly supplied between 20 and 30 per cent. of the butter imported into the United Kingdom. After 1950, when butter rationing was abolished in Australia, the quantity shipped was considerably lower, but in 1956 it again amounted to 1,515,000 cwt., or 21.4 per cent. of the total United Kingdom imports. Shipments fell away again in subsequent years. In 1960, Australia supplied 1,168,000 cwt. or 14.3 per cent. of the United Kingdom imports, New Zealand supplied 36.0 per cent. and Denmark 24.0 per cent.

In the following table, particulars of the quantity and value of butter imported into the United Kingdom are shown for the years 1958, 1959 and 1960 according to country of origin.

BUTTER: IMPORTS INTO UNITED KINGDOM.

Country from which Imported.	1958.		1959.		1960.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	'000 cwt.	£'000.	'000 cwt.	£'000.	'000 cwt.	£'000.
New Zealand	3,400	38,877	3,250	53,475	2,941	45,660
Australia	986	11,634	1,282	20,206	1,168	18,271
Other Commonwealth Countries and Republic of Ireland ..	373	4,474	160	3,611	175	2,545
Denmark	1,907	23,244	1,891	33,185	1,964	29,726
Netherlands	593	6,609	270	5,109	347	5,078
Other Foreign Countries ..	1,195	12,559	1,161	18,726	1,572	21,705
Total	8,454	97,397	8,014	134,312	8,167	122,985

3. **Cheese.**—The value of cheese imported into the United Kingdom in 1960 was £32,224,000. Of this, £18,440,000 was imported from New Zealand, £3,463,000 from Australia, £2,595,000 from Denmark, £2,397,000 from Canada and £1,853,000 from the Netherlands.

4. **Bacon.**—Of a total import in 1960 of bacon (excluding bacon in airtight containers), valued at £101,702,000, the value of that supplied by Denmark was £72,688,000, Poland, £10,824,000, the Netherlands, £7,865,000 and the Republic of Ireland, £6,131,000.

5. **Pork.**—The value of the United Kingdom imports of pork (excluding pork in airtight containers) was £4,903,000 in 1960. Imports were mainly from the Argentine Republic (£829,000) and Denmark (£576,000).

6. **Eggs.**—In 1960, the value of eggs imported into the United Kingdom was £8,640,000, comprising eggs in shell, £4,653,000, and liquid or frozen eggs, £3,987,000. Eggs in shell were supplied principally by Denmark and the Union of South Africa.

7. **Milk Products.**—In 1960, the value of preserved milk imported into the United Kingdom was £7,121,000. Of this total, imports from New Zealand amounted to £2,864,000, the Netherlands, £1,320,000 and Australia, £1,110,000.

CHAPTER XXV.

FORESTRY.

NOTE.—For further details on subjects dealt with in this chapter *see* the annual bulletins *Primary Industries, Part II.—Non-Rural Industries and Value of Production* and *Secondary Industries* (sawmills, etc., operations).

§ 1. Introduction.

1. **Source of Statistics.**—Statistics relating to forestry are, in general, provided by the various authorities concerned with forestry administration. In each State, suitable areas of Crown Land have been reserved for forestry purposes, either as State forests or other reserves, and the administration of these is the responsibility of the respective State Government forestry authorities. In addition, in some States, areas of forests on Crown Lands dedicated as National Parks and the like are administered by Government Departments other than the forestry authorities. There are timber resources on private land in each State but details concerning these areas and production therefrom are not complete for all States. Forestry activities in the Northern Territory and the Australian Capital Territory are administered by the Commonwealth Government.

Particulars of forested areas contained in this chapter have been collected by the Statisticians of the several States, mainly from information provided by the State Forestry authorities. The Forestry and Timber Bureau of the Commonwealth has provided figures for the Northern Territory and the Australian Capital Territory and, in addition, has made available certain other data.

Statistics of timber and by-products have been compiled from the annual factory collections undertaken by the Statisticians in the several States. Figures of production of gums, resins and tanning barks have been provided by the State Forestry authorities.

Data of imports and exports of forest products and timber and timber products have been compiled in the Commonwealth Bureau of Census and Statistics as part of the overall statistics of overseas trade.

The figures shown relate, in general, to financial years ending 30th June.

Forested areas shown in this chapter relate to areas administered by the State or Commonwealth authorities, or to those reserved by government legislation. They are not based on any inventory of forest resources using standard and uniform definitions throughout the Commonwealth. It should be noted, therefore, that the figures are not comparable between States owing to the lack of uniformity in the interpretation of what constitutes a forest.

2. **Objects of Forestry.**—The main object of forestry authorities is to manage the forests of the country in a manner that will provide the maximum benefits, both direct and indirect. Direct benefits include the provision of essential commercial commodities such as structural timber, pulpwood, plywood, veneers, firewood, bark products, tars, oils and resins. Indirect benefits include protection of soil and stock from wind and exposure, regulation of stream flow, provision of recreational facilities and aesthetic effects. Forestry also aims at improving existing forests and woodlands by properly controlled exploitation, by protection from such destructive agencies as fire and insect attack, and by inducing regeneration where it is desirable. The provision of a partial tree cover on denuded lands where such cover is necessary for protective purposes, and a complete cover when the land is better under forest than under any other land use, is a further aim of forestry.

§ 2. Forestry in Australia.

1. **General Account of Forests and Timbers.**—The area of land in Australia suitable for the production of commercial timber as the primary crop is very small in comparison with the size of the continent. It is concentrated mainly around the wetter coastal belts in the eastern highlands and includes the bulk of the land suitable for intensive development by agricultural or pastoral undertakings or other forms of closer settlement.

The trees which make up the forests of Australia are mainly evergreen hardwoods. The characteristic genus is *Eucalyptus*. There are over 600 different species of eucalypts and with few exceptions the natural occurrence of all of them is restricted to Australia. The genus includes species such as the mountain ash (*Eucalyptus regnans*) of Victoria and Tasmania, the world's tallest growing hardwood, and the karri (*E. diversicolor*) of Western Australia, another forest giant. At the other end of the scale, there are many eucalypts which do not grow to tall trees, including the species collectively known as the "mallees". The mallees develop a number of small stems from an underground structure called the "mallee root". Less than 100 species of eucalypts are used for sawmilling and not more than 40 are exploited extensively. The main commercial eucalypts are listed in Official Year Book No. 39 and earlier issues.

A large number of other genera represented in the Australian forest flora also produce commercial hardwoods. Among the outstanding furniture, cabinet and veneer timbers are red cedar (*Cedrela toona* var. *australis*), Queensland maple (*Flindersia brayleyana*), Southern and Northern silky oak (*Grevillea robusta* and *Cardwellia sublimis*, respectively), Queensland walnut (*Endiandra palmerstoni*), blackwood (*Acacia melanoxylon*), rose mahogany (*Dysoxylum fraserianum*), etc. Turpentine (*Syncarpia laurifolia*) ranks with the world's best as a harbour piling timber. Coachwood (*Ceratopetalum apetalum*) came into prominence for rifle furniture and for aircraft plywood during the 1939–45 War.

The most important indigenous softwood resources of Australia were in the forests of hoop pine (*Araucaria cunninghamii*) of Queensland and New South Wales. The greater part of the original hoop pine forest has been exploited, but considerable areas have been replanted with this species in Queensland and, to a lesser extent, in New South Wales. There are considerable areas of the useful termite-resisting cypress pine (*Callitris* spp.) in the inland areas of Queensland and New South Wales, which have not been cleared for grazing. These cypress pine areas are gradually being brought under systematic management.

Other native softwoods which have played a useful but minor part in the Australian timber industry include bunya pine (*Araucaria bidwillii*) and kauri (*Agathis* spp.) of Queensland, and huon pine (*Dacrydium franklinii*), celerytop pine (*Phyllocladus rhomboidalis*) and King William pine (*Arthrotaxis selaginoides*) of Tasmania.

The lower quality forests of inland Australia yield such commercial commodities as sandalwood, tan-barks and essential oils. They also have an important function in providing fuel and rough timbers for the development of agricultural and pastoral holdings.

2. **Extent of Forests.**—According to data assembled for the Seventh British Commonwealth Forestry Conference held in Australia and New Zealand in 1957, the total area of forest in Australia is estimated at 186,791 square miles, or about 6.3 per cent. of the total land area of the continent. The estimated forest area is distributed amongst the States as follows (the proportion of forest land to the total area of each State is shown in parentheses):—New South Wales and the Australian Capital Territory, 37,942 square miles (12 per cent.); Victoria, 26,222 (30 per cent.); Queensland, 28,000 (4 per cent.); South Australia, 36,000 (including 25,000 square miles of mallee suitable for firewood only) (10 per cent.); Western Australia, 41,826 (4 per cent.); Tasmania, 12,301 (47 per cent.) and the Northern Territory, 4,500 (1 per cent.). These areas are considerably in excess of those which are both suitable for reservation and likely to be maintained for timber production, for they include considerable areas of low-grade forest suitable only for the production of poles, fencing timbers and firewood. It is doubtful if the residual prime native forest area exceeds 30,000 square miles. Further particulars are set out in the table following.

CLASSIFICATION OF FOREST AREA: AUSTRALIA.

(Based on the 1955 Classification of Forests.)

Class of Forest.	Area.				Proportion of Total Forest Area.
	State Forest.	Communal Forest.	Private Forest.	Total.	
Exploitable—	Sq. Miles.	Sq. Miles.	Sq. Miles.	Sq. Miles.	Per Cent.
Softwood	10,512	5	2,808	13,325	7.1
Mixed Wood	754	..	754	754	0.4
Hardwood	41,691	75	13,129	54,895	29.4
<i>Total</i>	<i>52,957</i>	<i>80</i>	<i>15,937</i>	<i>68,974</i>	<i>36.9</i>
Potentially Exploitable—					
Softwood	58	..	100	158	0.1
Mixed Wood	100	100	0.1
Hardwood	13,002	..	12,200	25,202	13.5
<i>Total</i>	<i>13,160</i>	<i>..</i>	<i>12,300</i>	<i>25,460</i>	<i>13.7</i>
Other Lands Classed as Forest	81,023	450	10,884	92,357	49.4
Grand Total ..	147,140	530	39,121	186,791	100.0

State forests accounted for 78.8 per cent. of the total forest area, private forests for 20.9 per cent. and communal forests for 0.3 per cent.

The bulk of the softwood area of approximately 13,325 square miles is in Queensland and New South Wales and consists principally of cypress pine (*Callitris spp.*) in low rainfall areas. The total area has been increased in comparison with previous estimates by the inclusion of a large area of crown land carrying scattered cypress pine. The volume per acre of this species is comparatively low.

Further particulars of forested areas are set out in § 3, page 1005.

3. Persons Engaged.—In the following table, which shows particulars collected in the Population Censuses of Australia of 30th June, 1947 and 1954, the numbers of persons whose "industry" was stated to be "forestry (excluding sawmilling)" are shown, together with the numbers engaged in all primary industries and the total work force.

PERSONS ENGAGED, AUSTRALIA.

Particulars.					At 30th June.	
					1947.	1954.
Persons engaged in—						
Forestry (excluding sawmilling)	No.				24,793	15,468
All Primary Industries	No.				563,607	560,100
Total Work Force	No.				3,196,431	3,702,022
Persons employed in Forestry (excluding sawmilling) as a proportion of—						
All Primary Industries	%				4.4	2.8
Total Work Force	%				0.8	0.4

Particulars of the number of persons employed by Forestry Departments and in Saw-mills are included in § 5, para. 2, page 1010.

4. **Value of Production.**—(i) *General.* Statistics of both the gross value (at principal market) and local value (at place of production) of the forestry industry are available. Particulars of the value of materials used in the process of production are not available for all States; for this reason values cannot be stated on a net basis, as has been done with most other industries.

In 1959–60, the local value of forestry production amounted to £53,859,000. The most important States were New South Wales, Victoria and Queensland with £15,169,000, £15,476,000 and £8,469,000 respectively.

(ii) *Gross and Local Values, 1959–60.* The following table shows gross and local values of forestry production for each State in 1959–60. A more detailed reference to the value of production of forestry and other industries in Australia, as well as a brief explanation of the terms used, will be found in Chapter XXX.—Miscellaneous.

GROSS AND LOCAL VALUE OF FORESTRY PRODUCTION, 1959–60.
(£'000.)

State or Territory.	Gross Value (Gross Production Valued at Principal Markets).	Marketing Costs.	Local Value (Gross Production Valued at Place of Production).
New South Wales	15,390	221	15,169
Victoria	16,969	1,493	15,476
Queensland	9,397	928	8,469
South Australia	4,033	104	3,929
Western Australia	5,460	375	5,085
Tasmania	6,276	720	5,556
Northern Territory	25	(a)	25
Australian Capital Territory	150	(a)	150
Australia	57,700	3,841	53,859

(a) Not available.

(iii) *Local Values, 1955–56 to 1959–60.* In the following table, the local value of forestry production and the local value per head of population are shown by States for the years 1955–56 to 1959–60.

LOCAL VALUE OF FORESTRY PRODUCTION.

Year.	N.S.W.	Vic.	Q'ld.	S.A.	W.A.	Tas.	Aust.(a)
LOCAL VALUE (£'000).							
1955–56	15,343	11,823	8,660	4,596	4,877	4,591	50,059
1956–57	16,758	12,297	9,487	4,051	4,779	4,523	52,099
1957–58	15,341	13,088	9,414	3,587	5,112	4,547	51,306
1958–59	15,574	14,063	8,356	4,103	5,067	4,887	52,273
1959–60	15,169	15,476	8,469	3,929	5,085	5,556	53,859

LOCAL VALUE PER HEAD OF POPULATION (£).

1955–56	4.3	4.6	6.4	5.5	7.3	14.4	5.4
1956–57	4.7	4.7	6.9	4.7	7.0	13.9	5.5
1957–58	4.2	4.8	6.7	4.0	7.3	13.6	5.3
1958–59	4.2	5.0	5.9	4.5	7.1	14.3	5.3
1959–60	4.0	5.4	5.8	4.2	7.0	16.0	5.3

(a) Includes Northern Territory and Australian Capital Territory.

§ 3. Forested Areas.

1. **Forest Reservations.**—The first estimate of the forest area which should be reserved solely for purposes of timber production was made at an interstate forestry conference held at Hobart in 1920. This conference decided that an area of 24½ million acres of indigenous forest should be permanently dedicated to timber production. According to statements furnished by State and Commonwealth authorities, reservations of forest areas in Australia as at 30th June, 1960, totalled 33,791,000 acres, of which 23,088,000 acres were Dedicated State Forests and 10,703,000 acres were Timber and Other Reserves. The distribution of those areas is shown by States in the following table:—

AREA OF FOREST RESERVATIONS, 30TH JUNE, 1960.

(Acres.)

State or Territory.	State Forests.	Timber Reserves (Forest Acts).	Other Reserves.	Total.
New South Wales	6,420,005	1,441,542	..	7,861,547
Victoria	4,860,056	709,794	(a) 169,302	5,739,152
Queensland	5,118,483	3,055,740	(b) 843,054	9,017,277
South Australia	268,667	981	(c) 491,874	761,522
Western Australia	4,329,514	1,768,303	(a) 780,678	6,878,495
Tasmania	22,091,544	137,028	(e) 814,709	3,043,281
Northern Territory	(f) 358,900	358,900
Australian Capital Territory	(g) 131,000	131,000
Australia	23,088,269	7,113,388	3,589,517	33,791,174

(a) Timber reserves under the Land Act. (b) National Parks. (c) Includes some fauna and flora areas for which figures were not previously available. (d) Includes 464,984 acres of State Forests under pulpwood concession. (e) Consists of 612,000 acres of pulpwood concessions over Crown land and 202,709 acres of exclusive forest permits not elsewhere included. (f) Comprises mainly a fauna and flora reserve on Coburg Peninsula. (g) Forest land not specifically reserved.

If the permanently reserved areas were all of good quality, accessible, and fully productive, and if they supplied the class of timber required, they could be regarded as adequate for a larger population than exists in Australia at the present time. Actually, a considerable proportion is in inaccessible mountainous country and many of the forests contain a mixture of species, only some of which are at present of commercial value. Much of the area consists of inferior forest and a large proportion of the whole has been seriously degraded by recurrent fires. Moreover, the indigenous forest does not contain adequate supplies of softwoods and Australia's requirements have had to be met largely by imports.

It is freely acknowledged by Australian forest authorities that information on forest resources is imperfect. It is not possible to give a reliable estimate of the forest area needed to meet future demands because of the unknown variables involved, in particular, the yield capacity per acre, future consumption of different classes of timber, and the future population.

It appears, however, that all available good forested country and an adequate area suitable for plantations of coniferous timber must be reserved, protected and systematically managed if Australia is to approach the goal of self-sufficiency in timber supplies in the future.

2. **Plantations.**—Reference has been made to the inadequacy of indigenous softwood supplies, but as a result of the planned policy of the Forest Services and of several private commercial organizations, the area of softwood plantations, mainly of exotic species, is steadily increasing. It was natural that this aspect of forestry should receive earliest attention in South Australia, as this is the State most poorly endowed with natural forest. South Australia now has a larger area of planted softwoods than any other State in Australia, and for some years has been exploiting considerable quantities of timber from these plantations. The total production is now over 200,000,000 super. feet per annum and is expected to be increased substantially during the next decade. Production is also increasing in the other States and the thinnings from their plantations are already supplying a significant volume of timber.

Data relating to areas of plantations for past years have been shown as at 30th June. As new areas are being planted in most States at this time of the year, the following table has been compiled by the Forestry and Timber Bureau as at 30th September, 1960.

SOFTWOOD PLANTATIONS, 30TH SEPTEMBER, 1960.
(Acres.)

State or Territory.	Government.			Private: (mainly <i>P. radiata</i>).	Total.
	<i>Pinus radiata</i> .	Other species.	Total.		
New South Wales	64,372	18,646	83,018	12,000	95,018
Victoria	38,742	15,056	53,798	55,500	109,298
Queensland	1,852	88,566	90,418	5,169	95,587
South Australia	105,400	9,700	115,100	(a) 36,200	151,300
Western Australia	10,692	21,330	32,022	584	32,606
Tasmania	14,837	397	15,234	5,446	20,680
Australian Capital Territory ..	21,157	2,096	23,253	100	23,353
Australia	257,052	155,791	412,843	114,999	527,842

(a) Excludes plantings during 1960.

A special article giving a detailed account of the history and development of softwood plantations and of the characteristics of individual species has been prepared by the Forestry and Timber Bureau, and is included in Official Year Book No. 45, pages 975 *et seq.*

Hardwood plantations (mainly *Eucalyptus spp.*) comprise a much smaller area and the total acreage at 30th June, 1960, was 30,924 acres, nearly two-thirds of which was mallet (*Eucalyptus astringens*). Plantations of this species have been established in Western Australia for tan-bark production.

§ 4. Forestry Production.

1. Timber.—Particulars of logs treated and the production of sawn, peeled and sliced timber by sawmills and other woodworking establishments are shown in the following table, by States, for the year 1959–60. These figures have been compiled from the annual factory collections in each State which cover virtually all sawmills. The only omissions are some small portable mills operated by itinerants, e.g., sleeper cutters.

OUTPUT OF AUSTRALIAN-GROWN TIMBER : ALL MILLS, 1959-60.

(a) Excludes the Australian Capital Territory and the Northern Territory, details for which are not available for publication.

The next table shows the sawn, peeled and sliced output of Australian-grown timber from sawmills and other wood-working establishments in each State for the years 1955-56 to 1959-60.

OUTPUT(a) OF AUSTRALIAN-GROWN TIMBER : ALL MILLS.
(^{'000} super. feet.)

State.	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.
New South Wales	362,709	365,548	359,737	373,515	398,727
Victoria	351,271	342,288	346,473	344,018	350,458
Queensland	261,730	275,936	268,200	262,033	274,701
South Australia	100,983	94,869	84,541	122,456	128,442
Western Australia	222,397	204,474	201,664	211,943	199,059
Tasmania	150,632	135,744	130,562	146,009	169,659
Australia(b)	1,449,722	1,418,859	1,391,177	1,459,974	1,521,046

(a) Total production of sawn, peeled and sliced timber. (b) Excludes the Australian Capital Territory and Northern Territory, details for which are not available for publication.

In addition to the sawn timber shown in the preceding table, a large amount of hewn and round timber, e.g., sleepers, piles, poles, fencing timber, timber used in mining and fuel, is obtained from forest and other areas. Complete information in respect of the volume of this output is, however, not available.

2. Veneers, Plywood, etc.—Cutting of timber for the manufacture of veneers, plywood etc., has been carried out in most States for a number of years. In recent years, however, this has been considerably extended, since plywood manufacture has allowed the use of some species unsuitable for sawing. Special attention has been paid to ensure that logs suitable for peeling are diverted to ply factories. However, the supply of Australian-grown logs is inadequate and greater use is being made of imported logs.

The following table shows the production of plywood for each of the years 1955–56 to 1959–60.

PLYWOOD PRODUCED.
(’000 square feet— $\frac{3}{8}$ -in. basis.)

State.	1955–56.	1956–57.	1957–58.	1958–59.	1959–60.
New South Wales	39,256	41,921	45,647	56,378	62,701
Queensland	133,230	118,647	131,205	139,743	134,824
Other States	28,213	33,797	35,784	40,083	40,627
Australia	200,699	194,365	212,636	236,204	238,152

Of the total plywood produced in 1959–60, 180,869,000 square feet ($\frac{3}{8}$ -in. basis) were classed as “Commercial”, 36,514,000 as “Waterproof”, 2,660,000 as “Case” and 18,109,000 as “Sliced Fancy”.

During 1959–60, 602.4 million square feet ($\frac{1}{8}$ -in. basis) of veneers were produced by the rotary process for the manufacture of plywood, and 248.7 million square feet ($\frac{1}{8}$ -in. basis) were sold or added to stock, the bulk of which would eventually be used in the production of plywood. In addition, 41.3 million square feet of sliced veneers were produced.

3. Hardboard.—The production of hardboard from pulped wood for building purposes has increased considerably in Australia in recent years. There were five factories producing hardboard during 1959–60 (two in New South Wales, and one in each of Victoria, Queensland and Tasmania) and during the three years ended 30th June, 1960, the following quantities were produced:—1957–58, 24,504,000 square yards; 1958–59, 29,067,000 square yards; and 1959–60, 31,645,000 square yards.

Most of this hardboard enters into usage in the condition in which it leaves the producing factories. The remainder is further treated and surfaced to a variety of finishes and in 1959–60 this production accounted for 2,650,000 square yards valued at £948,000.

4. Wood Pulp and Paper.—(i) *Wood Pulp.* The manufacture of wood pulp from Australian-grown timber was established in Australia in 1939, after years of experimentation with eucalypt hardwoods. During 1959–60, four wood pulp mills were operating in three States and production was 144,872 tons of chemical pulp and 58,061 tons of mechanical pulp, a total of 202,933 tons. During the previous year, production was 144,757 tons of chemical pulp and 62,069 tons of mechanical pulp.

(a) *Victoria.* In Victoria, Australian Paper Manufacturers Limited produce wood pulp at Maryvale in Gippsland by a chemical process known as the kraft or sulphate process. The pulpwood used at this mill consists mainly of eucalypt timber below sawmilling quality, together with a quantity of plantation pine thinnings.

During the year 1959–60, 323,487 tons of eucalypt and pine pulpwood were supplied to Maryvale Mill. Plantations of both pines and eucalypts are being established in Gippsland at the rate of approximately 3,000 acres a year by A.P.M. Forests Proprietary Limited.

(b) *South Australia.* In South Australia, a paper board mill operates near Millicent, using raw material in the form of logs from the State Forests in the south east of South Australia. During 1959–60, a total quantity of 7,800,000 super. feet of pulpwood were supplied to this mill.

A new tissue paper mill near Millicent commenced operations in May, 1960. When in full production, it will use approximately 20 million super. feet of pulpwood annually.

(c) *Tasmania.* In Tasmania, two large mills are making pulp and paper from indigenous hardwoods. At Burnie, on the north-west coast, Associated Pulp and Paper Mills Ltd. use a chemical method, the soda process, to produce wood pulp for fine writing parchment and printing papers. A continuous digester at the Burnie mill makes it the only one in Australia to use a continuous pulping process. In addition, a semi-chemical pulp plant was brought into operation in 1959. In 1959–60, 71,000 tons of paper were

produced. The company holds freehold and State concession forest areas which are managed on a permanent yield basis with regeneration of the eucalypts in all suitable areas. Pine plantations are being established to provide softwoods for pulping.

Australian Newsprint Mills Ltd. at Boyer, 20 miles from Hobart, is the only producer of newsprint in Australia. Wood pulp is produced from hardwoods drawn from State timber concession areas. A mechanical process was used until 1957 when additional plant was installed for the manufacture of semi-chemical pulp. This plant uses the cold soda process which allows the utilization of additional species not suitable for ground wood pulp. The components of Boyer newsprint average 60 per cent. of ground-wood pulp, 22 per cent. of cold soda pulp (both made at Boyer from hardwoods) and 18 per cent. of imported Kraft pulp made from *Pinus radiata* in New Zealand. Newsprint production capacity is 85,000 long tons per annum. To secure more complete bush utilization, the company has established sawmills to convert understory species, principally myrtle and sassafras, to sawn timber. The forests are managed on a sustained yield basis. Forest utilization and management are designed to promote eucalypt regeneration. Experimental work into the problems involved is being carried out by the company and the Tasmanian Forestry Commission.

(ii) *Paper and Paper Board.* Paper and paper board are manufactured in all States but the industry is centred mainly in New South Wales, Victoria and Tasmania. During 1959-60, twenty paper mills were operating, nine in Victoria, four in New South Wales, three in Tasmania, two in Queensland and one each in South Australia and Western Australia. A wide variety of paper and paper board is produced in Australian mills. The quantity and value of paper produced in 1959-60, with comparable figures for 1958-59 in brackets, are as follows.—newsprint, 88,510 (83,071) tons valued at £6,682,005 (£6,304,189); blotting, 800 (832) tons, £144,685 (£145,224); duplicating, 5,804 (4,870) tons, £916,420 (£830,224); printing and writing, 67,825 (63,200) tons, £11,507,234 (£10,496,789); kraft wrapping, 66,451 (57,668) tons, £9,000,408 (£7,437,943); other wrapping 12,600 (12,362) tons, £2,275,045 (£2,092,727); felt and carpet felt, 4,145 (4,439) tons, £472,668 (£448,339); and other paper, 37,486 (35,043) tons, £4,329,530 (£3,709,471). In addition, 221,338 (200,339) tons of paper boards valued at £18,724,122 (£17,437,412) were produced.

5. *Other.*—(i) *Eucalyptus Oil.* Oil may be distilled from the foliage of all varieties of *Eucalyptus*, and several of them furnish a product widely known for its commercial and medicinal uses. Complete information regarding Australian production and consumption of eucalyptus oil is not available, but considerable quantities are manufactured, particularly in New South Wales and Victoria. The quantity and value of exports of eucalyptus oil distilled in Australia were 354,434 lb., £131,485 in 1957-58; 209,451 lb., £77,083 in 1958-59; and 256,888 lb., £94,760 in 1959-60.

(ii) *Gums and Resins.* Gums and resins are produced in most States of Australia, the main product being grass tree or yacca gum. This gum, which is used in the preparation of varnishes and lacquers, comes chiefly from South Australia, but small quantities are also produced in New South Wales and Western Australia. In 1959-60, the recorded production for Australia of gums and resins was 10,682 cwt. Exports of acaroid resin, grass-tree and yacca gum from Australia during the same period amounted to 9,068 cwt. valued at £18,058.

(iii) *Tanning Barks.* The forests of Australia are capable of yielding a wealth of tanning materials; many species of *Eucalyptus* and other genera contain varying proportions of tannin, chiefly in the bark, but also in the wood and twigs. Their scattered distribution, however, has resulted in the use of only the richest tan-bearing species in Australia. These are:—Golden wattle (*Acacia pycnantha*), green or black wattle (*Acacia decurrens* or *mollissima*), and mallet (*Eucalyptus astringens*). Mallet (*E. astringens*), of Western Australia, is not extensively used in Australian tanneries, but is exported. References to overseas trade in tanning substances are made in § 8, pages 1013 and 1014.

The production of extract from the bark of karri (*E. diversicolor*), of which very large quantities are available at karri sawmills, has passed the experimental stage, and private enterprise has started production on a commercial scale. The experimental work in kino impregnated marri (*E. calophylla*) bark is not yet complete. The total production of tanning bark in Australia approximated 25,000 tons per annum in the years prior to 1939, but since then production has declined and in 1959-60 was only 5,076 tons. However, this decrease is offset by the increased use of vegetable tanning extracts and synthetic tanning agents.

§ 5. Employment in Forestry.

1. **Persons Engaged in Forestry Activities.**—Particulars of the numbers of persons who, at the population censuses of 30th June, 1947 and 1954, stated that they were engaged in "forestry (excluding sawmills)" are shown in § 2, para. 3, page 1003.

2. **Employment by Forestry Departments.**—In the table below, details are shown of the number of persons employed by State Forestry Departments, and by the Forestry and Timber Bureau in the Australian Capital Territory and the Northern Territory, as at 30th June, 1960.

PERSONS EMPLOYED BY FORESTRY DEPARTMENTS, AS AT 30TH JUNE, 1960.

Occupational Group.	N.S.W.	Vic.	Q'ld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.

Males	9,117	6,809	6,329	2,251	3,777	2,759	31,042
Females	418	215	321	181	41	93	1,269
Total	9,535	7,024	6,650	2,432	3,818	2,852	32,311

(a) Excludes Northern Territory and Australian Capital Territory, details for which are not available for publication.

§ 6. Forest Administration and Research.

1. **Commonwealth Forestry and Timber Bureau.**—When the Commonwealth of Australia was established on 1st January, 1901, forestry was not included among the functions transferred from the States to the Commonwealth. In 1925 the Commonwealth Forestry Bureau was instituted and in 1930 received statutory powers. Its functions included advising the various Territorial Administrations on forestry matters, the management of forests placed under its control, the establishment of experimental forest stations, the training of professional foresters, etc. In 1946, the title of the Bureau was changed to "The Forestry and Timber Bureau" and its powers and functions were extended to embrace the collection of statistics and other information. In addition, its advisory functions were extended to the Governments of the Commonwealth and the States, or other interested bodies, on such matters as supply, production, imports and exports and distribution of timber in Australia.

The main activities of the Bureau under its statutory functions are:—

(a) **Forestry Education.** The Australian Forestry School, located in Canberra, trains professional foresters. Training at the school covers the third and fourth years of a four-year degree course in forestry. The first two years of the course are spent in a study of prescribed science subjects at one of the Australian universities. The third and fourth years

are spent at the Forestry School studying specialized forestry subjects. Students who satisfactorily complete the course graduate in Forestry at their home university and are awarded the Commonwealth Diploma in Forestry. The Commonwealth Diploma in Forestry or the Diploma in Forest Technology may also be awarded to suitable graduates from Australia or overseas who complete an appropriate course at the Australian Forestry School.

(b) *Silvicultural Research.* Research headquarters and a Central Experimental Station have been established in Canberra. Other forest experimental stations have been established at Mount Burr in the south-east of South Australia, in Tasmania and at Dwellingup in Western Australia, on a co-operative basis with the Forest Service of those States. An experimental station is also operating at Traralgon, Victoria in conjunction with A.P.M. Forests Pty. Ltd. It is proposed to establish similar co-operative experimental stations in other States and Territories.

The research work being carried out covers a wide field of studies of forest conditions; the genetic relationships and soil and climatic requirements of various species; forest nutrition; factors affecting the growth of trees; and the improvement of forest yields. Studies in fire protection, watershed management, forest entomology and pathology are also being actively pursued. Considerable expansion in research activities is planned as suitable trained staff becomes available.

(c) *Forest Management Research.* A national forest stocktaking is being carried out in co-operation with the Forest Services of the States, and special consideration is given to the use of aerial surveys to assist in forest assessment.

Research in the fields of forest management and mensuration is being carried out and further investigations into the economics of management are proposed.

A research station has been established at Darwin for the Northern Territory Administration.

(d) *Timber Supply Economics.* Advice is currently made available to government departments and private enterprise on timber supply matters. Research is undertaken on logging methods and machines and on matters associated with the marketing of timber products.

(e) *Management of Forests.* A Division of the Bureau manages the forests of the Australian Capital Territory, while the Darwin research station advises on the management of the forests of the Northern Territory. In addition, advice is made available to the Administrations of the Australian External Territories on the management of the forests in those Territories.

2. **Commonwealth Scientific and Industrial Research Organization, Division of Forest Products.**—Fundamental investigations connected with the properties and uses of timber and forest products generally are carried out by the Division of Forest Products of the Commonwealth Scientific and Industrial Research Organization. These investigations cover a very wide field, e.g., structure and chemistry of wood, tans, etc.; properties and uses of wood; methods of production of sawn timber, pulp, paper, etc.

3. **Forestry Activities of the States.**—The powers and functions of State Forest Authorities are laid down under Forestry Acts and Regulations. In each State, there is a Department or commission to control and manage State forests, etc. Its functions are summarized as follows: (a) the introduction of proper measures for the control and management of forest land; (b) the protection of forest land; (c) the conversion, marketing and economic utilization of forest products; (d) the securing of an adequate and permanent reservation of State forests; (e) the establishment and maintenance of coniferous forests to remedy the existing deficiency of softwoods in Australia. All State forest services are actively engaged on research programmes involving problems of a more applied nature as opposed to the basically fundamental biological research being carried out by the federal authorities.

Annual reports are issued by each State forest authority. The Forestry Commission of Victoria maintains a Forestry School at Creswick, where recruits are trained for employment in the Commission or in other avenues of forestry.

In addition to developing permanent forest reserves in each State, foresters are surveying all timber lands with a view to obtaining dedications of new State forests to add to the permanent forest estate or to release areas unsuitable for forestry for other uses. State forest authorities also usually control all timber on unoccupied Crown lands as well as over 10 million acres of timber reserves, national parks, etc.

4. **Private Forestry.**—A number of private forestry companies are now operating in Australia. They are mainly concerned with the supply of raw materials to specific wood processors (often parent companies). The majority have professional foresters on their staff, several being engaged on research.

An estimate of the area of softwood plantations established by private companies and individuals is included in the table in § 3, para. 2, page 1006.

§ 7. Fire Protection.

Fire control measures in Australia are the responsibility of the individual State Governments, and the provision of adequate fire protection is one of the main problems facing forest authorities. The forest services are responsible for fire protection measures over an area of some 40 million acres of dedicated and reserved forest areas throughout Australia, including some 10 million acres of Crown land in Victoria.

The responsibility for the protection of private property outside urban areas rests with volunteer bush fire brigade organizations which are co-ordinated in each State by a committee or board carrying out functions of an advisory or educational nature and fostering the growth and organization of the bush fire brigade movement. Throughout the main agricultural and forest areas of Australia there are over 4,500 registered volunteer bush fire brigades with a membership approaching 200,000. Although both forest and rural fire organizations are entirely separate entities, a high degree of co-operation and liaison is maintained.

In addition to the forest service and rural organizations, various private and semi-Government bodies in each State maintain fire protection organizations, which are generally concerned with the protection of private forestry operations and hydro-electric and water catchment areas.

Over the five-year period 1956–60, the annual cost of protecting from fire the 40 million acres of forest land for which State Forest Services are directly responsible is estimated at £1,600,000 or about 9d. an acre. The cost of rural fire control as a whole cannot be estimated with any degree of accuracy because by far the greatest contribution comes from the personal efforts of volunteer brigade members.

The Australian fire season is very variable, with an average of a particularly bad fire season every seven years or so. Such years as 1926, 1939, 1944, 1952 and 1957 account for a large proportion of the average annual burn. Over 80 per cent. of the area burnt carries little commercial timber, being mainly firewood and protection forest. The number of fires and the forest area burnt during the last four years is shown in the following table :—

NUMBER OF FIRES AND FOREST AREAS BURNT: AUSTRALIA.

(Source: Forestry and Timber Bureau.)

Year.	Number of Fires.		Forest Areas Burnt.	Burnt Areas as a Proportion of Total Forest Areas.
	No.		Acres.	Per cent.
1956–57	1,999		344,400	0.86
1957–58	2,908		2,078,340	5.11
1958–59	1,175		456,438	1.10
1959–60	1,407		1,297,301	3.25

Since the 1939–45 War, forest services have greatly expanded their fire detection facilities and big advances have been made in the use of power water-pumping equipment. Radio communication is now being used extensively by both forest services and rural organizations, and considerable progress has been made in the provision of legislative power for the rural bush fire movement, although the volunteer movement itself dates back to the turn of the century.

Intensive research work is being undertaken on fire problems and several governmental groups are working on such projects as the study of fire behaviour and associated fuel and meteorological conditions; the use of chemical aids in fire suppression; the development of protective clothing and devices to aid fire-fighters and of more efficient fire-fighting equipment. The fire weather service of the Bureau of Meteorology is being continually expanded to provide both the rural and forest fire-fighting authorities with improved fire weather forecasts.

Recognizing that fire prevention is one of the most important aspects of the problem, intensive campaigns have been conducted to reduce the incidence of man-caused fires. A study of fire causes in recent years reveals that human agencies account for 95 per cent. of all fires, and of this figure at least 80 per cent. are preventable. It is estimated that "burning-off" (much of which is started illegally) accounts for 35 per cent. of all fires. Lightning accounts for a little over 5 per cent. of all fires in Australia, although the incidence of fires caused by lightning is much higher in certain areas, especially the Southern Highlands region in New South Wales and Victoria. Although lightning is a relatively small numerical cause of fire, the percentage area burnt from this cause would be around 20 per cent. This high percentage is due to the multiple fire outbreaks causing fire fighting difficulties and to the general inaccessibility of the areas in which such fires generally occur.

§ 8. Oversea Trade in Forest Products, Timber and Timber Products.

1. **Imports.**—Quantities and values of forest products, timber and timber products imported into Australia during the years 1957–58 to 1959–60 are shown in the following table:—

IMPORTS OF FOREST PRODUCTS, TIMBER AND TIMBER PRODUCTS: AUSTRALIA.

Particulars.	Unit of Quantity.	Quantity.			Value (£A.Co.b. Port of Shipment).

(a) Non-pored woods.

(b) Pored woods.

(c) Less than 500 super. feet.

Imports of softwood logs in recent years have come almost exclusively from British Borneo and the Solomon Islands, and more than 90 per cent. of the imports of hardwood logs have also come from British Borneo. Imports of undressed softwood timber comprise mainly Douglas Fir (Oregon Pine) from Canada and the United States of America and Radiata Pine from New Zealand. Imports of undressed hardwood timber come mainly from Malaya and British Borneo. Timbers from Scandinavian countries provide most of the dressed timber imports.

Imports of timber products are mainly veneers and plywoods. The Australian Trust Territory of New Guinea provides most of the plywood imports and, together with the United Kingdom, over 75 per cent. of veneer imports.

Tanning substances are the only other forest products imported in significant quantities. The most important of these is wattle bark produced in the Union of South Africa.

2. Exports.—The quantities and values of timber, railway sleepers, veneers, plywood and other timber and forest products exported during the years 1957–58 to 1959–60 are shown in the following table:—

**EXPORTS OF FOREST PRODUCTS, TIMBER AND TIMBER PRODUCTS:
AUSTRALIA.**

Particulars.	Unit of Quantity.	Quantity.			Value (£A.f.o.b. Port of Shipment.)

(a) Excludes stumps and the like.

(b) Non-pored woods.

(c) Pored woods.

Sleepers make up the largest single forestry item exported from Australia. In 1959–60, India received more than 40 per cent. of Australia's sleeper exports while the United Kingdom, New Zealand and Pakistan each received more than three million superficial feet. Western Australia was the dominant exporting State.

Most of Australia's log and timber exports are of hardwoods. New Zealand received the greater part of exports of logs and almost 40 per cent. of the exports of all undressed timber, other than railway sleepers. The United Kingdom received most of Australia's exports of plywood and veneers.

Exports of tanning substances in 1959–60 were mainly to the United States of America and that country also was the largest importer of eucalyptus oil. More than 90 per cent. of the charcoal exports were shipped to New Zealand, Japan receiving the remainder.

CHAPTER XXVI.

FISHERIES.

NOTE.—Further information on subjects dealt with in this chapter is contained in the annual printed bulletin *Primary Industries, Part II.—Non-Rural Industries and Value of Production* and in the annual mimeograph statistical bulletin *Fishing and Whaling*, particularly as regards types of fish, etc., caught.

§ 1. Introduction.

1. Source of Statistics.—Fisheries statistics in Australia are, in general, collected by the various authorities responsible for the administration of the industry. The fisheries within territorial waters (i.e. within three miles of the shore) are administered by State Departments, while the Commonwealth Fisheries Office, a division of the Department of Primary Industry, develops and administers fisheries in extra-territorial waters and co-ordinates fisheries administration.

Statistics of production of fish, crustaceans, molluscs and pearl-shell and trochus-shell included in this chapter are collected and supplied by State Fisheries Authorities through the Statisticians of the several States. Statistics are provided on a year ended 30th June basis, although figures for pearl-shell and trochus-shell refer to the season ended December or January of the fiscal year shown.

Details of the catch shown in this chapter refer in most instances to the recorded commercial production only. In view of the importance of amateur fishermen in certain types of fishing, details shown (both for particular species and for totals) cannot be taken as representing the total catch. In addition, it is likely that the figures shown may understate to some extent the full commercial catch because no information is available on fish taken for sale by persons not licensed as professional fishermen.

Particulars of whaling are collected and supplied for publication by the Commonwealth Fisheries Office.

Data of imports and exports of fisheries and whaling products are compiled in the Commonwealth Bureau of Census and Statistics as part of the overall statistics of overseas trade.

2. Presentation of Fisheries Statistics.—In the preparation of Australian fisheries production statistics, the quantities of individual products are, generally, in terms of the form in which they are taken from the water. For example, the statistics of fish production published in this chapter are in terms of "estimated live weights" which are calculated from landed weights by using conversion factors for each species in each State. These conversion factors allow for the fact that the quantities of fish reported are frequently in a gutted, headed and gutted, or otherwise reduced condition. Crustaceans are reported on a "whole weight" basis, and molluscs (edible) on a "gross (in-shell) weight basis". The figures of pearl-shell and trochus-shell refer to the actual quantities of dry shell for sale and exclude the weight of the fish.

The catch is generally shown according to the State in whose waters it was taken. However, a quantity of sharks and crayfish taken by Victorian-based fishermen in Tasmanian waters, but marketed in Victoria, is included in the Victorian catch, since the economy of that State is most directly affected. Similarly, pearl-shell taken by Queensland luggers operating in Northern Territory waters is included in the Queensland take. Pearl-shell taken by Japanese fishermen operating in Australian waters is excluded from Australian production figures, although the quantities taken are shown as a footnote to the table on page 1018.

§ 2. The Fishing and Whaling Industries.

1. Resources and Fishing Areas.—(i) *Fish*. The waters surrounding the Australian continent contain a great variety of marine fauna. Despite this, the fish stocks in Australian waters, in common with most other countries of the Southern Hemisphere, are small by comparison with the stocks in the Northern Hemisphere, which supplies most of the world

production. Nevertheless, the Australian catch is low, even after making allowance for the smaller resources available, and the consumption of fish in Australia per head of population is small. Consequently, there is not the pressure on resources necessary to induce expansion in the fishing industry and to encourage the investment of large amounts of capital. On the other hand, even this somewhat restricted Australian demand for fish is not met from purely local sources of supply, and large quantities of fish are imported each year. This is explained by the fact that the fisheries in the estuaries of the Australian coasts (the so-called estuarine fisheries) and those offshore for fish that dwell on the bottom of the sea (the demersal fisheries) have been over-exploited, with a consequent diminution of stocks. On the other hand, of those species of fish which have their environment near the surface of the sea (the pelagic fish), some have been continuously exploited, while others of value to Australia, are still comparatively unexploited. It can be anticipated that the greatest future development of the Australian fishing industry will take place in the pelagic fisheries. However, no great contribution to the supplies of fresh fish can be expected from this source since most of the pelagic species caught are canned or processed.

The principal fishing areas at present are the coastal lakes, streams, estuaries and beaches which for the most part are associated with coastal streams. The offshore demersal grounds fall into two classes—(a) the reefs extending virtually right around Australia, from which cod, snapper, etc., are taken, and (b) the grounds from which flathead, morwong, etc., are taken. The flathead grounds lie on the continental shelf off south-east Australia, chiefly from Port Macquarie to south of Gabo Island and off the eastern Tasmanian coast. The demersal shark grounds lie principally in Bass Strait and on the continental shelf off eastern South Australia. Other demersal grounds also exist in the Great Australian Bight and off the southern part of Western Australia. In November, 1958, the Commonwealth Government assisted in the establishment of a trawling company to test the commercial possibilities of the Great Australian Bight. The grounds of existing pelagic fisheries include those for tuna which is taken in commercial quantities off the New South Wales and South Australian coasts. Barracouta is taken in Bass Strait and off eastern Tasmania. Spanish mackerel is found off the north-eastern coast from about Coff's Harbour to Cairns.

(ii) *Crustaceans*. Of the crustaceans exploited in Australia, crayfish is the most important and is taken on reefs of the continental shelf in the waters of all States. Considerable development has taken place in the crayfish fisheries, particularly in Western Australian and South Australian waters, owing to the opening up of markets in the United States of America for frozen crayfish tails. Crabs of various species are found in practically all coastal waters, while prawns are taken in the temperate waters of Queensland and New South Wales. Lobsters are caught in the fresh-water streams of New South Wales.

(iii) *Molluscs (Edible)*. In the mollusc group, edible oysters of various species are distributed around the entire Australian coastline. Oysters are taken in all States, with the exception of South Australia, and in the Northern Territory, but their commercial cultivation is restricted mainly to New South Wales. Until 1956, scallops were taken commercially in Tasmanian waters only, but since then they have been taken also in Queensland and Western Australia. Small quantities of other molluscs are also taken in some States.

(iv) *Pearl-shell and Trochus-shell*. Australia is the world's largest producer of pearl-shell, which is fished from Cairns in northern Queensland round the north coast of Australia to Exmouth Gulf in Western Australia. Trochus-shell is obtained from Mackay in Queensland to King Sound in Western Australia.

(v) *Whales*. Baleen whales, particularly the humpback whale, migrating from Antarctic waters to their breeding grounds in the warmer waters of low latitudes, pass up both the western and eastern coasts of Australia, returning to the Antarctic in the spring. Two whaling stations operate in Western Australia, one in New South Wales, and one in Queensland. The company operating in New South Wales also operates a station at Norfolk Island. In addition to baleen whales, one of the two Western Australian stations also processes sperm whales, which are taken off the south-west coast of that State throughout the year.

2. *Persons Engaged*.—In the following table, which shows particulars collected in the Population Censuses of Australia at 30th June, 1947 and 1954, the numbers of persons whose "industry" was stated to be "fishing and whaling" are shown together with the numbers engaged in all primary industries and the total work force.

PERSONS ENGAGED: AUSTRALIA.

Particulars.	At Census of 30th June—	
	1947.	1954.
Persons Engaged in—		
Fishing and Whaling No.	10,656	8,637
All Primary Industries No.	563,607	560,100
Total Work Force No.	3,196,431	3,702,022
Persons Engaged in Fishing and Whaling as a Proportion of—		
All Primary Industries %	1.9	1.5
Total Work Force %	0.3	0.3

Particulars of the number of persons engaged in the fishing industry, as shown in licensing records of the various States, are included in § 7, page 1027.

3. Value of Production.—(i) *General.* Although statistics of the value of production of the fishing industry have been on an established basis for some years, the actual collection of statistics of the quantity of fish taken presents many difficulties, and, consequently, any defects which may occur in the quantities must necessarily be reflected in the value of production. Statistics of both the gross value (at principal market) and local value (at place of production) of the fishing industry are available. Particulars of the value of materials used in the process of production are not available for all States, so that value of production cannot be stated on a net basis as has been done with most other industries.

In 1959–60, the local value of fishing and whaling amounted to £12,325,000. The most important State was Western Australia with £4,276,000, followed by New South Wales with £3,101,000.

(ii) *Gross and Local Values, 1959–60.* Values of fishing and whaling production for each State are shown for 1959–60 in the following table. A more detailed reference to the value of production of fishing and whaling and other industries in Australia, as well as a brief explanation of the terms used, is included in Chapter XXX.—Miscellaneous.

GROSS AND LOCAL VALUE OF PRODUCTION: FISHING AND WHALING, 1959-60.

(£'000.)

State or Territory.	Gross Value (Gross Production Valued at Principal Markets).	Marketing Costs.	Local Value (Gross Production Valued at Place of Production).
New South Wales	3,600	499	3,101
Victoria	2,045	274	1,771
Queensland	1,665	217	1,448
South Australia	1,125	150	975
Western Australia	4,311	35	4,276
Tasmania	806	123	683
Northern Territory	71	(a)	71
Australia	13,623	1,298	12,325

(a) Not available.

(iii) *Local Values, 1955-56 to 1959-60.* In the following table, the local value of fisheries production and the local value per head of population are shown by States for the years 1955-56 to 1959-60. Because the value of materials used in the course of production is not available for all States, it is not possible to show a comparison of net values.

LOCAL VALUE OF FISHING AND WHALING PRODUCTION.

Year.	N.S.W.	Vic.	Q'ld.	S.A.	W.A.	Tas.	Total.(a)

Gross Value ..	£'000.	76	..	2	78

(a) Catch by Victorian fishermen in Tasmanian waters, comprising 1,512,000 lb. estimated live weight of shark valued at £109,000 and 670,000 lb. crayfish valued at £134,000 included in Victoria. (b) Excludes small quantities of pipis in New South Wales, scallops in Western Australia and oysters in Northern Territory, particulars of which are not available for publication. (c) See footnote (b).

(d) Western Australia, season ended December, 1959; Queensland and Northern Territory, season ended January, 1960. (e) Excludes 861,000 lb. pearl-shell taken by Japanese pearlers operating in Australian waters.

In the table below, corresponding particulars are shown for the years 1955-56 to 1959-60.

**FISHERIES PRODUCTION : QUANTITY AND GROSS VALUE OF CATCH,
AUSTRALIA.**

Particulars.	Unit.	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.
Fish—

Weight ..	'000 lb.	2,114	1,911	1,229	916	869
Gross Value ..	£'000.	346	357	184	106	78

(a) Excludes pipis in New South Wales, scallops in Western Australia and oysters in Northern Territory for all years. Excludes oysters in Western Australia for years prior to 1959-60. (b) Excludes pearl-shell taken by Japanese pearlers operating in Australian waters. For quantities excluded see footnote to table on page 1018.

2. **Fish.**—The development of Australian fisheries proper has almost invariably occurred in the same sequence at each centre. The earliest fisheries were on-shore, followed by demersal reef fishing using long lines. Trawling operations then followed line fishing in suitable areas, and more recently the exploitation of pelagic fisheries has commenced.

The first major development of the demersal fishing industry came with the institution of trawling operations off the New South Wales coast in 1918, firstly by the New South Wales Government and later by private enterprise, and the fleet of vessels rapidly expanded. In recent years, the number of Danish seine vessels has continued to increase, particularly after the introduction of an improved multi-purpose type of vessel which can be used for tuna fishing as well as for seine trawling. Although steam trawlers based in Sydney formed an important part of the fleet in earlier years, only one boat of this type is still operating. A large diesel-powered trawler, based on Adelaide, now operates in the Great Australian Bight. Since 1930, fishing for school and gummy shark has rapidly extended its area of operations, particularly off the Victorian and Tasmanian coasts. A great impetus was given to this fishery during the war years by the demand for livers for fish oil production for medicinal purposes. This demand, however, eased with the return of cod-liver oil and availability of synthetic vitamin "A".

As far as pelagic fisheries are concerned, the growth of the Australian tuna fishing industry has been substantial in recent years. After the introduction of the pole fishing method in 1950, the catch of tuna increased considerably and amounted to 7.1 million lb. in 1959-60. Practically all this quantity was canned.

At the same time, the demand to justify an increased production of other pelagic fish, such as pilchards, sprats, jack mackerel and anchovies, has not been similarly encouraging. With pilchards caught in southern waters of Australia and sprats taken in Tasmanian waters there is usually some difficulty in finding a market. Considerable quantities of young jack mackerel, taken off the east coast of Tasmania and off Eden in New South Wales, are used as bait in tuna fishing. Anchovies caught by Victorian fishermen are used for manufacturing fish paste.

In the following table, total Australian recorded production of the main types of fish caught is shown by States in terms of estimated live weight for the year 1959-60.

FISH: PRODUCTION BY TYPE, 1959-60.

Total production of fish by States for the years 1955-56 to 1959-60 is shown in the following table.

FISH: PRODUCTION.

('000 lb. estimated live weight.)

State or Territory.	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.
New South Wales	23,062	28,992	27,925	29,632	29,716
Victoria(a)	10,826	14,136	13,348	11,718	15,438
Queensland	9,668	9,447	9,034	9,930	8,218
South Australia	7,328	9,688	9,591	9,990	11,006
Western Australia	9,768	9,545	9,783	10,114	10,255
Tasmania(a)	2,545	3,416	2,175	2,797	3,173
Northern Territory	101	179	160	235	332
Australia	63,298	75,403	72,016	74,416	78,138

(a) Catch by Victorian fishermen in Tasmanian waters is included in Victoria.

3. Crustaceans.—In terms of gross value of catch, the importance of crustaceans has increased in recent years, and in 1959-60 was nearly equal to that of fish. The crayfish is the most important crustacean, being caught in pots or traps in all States. Crayfish fisheries have been developed greatly since the 1939-45 War in order to take advantage of the market in the United States of America for frozen crayfish tails, the total catch having increased from approximately 3 million lb. in 1945-46 to more than 28 million lb. in 1959-60. Of the total catch in 1959-60, Western Australia produced nearly 70 per cent.

Prawns are taken by otter trawl, mainly in Queensland and New South Wales. In 1959-60, Queensland accounted for 51 per cent. of the total catch and New South Wales for 47 per cent.

Approximately two-thirds of Australia's production of crabs is taken from Queensland waters, and nearly all of the remainder is caught in New South Wales.

Commercial lobster production, apart from the Queensland shovel-nosed lobster which is scientifically classified as a crayfish, is restricted to a single freshwater species, *Euastacus serratus*, from New South Wales streams.

Details of production of crustaceans are shown by States in the table below on a gross weight basis for the year 1959-60.

CRUSTACEANS: PRODUCTION BY TYPE, 1959-60.

('000 lb. gross weight.)

Type.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	Aust.
Crayfish .. (a)	507	(b) 1,500	(c) 40	3,500	19,545	(b) 2,931	28,023
Prawns ..	3,624	7	3,986	..	132	..	7,749
Crabs ..	332	..	637	..	75	..	1,044
Total ..	4,463	(b) 1,507	4,663	3,500	19,752	(b) 2,931	36,816

(a) Includes catch of freshwater lobster (15,000 lb. in 1959-60). (b) Catch of crayfish by Victorian fishermen in Tasmanian waters (670,000 lb. in 1959-60) is included in Victoria. (c) Shovel-nosed lobster (*Thenus orientalis*).

The following table contains details of production of crustaceans in Australia for the years 1955-56 to 1959-60.

CRUSTACEANS: PRODUCTION BY TYPE, AUSTRALIA.

('000 lb. gross weight.)

Type.	1955-56.	1956-57.	1957-58.	1958-59.	1959-60.
Crayfish(a)	18,456	18,905	21,991	26,314	28,023
Prawns	6,148	5,075	4,687	6,751	7,749
Crabs	870	835	826	906	1,044
Total	25,474	24,815	27,504	33,971	36,816

(a) Includes freshwater lobster.

4. Molluscs (edible).—Initially the Australian oyster fisheries depended solely upon the harvesting of naturally grown stock in littoral and submarine areas. However, the stocks soon deteriorated and attention was turned to methods of cultivation. Commercial oyster farming is carried on mainly in New South Wales, where there has been constant improvement in methods and the present technique in certain areas is highly efficient. In 1959-60, New South Wales provided more than 95 per cent. of the Australian production.

Scallops are taken by dredge in Tasmanian waters and by trawl in Queensland waters. Tasmania is the principal producing State and in 1959-60 contributed 74 per cent. of the recorded Australian production.

Of the other molluscs taken, squid is the most important. Smaller quantities of cuttlefish, octopus, abalone and pipi have been taken from time to time.

Details of production of molluscs are shown by States in the table below on a gross (in-shell) weight basis for the year 1959-60.

MOLLUSCS: PRODUCTION BY TYPE, 1959-60.

('000 lb. gross (in-shell) weight.)

(e) Incomplete; see

notes to individual types.

5. Pearl-shell and Trochus-shell.—Pearl-shell and trochus-shell are taken from tropical waters of Australia, mostly during the period from April to January. In Western Australia, annual production is recorded for the year ended December, while in Queensland and Northern Territory the annual production is recorded for the year ended January. Statistics in this chapter are these annual production figures related to the financial year ending 30th June following the close of the season.

Australia's pearling industry, which ceased operations on Japan's entry into the war in December, 1941, was faced at the end of hostilities not only with a shortage of ships and gear but also with the scarcity of expert labour, particularly divers. Before the war, a large proportion of the key men were Japanese; others included Malays, Chinese, Koepangers, Filipinos, Papuans and Torres Strait Islanders. The Commonwealth Government, with the view of overcoming this shortage, permitted in 1953 the employment of 35 Japanese divers, tenders and engineers in Australian luggers. At 31st January, 1960, the number of Japanese, employed mainly in Western Australia and in the Northern Territory, was 125, out of a total number of 1,136 employed in the industry. Queensland, with a more ready source of labour from Torres Strait Islands, was able to expand its fishing more rapidly, and in the 1949 season achieved its highest post-war production of 1,191 tons. At 31st January, 1960, Queensland pearlers employed 619 Torres Strait Islanders in its total personnel of 769. Torres Strait Islanders therefore represented more than half of the total number of 1,136 employed in the Australian pearl-fishing industry at that date.

Australia's pearl fishing takes place offshore to the 25 fathom line. In September, 1953, following the arrival of a Japanese pearl-fishing fleet in Australian waters, the Commonwealth Pearl Fisheries Act 1952-53 was brought into operation. This Act aims at the management of the pearl-shell resources in accord with Australia's proclamation of sovereign rights over the natural resources of the sea bed and subsoil to the 100 fathom line. Japan disputed Australia's right to apply this legislation to foreign ships, and Australia agreed to refer the dispute to the International Court of Justice on condition that meantime Japanese pearling in Australian waters would be conducted in conformity with the Australian Government's policy of regulation and conservation, and that Japan would abide by the Court's decision. On these conditions, a Japanese pearling fleet has operated in prescribed waters since 1954.

In 1959-60, Australian production of pearl-shell and trochus-shell was 2,408,000 lb. and 869,000 lb. respectively. In addition, Japanese pearlers took 763,000 lb. of pearl-shell from Australian waters, but as this was not landed in Australian ports it is not regarded as Australian production. The seasons of highest recorded production of pearl-shell have been—Queensland, 3,200,000 lb. in 1929; Western Australia, 4,480,000 lb. in 1917; and Northern Territory, 1,800,000 lb. in 1937.

In the following table, particulars of the quantity of pearl-shell and trochus-shell produced are shown for the years 1955–56 to 1959–60.

PEARL-SHELL AND TROCHUS-SHELL: PRODUCTION.
(‘000 lb.)

Particulars.	1955–56.	1956–57.	1957–58.	1958–59.	1959–60.
Pearl-shell(a)—					
Queensland(b)	1,142	1,127	1,131	889	1,082
Western Australia(c) ..	1,460	2,012	2,218	1,687	1,138
Northern Territory(b) ..	311	585	753	314	188
Australia	2,913	3,724	4,102	2,890	2,408
Trochus-shell—					
Queensland(b)	2,101	1,900	1,207	887	847
Western Australia(c) ..	13	11	22	29	22
Australia	2,114	1,911	1,229	916	869

(a) Excludes pearl-shell taken by the Japanese pearling fleet which operated in Australian waters:—1955–56, 1,657,000 lb.; 1956–57, 1,458,000 lb.; 1957–58, 1,572,000 lb.; 1958–59, 1,064,000 lb.; 1959–60, 763,000 lb. (b) Season ended January of years shown. Shell taken by Queensland luggers operating in Northern Territory waters is included in Queensland. (c) Season ended December of years shown.

No complete particulars are available of production of natural pearls in Australia.

In 1956, the production of cultured pearls was introduced into Australia, with the establishment of a station at Augustus Island, off the northern coast of Western Australia. This station was later moved to a harbour, Kuri Bay, on Brecknock Island. This station, 130 miles north-east of Derby, produced its first crop of high quality pearls in 1958. Following the success of the operations at Kuri Bay, two pearl culture farms have commenced operations in northern Queensland. Particulars of production of cultured pearls are not available for publication.

Exports of pearls (including cultured pearls) from Australia were valued at £64,000 in 1958–59 and £47,000 in 1959–60.

§ 4. Marketing and Distribution of Fish.

Most of the fish taken in Australian waters is sold in the metropolitan markets, although many of the fisheries are considerably distant from these centres. The arrangements for marketing of fresh fish vary from State to State, and in some cases the State Government exercises a certain amount of control.

In New South Wales, marketing of fish is controlled by the Chief Secretary. The bulk of the State's catch is sold through the Sydney market, owned by municipal authorities but controlled by the Chief Secretary. A small branch market operates in Wollongong, and the eighteen fishermen's co-operatives market fish in their own regions also. By law, all fish for human consumption must be sold through a recognized market (i.e. Sydney, Wollongong or the co-operatives), unless ministerial consent for direct sale to consumers has been obtained.

In Victoria, there are no fish marketing regulations, and most of the catch, as well as considerable quantities of interstate fish, is sold by agents at the main Melbourne market, owned and controlled by the City of Melbourne. In addition, the fishermen's co-operatives engage in the wholesale and retail sale of fish within their own areas.

In Queensland, the Government Fish Board controls all marketing and, in addition to the main Brisbane market, regulates the sale of fish through eighteen coastal markets and eight agencies extending along the coast from Southport to Port Douglas.

In South Australia, the Adelaide city fish market, the only one in the State, is owned and operated by the South Australian Fishermen's Co-operative. Of the total State catch, approximately 80 per cent. is handled by the co-operative, the balance being sold privately either to local or interstate fish agents.

In Western Australia, the Perth market is established as a government instrumentality, but handles only a portion of the fish offered for sale in the main metropolitan area. Besides this, there are two other markets in Fremantle. One is conducted by the local fishermen's co-operative and the other by a private concern. Both are erected on land leased from the Crown. Outside the main metropolitan area, marketing is conducted on a more or less private basis.

In Tasmania, there is no established market, and the sale of fish is conducted on a private basis with fish agents playing a considerable part in the disposal of fish locally and to the mainland.

§ 5. Freezing, Processing and By-products.

1. **Freezing.**—Cold storage facilities, which were rather inadequate in the past, have in most States been improved and increased in recent years. In Queensland and New South Wales particularly, most depots which have been established at fishing ports have now been equipped with cold storage space. In several States, there has been a development of establishments equipped for snap freezing of fish, in particular the freezing of crayfish tails, prawns and scallops for export. In Western Australia, 41 vessels have been equipped with freezing plants to process crayfish at sea.

2. **Processing.**—The attempt to establish the fish preserving industry at the commencement of this century met with little success, although a bounty was paid to encourage production. The industry, however, continued to operate, but there was no marked development until after the 1939–45 War. Production of canned fish in 1959–60 was 8,133,000 lb.

In addition to the fish canned in 1959–60, 296,000 lb. smoked fish, 1,376,000 lb. fish paste, more than 7,500,000 lb. frozen crayfish tails for export, and a considerable quantity of quick-frozen fish for the local market were produced.

In 1939, New South Wales and Tasmania were the only States canning fish, but the industry has since been extended to Victoria, South Australia and Western Australia. Details of production are given in the following table for the years 1955–56 to 1959–60:—

FISH PROCESSING (EXCEPT FREEZING): AUSTRALIA.
(‘000 lb.)

Particulars.	1955–56.	1956–57.	1957–58.	1958–59.	1959–60.
Number of Factories	11	13	14	18	19
Fish Used (a)—					
Whole	3,528	8,072	9,293	10,603	11,739
Headed and/or Gutted ..	7,075	7,339	5,600	4,825	4,464
Estimated Live Weight Equivalent (b)	11,900	16,700	15,900	16,300	17,000
Production—					
Canned Fish (c)—					
Australian Salmon	(d)	(d)	5,198	4,756	4,559
Tuna	(d)	(d)	1,300	1,609	1,986
Total	6,008	8,257	7,856	7,782	8,133
Other	(d)	(d)	1,358	1,417	1,588
Canned Oysters	(e)	(e)	(e)	(e)
Smoked Fish	123	487	439	286	296
Fish Paste	(e)	(e)	1,700	1,314	1,376
Fish Meal	(e)	(e)	(e)	(e)	(e)

(a) Fish used for canning (including fish loaf), smoking and the manufacture of fish paste, but excluding the weight of oysters used for canning. (b) The weight of headed and/or gutted fish is taken as 85 per cent. of live weight. (c) Includes fish loaf, fish cakes, etc. (d) Not available. (e) Not available for publication.

The varieties canned in the several States differ according to the species caught, but complete details for each variety are not available. Tuna is the principal variety canned in New South Wales and South Australia, while barracouta is of major importance in Victoria and Tasmania. The greater proportion of fish canned in Western Australia is Australian salmon.

3. By-products.—Processing of offal for fish-meal, etc., has been established in certain States. The processing of livers for vitamin-rich oils was undertaken in several States but, as mentioned in § 3, para. 2, page 1019, production has fallen to a low level in recent years.

§ 6. Consumption of Fish.

Particulars of the estimated supplies of fish, crustaceans and molluscs available for consumption per head of population, in terms of edible weight, are included in the table below for the years 1955–56 to 1959–60. For the purpose of compiling this table, the non-commercial fish catch has been estimated at ten per cent. of the recorded catch.

Consumption of fisheries' products rose from 9.5 lb. per head in 1958–59 to 11.3 lb. in 1959–60. This increase was caused mainly by a substantial increase in imported fresh and frozen fish, the consumption of which has risen to 3.2 lb. per head, equalling that of fresh and frozen fish of Australian origin.

ESTIMATED SUPPLIES OF FISH, ETC., AVAILABLE FOR CONSUMPTION: AUSTRALIA.

(lb. edible weight per head per annum.)

Particulars.	1955–56.	1956–57.	1957–58.	1958–59.	1959–60.
Fresh or Frozen—					
Fish—					
Australian Origin	3.0	3.3	3.1	3.1	3.2
Imported	1.9	1.8	2.1	2.2	3.2
Crustaceans and Molluscs ..	1.0	0.9	0.8	0.9	1.0
Cured (incl. Smoked and Salted) ..	1.1	0.5	1.3	0.8	1.1
Canned—					
Australian Origin	0.6	0.8	0.7	0.8	0.8
Imported	2.5	1.7	1.8	1.7	2.0
Total	10.1	9.0	9.8	9.5	11.3

§ 7. Boats and Equipment.

The boats used for the inshore and estuary fisheries are mostly small vessels propelled by diesel or petrol engines of low power. The fishing gear used includes mesh nets, beach seines, various types of pots and traps, trolling and hand lines, and small otter type prawn trawls. The offshore vessels range in length from 30 feet to approximately 100 feet, and are almost invariably powered by diesel engines. Many of them have insulated holds to carry fish in ice, while some of the crayfish boats are fitted with wells in which the catch is kept alive. Other vessels have dry or brine refrigeration.

Almost every type of fishing equipment is used. This includes otter trawls for fish and prawns, Danish seines, beach seines for Australian salmon, mullet and other species, beehive type pots for crayfish, traps for crayfish and reef fish, long lines for fish and edible shark, and trolling gear for pelagic fishes including spanish mackerel, barracouta and the tunas. Most of the tuna is now taken by the live bait pole fishing method, the bait fish generally being caught with a lampara net, although several of the larger vessels have recently employed small purse seine or ring nets very successfully for this purpose.

The following two tables show details of the number of boats, value of boats and equipment, and number of persons employed in the taking of fish, crustaceans, molluscs (edible), pearl-shell and trochus-shell, together with some other particulars of oyster fisheries. These details have been compiled from information supplied for licensing purposes.

Because of the variations in definitions and licensing procedures in the several States, the data shown are not comparable between States. In some States, besides professional full-time fishermen, amateur part-time fishermen are licensed, and the figures shown are overstated to this extent. These data should not be used as a guide to the relative effort applied in obtaining the recorded catch. Figures for 1959-60 are not all comparable with those for previous years for the following reasons: in Queensland, numbers of men employed and boats engaged now refer only to those licensed to take fish for sale, whereas previously all licensed men and boats were included; in South Australia, the value of boats and equipment has been adjusted upward compared with previous years.

Figures of the number of persons engaged full-time in fishing and whaling as recorded in recent population censuses are shown in § 2, page 1017.

(a) Excludes edible oyster fisheries, except in Tasmania for years prior to 1959-60, but includes crustacean and other mollusc fisheries. (b) Figures not comparable with those for previous years. See text preceding table on page 1027.

(c) Excludes particulars for Western Australia and Tasmania for years prior to 1959-60 and for Northern Territory for all years shown. (d) Figures for years prior to 1958-59 exclude the value of stakes, timber frames, etc., used on oyster leases in New South Wales.

(e) Excludes Queensland. (f) Excludes Japanese pearling fleet which operated in Australian waters.

(g) Excludes particulars of edible oyster fisheries in Western Australia for years prior to 1959-60 and in Northern Territory for all years shown.

§ 8. Whaling.

The whaling industry was re-established in Australia in 1949, operations being carried out from shore-based stations. In that year, a station began operating at Point Cloates, Western Australia. The Australian Whaling Commission, established in 1949, built a station at Babbage Island near Carnarvon, Western Australia, and began operations towards the end of the 1950 season. In 1956, legislation was passed to dissolve the Commission and its assets were sold to the private company operating at Point Cloates. The operations of this company were transferred to Babbage Island and the Point Cloates station was closed in 1956. Other stations commenced operations in the following years: Cheynes Beach, near Albany (Western Australia), in 1952, Moreton Bay (Queensland) in 1952, Byron Bay (New South Wales) in 1954, and Norfolk Island in 1956.

Each of the stations operating is allowed a quota (in terms of humpback whales) determined by the Minister for Primary Industry, acting on the advice of the Director of Fisheries, who represents Australia on the International Whaling Commission. This catch quota was first introduced in Australia in 1951 and aims at conserving the stock of whales in order that the industry may continue on a stable basis.

Sperm whaling, which commenced in 1955 on an exploratory basis, is still being carried out on the Western Australian coast, but the catch of this species is not subject to the quotas determined.

There is no prescribed season for sperm whaling, but other details shown in the following table relate to seasons extending from 1st May to 31st October of each year.

WHALING STATISTICS: AUSTRALIA AND NORFOLK ISLAND.

(a) In terms of humpback whales. For quota purposes, 2½ humpback whales are taken as equivalent to 1 blue whale, 2 fin whales, 6 sei whales, or 6 bryde whales. Sperm whales are not subject to quota restrictions. (b) Includes 1 humpback whale taken on special permit. (c) Excludes sperm whales, particulars of which are not available for publication. (d) 6 barrels = 1 ton. (e) Estimated.

§ 9. Inquiries and Research.

1. **General.**—Research into the Australian fishing industry has been directed mainly towards seeking an explanation of the very slow rate of development and the conditions prevailing within the industry, as well as the paucity of supplies available to the public. Details of the inquiries undertaken and the recommendations arising from them are given in Official Year Book No. 38, page 1082, and subsequent developments are outlined below.

2. **Commonwealth Scientific and Industrial Research Organization, Division of Fisheries and Oceanography.**—Details of the establishment, organization and functions of the Division of Fisheries of the Commonwealth Scientific and Industrial Research Organization are given in Official Year Book No. 38, page 1083. The scientific basis on which the work of the Division is carried out has now been widened, and the name of the Division has been amended to "Division of Fisheries and Oceanography".

Research carried out by the Division has assisted greatly in the development and conservation of Australian fisheries. Details are given in Official Year Book No. 41, page 848, and in previous issues.

3. **Fisheries Division, Department of Primary Industry.**—The creation of the Fisheries Division of the Department of Primary Industry arose out of a Tariff Board recommendation in 1941. Details of the establishment, organization and functions of the division, which was formerly known as the Commonwealth Fisheries Office, are given in Official Year Book No. 38, page 1084.

In accordance with the Tariff Board report, scientific research, as distinct from developmental and administrative functions, was left to the Commonwealth Scientific and Industrial Research Organization, which had established a Division of Fisheries for this purpose in 1937.

The Fisheries Division of the Department of Primary Industry is responsible for all forms of fishing in extra-territorial waters, commercial development of fisheries, management of marine resources (fishing, pearling and whaling), co-ordination of conservation measures imposed by the States and the Commonwealth, economic research statistics, and negotiations with foreign nations on fisheries matters, information and extensions.

4. Fisheries Development Trust Account.—In early 1956, the assets of the Australian Whaling Commission, an authority set up by the Commonwealth Government in 1949, were disposed of to private interests. The finance derived from the sale, authorized by the Fishing Industry Act 1956, was paid into a fund, known as the Fisheries Development Trust Account. Provision was made in the Act for the moneys to be used for the purposes of developing the fishing industry through research, direct financial assistance, the development of particular fisheries, training schemes, and the dissemination of information and advice through various publications and the press.

An Advisory Committee on fisheries development was formed to advise the Minister on specific projects for fisheries development.

Projects which have so far been approved include:—the purchase of a modern diesel trawler to investigate the commercial potentialities of trawling in the Great Australian Bight; a survey of the prawn resources off the east coast of Australia; a survey of the pilchard resources off the New South Wales coast; barracouta survey in Bass Strait; crayfish survey off the south coast of Western Australia.

5. North Australia Development Committee.—In 1946, the North Australia Development Committee recommended that a hydrological and oceanographical survey should be made of North Australian waters. It also suggested that a biological survey should be made of the pearl oyster with particular reference to the possibility of instituting pearl culture.

Further reference to these and other recommendations is given in Official Year Book No. 41, page 848.

The C.S.I.R.O. Division of Fisheries and Oceanography subsequently set up a biological research station on Thursday Island, mainly for the pearl and pearl-shell investigations. Since 1951, a research vessel has been based on Thursday Island and is used for diving, biological and hydrological work.

§ 10. Oversea Trade in Products of Fishing and Whaling.

1. Imports of Fish.—The value of edible fish and fish products imported in 1959–60 amounted to £8,047,000 compared with £6,140,000 in 1958–59.

In 1959–60, the live weight equivalent of fresh and processed fish imported was estimated to be in the ratio of approximately 70 per cent. to the total Australian catch of fish, crustaceans and molluscs, the imports of canned fish being more than double the output of local factories. Of the total quantity of 35.5 million lb. of fresh and frozen fish imported in 1959–60, South Africa contributed 12.1 million lb., United Kingdom 8.1 million lb., New Zealand 7.2 million lb., and Denmark 3.4 million lb. A quantity of 20.4 million lb. of canned fish and fish products was imported in 1959–60, and of this 7.5 million lb. originated in Japan, 4.9 million lb. in the United Kingdom and 3.4 million lb. in Norway. Particulars of the imports of fish and edible fisheries products are shown below for the years 1957–58 to 1959–60.

IMPORTS OF FISH, CRUSTACEANS AND MOLLUSCS: AUSTRALIA.

Classification.	Quantity ('000 lb.).			Value (£A.'000 f.o.b. Port of Shipment).		
	1957-58.	1958-59.	1959-60.	1957-58.	1958-59.	1959-60.
Fresh or Frozen(a)	23,163	24,618	35,461	2,163	2,405	3,335
Smoked or Dried	9,698	6,284	9,206	648	491	704
Potted or Concentrated(b) ..	148	117	175	42	34	54
Canned—						
Herrings	4,581	4,008	5,237	480	443	586
Salmon	6,761	7,407	8,129	1,460	1,518	1,903
Sardines and Pilchards ..	4,381	4,456	6,148	826	829	1,058

Other Fish	727	269	310	100	66	71
Crustaceans	496	449	354	191	171	130
Molluscs	110	145	179	27	23	40
<i>Total Canned</i>	<i>17,117</i>	<i>16,796</i>	<i>20,413</i>	<i>3,094</i>	<i>3,062</i>	<i>3,797</i>
Fisheries Products, not elsewhere included	198	148	157
Total Fisheries Products	6,145	6,140	8,047

(a) Excludes frozen smoked which is included with "Smoked or Dried".

(b) Includes extracts and caviare.

2. Exports of Fish.—In 1959-60, exports of items other than crayfish tails remained at the low levels of earlier years, but crayfish tails increased in importance, their value representing nearly 91 per cent. of the total value of fish, etc., exports. Nearly all of this was exported to the United States of America.

The following table shows details of the total exports of edible fisheries products (including those produced in other countries) from Australia for the years 1957-58 to 1959-60:—

EXPORTS OF FISH, CRUSTACEANS AND MOLLUSCS: AUSTRALIA.

Particulars.	Quantity ('000 lb.).			Value (£A.'000 f.o.b. Port of Shipment).		
	1957-58.	1958-59.	1959-60.	1957-58.	1958-59.	1959-60.
Fresh or Frozen(a)—						
Crayfish tails	5,802	7,281	7,777	2,489	3,202	3,810
Oysters-in-shell	13	8	5	1	1	1
Other	802	1,423	801	207	366	295
Canned—						
Salmon	56	57	39	12	8	10
Other Fish	385	417	111	74	78	17
Crustaceans	60	58	73	19	15	23
Molluscs	21	14	33	6	3	15
<i>Total Canned</i>	<i>522</i>	<i>546</i>	<i>256</i>	<i>111</i>	<i>104</i>	<i>65</i>
Fisheries Products, not elsewhere included	1	2	25
Total Fisheries Products	2,809	3,675	4,196

(a) Excludes frozen smoked, which is included with "Fisheries Products, not elsewhere included".

3. **Imports and Exports of Unmanufactured Shell.**—Imports of unmanufactured shell include quantities of pearl, trochus and green snail shell from New Guinea, Papua and the Pacific Islands which are subsequently re-exported from Australia.

Imports of unmanufactured shell for the three years 1957–58 to 1959–60 were, respectively, 299,000 lb. (£46,000); 227,000 lb. (£44,000); and 156,000 lb. (£18,000). Exports during the same years were:—5,627,000 lb. (£1,300,000); 4,312,000 lb. (£832,000); and 3,572,000 lb. (£752,000). Pearl and trochus shell accounted for most of this, the quantity and value exported in 1959–60 being:—pearl shell, 2,593,000 lb. (£628,000); trochus shell, 934,000 lb. (£114,000).

4. **Imports and Exports of Marine Animal Oils.**—Imports of marine animal oils during the three years 1957–58 to 1959–60 were, respectively:—487,000 gals. (£261,000); 494,000 gals. (£232,000); 588,000 gals. (£266,000). Whale oil constituted the major part of these imports.

Of the total quantity of 354,000 gals. of whale oil imported in 1959–60, 272,000 gals. originated from Norfolk Island. Imports of other marine animal oils consisted of 64,000 gals. of cod liver oil, 123,000 gals. of unrefined fish oils and 47,000 gals. of other marine animal oils.

Exports of marine animal oils during the three years 1957–58 to 1959–60, consisting almost entirely of whale oil, amounted to:—4,025,000 gals. (£1,695,000); 5,403,000 gals. (£1,156,000); 3,062,000 gals. (£900,000). Of the total exports of whale oil of 3,056,000 gals. in 1959–60 1,986,000 gals. were shipped to the Federal Republic of Germany.

CHAPTER XXVII.

MINERAL INDUSTRY.

NOTE.—Further detailed information on the subjects dealt with in this chapter is contained in the annual printed Bulletin *Primary Industries, Part II.—Non-Rural Industries and Value of Production* issued by this Bureau, and in *The Australian Mineral Industry—Annual Review* and other publications issued by the Bureau of Mineral Resources, Geology and Geophysics, which also issues, in co-operation with this Bureau, a quarterly publication *The Australian Mineral Industry*, comprising two parts—Part I.—Quarterly Review, and Part II.—Quarterly Statistics. The mimeograph statistical bulletin *Mining and Quarrying* of this Bureau contains annual statistics of the industry prepared and published as soon as possible after the data have been compiled. A monthly statistical bulletin *The Gold Mining Industry, Australia* is issued also, and other current information on mining or mine products is contained in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, and the *Monthly Bulletin of Production Statistics*.

§ 1. Introduction.

1. **Sources of Statistics.**—In the main, the data contained in this chapter consist of official statistics of the Mines Departments of the several States and of the Northern Territory Mines Branch. The particulars shown have been compiled as far as practicable on the standardized basis which has been used in Australia since 1950, and this presentation has involved some rearrangement of official statistics published by the Mines Departments in some States. These statistics have been supplemented, as necessary, by data obtained from the Statisticians of the several States, the Commonwealth Bureau of Mineral Resources, the Joint Coal Board, the Australian Mines and Metals Association (Inc.), the Mineral Resources Division of the United Kingdom Overseas Geological Surveys and from several other sources.

2. **Presentation of Mineral Statistics.**—(i) *Mineral Industry Data.* The mineral industry includes all mining and quarrying and the recovery of minerals from ore dumps, tailings, etc. Ore-dressing and elementary smelting of metallic minerals (e.g., in the case of gold) and miscellaneous treatment of non-metallic minerals, where these are carried out in an associated plant at or near the mine, are included in the mineral industry. However, establishments primarily engaged in smelting and/or refining (including the smelting and refining sections of the large plants operated at Mt. Morgan and Mt. Isa in Queensland and at Mt. Lyell in Tasmania) are omitted and classified to the manufacturing industry.

For mines and quarries which produce more than one product, it is not possible to apportion some particulars relating to the operations of the mine (employment, salaries and wages paid, and costs incurred in production) to the minerals produced. It is, therefore, the practice to record these data only as a total for each mine and then to classify each mine to the industry of the most important mineral produced. Thus a mine producing, say, both tin and tungsten minerals, would be classified as a tin mine if tin were the more important product by value, or vice versa if tungsten were the dominant product.

The mineral industries are classified into four major groups, namely, Metal Mining, Fuel Mining, Non-metal (excluding Fuel) Mining, and Construction Material Quarrying.

Mineral industry data have been obtained annually, since 1952, from the Mining and Quarrying Census. This census is carried out in collaboration with the several Mines Departments and involves the uniform collection of particulars from all establishments employing on the average four or more persons during the period worked by the mine. A representative specimen collection form is included in the Bulletin *Primary Industries, Part II.*, No. 53, 1958–59, pages 47 and 48. For smaller mines, either simplified Census returns covering number of persons employed and value of output are collected or these particulars are compiled from data made available by the Mines Departments.

Particulars of the uranium-mining industry are excluded, as are operations associated with the exploration for minerals, e.g. oil-search.

(ii) *Mineral Product Data.* In the preparation of Australian mineral production statistics, the quantities and values of individual minerals produced are reported in terms of the products in the form in which they are dispatched from the locality of each mine. For example, in the case of a metal mine, the output is recorded as ore when no treatment is undertaken at the mine, or as a concentrate where ore-dressing operations are carried out in associated works in the locality of the mine. In addition to the basic quantity data, the contents of metallic minerals and contents or average grade of selected non-metallic minerals

are reported. Whenever practicable, contents (based on assay) of metallic minerals are shown for each metal which is a "pay metal" or a "refiners' prize" when present in the particular mineral. Other metallic contents which are not recovered are excluded.

Minerals are divided into four major groups, namely, Metals, Fuels, Non-metals (excluding Fuels) and Construction Materials. In this chapter, individual mineral products are arranged in these four groups.

Particulars relating to uranium-bearing minerals are excluded.

3. Occurrences of Minerals.—The greatest part of the area of outcropping rock on the Australian continent is Precambrian in age. These basement rocks form the western and central core of the continent and are flanked by younger Palaeozoic rocks which, along the eastern edge of the continent, form a belt several hundred miles wide extending from north Queensland to Tasmania. Smaller areas of Palaeozoic rocks occur in other States. Mesozoic sediments overlies large areas of the continent and reach their greatest development in central Queensland. Cainozoic rocks occur mainly in the southern parts of Victoria and South Australia and as residual basalt cappings over an extensive area of the Palaeozoic rocks of eastern Australia.

Minerals occur widely throughout the Precambrian and Palaeozoic rocks of the continent. Palaeozoic mineralization is perhaps more varied, but the deposits now being worked are in general smaller than those found in Precambrian rocks. Most of the larger deposits of minerals now being mined in Australia are shown in the following table according to the geological era in which they were formed.

PRINCIPAL AUSTRALIAN MINERAL DEPOSITS.

Age of Geological Formation in which Located.	Metal or Mineral.	State or Territory.	Locality.
Precambrian (more than 520 million years old)	Copper ..	Queensland ..	Mt. Isa
	Gold ..	Northern Territory ..	Tennant Creek
		Western Australia ..	Kalgoorlie and other localities
	Iron ..	South Australia ..	Middleback Ranges
		Western Australia ..	Yampi Sound
	Lead-Silver-Zinc	New South Wales ..	Broken Hill
Palaeozoic (between 200 and 520 million years old)		Queensland ..	Mt. Isa
	Uranium ..	Queensland ..	Mary Kathleen
		South Australia ..	Radium Hill
		Northern Territory ..	Rum Jungle and South Alligator River Area
	Black Coal ..	New South Wales ..	Hunter Valley, Lithgow, South Coast
		Queensland ..	Baralaba, Blair Athol, etc.
		Western Australia ..	Collie
	Copper-Gold ..	Queensland ..	Mt. Morgan
		Tasmania ..	Mt. Lyell
	Lead-Silver-Zinc	New South Wales ..	Captain's Flat
		Tasmania ..	Mt. Read and Rosebery
	Tin (lode) ..	Queensland ..	Herberton
Mesozoic (between 75 and 200 million years old)		Tasmania ..	North-east of State
	Tungsten ..	Tasmania ..	King Island and North-east of State
	Black Coal ..	Queensland ..	Ipswich
		South Australia ..	Leigh Creek
		Tasmania ..	St. Marys
Cainozoic (less than 75 million years old)	Mineral Sands(a)	New South Wales ..	North Coast
		Queensland ..	South Coast
	Brown Coal ..	Victoria ..	Gippsland
	Tin (alluvial) ..	New South Wales ..	Tingha
		Queensland ..	Herberton
		Tasmania ..	North-east of State

(a) The deposition of mineral sands, derived from Palaeozoic granites, continued throughout the Cainozoic Era.

The large bauxite (aluminium) deposits of Cape York Peninsula in Queensland, for which an extensive mining programme is planned, were formed during the early part of the Cainozoic Era as a result of climatic conditions then prevailing.

Of the non-metallic minerals, many, such as clay, sand and silica, etc., are not restricted to the rocks of any particular era. However, Precambrian rocks do contain important deposits of asbestos in Western Australia, limestone and dolomite in South Australia, and mica in the Northern Territory. All crude salt is produced by the evaporation of water from pans constructed along the sea coast or from inland lakes.

4. Mineral Concentrates.—Concentration is a physical process involving the removal of mineral impurity from the ore. Most mines now dispatch ore in concentrate form as this considerably reduces the transport costs and produces a saleable product in the form required by smelters. Most concentrates are nearly pure mineral and the ore-dressing processes (with the exception of that for uranium) involve no chemical change to the mineral being won. Various methods are used in concentration. Sulphide ores which now comprise the greatest tonnages treated are, in most instances, separated from the gangue by flotation. In this method of concentration, the ore is ground finely enough to liberate the individual mineral particles, aerated, and agitated in tanks of water to which chemicals have been added. Under certain conditions, particles of one sulphide mineral adhere to the froth bubbles and are collected in the froth overflow, while gangue and even other sulphides are depressed. By treating the tailings of one flotation process with different chemicals and conditions, it is often possible to separate a further concentrate, as is done at Broken Hill where the zinc sulphide is recovered from the tailings of the lead sulphide concentration process. Differential flotation is most extensively developed at Captain's Flat, in New South Wales, where successive concentrates of copper, lead, zinc and pyrite are obtained from a lead-silver-zinc-copper ore.

Other methods of concentration used are gravity (alluvial tin, mineral sands, some lead-zinc ores), electromagnetic (wolfram, scheelite, glauconite and mineral sands) and electrostatic (mineral sands).

Particulars of an average Broken Hill ore mined during 1959, showing metal contents before and after differential flotation, are shown in the following table. It should be noted that in both the ore and the concentrate, lead and zinc are contained as the minerals lead sulphide and zinc sulphide respectively. Most of the silver is contained in minerals which are collected with the lead sulphide.

ORE TREATED AND CONCENTRATES PRODUCED BY DIFFERENTIAL FLOTATION AT BROKEN HILL (a), 1959.

Particulars.	Quantity.	Proportion of weight of ore mined.	Average Assays.			Proportion of Metal Distribution.		
			Lead.	Silver.	Zinc.	Lead.	Silver.	Zinc.
	tons.	%	%	f. oz.	%	%	%	%
Ore treated ..	1,869,528	100.0	13.0	4.5	11.2	100.0	100.0	100.0
Lead Concentrate	308,519	16.5	75.5	25.3	4.1	95.9	92.8	6.1
Zinc Concentrate	358,036	19.2	0.9	0.8	52.0	1.3	3.5	88.8
Residues(b) ..	1,202,973	64.3	0.6	0.3	0.9	2.8	3.7	5.1

(a) Average particulars for the five operating companies. (b) These are of no economic use at present and are either pumped as filling for underground workings or otherwise discarded.

§ 2. The Mineral Industry.

1. Persons Engaged.—In the following table, which shows particulars collected in the Population Censuses of Australia at 30th June, 1947 and 1954, the numbers of persons whose "industry" was stated to be "mining and quarrying" are shown together with the numbers engaged in all primary industries and the total work force.

PERSONS ENGAGED, AUSTRALIA.

Particulars.	At 30th June—	
	1947.	1954.
Persons Engaged in—		
Mining and Quarrying No.	57,574	62,107
All Primary Industries No.	563,697	560,100
Total Work Force No.	3,196,431	3,702,022
Persons Engaged in Mining and Quarrying as a proportion of—		
All Primary Industries %	10.2	11.1
Total Work Force %	1.8	1.7

Corresponding details from the 1961 Population Census are not yet available.

Particulars of the numbers of persons engaged in the various mining and quarrying industries, as collected in the Annual Mining and Quarrying Census, are included in paras. 4 (ii) and (iii), pages 1039–40.

2. **Size Classification of Mines and Quarries.**—Most of the mines and quarries worked during 1959 employed less than four persons, including working proprietors. However, more than half of the persons engaged in mining and quarrying were in the 55 mines each employing 200 persons or more. The following table shows the total number of mines grouped according to sizes in accordance with the average number of persons employed during the period worked by each mine in 1959. The details of persons employed are not directly comparable with the Population Census figures shown in the preceding table. For particulars of the method of compiling these industry statistics, *see* para. 2 (i), page 1033.

MINING AND QUARRYING: SIZE CLASSIFICATION OF ESTABLISHMENTS, 1959.

Mines and Quarries employing on the average(a)—	N.S.W.	Vic. (b)	Q'land.	S.A.	W.A.	Tas.	N.T.	Aust. (b) (c)
Less than 4 persons—								
Establishments ..	570	65	285	330	261	75	37	1,628
Persons ..	1,015	129	447	537	748	139	75	3,095
From 4 to 20 persons—								
Establishments ..	163	105	90	93	80	38	12	582
Persons ..	1,314	949	882	773	652	285	114	4,975
From 21 to 200 persons—								
Establishments ..	91	33	71	12	29	15	1	253

(a) Average during period worked. Includes working proprietors. producers in Victoria for which employment figures are not available.

(b) Excludes 13 salt
(c) Includes Australian

(d) Not available for publication; included in totals.

3. **Value of Production.**—(i) *General.* In 1959, the local value of mining and quarrying in Australia (the value of output, or the selling value of mine and quarry products at the mine or quarry) was £164,985,000, or 11.6 per cent. of the production of all primary industries. The most important State was New South Wales with £71,090,000, followed by Queensland with £33,329,000 and Western Australia with £21,787,000.

(ii) *Local and Net Values of Production, 1959.* Local and net values of mining and quarrying production for each State are shown for 1959 in the following table. A more detailed reference to the value of production of mining and quarrying and other industries in Australia as well as a brief explanation of the terms used will be found in Chapter XXX.—Miscellaneous.

MINING AND QUARRYING: LOCAL AND NET VALUES OF PRODUCTION, 1959.
(£'000.)

State or Territory.	Local Value (Value of Output at Mine or Quarry).	Cost of Power, Fuel, Light and Other Materials and Stores Used.	Net Value. (a)
New South Wales	71,090	14,759	56,331
Victoria	14,935	2,834	12,101
Queensland	33,329	8,848	24,481
South Australia	13,209	2,511	10,698
Western Australia	21,787	7,022	14,765
Tasmania	7,639	2,241	5,398
Northern Territory	2,727	525	2,202
Australian Capital Territory	269	90	179
Australia	164,985	38,830	126,155

(a) Local value less cost of power, fuel, light and other materials and stores used; depreciation and maintenance costs have not been deducted.

(iii) *Local Values, 1955 to 1959.* In the following table, the local values of mining and quarrying production are shown by States and Territories for the years 1955 to 1959:—

MINING AND QUARRYING: LOCAL VALUE OF PRODUCTION.(a)
(£'000.)

Year.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
1955 ..	84,244	10,917	26,892	10,512	19,746	10,744	1,691	125	164,871

(a) Value of output or selling value of products at the mine or quarry.

(iv) *Net Values of Production, 1955 to 1959.* In the following table, the net value of production of mining and quarrying products and the value per head of population are shown by States and Territories for the years 1955 to 1959.

MINING AND QUARRYING: NET VALUE OF PRODUCTION.(a)

Year.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
NET VALUE OF PRODUCTION.(a) (£'000.)									
1955	69,262	8,869	21,732	8,452	14,143	8,612	1,377	63	132,510
1956	72,053	9,457	24,148	9,487	14,350	8,298	2,084	105	139,982
1957	66,091	9,944	18,810	9,320	14,889	5,897	1,741	110	126,802
1958	55,801	10,987	19,796	9,999	14,454	5,168	1,997	134	118,336
1959	56,331	12,101	24,481	10,698	14,765	5,398	2,202	179	126,155
NET VALUE OF PRODUCTION(a) PER HEAD OF POPULATION. (£.)									
1955	19.8	3.5	16.2	10.3	21.4	27.2	80.8	1.9	14.4
1956	20.3	3.6	17.7	11.2	21.2	25.8	116.4	3.0	14.8
1957	18.2	3.6	13.5	10.7	21.5	17.9	93.0	2.9	13.2
1958	15.1	4.0	14.0	11.1	20.5	15.3	103.9	3.3	12.0
1959	15.0	4.3	17.0	11.6	20.5	15.7	107.5	3.8	12.5

(a) Local value, or value of output, less cost of power, fuel, light and other materials and stores used; depreciation and maintenance costs have not been deducted.

4. Statistics of the Principal Mining and Quarrying Industries.—(i) *Summary, 1959.* In the next table, statistics of numbers of mines and quarries, persons employed, local and net value of production and other particulars are shown for the major industry groups for the year 1959. For particulars of the method of compiling these industry statistics, see para. 2 (i), page 1033.

MINING AND QUARRYING: SUMMARY OF OPERATIONS, INDUSTRY GROUPS, AUSTRALIA, 1959.

Industry Group.	Mines and Quarries.	Persons Employed. (a)	Salaries and Wages Paid. (b)(c)	Local Value of Production. (d)	Total Fuel, Materials, etc., Used.	Net Value of Production. (e)	Value of Additions and Replacements to Fixed Assets.(b)
	No.	No.	£'000.	£'000.	£'000.	£'000.	£'000.
Metal Mining ..	756	20,256	26,218	77,522	21,545	55,977	10,229
Fuel Mining ..	226	20,197	25,147	55,334	10,759	44,575	11,361
Non-metal (excluding Fuel) Mining(f) ..	687	2,975	2,631	10,555	2,359	8,196	1,454
<i>Total, All Mining ..</i>	<i>1,669</i>	<i>43,428</i>	<i>53,996</i>	<i>143,411</i>	<i>34,663</i>	<i>108,748</i>	<i>23,044</i>
Construction Material Quarrying(g) ..	862	4,116	3,490	21,574	4,167	17,407	1,408
Total All Mining and Quarrying	2,531	47,544	57,486	164,985	38,830	126,155	24,452

(a) Average number employed (including working proprietors) during whole year. (b) Excludes mines and quarries employing less than four persons. (c) Excludes drawings by working proprietors; he amounts are net after deducting value of explosives sold to employees. (d) Value of output or selling value of products at mine or quarry. (e) Local value less cost of power, fuel, light and other materials and stores used; depreciation and maintenance costs have not been deducted. (f) Incomplete for some industries outside the normal administrative control of State Mines Departments (e.g., clays and salt). (g) Incomplete owing to difficulties of coverage.

In the next table, statistics of numbers of mines and quarries, persons employed, local and net value of production are shown for each State, the Northern Territory, and the Australian Capital Territory for the year 1959:—

MINING AND QUARRYING: SUMMARY OF OPERATIONS, 1959.

State or Territory.	Mines and Quarries.	Persons Employed. (a)	Salaries and Wages Paid. (b)(c)	Local Value of Production. (d)	Total Fuel, Materials, etc., Used.	Net Value of Production. (e)	Value of Additions and Replacements to Fixed Assets. (b)
	No.	No.	£'000.	£'000.	£'000.	£'000.	£'000.

Construction Material Quarrying(f) ..	1,072	1,046	542	912	288	176	39	41	4,116
Total, All Mining and Quarrying ..	21,998	3,507	8,434	2,243	8,105	2,724	492	41	47,544

(a) Average employment during whole year, including working proprietors. (b) Not available for publication. (c) Includes persons engaged by one mine which has both underground and opencut workings. (d) Incomplete for some industries outside the normal administrative control of State Mines Departments (e.g. clays and salt). (e) Not available for publication; included with "Construction Material Quarrying". (f) Incomplete owing to difficulties of coverage.

(iii) *Employment in Mining and Quarrying, 1955 to 1959.* The following table shows particulars of mining employment in Australia for the years 1955 to 1959. The figures show the average number of persons employed during the whole year.

MINING AND QUARRYING: EMPLOYMENT(a), AUSTRALIA.

Industry.	1955.	1956.	1957.	1958.	1959.
<i>Metal Mining—</i>					
Gold Mining	6,753	6,488	6,205	5,901	5,948
Lead-Silver-Zinc Mining	10,076	10,627	10,354	9,461	9,031
Copper-Gold Mining	2,127	2,301	2,151	2,057	2,301
Tin Mining	937	938	856	944	926
Mineral Sands Mining	891	1,592	2,062	1,102	1,019
Other Metal Mining	1,273	1,407	1,300	1,030	1,031
<i>Total, Metal Mining</i>	<i>22,057</i>	<i>23,353</i>	<i>22,928</i>	<i>20,495</i>	<i>20,256</i>
<i>Fuel Mining—</i>					
Black Coal Mining	25,660	23,895	22,345	20,795	18,678
Brown Coal Mining	1,502	1,566	1,579	1,540	1,519
<i>Total, Fuel Mining</i>	<i>27,162</i>	<i>25,461</i>	<i>23,924</i>	<i>22,335</i>	<i>20,197</i>
<i>Non-metal (excluding Fuel) Mining(b)</i>	<i>2,678</i>	<i>2,708</i>	<i>2,749</i>	<i>2,728</i>	<i>2,975</i>
<i>Total, All Mining</i>	<i>51,897</i>	<i>51,522</i>	<i>49,601</i>	<i>45,558</i>	<i>43,428</i>
<i>Construction Material Quarrying(b)</i>	<i>4,197</i>	<i>4,329</i>	<i>4,640</i>	<i>4,581</i>	<i>4,116</i>
Total, All Mining and Quarrying ..	56,094	55,851	54,241	50,139	47,544

(a) Average employment during whole year, including working proprietors.

(b) Incomplete.

(iv) *Salaries and Wages Paid in Mining, 1955 to 1959.* Salaries and wages paid in the mining and quarrying industries in Australia during each year 1955 to 1959 are shown in the following table. Information regarding rates of wages paid in the mining industry is shown in Chapter XII.—Labour, Wages and Prices (p. 426) and also in the *Labour Report*.

MINING AND QUARRYING: SALARIES AND WAGES PAID(a), AUSTRALIA.

(£'000.)

Industry.	1955.	1956.	1957.	1958.	1959.
<i>Metal Mining—</i>					
Gold Mining	6,344	6,551	6,422	6,492	6,504
Lead-Silver-Zinc Mining	15,154	17,299	16,241	13,462	13,944
Copper-Gold Mining	1,867	2,114	2,289	2,362	2,710
Tin Mining	734	733	753	737	814
Mineral Sands Mining	819	1,644	2,177	1,327	1,188
Other Metal Mining	1,328	1,504	1,402	1,108	1,058
<i>Total, Metal Mining</i>	<i>26,246</i>	<i>29,845</i>	<i>29,284</i>	<i>25,488</i>	<i>26,218</i>
<i>Fuel Mining—</i>					
Black Coal Mining	26,065	25,862	25,105	24,501	23,437
Brown Coal Mining	1,761	1,649	1,640	1,694	1,710
<i>Total, Fuel Mining</i>	<i>27,826</i>	<i>27,511</i>	<i>26,745</i>	<i>26,195</i>	<i>25,147</i>
<i>Non-metal (excluding Fuel) Mining(b)</i>	<i>2,105</i>	<i>2,300</i>	<i>2,400</i>	<i>2,384</i>	<i>2,631</i>
<i>Total, All Mining</i>	<i>56,177</i>	<i>59,656</i>	<i>58,429</i>	<i>54,067</i>	<i>53,996</i>
<i>Construction Material Quarrying(b)</i>	<i>2,439</i>	<i>2,738</i>	<i>3,219</i>	<i>3,241</i>	<i>3,490</i>
Total, All Mining and Quarrying ..	58,616	62,394	61,648	57,308	57,486

(a) Excludes mines and quarries employing less than four persons, and drawings by working proprietors; the amounts are net after deducting value of explosives sold to employees. (b) Incomplete.

(v) *Accidents in Mining.* Particulars of numbers of persons killed and injured in accidents in mines and associated treatment plants are recorded by State Mines Departments. Numbers injured are not reported on a uniform basis in all States, as varying criteria are used in determining what constitutes injury for the purpose of these records. In 1959, 29 persons were recorded as having been killed and 1,565 as having been injured in mining (excluding quarrying) accidents. Recorded deaths and injuries in that year were highest in black coal mines (13 and 444, respectively), lead-silver-zinc mines (8 and 434) and gold mines (3 and 406).

(vi) *Local and Net Values of Mining and Quarrying Production, 1959.* The following two tables show particulars of the local and net value of production for individual mining and quarrying industries and for all mining and quarrying for the year 1959. It should be noted that these statistics are on an industry basis and not by product. For particulars of the method of compiling these industry statistics see para. 2 (i), page 1033.

(a) Excludes Australian Capital Territory where production is confined to brick clay mining and construction material quarrying. (b) Includes cupreous ore for fertilizer. (c) Estimated.
 (d) Bullion, alluvial, retorted gold, etc. (e) Gross weight not available. (f) Iron oxide for metal extraction. (g) Includes lead-silver ore. (h) Incomplete; figures relate only to production reported by Mines Departments. (i) Excludes quantities used directly as a building or road material. (j) Not available for publication. (k) Incomplete owing to difficulties of coverage. (l) Not available.
 (m) Less than 500 tons.

NOTE.—Particulars of uranium concentrate produced are not available for publication and have been excluded from the table above.

2. Quantities of Principal Minerals Produced, Australia.—The following table shows the quantities of the principal minerals produced in Australia during the years 1955 to 1959.

QUANTITIES OF PRINCIPAL MINERALS PRODUCED: AUSTRALIA.(a)

Mineral.	Unit.	1955.	1956.	1957.	1958.	1959.

(a) Excludes Australian Capital Territory where production is confined to brick clay mining and construction material quarrying. (b) Includes cupreous ore for fertilizer. (c) Includes a small quantity of gold ore. (d) Bullion, alluvial, retorted gold, etc. (e) Gross weight not available. (f) Iron oxide for metal extraction. (g) Includes lead-silver ore. (h) Includes a small quantity of lead-zinc ore. (i) Incomplete; figures relate only to production reported by Mines Departments. (j) Excludes quantities used directly as a building or road material. (k) Incomplete owing to difficulties of coverage.

NOTE.—Particulars of uranium concentrate produced are not available for publication and have been excluded from the table above.

3. Contents of Metallic Minerals Produced in 1959.—The following table shows the contents of metallic minerals produced in 1959 which were "pay metals" or which were recovered as "refiners' prizes". Further particulars for earlier years are shown in the following paragraph and in the sections later in this chapter covering principal contents.

CONTENTS OF METALLIC MINERALS PRODUCED, 1959.

Content of Metallic Minerals Produced.	Unit.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	Aust.
Alumina (Al ₂ O ₃)	ton	1,648	1,991	(a) 3,275	6,914

Zircon ..	"	48,210	71,769	87,703	58,745	112,352

(a) 1 unit = 22.4 lb. (b) Partly estimated. (c) Estimated. (d) Excludes iron content of iron oxide not intended for metal extraction. Partly estimated. (e) Content of metallurgical grade manganese ore. (f) Content of manganese ore of other than metallurgical grade. (g) Sulphur content of pyrite and other minerals from which sulphur is extracted.

NOTE.—Particulars of production of uranium oxide (U_3O_8) are not available for publication and have been excluded from the table above.

5. **Local Value of Minerals Produced, 1955 to 1959.**—Particulars of the estimated values of minerals (mine and quarry products) produced during the years 1955 to 1959 are shown in the following table. The values represent the estimated selling value at the mine or quarry of minerals produced during the years concerned.

LOCAL VALUE OF MINERALS PRODUCED: AUSTRALIA.
(£'000.)

Mineral.	1955.	1956.	1957.	1958.	1959.
METALLIC MINERALS.					
Copper Ore, Concentrate, etc.(a) ..	15,120	18,287	12,345	14,770	21,165

NON-METALLIC (EXCLUDING FUEL) MINERALS.(c)					
<i>Total Non-metallic (excluding Fuel) Minerals</i>	<i>7,303</i>	<i>8,041</i>	<i>9,002</i>	<i>10,192</i>	<i>10,533</i>

CONSTRUCTION MATERIALS.(d)					
<i>Total Construction Materials</i>	<i>14,824</i>	<i>16,444</i>	<i>17,840</i>	<i>18,497</i>	<i>21,597</i>

TOTAL.					
<i>Total, All Minerals and Construction Materials (c)</i>	<i>164,871</i>	<i>176,320</i>	<i>165,111</i>	<i>155,955</i>	<i>164,985</i>

(a) Prior to 1958, the value of lead-copper concentrate was included with Copper Ore, Concentrate, etc.
 (b) Includes the value of iron oxide for fluxing.
 (c) Excludes Australian Capital Territory, details of which are included with construction materials.
 (d) Incomplete owing to difficulties of coverage.

NOTE.—Particulars of the value of uranium concentrate produced are not available for publication and have been excluded from the table above.

6. **Local and Net Value of Mining and Quarrying Production by Industry, 1959.**—Particulars of the local value (or value of output) and net value (or value of production) of production of the principal Mining and Quarrying industries for the year 1959 are shown in para. 4 (vi.), page 1041. Owing to the necessity of classifying individual mines according to the principal mineral produced, the values in the tables on pages 1041–2 for mining industry groups differ slightly in some cases from totals of the corresponding groups of mine products shown in the table in para. 5 above.

§ 4. Gold.

1. **Historical.**—The earliest definite record of the discovery of gold in Australia was made on 15th February, 1823, by James McBrien, a surveyor, while surveying the Fish River between Rydal and Bathurst, New South Wales, and there are records of gold having been identified in several places during the next 27 years. It is believed that the first authentic

discovery of gold from which actual mining operations resulted was made in January, 1846, about 10 miles east of Adelaide, South Australia. However, credit for the first discovery of payable gold is generally given to E. H. Hargraves, who notified the Government of New South Wales on 3rd April, 1851, of his find, located at the junction of the Summerhill and Lewis Pond Creeks in the Bathurst (N.S.W.) district. This caused a gold rush, and prospecting started in many localities.

The Colony of Victoria was separated from New South Wales on 1st July, 1851, and within a few days of its inception, the new government was notified of the discovery of gold in several places. It would appear that the Hon. W. Campbell discovered gold near Clunes (Victoria) in March, 1850, but temporarily concealed the fact, and his discovery was not disclosed until 8th July, 1851. The discovery of gold at Ballarat and Bendigo followed soon afterwards.

The early discoveries were of alluvial gold, and only crude equipment was required to work them. As a consequence, cities and towns were depleted of their population as large numbers rushed to the diggings. The Australian population growth from 438,000 at the end of 1851 to 1,168,000 at the end of 1861 can be said to be largely due to the discoveries of gold.

Discoveries continued to be made, including such important fields as Canoona (Queensland) in 1858, Forbes (New South Wales) in 1862, Gympie (Queensland) in 1868, and Charters Towers and Mount Morgan (both in Queensland) in 1882. With the discovery at Mt. Lyell (Tasmania) in 1886, the major discoveries in the eastern States ceased.

Western Australia did not enter the field for a considerable time after gold mining had become well established in most of the other States. Although some specimens had been found between 1850 and 1870, it was not until 1886 that the Kimberley field was discovered, followed by Yilgarn in 1887. In 1892, Bayley and Ford discovered Coolgardie, and in May of the following year Hannan and Flannigan found Kalgoorlie. In the year since, there have been no further discoveries of major goldfields although many profitable deposits in other localities have been found and worked.

The amount of gold won in Australia in any one year attained its maximum in 1903, the year in which Western Australian production reached its highest level. For the other States, the years in which the greatest yields were obtained were as follows:—New South Wales, 1852; Victoria, 1856; Queensland, 1900; South Australia, 1904; and Tasmania, 1899. In recent years, output from the Northern Territory has expanded considerably and the highest annual production was recorded as recently as 1956.

Owing to the exhaustion of the more easily worked deposits and increased costs due to deep mining, the production of gold in Australia declined from 3,837,979 fine oz. in 1903 to 427,160 fine oz. in 1929, the lowest output since its discovery. Increased activity in prospecting due to prevailing economic conditions resulted in some improvement in 1930, but the marked development between that year and 1939 was caused by the heavy depreciation of Australian currency in terms of gold. Following the outbreak of the 1939–45 War, there was a sharp fall in gold production to 656,867 fine oz. in 1944 and 657,213 fine oz. in 1945, but with the release of man-power after the war, there has been a slight upward trend in mine production of gold, which in 1953 exceeded 1,000,000 fine oz. for the first time since 1942. The devaluation of Australian currency in September, 1949, gave an impetus to gold production, but this was offset in the following years by increasing costs which brought about the closing of several large producers in New South Wales, Victoria and Western Australia.

2. Present Methods of Mining and Treatment.—Gold ores can be divided into two types, namely, free-milling and refractory. Free-milling ores are those that, when finely ground, will yield their gold content to amalgamation and/or cyanidation, and these are found in most of the gold deposits of Australia.

Some refractory ores, which are not amenable to amalgamation, allow their gold to be dissolved by cyanidation, from which solution the gold is then precipitated. However, on the Coolgardie field, where gold bearing sulphide and telluride minerals occur, it is necessary first to recover these from gangue by flotation. This concentrate is then roasted and the resulting calcine, an impure oxide containing free gold, is cyanided to yield gold. This is usually smelted as bullion, in which form it leaves the vicinity of the mine.

3. **Mine Production.**—The table hereunder shows the mine production of gold (gold content of minerals produced) during 1959 according to the mineral in which it was contained and the State or Territory of origin. It should be noted that the minerals shown below contain, in addition to gold, certain other metals.

GOLD : MINE PRODUCTION, 1959.

(Fine oz.)

Mineral in which contained.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	N.T.	Aust.
Copper Ore, Concentrate, etc. ..	2,699	..	74,988	..	1,345	6,915	11,715	97,662

Lead Concentrate ..	8,396	..	54	3,615	..	12,065
Lead-Copper Concentrate	8,436	..	8,436
Pyrite Concentrate..	(a)	(a)
Zinc Concentrate ..	1,719	2,275	..	3,994
Total Gold ..	13,275	34,662	91,687	16	860,969	21,353	63,142	1,085,104

(a) A small quantity of gold recovered from pyrite concentrate dispatched from Kalgoorlie for sulphuric acid manufacture is included with Gold Ore, Concentrate, etc.

The principal sources of production during 1959 were as follows:—

(i) *New South Wales.* There are now no mines employing four or more hands engaged solely in gold mining in New South Wales. Most of the gold produced during 1959 was contained in lead and zinc concentrates produced at Broken Hill and copper, lead, zinc and gold concentrates milled at Captain's Flat.

(ii) *Victoria.* At Chewton, near Castlemaine, one mine produced nearly half of the State's production. In addition, four gold mines located in the north-east of the State each produced more than 1,000 fine oz.

(iii) *Queensland.* The copper concentrate produced at Mt. Morgan contained more than three-quarters of the State's output of gold, nearly all the remaining production coming from a mine at Cracow.

(iv) *South Australia.* The only gold produced was won by prospectors.

(v) *Western Australia.* More than half of the total production came from the Coolgardie goldfields, while most of the remaining production came from the Dundas, Murchison and Yilgarn goldfields. A single mine at Fimiston maintained its position as the largest gold producer in Australia, mining 172,420 fine oz. during 1959, and three other mines each produced over 100,000 fine oz. in the same period.

(vi) *Tasmania.* Copper concentrate produced at Mt. Lyell contained most of the gold produced in Tasmania during 1959, while most of the remaining production was included in lead-copper, lead and zinc concentrates milled at Rosebery. A small quantity of gold was recovered from alluvial tin-mining operations.

(vii) *Northern Territory.* Gold production in the Northern Territory is centred around Tennant Creek.

The following table shows the recorded mine production of gold (i.e., gold content of minerals produced) in the several States and in Australia as a whole during each of the ten decennial periods from 1851 to 1950, and in single years from 1951 to 1959. Owing to defective information in the earlier years, it is likely that the recorded production falls considerably short of the actual totals.

(a) Gold content of minerals produced.

(b) Less than 500 fine oz.

4. Refinery Production.—Amalgam and gold slimes from cyanide extraction are treated at the mines to produce gold bullion, which at some mines may be partly refined before dispatch to the Royal Mints, located in Melbourne and Perth. By-product gold from lead smelting is refined at Port Pirie in South Australia, while the gold contained in copper refinery sludges, resulting from electrolytic copper refining at Mount Lyell and Port Kembla, is recovered at Port Kembla. Gold bullion and other gold-bearing materials are also refined in Sydney.

Details of the refinery production of gold in Australia and the value of refined newly-won gold of Australian origin are shown in the following table for each of the years 1956 to 1960. The value of the refined newly-won gold is based on the price fixed by the Commonwealth Bank, but allowance is made for premiums on sales of gold overseas and for industrial purposes in Australia.

PRODUCTION OF REFINED GOLD IN AUSTRALIA.

(a) Excludes U.S.S.R. The United States Bureau of Mines has estimated U.S.S.R. production at 9-10 million ounces per annum in recent years.

7. **Prices of Gold.**—Under existing legislation, all gold produced in Australia is sold to the Reserve Bank. The official price of gold is fixed by the Reserve Bank, and on 1st May, 1954, it was raised from £15 9s. 10d. to £15 12s. 6d. per fine oz. The current price reflects the "parity" value of Australian currency established by the International Monetary Agreement Act 1947. Previously, the price of gold was based on the price for which gold could be sold abroad in official markets, less costs of movement.

Average prices of gold per fine oz. at mints in Australia and on the London gold market, for the years 1956 to 1960, are shown in the following table.

PRICES OF GOLD: AUSTRALIA AND LONDON.

(per fine oz.)

Place of Sale.	1956.	1957.	1958.	1959.	1960.
At Mints in Australia £A. s. d.	15 12 6	15 12 6	15 12 6	15 12 6	15 12 6
London .. fstg. s. d.	12 10 2	12 10 3	12 9 9	12 9 10	12 11 2

8. **Sales of Gold on Oversea Premium markets.**—In November, 1951, the Commonwealth Government decided to allow Australian gold producers to benefit from the high prices then being paid for gold on some overseas markets. To implement this decision, the Gold Producers' Association Limited was incorporated in December, 1951, and the first sales were made in that month. By arrangement with the Reserve Bank of Australia, the total quantity of newly-won gold delivered to the Bank by members of the Association in any calendar month, less the quantity required for industrial purposes in Australia, is available to the Association for sale on overseas premium markets during the ensuing two calendar months. The net proceeds from premium sales are distributed to members in proportion to their production of gold. The actual volume of sales on overseas premium markets has been dependent largely on the premium over the Australian fixed price. Towards the end of 1953, the price of gold on overseas premium markets fell sharply and by the end of 1957 regular monthly sales had virtually ceased. However, following the sharp rise in the price of gold on the London and other free gold markets in October, 1960, premium sales once again commenced in that month.

The following table shows the quantity and value of gold sold on overseas premium markets and the average price realized for these sales during the years 1956 to 1960. It should be noted that this series is in no way indicative of the average return to gold producers for all gold produced.

GOLD SOLD ON OVERSEA PREMIUM MARKETS.

9. **Assistance to the Gold-Mining Industry.**—(i) *Gold Subsidy.* After the collapse of high premium prices late in 1953, conditions in the gold-mining industry again became acute and many producers were faced with the prospect of closing down. To meet this situation, the Gold-Mining Industry Assistance Act was assented to on 18th November, 1954. The purpose of this Act was to assist the gold-mining industry in Australia and the Territories of Papua and New Guinea by the payment of a subsidy, subject to certain conditions, on the production and sales of gold. To be eligible for the subsidy, the value of a producer's output of gold must exceed 50 per cent. of the total value of his mine output. The subsidies paid under the original Act were increased under amendments enacted on 22nd October, 1957, and 22nd May, 1959. Under the Act as it now stands, the subsidy payable to small producers whose annual output does not exceed 500 fine oz. is £2 8s. 0d. per fine oz., irrespective of cost of production. For large producers, subsidy is paid at the rate of three quarters of the excess of the average cost of production over £13 10s. 0d. per fine oz. with a maximum amount of subsidy of £3 5s. 0d. per fine oz. Where a producer receives an amount in excess of the official price of £15 12s. 6d. per fine oz. as a result of

sales on oversea premium markets or otherwise, the subsidy payable shall be reduced by the amount of the excess. The subsidy is also limited to the extent that the annual net profit of a producer shall not, with the addition of the subsidy, exceed 10 per cent. of the capital investment in the company. The maximum expenditure on development allowable in determining costs is £5 5s. 0d. per fine oz. A further condition of the Act is that the recovery rate of the mine shall not fall below nine-tenths of that for the year previous to the commencement of the Act. Payments under the Act are to continue until 30th June, 1962.

Payments under the Act commenced in March, 1955, and the amounts paid to gold producers in the various States and Territories of Australia in each of the years 1956 to 1960 are shown in the following table.

NET SUBSIDY PAYMENTS TO GOLD PRODUCERS.
(£.)

Year.	New South Wales.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Terr.	Papua and New Guinea.	Total.

(ii) *Income Taxation Exemption.* Income from gold mining is exempt from taxation in the hands of the producer. If the producer is a company, such income is exempt from taxation in the hands of the shareholders when paid as dividends.

10. *Employment in Gold Mining.*—Particulars of the numbers of persons employed in gold mining are shown in paras. 4 (ii) and (iii), pages 1039–40.

§ 5. Lead, Silver and Zinc.

1. *Historical.*—Prior to the discovery of the great Broken Hill lead-silver-zinc lode in 1883 by Charles Rasp, a boundary rider, the mining of lead-silver-zinc ores at other localities in New South Wales had been intermittent and only small quantities were produced. The Broken Hill lode has proved to be one of the biggest in the world and to date over 80 million tons of ore have been raised. The Broken Hill Proprietary Co. Ltd., now engaged in steel manufacture, was the company first formed to operate at Broken Hill and continued operations there until 1939 when the ore in its leases became exhausted. The first ores mined at Broken Hill were oxidized and required only simple smelting to produce a lead-silver bullion. No initial attempt was made to recover zinc and it was not until 1897 that the first commercial zinc concentrate was produced. The exhaustion of the oxidized ore early this century led to the mining of the deeper sulphide ores. The need to produce separate lead and zinc concentrates for smelting purposes, with economic metal recoveries, resulted in the perfection at Broken Hill of the differential ore flotation process. The preparation of sulphide concentrates by flotation methods is now used throughout the world. Mining operations at Broken Hill are now mainly carried on to the north and south of the original leases. In 1939, Lake George Mines Ltd. at Captain's Flat, near Canberra, commenced large-scale mining of a lead-zinc-copper ore body which had been first worked in 1882. The Captain's Flat mine is expected to cease operations during 1962 because of the exhaustion of ore reserves.

Lead-silver-zinc ores have been mined in Queensland since 1870, but it was not until 1923 that the largest ore-body, at Mt. Isa, was discovered by John Miles. Mt. Isa Mines Ltd. commenced mining operations at this centre in 1931. Mt. Isa is now the second largest centre in Australia producing lead-silver-zinc ores and the largest producer of copper. During the 1939–45 War, mining of lead-silver-zinc ores at Mt. Isa was suspended in favour of copper production.

Lead-silver ores were first discovered in Western Australia in the Northampton District in 1848 and most of the subsequent production in that State has been from that District.

The first recorded production of lead in Tasmania was in 1888, and of zinc, in 1919. Production has been restricted to the West Coast.

2. *Present Methods of Mining and Treatment.*—Nearly all ores now mined are composed of deep-lying sulphide minerals and it is therefore necessary to mine these ores by underground methods. At all large mines, it is the practice to produce separate lead and zinc concentrates,

with the lead concentrate containing most of the silver. These concentrates are prepared by differential flotation except in cases where a satisfactory concentrate can be obtained by gravity methods. In flotation plants, the ore is finely ground and by differential flotation a lead concentrate is first produced, with the zinc concentrate subsequently separated from the tailings. At Captain's Flat, differential flotation methods are used to produce successive concentrates of copper, lead, zinc and pyrite.

Particulars of representative Broken Hill lead and zinc concentrates are shown in para. 4, page 1035.

3. **Mine Production.**—The following table shows for 1959 the mine production (metal content of ores and concentrates produced) of lead, silver and zinc in Australia, and the respective minerals in which these metals were contained.

**LEAD, SILVER AND ZINC: CONTENT OF ORES AND CONCENTRATES

(a) Includes lead-silver ore.

The principal sources of production of lead, silver and zinc during 1959 were as follows:—

(i) *New South Wales.* Lead and zinc concentrates, produced only at Broken Hill and Captain's Flat, contained nearly all the New South Wales production of lead and silver and all of the zinc. The five Broken Hill mines now operating, are:—Zinc Corporation Ltd., New Broken Hill Consolidated Ltd., North Broken Hill Ltd., Broken Hill South Ltd., and Barrier Central Pty. Ltd. These mines, during 1959, produced (in terms of the contents of all ores and concentrates produced) over 70 per cent. of Australia's lead and zinc and more than one half of the silver. Small quantities of lead-silver ore were produced, mainly in the Broken Hill district. In addition, the copper concentrate produced at Captain's Flat contained silver, as did small quantities of copper ore produced in other parts of the State and gold bullion produced from gold mining operations.

(ii) *Victoria.* All the silver produced was obtained from gold mining operations. No zinc bearing minerals are mined in Victoria and lead was last mined in 1957.

(iii) *Queensland.* Mt. Isa produced all the zinc concentrate and nearly all the lead concentrate in Queensland during 1959. These contained most of the State's production of lead and silver and all the zinc. Small quantities of lead ore were mined mainly at Mt.

Isa and in the surrounding district. Copper concentrates containing silver were produced at Mount Morgan, while some silver is also contained in gold bullion derived from gold ores, mainly at Cracow.

(iv) *South Australia.* Very small quantities of lead and silver were contained in lead ore mined in South Australia during 1959. No zinc ore for fertilizer was mined during that year.

(v) *Western Australia.* Most of the silver produced in Western Australia was obtained from gold bullion produced by the gold-mining industry. Lead ores, mined chiefly near Geraldton, contained lead and silver, while copper concentrate milled at Ravensthorpe also contained silver. No zinc was produced during 1959.

(vi) *Tasmania.* All the lead, silver and zinc was produced from mines on the West Coast. All the zinc and most of the lead and silver were produced from mines at Rosebery and Mt. Read and milled at Rosebery to produce separate lead, zinc, and lead-copper concentrates. Silver was also contained in copper concentrate milled at Mt. Lyell.

(vii) *Northern Territory.* No ores containing lead or zinc were mined during 1959. However, silver was produced in copper concentrates from Tennant Creek and from Rum Jungle and in small quantities of copper ore mined at various localities.

The table hereunder shows the quantities of lead, silver and zinc contained in minerals won in the several States and the Northern Territory during the years 1955 to 1959:—

LEAD, SILVER AND ZINC: CONTENT OF ORES AND CONCENTRATES PRODUCED.

4. **Smelter and Refinery Production.**—(i) *Lead Concentrate.* Lead concentrate produced at Broken Hill is railed to Port Pirie, in South Australia, for smelting and refining. Lead-silver bullion is produced from initial smelting, and lead, silver and gold are then refined. Cadmium is obtained from smelter fumes and refined to produce rods of metal. The sulphur dioxide gas formed during pre-smelter sintering operations is used to manufacture sulphuric acid. The antimony contained in the concentrate is alloyed with lead to form marketable antimonial lead while the copper is processed to the matte and speiss stage and sent to copper refineries for copper extraction. Lead concentrates produced at Broken Hill are now in excess of Port Pirie smelter and refinery capacity and part of the Broken Hill production is exported.

Lead ore and concentrate produced at Mount Isa is smelted at the mine to derive a lead bullion which is rich in silver. All of this bullion is exported to the United Kingdom for refining. A lead-copper dross is produced as a by-product of lead smelting and this is also exported.

Lead and lead-copper concentrates produced in Tasmania, and lead concentrates produced at Captain's Flat in New South Wales and in Western Australia, are exported.

(ii) *Zinc concentrate.* About half of the zinc concentrate produced at Broken Hill is exported overseas, and the remainder is shipped from Port Pirie to Risdon, near Hobart, for refining. At Risdon, the Broken Hill concentrate, together with all zinc concentrate produced in Tasmania, is roasted to form zinc oxide, or calcine. Sulphur dioxide formed during this roasting process is used for the manufacture of sulphuric acid. The calcine is leached with a weak solution of sulphuric acid to form a zinc sulphate solution which, after purification, is electrolysed. Zinc of high purity is deposited on the cathodes and this zinc is melted and cast into ingots. Cadmium metal and cobalt oxide are also recovered. Lead-silver residues are recovered and forwarded to Port Pirie for smelting with lead concentrates. Copper residues are sent to Port Kembla for treatment.

Zinc concentrates produced at Mt. Isa and Captain's Flat are exported.

In the following table, details are given of the production and sales of refined primary lead, silver and zinc as recorded from data received from the Bureau of Mineral Resources and the Australian Mines and Metals Association. The figures shown for refined silver production include small quantities recovered from imported materials.

6. **Prices of Lead, Silver and Zinc.**—The following table shows average prices of lead, silver and zinc in Australia and on the London Metal Exchange during the years 1956 to 1960.

PRICES OF LEAD, SILVER AND ZINC.

Particulars.	1956.	1957.	1958.	1959.	1960.
<i>Australian Prices, in Australian currency—</i>					
Lead, per ton .. £	140	117	(a) 87	100	100
Silver, per fine oz.(b) s. d.	8 3	8 3	8 0	8 2	8 3
Zinc, per ton(c) .. £	122	104	91	105	113
<i>London Metal Exchange Prices, in sterling—</i>					
Lead, per ton .. £	116	97	73	72	72
Silver, per fine oz. s. d.	6 7	6 7	6 4	6 7	6 7
Zinc, per ton .. £	98	82	65	80	88

(a) Average market price was used for the periods shown prior to 23rd December, 1958, when the minimum price was fixed at £100 per ton. (b) Silver prices shown represent export parity calculated from London Metal Exchange prices.

(c) Prior to 1st January, 1958, and subsequent to 30th June, 1959, the prices shown were average market prices. On 1st January, 1958, a minimum price was fixed at £90 and this minimum was later raised to £100 on 22nd December, 1958. The minimum price was abolished on 1st July, 1959.

7. **Employment in Lead, Silver and Zinc Mining.**—Particulars of the number of persons employed in mining for these metals are shown in paras. 4 (ii) and (iii), pages 1039–40.

§ 6. Copper.

1. **Historical.**—Copper was first discovered in Australia in 1842, at Kapunda in South Australia and in the Northampton district of Western Australia. The subsequent large-scale mining of the South Australian deposits contributed significantly to that State's development, but now only very small quantities are mined in South Australia.

The mining of copper commenced in New South Wales in 1847, near Rockley. Copper was first recognized in the Cobar district in 1869, and large-scale mining continued at Cobar until 1952. Other fields were opened at Mt. Hope in 1878, Nymagee in 1880 and Captain's Flat in 1882, but of these, only Captain's Flat is still producing.

The first important discovery of copper in Queensland was made in 1862, when a rich lode was found near Clermont. Copper was discovered in the Herberton mineral field in 1879 and at Mt. Morgan in 1882. The copper ore body at Mt. Isa was not recognized as an outcrop when the lead-zinc ore body was discovered in 1923, and was discovered as a result of underground development.

Copper mining was first undertaken at Mt. Isa during the 1939–45 War, but it was not until the erection of a copper smelter at that centre that large-scale production commenced. The Mt. Isa mine is today Australia's largest producer of copper.

In Tasmania, the Mt. Lyell deposit was discovered in 1886.

2. **Methods of Mining and Treatment.**—Most of the large copper ore bodies contain the mineral chalcopyrite, an iron-copper sulphide. Copper ore is mined by opencut methods at Mt. Morgan and Mt. Lyell and by underground methods at Mt. Isa, Captain's Flat and Ravensthorpe (Western Australia). Oxidized copper ore is mined at Mt. Isa and at numerous other localities, mainly in Western Australia.

It is the practice for the sulphide ore to be finely ground and for the chalcopyrite contained in it to be recovered by flotation. At Mt. Lyell and Mt. Morgan, the tailings from the copper flotation are subjected to a further flotation and a pyrite concentrate is produced. The oxidised ore mined at Mt. Isa is not concentrated and is fed direct to the smelters.

3. **Mine Production.**—The following table shows for 1959 the copper content of all minerals produced in the several States and the Northern Territory:—

COPPER: CONTENT OF ORES AND CONCENTRATES PRODUCED, 1959.
(Tons.)

Mineral in which Contained.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	Aust.
Copper Ore, Concentrate, etc.	964	14	65,801	16	2,197	11,575	9,953	90,520
Lead Concentrate	2,323	..	997	3,320
Lead-Copper Concentrate	487	..	487
Zinc Concentrate	441	182	..	623
Total	3,728	14	66,798	16	2,197	12,244	9,953	94,950

The following were the principal sources of copper during 1959:—

- (i) *New South Wales.* Most of the copper produced in this State was contained in lead concentrate milled at Broken Hill. At Captain's Flat, nearly all the copper was contained in lead concentrate. Small quantities of copper were precipitated from water pumped from old mine workings, mainly at Cobar.
- (ii) *Victoria.* A small quantity of copper ore was mined in North Gippsland. This was the first production recorded in post-war years.
- (iii) *Queensland.* Mt. Isa was the most important copper producer in Australia, its 1959 output being 61 per cent. of the Australian total. The copper produced at Mt. Isa is contained in copper sulphide concentrate, oxidized copper ore and lead concentrate. Copper concentrate containing appreciable gold and silver, was also produced at Mt. Morgan. Other copper was contained in copper ore mined mainly near Mt. Isa and Cloncurry and in copper precipitate.
- (iv) *South Australia.* Only a negligible quantity of copper was produced from areas which in the past were important for copper.
- (v) *Western Australia.* Approximately one half of the copper mined was contained in copper concentrate produced at Ravensthorpe. The remainder was contained in copper ore won at various localities in the State for fertilizer manufacture.
- (vi) *Tasmania.* Most of the State's production was at Mt. Lyell, where copper was contained in copper concentrate and precipitate. Lead-copper concentrate and zinc concentrate milled at Rosebery made up the remainder of Tasmania's production.
- (vii) *Northern Territory.* At Rum Jungle, a copper concentrate and a copper precipitate were produced in association with uranium mining. A copper concentrate was also produced at Tennant Creek. Small quantities of ore were mined at other localities.

The table hereunder shows the quantities of copper contained in minerals produced in the several States and the Northern Territory during the years 1955 to 1959:—

COPPER: CONTENT OF ORES AND CONCENTRATES PRODUCED.
(Tons.)

State or Territory.	1955.	1956.	1957.	1958.	1959.
New South Wales	3,492	4,289	4,382	4,023	3,728
Victoria	14
Queensland	31,858	35,708	35,786	50,511	66,798
South Australia	1	2	1	16
Western Australia	699	740	788	1,107	2,197
Tasmania	8,394	8,807	10,984	11,413	12,244
Northern Territory	2,869	5,002	7,313	8,660	9,953
Australia	47,312	54,547	59,255	75,715	94,950

4. **Smelter and Refinery Production of Copper.**—Most of the copper concentrate milled in Australia is smelted locally, blister copper being produced at Mt. Isa, Mt. Morgan, Mt. Lyell and Port Kembla. Port Kembla smelts all of the concentrate from Captain's Flat and some from Tennant Creek.

Blister copper smelted at Mt. Isa is railed to Townsville for electrolytic refining at the refinery which commenced production there in 1959. Mt. Lyell blister copper is electrolytically refined at Mt. Lyell and the bulk is remelted and cast into primary shapes at Port Kembla. Mt. Morgan blister copper is shipped to Port Kembla, where together with blister produced at Port Kembla, it is refined. Most Port Kembla copper is electrolytically refined, although fire refining, which is a cheaper process and undertaken when there are no other metals to be recovered, is used to a lesser extent. Copper from some copper drosses and speisses, by-products of lead refining operations at Port Pirie, is also extracted at Port Kembla.

At Port Kembla, gold and silver contained in electrolytic refining tank house slimes from Mt. Lyell, Townsville, and Port Kembla are recovered.

In the following table, details are given of the production of blister copper, and the production and sales of refined copper for the years 1955 to 1959:—

METALLIC COPPER: PRODUCTION AND SALES, AUSTRALIA.

6. Prices.—Details of the average market price for the years 1956 to 1960 are given in terms of Australian currency and sterling in the following table:—

AVERAGE PRICE OF ELECTROLYTIC COPPER IN AUSTRALIA AND THE UNITED KINGDOM.

(£ per ton.)

Country.	1956.	1957.	1958.	1959.	1960.
Australia — in Australian currency(a)	435	341	284	312	324
United Kingdom—in sterling	304	220	193	235	239

(a) Ex works Port Kembla.

7. Employment in Copper Mining.—Particulars of the numbers of persons engaged in the mining of copper and copper-gold ores are shown in paras. 4 (ii) and (iii), pages 1039–40,

8. Assistance to the Copper-mining Industry.—(i) *Copper Bounty*. The Copper Bounty Act was enacted in 1958, following a Tariff Board inquiry and recommendation, to provide assistance to the industry partly by duty and partly by bounty. The provisions of the Act were reviewed in 1960, and it will continue in its present form until 31st December, 1963. The bounty is payable on copper sold on the Australian market, and provides in effect payment at the rate of £1 for each £1 by which the Australian price falls short of £340, with a maximum of £35 a ton, or, in the case of producers of 50 tons per annum or more, such lesser bounty as will give a return of 10 per cent. on assessed capital employed in the production of copper. The bounty reduced the net effective price of copper to Australian consumers from £340 to £305. A duty is imposed on imported copper when the Australian equivalent of the London Metal Exchange price falls below £290 (£Stg.232), increasing by £1 for each £1 that the Australian equivalent falls below £290. Including freight and other charges, the landed cost is thus expected to be maintained at about £305 so long as the Australian equivalent of the London Metal Exchange price is not in excess of £290.

(ii) *Income Taxation Concession*. One-fifth of the net income from copper mining is exempt from taxation in the hands of the producer. If the producer is a company, this concession also applies to such income when paid to the shareholders as dividends.

§ 7. Tin.

1. Historical.—Although specimens of tin had been found in New South Wales as early as 1851, it was not until tin stone was discovered near Inverell in 1872 that mining operations commenced. The New England area is still the most important producing area in New South Wales.

The first notable discovery of tin in Queensland occurred in 1872, when rich deposits of stream tin were found in the country to the south of Warwick but these alluvial deposits soon became exhausted. In 1879, important discoveries were made in the Herbert River district and rich fields, including that at Herberton, were opened up.

Tin was first discovered in Western Australia in 1888, and since then has been found in several widely separated localities in the State. More than half of the production to date has come from the Greenbushes Mineral Field, and most of the remainder from the Pilbara goldfield.

Tin mining in Tasmania dates from the year 1871, when the Mount Bischoff mine was discovered. Soon afterwards, rich deposits were located in the north-east of the State and near St. Helens. In 1875, tin was discovered at Mt. Heemskirk.

2. Present Methods of Mining and Treatment.—All tin produced in Australia is contained in tin concentrate, which is usually of the mineral cassiterite (tin oxide). The greater proportion of the production is obtained from alluvial workings as a gravity concentrate. In the lode deposits, tin is usually not associated with other recoverable minerals. However, at two mines in Tasmania tin is associated with wolfram and sulphide minerals. At

these mines, a gravity concentrate of tin, wolfram and sulphide minerals is obtained and from this the wolfram is separated by electromagnetic means. The tin and sulphide minerals are separated by flotation, the sulphides being floated off and the tin remaining as tailings.

3. **Mine Production.**—The following table sets out the tin content of tin concentrate produced in Australia during the years 1955 to 1959. No tin is included in minerals other than tin concentrate.

TIN: CONTENT OF TIN CONCENTRATES PRODUCED.

(Tons.)

State.	1955.	1956.	1957.	1958.	1959.
New South Wales	270	269	211	239	174
Victoria	2	..	(a)
Queensland	770	630	772	1,019	1,104
Western Australia	119	240	182	94	174
Tasmania	853	938	777	883	890
Northern Territory	3	1	10	2	9
Australia	2,017	2,078	1,952	2,237	2,351

(a) Less than half a ton.

The following were the principal sources of production in 1959:—

- (i) *New South Wales.* Virtually the whole of the State's production was from alluvial deposits. The New England region mainly around Tingha produced two-thirds of the total production.
- (ii) *Victoria.* No tin was produced in Victoria.
- (iii) *Queensland.* Most of the tin concentrate produced in Queensland was from the Herberton field, alluvial tin concentrate being produced. Tin concentrate was also produced in the Chillagoe, Kangaroo Hills and Cooktown districts.
- (iv) *South Australia.* No tin was produced in South Australia.
- (v) *Western Australia.* Nearly all the tin concentrate produced in Western Australia was lode tin won from the Pilbara field.
- (vi) *Tasmania.* Most of the tin concentrate produced in Tasmania is won in the north-east part of the State, from both lode and alluvial deposits. The largest amount of tin concentrate produced in Australia during 1959 came from a lode deposit in north-east Tasmania, and wolfram concentrate, as well as tin concentrate, was produced.
- (vii) *Northern Territory.* Small quantities were won at various localities.

4. **Smelting and Refining.**—Except for occasional small parcels of concentrate shipped to overseas smelters, all local production is treated by the two tin smelters located in Sydney. The combined capacity of the two smelters is well in excess of the domestic supply of concentrates and there seems little prospect of this capacity being fully utilized in the foreseeable future unless concentrates could be economically imported and smelted.

The production of refined tin in Australia from locally produced tin concentrate during recent years, as recorded by the Bureau of Mineral Resources, was as follows:—1956, 1,850 tons; 1957, 1,806 tons; 1958, 2,121 tons; 1959, 2,226 tons; and 1960, 2,254 tons.

5. **Production in Principal Countries and World Total.**—World production of tin reached its maximum in 1941 when 241,400 tons were recorded. Australia's contribution to the world's tin production is about 1 per cent.

MINE PRODUCTION OF PRINCIPAL METALS
(METALLIC CONTENT OF MINERALS)
AUSTRALIA, 1930 TO 1960

MINE PRODUCTION OF PRINCIPAL METALS
AND PRODUCTION OF COAL
(METALLIC CONTENT OF MINERALS)
AUSTRALIA, 1930 TO 1960

The production of tin ore (metal content) as published by the Mineral Resources Division of the United Kingdom Overseas Geological Surveys, for the principal producing countries in 1958 and 1959 was as follows:—

TIN : PRODUCTION IN PRINCIPAL COUNTRIES.

(Tons.)

Country.	Production.		Country.	Production.	
	1958.	1959.		1958.	1959.
Malaya, Federation of	38,458	37,521	Australia ..	2,237	2,351
Indonesia	23,200	21,613	Burma(b)	1,200	1,400
Bolivia	18,000	23,811	Union of South Africa	1,416	1,272

Nigeria	6,154	5,491	<i>Total(c) ..</i>	134,000	141,000

(a) Estimated smelter production.
and Vietnam.

(b) Estimated.

(c) Excludes U.S.S.R., Czechoslovakia

6. Prices.—Details of the movement in average market prices of tin for the years 1956 to 1960 are given in terms of Australian currency and sterling in the following table:—

AVERAGE PRICE OF TIN IN AUSTRALIA AND THE UNITED KINGDOM.

(£ per ton.)

Country.	1956.	1957.	1958.	1959.	1960.
Australia — in Australian currency	1,014	992	995	1,058	1,042
United Kingdom—in sterling	788	755	735	786	794

7. Employment in Tin Mining.—The number of persons employed in tin mining is shown in paras. 4 (ii) and (iii), pages 1039–40.

§ 8. Iron.

1. Historical.—Iron ore was first mined in New South Wales to supply raw material for the ironworks that were established near Mittagong in 1852. Iron ore for the ironworks established later at Lithgow was drawn from Carcoar, near Bathurst.

In South Australia, the iron ore deposits of the Middleback Ranges, near Whyalla, were first mined by the Broken Hill Proprietary Co. Ltd. in 1900 to provide a flux for lead smelting operations at Port Pirie. When that company opened its Newcastle steelworks in 1915, it greatly expanded ore production from the Middleback Ranges and most of the Australian steel industry's requirements of iron ore still come from this source.

Regular shipments of iron ore from Yampi Sound, north of Derby in Western Australia, to the steelworks at Port Kembla commenced in 1951. Iron ore for the iron smelter at Wundowie, which commenced operations in 1948, has in recent years been provided entirely from the deposits at Koolyanobbing, near Southern Cross.

Besides the large quantities of iron ore that are mined for metal extraction purposes, smaller quantities of iron oxide are mined for other purposes, such as gas purification, cement manufacture, coal washing and fluxing.

2. **Methods of Mining and Treatment.**—All iron ore and iron oxide is won by opencut mining. The ore is selectively mined, crushed and screened to provide a standard assay and size for blast furnace use. No concentration is carried out. The iron ore from Yampi Sound, however, is powdery and friable and has to be sintered, or agglomerated, before making up the furnace charge.

3. **Mine Production of Iron Ore.**—Iron oxide deposits exist in all States and in the Northern Territory, but at present iron oxide for metal extraction purposes, termed iron ore in this chapter, is produced in two States only. The following table shows the estimated iron content of iron ore produced during the years 1955 to 1959.

IRON : ESTIMATED IRON CONTENT OF IRON ORE PRODUCED.

(Tons.)

State.	1955.	1956.	1957.	1958.	1959.
South Australia	1,971,693	2,324,825	2,199,981	2,173,922	2,218,846
Western Australia	325,579	211,215	262,519	365,275	480,769
Australia	2,297,272	2,536,040	2,462,500	2,539,197	2,699,615

The producing centres during 1959 were as follows:—

- (i) *South Australia.* During 1959, 3,413,609 tons of iron ore were drawn from the Iron Monarch and Iron Baron deposits in the Middleback Ranges. Selected foundry grade ore was diverted as required to the Whyalla blast furnace, but the greater part was shipped to Newcastle and Port Kembla for smelting.
- (ii) *Western Australia.* During the year, 672,239 tons of ore were shipped from Yampi Sound, north of Derby, to New South Wales for sintering and smelting. A quantity of 54,845 tons was mined at Koolyanobbing, near Southern Cross, for pig iron production at Wundowie.

4. **Mine Production of Iron Oxide.**—Production of iron oxide, excluding that used for metal extraction (iron ore) and mineral pigments, in the several States during 1959, according to end use, is shown in the following table. Only total quantities of iron oxide produced are recorded; particulars of metallic content are not available.

IRON OXIDE PRODUCTION, 1959.

(Tons.)

Use.	New South Wales.	Victoria.	Queensland.	South Australia.	Tasmania.	Australia.
For gas purification ..	1,933	2,241	181	4,355
For cement manufacture ..	3,281	..	1,323	..	4,881	9,485
For coal washing	30	30
For fluxing	9,600	..	9,600
Total	5,244	2,241	1,323	9,600	5,062	23,470

The principal sources of iron oxide production during 1959 were as follows:—

- (i) *New South Wales.* Quantities of iron oxide for gas purification were obtained from deposits near Port Macquarie, while that used for cement manufacture was mined from the Mudgee and Rylstone mining divisions. Magnetite, used in coal washing, was produced from beach sand deposits near Murwillumbah.
- (ii) *Victoria.* Limonite ore used for gas purification was mined at Buchan.
- (iii) *Queensland.* Iron oxide produced for cement manufacture was mined near Townsville.
- (iv) *South Australia.* A quantity of 9,600 tons drawn from the Middleback Ranges was dispatched to Port Pirie for use as a flux in lead smelting operations.
- (v) *Tasmania.* Iron oxide for gas purification and cement manufacture was mined in the vicinity of Penguin.

Particulars of Australian production of iron oxide for the years 1955 to 1959, according to end use, are shown in the following table.

IRON OXIDE PRODUCTION: AUSTRALIA.
(Tons.)

Use.	1955.	1956.	1957.	1958.	1959.
For gas purification ..	5,328	6,479	5,338	2,864	4,355
For cement manufacture ..	7,400	9,126	9,759	6,093	9,485
For coal washing	183	..	4	25	30
For fluxing	10,605	10,440	4,650	8,100	9,600
Total	23,516	26,045	19,751	17,082	23,470

5. Iron and Steel Production.—(i) *Australia.* The production of pig-iron and steel ingots in Australia, of which New South Wales is the main producing State, is shown in the following table for each of the years ended 31st May, 1951 to 1960.

PIG-IRON AND INGOT STEEL: PRODUCTION, AUSTRALIA.
(Tons.)

Year Ended 31st May.	Pig-iron. (a)	Steel Ingots. (b)	Year Ended 31st May.	Pig-iron. (a)	Steel Ingots. (b)
1951	1,313,332	1,443,831	1956	1,910,521	2,320,289
1952	1,430,027	1,521,386	1957	2,098,352	2,773,995
1953	1,691,693	1,801,028	1958	2,283,925	3,037,705
1954	1,826,711	2,116,813	1959	2,293,709	3,203,584
1955	1,868,841	2,208,708	1960	2,655,237	3,519,719

(a) Includes pig-iron for castings; excludes ferro-alloys.

(b) Includes recovery from scrap.

In 1959, ten blast furnaces were operating in Australia; four at Port Kembla and three at Newcastle, in New South Wales, two at Windowie, Western Australia, and one at Whyalla, South Australia. During 1959, ingot steel was produced from 28 open-hearth furnaces (17 at Newcastle and 11 at Port Kembla) and from 10 electric furnaces (5 at Newcastle, 3 at Melbourne, 1 at Whyalla and 1 at Port Kembla).

(ii) *New South Wales.* The principal producers in Australia, both in New South Wales, are the Broken Hill Proprietary Co. Ltd. at Newcastle and Port Kembla, and Australian Iron and Steel Ltd. at Port Kembla.

(iii) *South Australia.* At Whyalla in South Australia, the Broken Hill Proprietary Co. Ltd. produces pig iron, using locally produced raw materials together with metallurgical coke from New South Wales. A small quantity of steel ingots is produced from an electric furnace.

(iv) *Western Australia.* In Western Australia, the State-owned Wundowie Charcoal Iron and Steel Industry produces pig iron, using charcoal for smelting. This high grade iron is used in the manufacture of spheroidal graphite cast iron, and considerable quantities are exported. At Kwinana, The Broken Hill Proprietary Co. Ltd. produces steel products from billets imported from New South Wales.

6. *Production of Iron and Steel in Principal Countries.*—Particulars of the production in the principal countries and the estimated world total production during the calendar years 1958 and 1959, according to figures published by the Mineral Resources Division of the United Kingdom Overseas Geological Surveys, are shown in the next table.

IRON AND STEEL: PRODUCTION IN PRINCIPAL COUNTRIES.

§ 9. Mineral Sands.

1. *Historical.*—In recent years, the growing world demand for titanium metal has brought about a rapid expansion of Australian mineral sands mining. Australia is the largest producer of rutile and zircon in the world, and nearly all this production comes from the mineral sands deposits along the beaches of the east coast. The ilmenite produced on the east coast has proved unsuitable for titanium oxide pigment manufacture, and most of the production is discarded. However, ilmenite produced from mineral sands mined in Western Australia since 1956 has a much lower chromic oxide content than east coast ilmenite, and is therefore suitable for paint manufacture.

The first commercial development of the mineral sands deposits commenced at Byron Bay in New South Wales in 1934, when a mixed zircon-rutile-ilmenite concentrate was prepared. Large scale production of zircon-rutile concentrate commenced in Queensland in 1941 when electromagnetic separators were installed to separate the ilmenite. In 1943, after the installation of electrostatic separators, a rutile concentrate was produced. The Commonwealth Government banned the export of mixed concentrates in 1944, and all producers now turn out separate concentrates of rutile, zircon, ilmenite and monazite.

Production of rutile and zircon in 1959 was considerably lower than the record post-war production achieved in 1957, mainly because of reduced prices offering on world markets. Virtually all rutile and zircon concentrates are exported overseas.

2. **Present Methods of Mining and Treatment.**—Mineral bearing sands are usually recovered from sand dunes, but deposits occurring below sea level are recovered by suction dredges. The mineral sands and beach sand (quartz) are gravity concentrated, either by shaking tables or by spiral concentrators, resulting in the complete elimination of quartz and leaving a mixed concentrate of heavy minerals. Magnetic ilmenite and monazite are separated by electromagnetic methods and are then separately recovered, using increasing magnetic intensities. The remaining zircon and rutile are separated, using electrostatic separators. The above method is employed at nearly all plants, but Zircon Rutile Ltd., at Byron Bay, recovers a zircon concentrate from the raw sand using froth flotation.

3. **Mine Production.**—(i) *Titanium Dioxide.* The following table shows the quantities of titanium dioxide contained in rutile and ilmenite concentrates produced during the years 1955 to 1959.

TITANIUM DIOXIDE: CONTENT OF CONCENTRATES PRODUCED.
(Tons.)

State.	1955.	1956.	1957.	1958.	1959.
CONTAINED IN RUTILE CONCENTRATE.					
New South Wales	33,045	62,470	83,363	44,915	44,792
Queensland	24,198	30,772	41,500	35,755	34,736
Western Australia	285	96
Australia	57,243	93,242	124,863	80,955	79,624
CONTAINED IN ILMENITE CONCENTRATE.					
New South Wales	230	481	485	59	111
Queensland	32	..	78
Western Australia	1,779	38,325	38,219	45,566
Australia	262	2,260	38,888	38,278	45,677

(ii) *Zircon.* The quantities of zircon mineral contained in zircon concentrate produced during the years 1955 to 1959 are shown in the table below.

ZIRCON: CONTENT OF ZIRCON CONCENTRATE PRODUCED.
(Tons.)

State.	1955.	1956.	1957.	1958.	1959.
New South Wales	32,465	50,135	58,747	32,230	71,156
Queensland	15,745	21,634	28,956	26,412	34,504
Western Australia	103	6,692
Australia	48,210	71,769	87,703	58,745	112,352

(iii) *Other Products.* Small quantities of monazite concentrate, tin concentrate, magnetite and garnet concentrate were also recovered from mineral sands.

(iv) *Sources of Production.* The principal sources of mineral sands treated during 1959 were:—

(a) *New South Wales and Queensland.* The main deposits of mineral sands occur along 300 to 400 miles of the eastern Australian coast from Swansea, New South Wales to Curtis Island, Queensland. At present, the principal mining operations are located within a 90 mile stretch of coast extending from Byron Bay, New South Wales, to North Stradbroke Island, Queensland.

(b) *Western Australia.* Deposits of mineral sands occur on the south-west coast of Western Australia, in the Bunbury and Albany districts.

4. *Employment in Mineral Sands Mining.*—Particulars of the number of persons employed in mineral sands mining are shown in paras. 4 (ii) and (iii), pages 1039–40.

§ 10. Aluminium.

1. *Mine Production.*—The source of aluminium is the ore bauxite, which is produced in small quantities in New South Wales, Victoria and Queensland. Australian production is used for the manufacture of refractories, all bauxite used for metal extraction during 1959 (except a small quantity of Western Australian ore used for plant tests) being imported, mainly from Indonesia. Large deposits of bauxite exist on the Cape York Peninsula in north Queensland, and it is expected that this raw material will be refined in Australia when mining commences. The alumina content of bauxite produced in Australia during the years 1955 to 1959 is shown in the following table:—

ALUMINA : CONTENT OF BAUXITE PRODUCED.

(Tons.)

State.	1955.	1956.	1957.	1958.	1959.
New South Wales	902	1,578	1,354	633	1,648
Victoria	1,644	2,600	1,910	2,304	1,991
Queensland	(a) 860	(a) 440	(a) 494	(a) 596	..
Western Australia	(a) 3,275
Australia	3,406	4,618	3,758	3,533	6,914

(a) Estimated.

2. *Refinery Production.*—A refinery for the production of alumina and refined aluminium was constructed at Bell Bay on the Tamar River, in Northern Tasmania. The location of this refinery was determined by the availability of large supplies of hydro-electric power. Production of alumina commenced in February, 1955, and of refined aluminium in September, 1955. The following table shows the production of alumina and refined aluminium in Australia during the years 1956 to 1960:—

ALUMINA AND REFINED ALUMINIUM : PRODUCTION, AUSTRALIA.

(Tons.)

Refinery Product.	1956.	1957.	1958.	1959.	1960.
Alumina	16,863	20,116	22,490	26,900	29,801
Refined Aluminium	9,143	10,624	10,869	11,370	11,655

Source: Bureau of Mineral Resources.

§ 11. Uranium.

Uranium concentrate has been produced in Australia since 1954, but particulars of the quantity of U_3O_8 concentrate produced and its value are not available for publication. All U_3O_8 concentrate is exported overseas. During 1959, the principal producing centres were as follows:—

- (i) *Queensland.* Uranium ore was mined by opencut methods at Mary Kathleen, 33 miles east of Mt. Isa.
- (ii) *South Australia.* Uranium ore was mined by underground methods at Radium Hill, 289 miles north-east of Adelaide. A concentrate of heavy minerals is produced at the mine and this is railed to a treatment plant at Port Pirie for the chemical extraction of U_3O_8 concentrate.
- (iii) *Northern Territory.* At Rum Jungle, uranium-copper and copper ores were treated to produce U_3O_8 concentrate, copper concentrate and copper precipitate. Mining operations ceased at Rum Jungle in November, 1958, but sufficient ore was stockpiled to permit the continuation of full-scale production of uranium concentrate for some years.

During 1959, ore was mined in the South Alligator River area. Two companies opened treatment plants in that year.

Income from uranium mining is exempt from taxation in the hands of Australian producers. If the producer is an Australian company, such income is exempt from taxation in the hands of the shareholders when paid as dividends.

§ 12. Other Metallic Minerals.

1. *Tungsten.*—In recent years, Tasmania has been the principal State producing tungsten ores, scheelite being mined on King Island in Bass Strait and wolfram being mined in association with tin ores in the north-east part of the State. Because of low world prices, scheelite production on King Island ceased in August, 1958, but production was recommenced on a limited scale in 1960.

Particulars of the production of tungstic oxide contained in scheelite and wolfram concentrates produced during the years 1955 to 1959 are shown in the following table:—

TUNGSTIC OXIDE (WO_3) : CONTENT OF CONCENTRATES PRODUCED.
(Tons.)

State.	1955.	1956.	1957.	1958.	1959.
CONTAINED IN SCHEELITE CONCENTRATE.					
New South Wales	7	2	1	1	(a)
Queensland	(a)	3	1
Western Australia	5
Tasmania	948	985	948	477	..
Australia	960	990	950	478	(a)
CONTAINED IN WOLFRAM CONCENTRATE.					
New South Wales	1	2	(a)
Queensland	(b) 51	46	19	5	..
Tasmania	389	443	391	360	645
Northern Territory	81	101	49	7	8
Australia	522	592	459	372	653

(a) Less than half a ton.

(b) Estimated.

2. **Manganese.**—There has been considerable expansion of manganese ore production in recent years, due mainly to the relaxation of some provisions of the embargo on export of manganese ores. Western Australia, where activities were centred around Horseshoe in the Peak Hill District and Ant Hill and Mt. Sunday in the Pilbara District, continues as the main producing State. Northern Territory production is at Mucketty, near Renner Springs.

The following table shows the manganese content of metallurgical grade and the manganese dioxide content of battery and other grades of manganese ore produced during the years 1955 to 1959:—

MANGANESE : CONTENT OF MANGANESE ORE PRODUCED.

(Tons.)

Year.	Metallurgical Grade.				Battery and Other Grades.			
	In terms of Manganese (Mn) Content.				In terms of Manganese Dioxide (MnO ₂) Content.			
	N.S.W.	Q'land. (a)	W. Aust.	Australia.	N.S.W.	W. Aust.	N. Terr.	Australia.
1955 ..	443	35	19,984	20,462	403	..	975	1,378
1956 ..	436	140	25,280	25,856	371	179	914	1,464
1957 ..	391	557	33,956	34,904	385	186	668	1,239
1958 ..	516	3,181	21,926	25,623	511	195	2,113	2,819
1959 ..	620	4,350	35,996	40,966	907	162	1,406	2,475

(a) Estimated.

Zinc concentrates produced at Broken Hill and Rosebery contain manganese. However, in 1959, only 167 tons of manganese dioxide, recovered as a by-product of zinc refining at Risdon, near Hobart, were utilized.

3. **Other.**—The production in 1959 (1958 shown in parentheses) of other metallic minerals worthy of note was as follows:—

Antimony. The antimony content of antimony-bearing minerals produced was 1,280 tons (1,356 tons). Of this amount, 652 tons (664 tons) were in lead concentrate and 628 tons (692 tons) in 1,022 tons (1,116 tons) of antimony ore and concentrate.

Beryllium. Production of beryllium ore was 317 tons (247 tons), which came mainly from Western Australia where the Pilbara gold field was the main producing area. The beryllium oxide content of the ore was 3,587 units of 22.4 lb. (2,900 units).

Chromite. Production of chromite was 120 tons (776 tons) with an estimated chromic oxide content of 60 tons (386 tons). This production came from Rockhampton, in Queensland.

Tantalite-Columbite. The production of tantalite-columbite concentrate was 18,950 lb. (13,507 lb.) and the whole of this output came from Western Australia. The tantalum pentoxide and columbium pentoxide content of the concentrates was 8,499 lb. (6,736 lb.).

Other. A small quantity of native osmiridium was produced in Australia during 1959.

§ 13. Coal.

1. **Historical.**—Coal was probably the first of Australia's mineral products to be discovered, being reported from the neighbourhood of Newcastle in 1796. In the following year, outcrop coal was discovered at Coalcliff, 40 miles south of Sydney, and at the entrance to the Hunter River in the Newcastle district. By 1799, outcrop coal was being exported overseas from the latter field. All production was from the Newcastle district until 1857, when the first coal was produced from the southern field. The estimated production in 1830 was 4,000 tons and this increased to 30,000 tons in 1840, 70,000 tons in 1850, and 370,000 tons in 1860. In 1864, the first coal was discovered in the Greta-Cessnock-Maitland field which has since become the principal Australian source of gas coal.

The discovery of coal in Victoria dates from the year 1825, when the mineral was reported to have been found at Cape Paterson, but only a small quantity of coal was mined in Victoria prior to the opening of the State-owned mine at Wonthaggi in 1909. Present day Victorian production is obtained almost exclusively from this mine. In Victoria, brown coal was discovered at Lal Lal in 1857 and in the Latrobe Valley in 1874. Mining operations were first undertaken in 1889, but it was not until after the 1914-18 War that large scale mining began.

In Queensland, coal was first discovered near Ipswich in 1827 and the first colliery was established there in 1846. At Blair Athol, 240 miles west of Rockhampton, coal was discovered in 1864. This field is unique in that the field's total reserves of 200 million tons are available for opencut mining in a seam attaining a thickness of over 90 feet, the greatest thickness of black coal yet found in Australia.

The deposits of black coal at Leigh Creek, 377 miles north of Adelaide, were discovered in 1888 during dam-sinking operations. Small quantities of coal were mined in 1907 and 1917, but it was not until 1944 that extensive opencut mining operations began.

In Western Australia, coal was first discovered on the Irwin River in 1846, but the discovery of the Collie field in 1883 proved to be of far greater importance. This field is located 120 miles south of Perth and commercial mining began there in 1898.

There appear to be no reliable records of the earliest discoveries of coal in Tasmania. Coal was mined on the Tasman Peninsula to provide fuel for penal settlements in the vicinity and for Hobart, and mining continued there until about 1877. In 1824, coal was discovered at South Cape Bay near the most southerly part of the island. The most important deposit is the Mt. Nicholas-Fingal-Dalmyne (St. Marys) field in the north-east part of the State.

The mining of black coal on a large scale by opencut methods first began in Australia at Blair Athol in Queensland, where in 1937, the first year of production, 18,494 tons (0.2 per cent. of total Australian black coal production for that year) were produced. Opencut mining of black coal was introduced in New South Wales in 1940, in Western Australia in 1943, in South Australia in 1944, and in Tasmania in 1950. The output from opencuts rose slowly up to 1943 when 119,406 tons (0.8 per cent.) were produced, increasing rapidly from 1944 and reaching an output of 4,102,653 tons (21.1 per cent.) in 1952. Since then, however, the output from opencut mining has declined and in 1959 it was only 1,705,374 tons (8.4 per cent.). This decline has been mainly due to the closing down of large opencuts in New South Wales, as over-production of coal began to occur late in 1952.

2. Mine Production of Black Coal.—Production of black coal according to rank in the several States during the years 1955 to 1959 is set out in the following table. The tonnages produced by underground mining and opencut mining are also shown.

BLACK COAL : PRODUCTION.
(Tons.)

Particulars.	1955.	1956.	1957.	1958.	1959.

(b) Sub-bituminous coal from an opencut mine.

(c) Sub-bituminous coal.

The principal producing centres during 1959 were as follows:—

- (i) *New South Wales.* The principal deposits worked were in the vicinity of Newcastle, Cessnock and Singleton (northern field), Lithgow (western field) and Wollongong (southern field). Tonnages mined in 1959 were: northern field, 9,338,280 tons; southern field, 4,811,754 tons and western field, 1,562,406 tons. All opencut coal was from the northern field.
The coal fields of New South Wales, predominantly bituminous, are the most important in Australia, in respect of the magnitude, quality and accessibility of reserves and the extent to which the deposits are being worked. Coal from the various seams differs in properties, coal from the Greta seam worked in the vicinity of Cessnock being particularly suitable for gas making, while coal from the Victoria tunnel, Dudley, Young Wallsend and Borehole seams, all of which are mined near Newcastle, have coking properties and are used in the steelworks. Coking coal is also obtained from the Bulli seam which is mined near Wollongong and in the Burragorang Valley. A multi-purpose coal is available in the Singleton area and steaming coals are mined around Newcastle, Lithgow, Cessnock and Wollongong.
- (ii) *Victoria.* Production of black coal in Victoria was restricted to the Gippsland district. The State Coal Mine at Wonthaggi was the main producer, and the remaining production came from small privately-owned mines.
- (iii) *Queensland.* The principal producing centres were Ipswich, 1,520,521 tons; Collinsville, 478,509 tons; Blair Athol, 175,573 tons; and Callide, 67,720 tons. Opencut coal was mined at Blair Athol, Callide, and Collinsville and the total coal won by this means was 17 per cent. of total production.
- (iv) *South Australia.* Coal was mined only at Leigh Creek, 377 miles north of Adelaide.
- (v) *Western Australia.* The only coal deposits which have been developed on a commercial scale are at Collie in the south-west of the State and all production during 1959 was from this source.
- (vi) *Tasmania.* Of the total production, 290,692 tons were produced from the Avoca and Mt. Nicholas-Fingal-Dalmaine fields in the north-east of the State. Of the remainder, 2,217 tons of semi-anthracite were produced at the Sandfly mine, near Hobart.

3. *Mine Production of Brown Coal.*—Brown coal is mined only in Victoria and production in recent years has been as follows:—1955, 10,112,206 tons; 1956, 10,559,801 tons; 1957, 10,740,989 tons; 1958, 11,643,629 tons; and 1959, 13,034,605 tons. In the past ten years, the output of brown coal has nearly doubled.

4. *Australia's Coal Reserves.*—The latest available estimate of the measured and indicated coal reserves of Australia is that prepared by the Coal and Lignites Panel of the Power Survey Sectional Committee of the Standards Association of Australia, and is shown in the following table. It should be noted that reserves can only be included in the "measured and indicated" categories when sufficient exploratory and testing work has been completed.

ESTIMATED COAL RESERVES OF AUSTRALIA, 1959.
(Million Tons.)

State.	Bituminous Coal.(a)	Sub-bituminous Coal.	Brown Coal. (Lignite).
New South Wales	8,650	800	..
Victoria	12	..	56,100
Queensland	749
South Australia	144	230
Western Australia	274	..
Tasmania	240
Australia	9,651	1,218	56,330

(a) Includes reserves of a small quantity of semi-anthracitic coal.

5. *Production in Principal Countries.*—The following table shows the production of the principal countries in 1958 and 1959 as published by the Mineral Resources Division of the United Kingdom Overseas Geological Surveys.

COAL : PRODUCTION IN PRINCIPAL COUNTRIES.
(⁰000 Tons.)

Country.	Black Coal.		Brown Coal and Lignite.	
	1958.	1959.	1958.	1959.
United States of America ..	383,205	383,837	2,167	2,482

Interstate Vessels(c) ..	198	181	171	172	148
Total	12,223	12,220	12,332	12,483	12,725
<i>Consumption as raw material—</i>					
Gas works	2,031	1,946	1,779	1,761	1,727
Coke works	3,258	3,665	3,841	3,846	4,216
Total	5,289	5,611	5,620	5,607	5,943
Exports (Oversea)	194	545	836	645	1,088
Mine Washery Refuse and Dump Losses(c)	233	274	495	660	982
Balance—Unrecorded consumption, other purposes(d)	1,098	1,067	1,088	1,072	479
Grand Total	19,037	19,717	20,371	20,467	21,217

(a) Includes miners' and colliery coal.

(b) Government railways only.

(c) Only New South Wales available.

(d) Includes net change in stocks.

After the 1939-45 War, it was found necessary to augment local supplies of black coal in Australia by increasing imports. The quantity imported reached a post-war peak of 597,866 tons in 1950-51, but has since declined as production has expanded considerably. Since 1952-53, exports have exceeded imports by a wide margin; in 1959-60, exports of black coal were 1,087,844 tons and imports were 7,678 tons. These imports were of black coal for special purposes only.

(ii) *Brown Coal.* The table following shows the production and utilization of brown coal and the production of briquettes in Victoria for the years 1955-56 to 1959-60:—

BROWN COAL: PRODUCTION AND UTILIZATION, VICTORIA.
(⁰⁰⁰ Tons.)

Year.	Production.	Consumption as Fuel.			Consumption as Raw Material in Briquette Manufacture.	Briquettes Manufactured.
		Electricity Generation.	Briquette Factory.	Other Factories. (a)		
1955-56	10,383	6,517	843	1,191	1,686	634
1956-57	10,772	6,943	806	1,309	1,613	618
1957-58	10,869	7,020	810	1,297	1,619	626
1958-59	12,243	8,470	819	1,293	1,639	643
1959-60(b)	14,101	9,300	1,198	1,248	2,396	975

(a) Recorded consumption.

(b) Subject to revision.

The briquetting plant of the State Electricity Commission at Yallourn started operations in November, 1924, and the output, which in 1926 was 95,477 tons, had increased to 180,905 tons in 1930 and to 1,513,727 tons in 1960. Approximately two and a half tons of brown coal are required to make one ton of briquettes. In December, 1956, the Lurgi high pressure brown coal gasification plant at Morwell was opened. This plant is operated by the Gas and Fuel Corporation of Victoria and produces town gas which is sent to Melbourne through 103 miles of pipeline.

7. *Exports.*—The quantities and values of the overseas exports of Australian coal and of bunker coal for overseas vessels for the five years 1955-56 to 1959-60 are shown in the following table. These shipments were made mainly from New South Wales.

COAL: OVERSEA EXPORTS AND BUNKER, AUSTRALIA.

Year.	Oversea Exports.(a)		Bunker Coal for Oversea Vessels.	
	Quantity.	Value.	Quantity.	Value.
	Tons.	£A f.o.b.	Tons.	£A f.o.b.
1955-56	193,813	780,284	38,749	165,224
1956-57	545,101	2,196,044	9,065	44,116
1957-58	836,336	3,390,628	11,608	50,656
1958-59	645,249	2,676,042	8,187	37,808
1959-60	1,087,844	4,326,810	8,117	25,380

(a) Excludes bunker coal.

New South Wales, in addition to meeting requirements within the State, supplies considerable quantities of coal to other States and for export overseas. Of the total of 17,076,000 tons produced in 1959-60, 1,951,000 tons (11.4 per cent.) were exported interstate and 1,088,000 tons (6.4 per cent.) were exported overseas. The demand for bunker coal continues to decline and in 1959-60 a total of 149,000 tons (0.9 per cent.) of New South Wales production was supplied for interstate and overseas vessels.

8. Value at the Mine in New South Wales.—Particulars of the average values at the mine (or at screens or mine washeries where these are at a distance from the mine) of saleable coal for each district and for New South Wales as a whole are shown in the following table for the years 1955 to 1959. Saleable coal excludes miners' coal, coal consumed at the mines and refuse, etc., removed by the use of hand picking belts or at mine washeries. In calculating these values, coal won by producer consumers is also excluded, and in respect of stocks of coal held at grass by the Commonwealth Government only actual sales have been taken into account. No deduction has been made in respect of excise duty operative from 1st November, 1949.

**AVERAGE SELLING VALUE AT THE MINE PER TON OF SALEABLE COAL:
NEW SOUTH WALES.**

(s. d.)

Year.	Northern District.	Southern District.	Western District.	Average for State.
1955.. .. .	59 11	58 10	55 9	59 2
1956.. .. .	59 3	58 1	55 1	58 6
1957.. .. .	58 3	55 7	50 7	56 9
1958.. .. .	56 1	55 0	47 5	54 10
1959.. .. .	52 5	54 4	47 6	52 7

9. Values in New South Wales, United Kingdom and the United States of America.—The following table shows, for the years 1955 to 1959, average values of coal produced in New South Wales, Great Britain and the United States of America. The figures give an indication of changes in average value or price within each country but they do not necessarily show the relative levels as between the countries concerned.

PRODUCTION VALUES OF COAL PER TON: NEW SOUTH WALES, UNITED KINGDOM AND UNITED STATES OF AMERICA.

Country.	1955.	1956.	1957.	1958.	1959.
	s. d.	s. d.	s. d.	s. d.	s. d.
New South Wales—Bituminous(a)	59 2	58 6	56 9	54 10	52 7
United Kingdom—Deep mined(b)	68 0½	77 0	82 1	85 7	83 5½
United States of America—Bituminous and lignite(c) ..	\$ 4.50	\$ 4.82	\$ 5.08	\$ 4.86	\$ 4.77

(a) Average selling value at the mine per ton of 2,240 lb.; the figures relate to saleable coal and include excise duty. (b) Average value in sterling at the mine per ton of 2,240 lb. (c) Average value in United States currency at the mine per ton of 2,000 lb.

10. Employment in Coal-mines.—The number of persons employed, both above and below ground, in coal-mines in each State for each of the years 1955 to 1959 is shown in the following table:—

COAL-MINES: PERSONS EMPLOYED.(a)

Year.	New South Wales.	Victoria.		Queensland.	South Australia.	Western Australia.	Tasmania.	Australia.
		Black.	Brown.					
1955	19,260	687	1,502	3,634	280	1,432	367	27,162
1956	17,918	610	1,566	3,568	260	1,190	349	25,461
1957	16,622	561	1,579	3,493	223	1,145	301	23,924
1958	15,463	516	1,540	3,295	230	999	292	22,335
1959	13,445	401	1,519	3,172	251	1,095	314	20,197

(a) Average number of persons employed (including working proprietors) during whole year.

The year of maximum employment was 1926 when 31,774 persons were engaged in the coal-mines of Australia. Shortly after that year, the industrial depression and a prolonged stoppage of work on one of the principal fields of New South Wales during 1929 and 1930 seriously affected the figures of employment. After 1933, there was a gradual increase up to a level of about 23,000 which was maintained during the war years. There was a further increase after the war to 28,303 in 1952, but since then the number in employment has fallen again. In 1959, it was 20,197.

In New South Wales, during 1959, 13,483,000 tons of coal or 88.2 per cent. of the total output of underground coal, were loaded by machinery as compared with 1,101,000 tons (9.8 per cent.) in 1939, 3,089,000 tons (32.9 per cent.) in 1949, and 12,354,000 tons (81.6 per cent.) in 1958. Similar details for other States are not available, but machinery is used to a considerable extent in Western Australian mines and to a lesser extent in Queensland.

11. Production of Black Coal per Man-shift.—(i) *Underground Mines.* The following table shows particulars of estimated black coal output per man-shift worked, (a) at the coal face, and (b) by all employees, in respect of underground mines for each State concerned and for Australia for the years 1955 to 1959. These estimates have been calculated by the Joint Coal Board from data collected fortnightly in respect of coal production and the number of man-shifts actually worked. In South Australia, black coal is won only by opencut mining.

PRODUCTION OF BLACK COAL PER MAN-SHIFT: UNDERGROUND MINES.
(Tons.)

Year.	N.S.W.	Vic.	Q'land.	W. Aust.	Tas.	Australia.
PRODUCTION PER MAN-SHIFT WORKED AT COAL FACE.						
1955	10.76	2.13	6.61	4.74	6.54	9.24
1956	11.43	2.05	6.79	5.14	7.04	9.77
1957	13.19	2.01	7.13	5.88	7.60	11.02
1958	14.48	2.04	7.28	6.67	8.01	11.96
1959	18.07	2.10	7.53	7.60	7.34	14.13
PRODUCTION PER MAN-SHIFT WORKED BY ALL EMPLOYEES.						
1955	3.29	0.86	2.66	2.06	3.08	3.14
1956	3.55	0.83	2.65	2.35	3.41	3.28
1957	3.99	0.85	2.82	2.77	3.76	3.65
1958	4.35	0.89	2.90	3.02	3.91	3.95
1959	4.90	0.93	2.95	3.35	3.72	4.37

(ii) *Opencut Mines.* In the next table, the Joint Coal Board's estimates of production of black coal per man-shift worked by all employees in opencut mines are shown for the years 1955 to 1959. There are no opencuts producing black coal in Victoria.

PRODUCTION OF BLACK COAL PER MAN-SHIFT: OPENCUT MINES.
(Tons.)

Year.	N.S.W.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia.
1955	9.18	11.42	6.02	5.77	7.78	8.11
1956	10.36	13.06	6.72	6.37	8.56	9.19
1957	11.11	12.17	9.89	6.04	7.68	10.25
1958	11.31	13.63	11.46	6.78	10.42	11.47
1959	12.47	12.50	10.36	7.64	10.47	11.08

12. **Joint Coal Board.**—After the 1939–45 War, the Governments of the Commonwealth and New South Wales agreed to create jointly a coal authority with powers similar to, and in some respects wider than, those possessed under Commonwealth war-time legislation. Following this agreement, the Joint Coal Board was created and has functioned as from 1st March, 1947. Briefly, it is the responsibility of the Board to ensure that the coal of the State is conserved, developed, worked, distributed and used to the best advantage in the public interest, and to promote the welfare of the workers in the industry. Further details of the powers and functions of the Board are contained in Official Year Book No. 39, page 887.

§ 14. Coke and Other By-products from Coal.

1. **Coke.**—The production of metallurgical coke in Australia was limited to about 250,000 tons per annum prior to the 1914–18 War. This was below local requirements and necessitated an annual import of about 27,000 tons. By 1920, production had risen to more than 500,000 tons, by 1938–39 to 1,164,873 tons, and in 1959–60 it reached the record level of 2,376,097 tons. Imports exceeded exports prior to 1952–53, but in 1952–53 and later years there has been a net export surplus. In 1959–60, exports amounted to 75,502 tons while imports were 8,802 tons. Most of the tonnage imported is petroleum coke for use in the production of aluminium.

In addition to metallurgical coke referred to above (which is produced by specialized coke works), considerable quantities of coke are produced in gas works as a by-product of the manufacture of gas. Production in gas works in 1959–60 was 758,668 tons. To date, there has been no production of petroleum coke at Australian oil refineries.

In order to avoid duplication with coal values, the figures for coke have not been included in the general tables of mineral production in the early part of this chapter.

In the following table, particulars of the production of coke in coke works and gas works in Australia are shown for the years 1955–56 to 1959–60. The figures exclude output of coke breeze, which amounted to 343,808 tons in 1958–59 and 316,549 tons in 1959–60.

COKE PRODUCTION: AUSTRALIA.
(Tons.)

Industry..	1955–56.	1956–57.	1957–58.	1958–59.	1959–60.
Coke Works	2,058,426	2,234,458	2,295,737	2,210,621	2,376,097
Gas Works	1,031,135	954,756	831,615	815,464	758,668
Total	3,089,561	3,189,214	3,127,352	3,026,085	3,134,765

2. **Other By-products from Coal.**—In addition to coke, other products are obtained from the treatment of coal by coke and gas works. Some of the main items produced, principally in coke and gas works, during 1959–60 (1958–59 in parentheses) were: crude tar, 43,474,814 gallons (49,799,660 gallons); refined tar, 29,647,990 gallons (28,696,302 gallons); and ammonium sulphate, 104,861 tons (117,489 tons).

§ 15. Mineral Oils.

In 1960, the search for oil continued throughout the Australian mainland and in Papua-New Guinea. Some significant discoveries of gas were made. In two instances, some oil was associated with gas shows.

In the Roma area, Queensland, Pickanjinne No. 1 well tested a flow of 6.2 million cubic feet of gas per day. Cabawin No. 1 well, near Tara, Queensland, blew out while drilling below 9,000 feet, and some oil was observed in association with gas. The well was quickly brought under control and drilling is continuing.

In Papua, Ichi No. 11 well was drilled to a total depth of 10,042 feet. A gas flow of about 31 million cubic feet per day was tested from an interval in the Mesozoic section. No oil shows were recorded.

The Petroleum Search Subsidy Act 1959 continues to attract applications for subsidy for stratigraphic drilling and geophysical surveys. For particulars of the subsidy, see paragraph (d), *Search for Oil*, page 1088.

Drilling programmes were undertaken in all States and Territories with the exception of South Australia and Tasmania.

In the following table, details are given of the footage drilled in the search for oil in the Commonwealth of Australia and the Territories of Papua and New Guinea during the years 1956 to 1960:—

FOOTAGE DRILLED IN THE SEARCH FOR OIL.

(a) Based on figures obtained from State Departments of Mines and the Northern Territory Mines Branch.

§ 16. Sulphur.

1. **Mine Production of Sulphur.**—There is no production of elemental sulphur (brimstone) in Australia but, although sulphur is itself non-metallic, considerable quantities are contained in certain metallic minerals produced.

It should be noted that large quantities of the lead and zinc concentrates produced are exported and the sulphur they contain is not available for utilization in Australia.

The following table shows the sulphur content of the metallic minerals produced during 1959 from which sulphur was subsequently recovered:—

SULPHUR: CONTENT OF METALLIC MINERALS PRODUCED, 1959.

(Tons.)

Mineral in which contained.	N.S.W.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia.
Lead Concentrate	48,042	(a) 266	(a) 2,160	50,468
Lead-copper Concentrate	(a) 841	(a) 841
Pyrite Concentrate	16,577	8,946	(a) 27,616	24,207	29,535	106,881
Zinc Concentrate ..	124,273	(a) 8,518	19,564	152,355
Total ..	188,892	17,464	(a) 27,616	24,473	52,100	310,545

(a) Estimated.

The principal producing centres during 1959 were:—

(i) *New South Wales.* All the sulphur produced in New South Wales was contained in lead and zinc concentrates produced at Broken Hill and in lead, zinc and pyrite concentrates produced at Captain's Flat.

(ii) *Queensland.* In Queensland, sulphur was contained in zinc concentrate milled at Mt. Isa and in pyrite concentrate produced at Mt. Morgan. No sulphur was recovered in Australia from the zinc concentrate.

(iii) *South Australia.* A pyrite concentrate containing sulphur was produced from ore mined at Nairne, 22 miles east of Adelaide.

(iv) *Western Australia.* Sulphur was recovered from pyrite concentrates produced at Norseman and at Kalgoorlie. Although both these concentrates are auriferous, gold was recovered only from that produced at Kalgoorlie. A small quantity of sulphur was contained in lead concentrates produced in the Northampton mineral field.

(v) *Tasmania.* A pyrite concentrate was recovered at Mt. Lyell after the prior separation of the copper sulphide mineral. Recoverable sulphur was also contained in lead, lead-copper and zinc concentrates milled at Rosebery, but only that contained in zinc concentrate was recovered in Australia.

The following table shows for the years 1955 to 1959 the sulphur content of minerals from which sulphur was subsequently recovered:—

SULPHUR: CONTENT OF METALLIC MINERALS PRODUCED.

(Tons.)

State.	1955.	1956.	1957.	1958.	1959.
New South Wales	140,120	187,087	207,604	197,736	188,892
Queensland	47,515	(a) 15,103	24,544	(a) 14,647	17,464
South Australia (b) ..	13,790	31,248	32,721	32,129	27,616

Tasmania	39,066	47,339	52,185	54,472	52,100
Australia ..	264,383	306,072	342,474	322,619	310,545

(a) Partly estimated. (b) Estimated.

2. **Production of Sulphuric Acid.**—The principal use of sulphur is in the manufacture of sulphuric acid, which is produced in all States and in the Northern Territory. Most of this is used for fertilizer manufacture, although small quantities are used in the rubber and chemical industries and in the preparation of uranium concentrates. Sulphur contained in lead concentrate is used for acid manufacture at Port Pirie and sulphur in zinc concentrates is used at Risdon. Pyrite concentrate is used as a source of sulphur for acid manufacture at Cockle Creek, near Newcastle, and at Port Kembla in New South Wales, and at Melbourne, Brisbane, Adelaide, Perth and Fremantle. However, half the sulphuric acid produced in Australia is made from imported elemental sulphur. The next table shows, for the years 1956 to 1960, the Australian production of sulphuric acid and the quantity of sulphur in the acid produced from various sources.

SULPHUR USED IN SULPHURIC ACID PRODUCTION: AUSTRALIA.

(Tons.)

Item.	1956.	1957.	1958.	1959.	1960.

(a) All imported.

§ 17. Non-metallic Minerals.

1. **Asbestos.**—The production of asbestos in Australia at present is only sufficient to meet about one-sixth of domestic requirements. Production in recent years has been of two types, chrysotile (white) and crocidolite (blue). The deposits of chrysotile, however, are relatively small and widely scattered, and during 1959, it was produced mainly at Nunyerry and Lionel in Western Australia and at Baryulgil in New South Wales. Production of crocidolite, which is confined to the Hammersley Ranges in Western Australia, about 200 miles south-east of Roebourne, has expanded greatly in recent years. Large scale operations were commenced there in 1943 at Wittenoom Gorge, and reserves are estimated at two million tons.

The production of chrysotile and crocidolite in Australia during the five years 1955 to 1959 is shown in the following table:—

PRODUCTION OF ASBESTOS : STATES.
(Short Tons of 2,000 lb.)

Year.	Chrysotile.			Crocidolite.
	New South Wales.	Western Australia.	Australia.	Australia.(a)
1955	661	308	969	5,025
1956	697	852	1,549	8,160
1957	676	1,556	2,232	12,438
1958	712	1,543	2,255	13,313
1959	726	707	1,433	16,442

(a) Produced in Western Australia only.

2. **Clays.**—Statistics of clay production in Australia are not entirely satisfactory, mainly because of differences between States in the classification of the various types of clays. In addition, the statistics are incomplete as some clays are outside the normal administrative control of some State Mines Departments. In the following table, the recorded production of the main types of clays produced in each State of Australia is shown for the year 1959.

PRODUCTION OF CLAYS : STATES, 1959.
(Tons.)

Type.	New South Wales.	Victoria.	Queensland	South Australia.	Western Australia.	Tasmania.	Australia.
Bentonite and Bentonitic Clay ..	56	..	96	..	133	..	285
Brick Clay and Shale ..	1,893,440	21,122,000	289,931	441,354	(a) 398,000	153,880	4,298,605

(a) Estimated.

(b) Not available.

(c) Incomplete.

3. **Gypsum.**—There are very extensive deposits of gypsum in Australia, but only the more accessible and easily worked deposits have been exploited. These deposits lie in four main regions, (a) in New South Wales stretching from around Griffith to near Broken Hill, (b) in the north-west corner of Victoria, the south-west corner of New South Wales and adjoining parts of South Australia, (c) in South Australia on both sides of St. Vincent Gulf and extending to Lake MacDonnell in the west, and (d) between Perth and Kalgoorlie in Western Australia. The South Australian deposits are the most important and more than half the total Australian production of gypsum in 1959 came from that State, where the main centres of production are Stenhouse Bay on Yorke Peninsula and Lake MacDonnell.

The building industry is the main user of the gypsum produced in Australia. The greatest part is used in the manufacture of plaster and most of the remainder in cement manufacture. A small amount is also used as fertilizer. A considerable quantity is exported, mainly to New Zealand for use in the plaster industry, and to New Caledonia for use in nickel smelting operations.

The production of gypsum in Australia is set out in the following table for the five years 1955 to 1959.

PRODUCTION OF GYPSUM : STATES.

(Tons.)

Year.	New South Wales.	Victoria.	South Australia.	Western Australia.	Australia.
1955	136,356	83,190	204,522	39,946	470,014
1956	94,203	78,895	263,136	27,121	463,355
1957	101,491	68,647	274,945	33,353	478,436
1958	90,664	72,010	306,749	35,515	504,938
1959	101,143	81,101	296,816	37,731	516,791

4. **Limestone.**—Limestone is quarried in all States, being used mainly for the manufacture of cement. Other uses are in agriculture, in the steel industry as a metallurgical flux, and in the chemical industry.

The recorded statistics of limestone production in each State of Australia for the years 1955 to 1959 are shown in the following table. Details of limestone produced for use as building or road material are not included.

PRODUCTION OF LIMESTONE(a) : STATES.

('000 Tons.)

Year.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	Australia.
1955 ..	1,690	714	(b)	987	(b)	206	3,998
1956 ..	1,700	813	(b)	1,076	(b)	179	4,264
1957 ..	1,897	846	(b)	1,135	(b)	205	4,572
1958 ..	2,061	859	(b)	1,220	(b)	235	5,324
1959 ..	2,056	1,120	(b)	1,017	(b)	230	5,305

(a) Includes shell and coral.

(b) Not available for publication, included in total for Australia.

5. **Magnesite.**—The major sources of magnesite at present are deposits at Fifield and Thuddungra in central New South Wales. Most of the output of magnesite in Australia is used for refractory purposes, particularly in the steel industry, and small amounts are used in chemical, paper, glass, rubber, and ceramic industries. Particulars of the production of magnesite in each State for the years 1955 to 1959 are set out in the table below.

PRODUCTION OF MAGNESITE : STATES.

(Tons.)

Year.	New South Wales.	Queensland.	South Australia.	Western Australia.	Australia.
1955	57,262	..	412	..	57,674
1956	63 050	..	831	804	64,685
1957	83,271	..	202	..	83,473
1958	69,030	20	341	..	69,391
1959	59,777	..	790	19	60,586

6. *Mica*.—Almost all Australian production of muscovite mica comes from the Northern Territory, though small quantities of inferior grades have been obtained from most of the States. The centre of mica production in the Northern Territory is the Harts Range area, about 130 miles north-east of Alice Springs, where mining has been carried on intermittently since 1892, and the Plenty River field, 50 miles north-east of Harts Range.

The Commonwealth Mica Pool, details of which are given on page 1094 of Official Year Book No. 46, purchased, prior to 31st December, 1960, all mica which was in accordance with certain specifications. The following table shows the quantity of muscovite mica produced in Australia during the five years 1955 to 1959:—

MUSCOVITE MICA PRODUCTION.

(lb.)

Particulars.	1955.	1956.	1957.	1958.	1959.
New South Wales—					
Scrap	20,160	15,680	7,000
Queensland—					
Scrap	21,728	..
Northern Territory—					
Trimmed	56,649	28,837	36,713	31,391	33,665
Crude and Film	35,840	170,000
Scrap	40,600	11,088	11,000

7. *Salt*.—Salt is obtained in Australia by evaporation of saline lakes and clay pans. Production satisfies local requirements and provides a considerable surplus for export. Recorded production in South Australia (the chief producing State) is shown in the following table for the years 1955 to 1959. Estimates of total Australian production are also shown.

SALT PRODUCTION.

('000 Tons.)

South Australia	291	332	339	336	358
Estimated Australian Total ..	369	409	428	430	468

8. *Other Non-metallic Minerals*.—(i) *General*. Many other non-metallic minerals are produced in Australia in considerable quantities, and are listed separately in the following paragraphs.

(ii) *Barite*. The principal centre producing first-grade barite is at Orparinna in the North Flinders Range in South Australia. The production of barite in Australia during 1959 was 6,214 tons, of which 6,145 tons came from South Australia and 60 tons from New South Wales.

(iii) *Diatomite*. Production of diatomite is carried on mainly in the eastern States of Australia. In 1959, 5,089 tons were produced, of which New South Wales produced 4,409 tons, mainly at Coonabarabran and Barraba.

(iv) *Dolomite*. Up to 1950, New South Wales was the main producer of dolomite, but in that year a large deposit at Ardrossan in South Australia, which now produces over 90 per cent. of the total output, was opened up. In 1959, South Australia produced 151,401 tons; New South Wales, 3,776 tons; Tasmania, 2,907 tons; and Queensland, 2,000 tons, making an Australian total of 160,084 tons.

(v) *Felspar*. The main demand for felspar comes from the glass and ceramic industries. Most of the Australian production of felspar comes from New South Wales, which produced 4,700 tons out of the Australian total of 6,750 tons in 1959. Of the remainder, 1,396 tons came from Western Australia and 654 tons from South Australia.

(vi) *Gemstones.* (a) *Opals.* Most of the opals won in recent years came from the Coober Pedy and Andamooka fields in South Australia which produced opals worth £422,000 in 1959. Other production in 1959 was from Lightning Ridge in New South Wales, valued at £23,000, and the Quilpie district in Queensland, valued at £1,000.

(b) *Sapphires.* In 1959, sapphires produced in the Inverell District of New South Wales were valued at £2,000 and production from the Anakie Field in Central Queensland was valued at £1,000.

(vii) *Silica.* The production of silica is not recorded in Victoria and production recorded in all other States may not be complete. The output of silica, which includes glass sand, quartz, quartzite, sand, sandstone, and silicious abrasives, but does not include production for use as building or road material, was 125,918 tons in New South Wales; 13,607 tons in South Australia; 7,140 tons in Western Australia; 6,519 tons in Tasmania; and 1,594 tons in Queensland; giving a total of 154,788 tons recorded for those States during 1959.

(viii) *Sillimanite.* In 1959, 3,633 tons of sillimanite were produced in Australia, of which 3,587 tons came from South Australia.

(ix) *Talc.* The Australian output of talc (including steatite) was 16,376 tons in 1959. South Australia produced 11,239 tons, Western Australia 4,048 tons, and New South Wales 1,089 tons.

(x) *Other.* Other non-metallic minerals produced in Australia in small quantities during 1959 were fluorspar, garnet concentrate, glauconite, industrial diamonds, foundry loam, mineral pigments, pebbles for grinding, perlite, phosphate rock, pyrophyllite, and serpentine.

§ 18. Oversea Trade in Minerals and Mineral Products.

Particulars of the quantity and value of the principal mineral and mineral product items imported into and exported from Australia during the years 1957 to 1959 are shown in the following table:—

(a) Includes lead-copper concentrate.

Considerable quantities of metallic ores, concentrates, slags and residues are exported from Australia for refining overseas. The following table shows the quantities of such items exported during 1959 and their principal metallic content as estimated by assay:—

PRINCIPAL METALLIC CONTENTS OF SPECIFIED ORES AND CONCENTRATES, ETC., EXPORTED FROM AUSTRALIA DURING 1959.

Ores and Concentrates, etc.	Quantity Exported. ton.	Metallic Contents—Estimated from Assay.						
		Copper.	Gold.	Lead.	Silver.	Tin.	Tungstic Oxide.	Zinc.
		ton.	fine oz.	ton.	fine oz.	ton.	ton.	ton.

(a) Includes lead-copper concentrate.

§ 19. Government Aid to Mining, and Mineral Control.

1. *Aid to Mining.*—(i) *Commonwealth.* (a) *Assistance to the Gold Mining Industry.* For particulars, see para. 9, page 1052.

(b) *Assistance to the Copper Mining Industry.* For particulars, see para. 8, page 1061.

(c) *Income Taxation Concessions.* For particulars of income taxation concessions to the gold, copper and uranium mining industries, see pages 1053, 1061 and 1071 respectively. Further information is given in a booklet entitled *Income Tax for the Mining Industry*, issued by the Commissioner of Taxation.

(d) *Search for Oil.* The Commonwealth Government has encouraged the search for oil in Australia, Papua and New Guinea and considerable sums have been spent during recent years in geological and geophysical surveys and in drilling operations.

The Bureau of Mineral Resources, in close co-operation with the Mines Departments of the States, has continued regional geological and geophysical surveys throughout the Commonwealth. In 1957, the Commonwealth introduced the Petroleum Search Subsidy Act 1957, whereby stratigraphic drilling operations were subsidised to the extent of 50 per cent. of cost. In 1959, the Petroleum Search Subsidy Act 1959 increased the nature of operations for which subsidy was offered, to include all types of geophysical surveys and off-structure drilling operations. Under the 1957 Act, £500,000 was set aside each year for a period of four years, and under the 1959 Act, £1,000,000 was set aside for each of three years, ending in 1962.

Under these Acts, 49 operations had been approved for subsidy to the end of 1960. For particulars of oil search operations in 1960, see § 15, Mineral Oils, page 1080.

(e) *Rewards for Discovery of Uranium Ore.* The Commonwealth Government's offer to pay rewards up to a maximum of £25,000 for the discovery of any one deposit of uranium ore was withdrawn as from 31st March, 1961.

(f) *Mica Pool.* The Commonwealth Mica Pool ceased purchasing mica on 31st December, 1960, and the Committee of Management was abolished on the same day. The Pool will continue to sell mica while stocks last.

(g) *Bureau of Mineral Resources, Geology and Geophysics.* The Bureau of Mineral Resources, Geology and Geophysics has sections dealing with geology, geophysics, mining engineering, petroleum technology and mineral economics. The geological section provides geologists to conduct all surveys required in Commonwealth Territories, and makes detailed and regional surveys in conjunction with or by arrangement with the State Mines Departments, surveys of possible oil-fields in Australia and New Guinea, surveys of mines for which financial assistance is sought, and investigations of deposits of radio-active minerals. The geophysical section conducts investigations throughout Australia and New Guinea connected with the search for metalliferous radio-active and other mineral deposits; investigations connected with exploration for coal, oil and water; regional magnetic and gravity surveys; engineering and military geophysics; and the operation of geophysical (magnetic and seismic) observatories. The Bureau works in close co-operation with the Mines Departments of the States. It has assumed full responsibility for geological and geophysical surveys in Commonwealth Territories, but suitable arrangements have been made to ensure that the local Administrations have the necessary technical advice directly available to them.

(h) *Ore-dressing and Mineragraphic Investigations.* These investigations are conducted by the Commonwealth Scientific and Industrial Research Organization as required by the industry. Ore-dressing investigations are carried out at the Ore-Dressing Laboratory, situated in the Department of Mining, University of Melbourne, and at the Ore-Dressing Laboratory, Kalgoorlie, situated at the School of Mines. The Mineragraphic Investigations Section is located in the Geology Department, University of Melbourne.

These two groups of laboratories perform complementary services—the Mineragraphic Investigations Section assesses microscopically the state of dispersion and the mineral association of ore bodies, while the Ore-Dressing Laboratories investigate the composition of ores and provide advice on suitable methods for their full-scale treatment. Much of this research is carried out on a co-operative research basis with the mining industry.

(i) *Department of Territories.* For particulars of the Northern Territory Administration, see paragraph (h) under section. (ii). *States* following.

(ii) *States. (a) General.* In addition to free assays and determinations of rocks and minerals carried out for prospectors by the Mines Departments of the States and Territories, technical officers of these departments provide advice to the mining and allied industries where required, carry out field examinations of mining prospects, advise on exploration and development, select sites for water supply, and in general give a free technical service to the mining industry.

(b) *New South Wales.* State aid to assist metalliferous mining may consist of grants to assist the prospecting and/or mining for gold and minerals, and for the purchase, removal and installation of mining plant or equipment. A quantity of mechanical equipment is also available in several localities for hire at reasonable rentals to prospectors and small mine operators, and District Inspectors have geiger counters and scheelite detectors which are loaned to approved persons.

(c) *Victoria.* Loans may be granted to assist prospecting and development or the purchase of machinery for gold mining. The Mines Department has stamp batteries in different parts of the State to crush ore for prospectors at nominal rates. Small mining companies may avail themselves of these facilities. Drilling with diamond, rotary and percussion drills is carried out by the Mines Department for mining companies and for general mineral exploration. A survey of the State's underground water reserves is in progress, in conjunction with the opening up of town water supplies from underground sources.

(d) *Queensland.* Various forms of assistance to mining are made available by the Queensland Department of Development and Mines. Grants are made from the Consolidated Revenue Fund for use on construction and maintenance of roads in mining areas. Advances are made from the Gold Mining Encouragement Fund for mining development work. This assistance is restricted to gold mines and advances are repayable from proceeds of the mine, if any. From the Assistance to Metalliferous Mining Fund, plant, such as jackhammers, compressors and pumps, is purchased and maintained. Such plant is made available on hire, the rental payments being credited back to the fund. Prospecting assistance is made available in approved cases, the rates being £2 10s. a week for a single man and £3 10s. a week for a married man with dependants. This is not repayable. From the Advances to Mining Fund, assistance by way of subsidy is advanced for mine development. Such is repayable from proceeds of the mine. The Department also maintains a treatment works for tin ores, etc., at Irvinebank, an assay office at Cloncurry, and diamond-drilling plants in several parts of the State. The Venus State mill at Charters Towers is available for the treatment of gold-bearing ores.

(e) *South Australia.* The Department of Mines provides the following services and facilities to the mineral industry:—(i) Hire of boring plant and mining equipment, boring and testing of mineral deposits, financial subsidies in approved cases for prospecting and mining development, development of sub-surface water supplies for farming pastoral, irrigation and mining purposes, and purchase of basic metal ores from prospectors; (ii) geological examination of mineral deposits, water supply, dam foundation and drainage problems, guidance on mining legislation, and publication and issue of geological bulletins and maps. It also provides, through the Australian Mineral Development Laboratories, chemical and metallurgical analytical and assay investigation, testing and treatment of ores and minerals, petrographic, mineragraphic and radiometric determinations. Pilot scale metallurgical and chemical treatment plants are maintained and operated for the development of mineral extraction processes.

(f) *Western Australia.* Assistance is given to prospectors to the extent of £5 a week south of the 26th parallel of latitude, and of £6 a week north of that parallel; also provision is made of some tools required for prospecting.

There are twenty State batteries operating throughout the gold-fields for the treatment of ore from prospectors and small mine-owners, at a nominal charge. A cartage subsidy is also granted to such operators sending ore to State batteries for treatment.

Provision is made for loans to mine-owners who require assistance to develop mines. The Government also has a drilling scheme, financing mine-owners on a £1 for £1 basis.

(g) *Tasmania.* The Department of Mines provides financial assistance to mining lessees for the purchase of plant and machinery, for sinking, repairing or dewatering of shafts, for construction of dams and water races, for testing and proving a deposit of any mining product, for developmental work and for diamond and other types of drilling. The Department has available for hire percussion and diamond drills for exploration, as well

as a complete plant for small shaft sinking and tunnelling. Other assistance is rendered to the industry by geological and engineering advice and through ore-dressing research into metallurgical recoveries and the selection and design of treatment plant.

(h) *Northern Territory.* In order to encourage the development of the mining industry, the Northern Territory Administration has erected Government batteries at Tennant Creek, Hatches Creek, and Maranboy for the treatment of miners' ores. The Tennant Creek battery is the only one now in operation. After reconstruction, it was re-opened for public crushing in October, 1958, and has been fully employed since that date. The re-opening of the Hatches Creek and Maranboy batteries will depend on the revival of small scale wolfram and tin mining, respectively, in these areas. The Administration is erecting another battery at Mount Wells, near Burrundie, to treat tin, gold and lead ores. It is expected that this battery will commence crushing towards the end of 1961. The crushing charges are subsidized by Government grants. In addition, the Administration provides cartage subsidies and financial advances to encourage miners to carry out developmental work. Roads and water supply services are provided and maintained for mines under active development throughout the Territory.

2. *Control of Minerals.*—(i) *Control of Exports of Metals and Minerals.* Certain metals and minerals produced in Australia are subject to export control for one or more of the following reasons:—

- (a) the necessity of conserving resources;
- (b) the inadequacy of local production to fulfil domestic demand;
- (c) the strategic importance of the minerals;
- (d) to encourage processing of the minerals in Australia prior to export.

Minerals and metals subject to export control include iron ores and concentrates; pig-iron; manganese ores; beryllium ores and concentrates; lithium ores and concentrates; minerals containing uranium; and minerals, including monazite, containing thorium. Mixed concentrates of beach sand minerals are prohibited exports but the major constituent minerals (rutile, zircon and ilmenite) may be exported.

(ii) *Radio-active Minerals.* During 1953, Commonwealth Legislation was enacted to set up an Atomic Energy Commission which is responsible, in an overall sense, for the production and utilization of uranium in Australia. This Act, the Atomic Energy Act 1953–1958, supersedes the Atomic Energy (Control of Materials) Act of 1946, but retains a provision of that Act which provides for control of substances which could be used for production or use of atomic energy. It gives the Commonwealth power to acquire such substances in their natural state and in waste materials from mining operations, to carry on mining and other operations necessary for the recovery of such substances, and to pay compensation for such acquisition. It also gives the Commonwealth power to obtain possession of such substances held by any person.

Further information concerning the Atomic Energy Commission appears in Chapter XXX.—Miscellaneous.

CHAPTER XXVIII.

DEFENCE.

§ 1. Department of Defence.

1. **Functions and Organization.**—(i) *Functions.* Subject to the authority of Cabinet, the Minister and Department of Defence are responsible for the following functions.—

The formulation and general application of a unified defence policy relating to the Defence Forces and their requirements, including:—(a) co-operation in British Commonwealth and regional defence and the defence aspect of the Charter of the United Nations; (b) the supply aspect of defence policy, including the review of production programmes and capacity; (c) the scientific aspect of defence policy; and (d) the financial requirements of defence policy and the allocation of funds made available.

The defence aspect of armistice and peace terms, control commissions, and forces of occupation.

Matters of policy or principle and important questions having a joint Service or inter-departmental defence aspect.

The defence aspect of questions relating to the organization and machinery for—(a) co-operation in British Commonwealth defence; (b) co-operation in regional security, including obligations under the United Nations Charter; (c) higher direction in war; and (d) higher direction of the Services.

The Commonwealth War Book, which is a summary of national plans for an emergency as developed in departmental war books.

The administration of inter-Service organizations, such as the joint intelligence machinery.

The defence aspect of:—the strength and organization of the forces, higher appointments in the Services, honours and awards.

Advice on the military aspect of civil defence.

(ii) *Organization, higher defence machinery and the control of the joint Service machinery.*

The joint Service and inter-departmental advisory machinery of the Department consists of various committees headed by the Defence Committee, the Chiefs of Staff Committee, the Defence Administration Committee and the Joint War Production Committee.

The Defence Committee is a statutory body consisting of the Secretary, Department of Defence, who is Chairman, the Chairman of the Chiefs of Staff Committee, the Chiefs of Staff of the three Services, the Secretary, Prime Minister's Department, the Secretary, Department of External Affairs, and the Secretary to the Treasury. Its function is to advise the Minister for Defence on—

(a) The defence policy as a whole and the co-ordination of military, strategic, economic, financial and external affairs aspects of defence policy,

(b) matters of policy or principle and important questions having a joint Service or an inter-departmental defence aspect, and

(c) such other matters having a defence aspect as are referred to the Committee by or on behalf of the Minister for Defence.

The Chiefs of Staff Committee meets regularly for the discussion of technical matters on a joint service basis, and is responsible in peace for the preparation of strategic appreciations and military plans. The functions of the Defence Administration Committee, in addition to the regular review of the progress of the Defence Programme, include the co-ordination and integration of Service activities and the improvement of methods and organization. The function of the Joint War Production Committee is, briefly, to examine the relation between strategic plans and their requirements to ensure that the war potential for them exists. The major committees subordinate to the Defence

Committee and/or the Chiefs of Staff Committee comprise the Principal Administrative Officers Committee (Maintenance and *Matériel*), the Principal Administrative Officers Committee (Personnel), the Defence Research and Development Policy Committee, the Joint Planning Committee, the Joint Intelligence Committee and the Joint Administrative Planning Committee.

(iii) *Defence Business Board.* The Defence Business Board furnishes advice on business matters of common interest to the three Services, or important subjects on which the collective advice of the Board is desired from the business aspect, with a view to promoting efficiency and economy in the execution of the Defence Programme. The Board comprises businessmen who serve in a part-time honorary capacity and consists of an independent chairman and deputy chairman and the business advisers of the three Service Departments.

2. *Basis of Current Defence Policy.*—The main strategic factors affecting current defence policy may be summarized as follows.—

(i) Because of the nuclear deterrent, the outbreak of limited or local wars is more likely than a global or full-scale war.

(ii) In any likely war in the foreseeable future, Australia's interests will most likely be centred in South-East Asia, which is its first line of defence.

(iii) The defence of South East Asia and Australia is to be sought through the concept of collective security. The greatest importance is attached, in Australia's defence policy and planning, to participation in the collective defence arrangements developed in its area of strategic interest—SEATO, ANZUS and British Commonwealth arrangements for defence co-operation. Such arrangements are entirely in accord with the United Nations Charter.

3. *The Defence Programme.*—(i) *Programme.* The level of national defences must be adequate to enable Australia to meet its regional and home defence responsibilities. The present three year defence programme which runs until June, 1962, is based on a comprehensive review of defence policy which was undertaken in 1959. It is designed to meet present strategic requirements and has, as its primary aim, the continual improvement of the ability of the Australian forces to act swiftly and effectively, in co-operation with allied forces, to meet limited or local war situations. Emphasis is placed in the programme on two major points: first, to have the forces, both regular and citizen, more readily available than they have been in the past; secondly, to provide them with modern equipment, in greater quantity and more varied types. Equipment used by the Australian forces will be standard or compatible, as far as possible, with that used by United States forces, with whom they are associated in defence arrangements.

Primary emphasis is placed in the Royal Australian Navy on anti-submarine capability and training, and provision exists for the acquisition of aircraft, vessels, and other equipment suitable for this purpose. Two new type anti-submarine frigates have already been delivered to the R.A.N. By agreement with the Royal Navy, modern submarines are maintained on the Australian station for effective anti-submarine training. For particulars of the operational fleet, *see* page 1096.

Important decisions relating to Army organization which will improve considerably the availability and operational effectiveness of the Australian Army, both regular and citizen forces, have been taken and are being implemented. The Army is now composed entirely of volunteers, and the combat elements are being based on the new pentropic division (*see* page 1097). The programme for modernizing army equipment is being put into effect, and further modern weapons, vehicles, aircraft, and marine craft are being obtained.

For the R.A.A.F., the Mirage III. aircraft with airframes and engines manufactured to a substantial extent in Australia has been selected as the future replacement of the present Avon Sabre fighter aircraft. Previous decisions taken to strengthen elements of the R.A.A.F. are being implemented.

In the field of research and development, Australia is making its principal contribution through the Long Range Weapons Establishment which is a joint United Kingdom-Australian effort for the testing of guided weapons. The executive authority for this project is the Department of Supply (*see* p. 1101).

(ii) *Financial.* Details of defence expenditure for 1959-60 and the allocation of the Defence Vote for 1960-61 are set out in the two tables which follow:—

DEFENCE EXPENDITURE, 1959-60.

(£'000.)

Service or Department.	Maintenance.	Capital Material Requirements, Machinery, Plant and Equipment.	Capital Buildings, Works and Acquisition of Sites.	Total Expenditure.
Defence	1,168	42	21	1,231
Navy	32,647	8,430	1,216	42,293
Army	52,571	9,626	3,536	65,733
Air	44,335	13,471	4,043	61,849
Supply	13,726	2,663	4,411	20,800
Other Services	1,204	1	474	1,679
Total	145,651	34,233	13,701	193,585

DEFENCE VOTE, 1960-61.

(£'000.)

Service or Department.	Maintenance.	Capital Material Requirements, Machinery, Plant and Equipment.	Capital Buildings, Works and Acquisition of Sites.	Total Expenditure.
Defence	1,256	55	31	1,342
Navy	31,755	11,317	1,644	44,716
Army	50,926	11,344	3,369	65,639
Air	45,669	13,494	4,115	63,278
Supply	14,712	3,342	3,167	21,221
Other Services	1,343	84	530	1,957
Total	145,661	39,636	12,856	198,153

(iii) *Personnel Strengths.* The personnel strengths of the Services at 31st December, 1960, are shown in the following table:—

PERSONNEL STRENGTHS: SERVICES, DECEMBER, 1960.

Category.	Navy.	Army.	Air Force.	Total.
Permanent Forces	(a) 10,519	20,702	15,006	46,227
Citizen Forces (Volunteers)	(b) 7,842	25,765	748	34,355
Total Forces	18,361	46,467	15,754	80,582

(a) Excludes 28 cadet midshipmen not on pay.

(b) Excludes 185 nominal reservists.

4. **Australian Forces Serving in Malaya.**—Australia has participated with the United Kingdom and New Zealand in the Commonwealth Strategic Reserve in Malaya since it was first established in 1955. At the request of the Government of the Federation of Malaya, the Strategic Reserve continues to be stationed in that country and to assist in border security operations against the communist terrorists.

§ 2. Naval Defence.

1. **Administration.**—Under the provisions of the Constitution, the Minister of State for the Navy administers the Department of the Navy. Under the Naval Defence Act 1910–1952, the Royal Australian Navy is administered by the Naval Board. The Naval Board consists of the Minister as Chairman, four Naval Members, and the Secretary, Department of the Navy.

2. **Historical.**—Prior to 1901, naval defence systems were organized under the State Governments. Information regarding these systems is given in Official Year Book No. 2, page 1084. An outline of the development of Australian naval policy is given in Official Year Books No. 3, page 1060, and No. 12, page 1012. An account of the building of the Australian Navy, its cost, the compact with the Imperial Government, and other details appears in Official Year Book No. 15, pages 921–23. The growth and the activities of the Royal Australian Navy during the 1939–45 War are shown in Official Year Book No. 36, pages 1023–27.

3. **Link with the Royal Navy.**—Strong links with the Royal Navy are maintained by a constant exchange of officers for extended tours of duty, and by a full exchange of information and ideas. A liaison staff is maintained by the Royal Australian Navy in London, and by the Royal Navy in Australia. Advanced training and staff courses in the United Kingdom are provided by the Royal Navy for Royal Australian Navy officers.

A liaison staff is also maintained by the Royal Australian Navy in Washington and a comprehensive exchange of information is provided by this link. Staff courses in the United States are also attended by officers of the Royal Australian Navy.

4. **Strength of the Fleet.**—Ships in commission at June, 1961. were.—

H.M.A. Fleet.

- 1 Aircraft carrier.
- 4 Destroyers.
- 3 Fast anti-submarine frigates.
- 5 Frigates.
- 4 Auxiliary vessels.

5. **Personnel.**—The authorized establishment strength of the Royal Australian Navy has been pegged at 12,800 comprising 1,427 officers and 11,373 ratings. In December, 1960, the actual strength of the Naval Forces, permanent and reserves, serving full time, was 1,170 officers and 8,912 ratings, including 124 native ratings of the Papua and New Guinea Division of the Royal Australian Navy. 68 cadet midshipmen were undergoing training at the Naval College. 14 officers and 296 ratings were serving in the Women's Royal Australian Naval Service. Reserve strength comprised 1,095 officers and 6,812 ratings, serving part-time.

6. **Women's Royal Australian Naval Service.**—The established personnel strength of the W.R.A.N.S. is 16 officers and 370 ratings. They serve in the shore establishments in the following categories: Radio-operators, Regulating, Writers, Stores Assistants, Sick Berth Attendants, Motor Transport Drivers, Wrans (Radar Plot), Cooks and Stewards.

7. **Reserve Training.**—Members of the Royal Australian Naval Reserve carry out limited training at night or on Saturday afternoons, plus 13 days' annual continuous training; engagements are for three years and pay is approximately that of the Permanent Naval Forces. Special courses and service of longer duration are available to selected members. The Royal Australian Fleet Reserve consists of former ratings of the R.A.N., R.N., or a Dominion Navy whose obligation to perform training is determined by the length of their permanent naval service.

8. **Fleet Air Arm.**—The Fleet Air Arm of the Royal Australian Navy maintains two front line squadrons, embarked in the operational carrier, H.M.A.S. *Melbourne*. This ship is fitted with an angled deck, steam catapult and mirror deck-landing sights. Training and support squadrons for H.M.A.S. *Melbourne's* Sea Venom jet all-weather fighter and ground attack aircraft and Gannet turbo-prop anti-submarine aircraft are based at the Naval Air Station H.M.A.S. *Albatross* at Nowra, New South Wales.

9. **Ship Construction and Repair.**—Under the present ship construction programme, two anti-submarine frigates are completing at Australian dockyards and will commission in July, 1961. Two more have been launched and are fitting out.

In addition, six coastal minesweepers are being purchased in the United Kingdom and a survey vessel will be constructed at the State Dockyard, Newcastle.

10. **Naval College.**—The Royal Australian Naval College, transferred in 1930 from Jervis Bay, A.C.T., to Flinders Naval Depot, was re-established at Jervis Bay in January, 1958, and was commissioned as H.M.A.S. *Creswell*.

11. **Training Establishments.**—Flinders Naval Depot, at Crib Point, Westernport, Victoria, is the basic training establishment for ratings in the permanent forces, while several advanced training schools are established in Sydney, New South Wales. The Apprentice Training Establishment at Quaker's Hill, New South Wales, provides secondary education as well as training in trades in which the lads will be employed during their service in the Royal Australian Navy. Junior recruits training was introduced at Fremantle, Western Australia, during the latter half of 1960. A large proportion of instructional hours is devoted to school subjects, and the remaining instructional time is basic naval training and disciplinary training, so that on completion of training, ratings will be ready to undergo technical and specialist courses.

12. **The Australia Naval Station.**—Defined limits of the Australia Station are as follows.—

Eastern.—From 3° 30' North, 169° East, south to 1° South, thence east to 170° East, thence south along this meridian to 30° South, thence to 45° South, 160° East, thence south along this meridian.

Northern.—From 3° 30' North, 169° East, west to 125° East, thence south to the Coast of Celebes, thence west along the Coast of Celebes to 120° East, thence south along this meridian to 10° South, thence west to 78° East.

Western.—From 10° South, 78° East, south along this meridian.

13. **Ship's Service Outside Australian Waters.**—During the year ended June, 1961, H.M.A. Ships *Melbourne*, *Vendetta*, *Vampire*, *Voyager*, *Quiberon*, *Quickmatch* and *Queenborough* served on the Far East Station as units of the Commonwealth Strategic Reserve with headquarters at Singapore. H.M.A. Ships *Diamantina*, *Swan* and *Gascoyne* also made visits beyond the limits of the Australia Station.

14. **Papua and New Guinea Division of the Royal Australian Navy.**—A Papua and New Guinea Division of the Royal Australian Navy, consisting of native ratings, was inaugurated in July, 1951, as a separate part of the Permanent Naval Forces for employment in Papua and New Guinea and adjacent waters.

15. *Ships of the Royal Australian Navy.*—The following ships were in commission or in reserve in June, 1961:—

SHIPS OF THE ROYAL AUSTRALIAN NAVY, JUNE, 1961.

Vessel.	Description.	Displacement.
In Commission—		Tons.
<i>Melbourne</i>	Aircraft Carrier	15,680
<i>Anzac</i>	Destroyer	2,436
<i>Vampire</i>	"	2,789
<i>Vendetta</i>	"	2,789
<i>Voyager</i>	"	2,801
<i>Queenborough</i>	Frigate	2,020
<i>Quiberon</i>	"	2,020
<i>Quickmatch</i>	"	2,020

(a) Commissions July, 1961.

§ 3. Military Defence.

1. *State Systems.*—A detailed historical account of the Australian defence forces prior to federation appears in Official Year Book No. 2, pages 1075–80. See also Official Year Book No. 12, page 999.

The strength of the military forces of the States at 31st December, 1900 (the eve of federation), exclusive of cadets, reservists, and rifle club members, was—New South Wales, 9,338; Victoria, 6,335; Queensland, 4,028; South Australia, 2,932; Western Australia, 2,696; Tasmania, 2,024; total for Australia, 27,353.

2. *Commonwealth Systems.*—(i) *General.* Under the terms of the Constitution Act 1900, the Commonwealth took over control of defence matters in March, 1901. The growth of the Commonwealth Military Forces may be considered to have taken place in a number of phases. For particulars of the phases which cover the period from the welding together of the military forces of the States into one homogeneous Army in 1902 up to the re-establishment of the Military Board and the organization of Commands after World War II., see Official Year Book No. 46 and earlier issues.

The National Service Training Scheme was introduced in August, 1951. Full-time training under the scheme was suspended in November, 1959, and part-time training obligations with the Citizen Military Forces ended in June, 1960.

In 1960, a complete re-organization of the Australian Military Forces was undertaken. The re-organization involved the reshaping of the Army by—

- (a) the adoption of a pentropic divisional organization,
- (b) increasing the Regular Field Force,
- (c) reducing the command, training, and administrative structure, and
- (d) converting the Citizen Military Forces to a wholly volunteer force and eliminating national service training.

(ii) *Composition of the Australian Military Forces.*

- (a) *The Australian Regular Army.* Current planning provides for a Regular Army with a strength of 21,000.
- (b) *The Citizen Military Forces.* Planned strength of the C.M.F. is 30,000 volunteers. Members are required to volunteer for service overseas in the event of war.
- (c) *Strength of the Australian Military Forces.* The effective strength of the Australian Military Forces at 30th April, 1961, was—Australian Regular Army (including 597 Pacific Islanders and 581 Women's Services), 20,240; Citizen Military Forces, 26,786.

(iii) *Organization.* Army Headquarters is responsible for the policy and control of the Australian Military Forces. The Military Board consists of the Minister for the Army, President, the Chief of the General Staff, five Military Members, and the Secretary, Department of the Army. After World War II., Command Headquarters were established to implement Army Headquarters policy and to command and administer those units placed under their authority. Command Headquarters are established in the mainland capital cities of Australia. The geographic extent of Commands is as follows:—

Northern Command.—The State of Queensland and a small part of northern New South Wales and the Territory of Papua and New Guinea.

Eastern Command.—The State of New South Wales, less those parts included in Northern, Southern, and Central Commands.

Southern Command.—The State of Victoria, the State of Tasmania, and part of southern New South Wales.

Central Command.—The State of South Australia, plus a portion of south-western New South Wales.

Western Command.—The State of Western Australia.

Northern Territory Command.—The Northern Territory.

The basic formation in the re-organized Army is the pentropic division, which is designed to have improved tactical capabilities with increased mobility and flexibility under conditions of tropical warfare. The pentropic division consists of five battle groups, each under the direct command of the divisional headquarters. Each battle group has, as its basic component, an infantry battalion of larger size and greatly increased fire-power compared with the infantry battalion which existed prior to the re-organization. In addition to the strengthened infantry battalion, each battle group includes supporting elements such as armour, artillery, engineers, signals, etc.

Two pentropic divisions have been raised. One division consists of two A.R.A. and three C.M.F. battle groups, and the other of five C.M.F. battle groups.

(iv) *Military Training Systems.* (a) *The Staff College.* Until 1938, the training of staff officers was carried out in the various Military Districts throughout Australia, except in cases where officers were selected from time to time to attend courses abroad. In 1938, an Australian Command and Staff School, located in the original Officers' Mess at Victoria Barracks, Sydney, was established. Between 1939 and 1945, the training of staff officers was carried out under varying conditions by different schools in accordance with the changing needs of the war.

Early in 1946, the Staff School (Australia) was established at Seymour, Victoria, and redesignated the Staff College in conformity with other Empire training establishments for training officers for command and staff appointments. The College was later moved to Queenscliff, Victoria, where it is at present situated. As from 1961, the course is to be of eighteen months' duration and will be held biennially. The normal intake is 50 students, and, on successfully completing the course, an officer is awarded the symbol "psc". The course is designed to train selected officers for Grade II. appointments in all branches of the staff in peace and war, and to prepare them to assume, after experience, command and higher staff appointments. Each course includes, among the students, Army representatives of the United Kingdom and other Dominions and countries.

Included in the 1961 course are students from the United Kingdom, Canada, New Zealand, India, Pakistan, Ceylon, United States of America, Thailand, Malaya, Indonesia and Burma. Vacancies on each course are reserved also for officers who may be nominated by the Royal Australian Navy, the Royal Australian Air Force and the Commonwealth Public Service.

In order to ensure common standards in tactical doctrine and staff and command training throughout the British Commonwealth, liaison is maintained with other Staff Colleges, and to this end there is also a reciprocal exchange of instructors between the United Kingdom and Australia. An instructor is now also provided by New Zealand.

(b) *The Royal Military College.* The Royal Military College was established in 1911 at Duntroon in the Australian Capital Territory for the purpose of providing trained officers for the Army. The conditions of entry are laid down in the Royal Military College Regulations and provide for admission by "normal" and "service" entries. The length of the "normal" course is four years; "service" entry cadets attend for three years. While at the College, Staff Cadets are wholly maintained, and, in addition, receive payment increasing with each year of the course. The course of instruction is organized into military and civil departments, and the instructional staff comprises officers of the Army and civilian professors. On graduation, cadets are appointed lieutenants in the Australian Regular Army. The College also trains New Zealand cadets for commissions in the New Zealand Permanent Forces under an agreement made with the Government of that Dominion.

(c) *The Officer Cadet School.* The Officer Cadet School was established in 1951 at Portsea, Victoria, for the purpose of speeding up the production of junior regimental officers for the Australian Regular Army. Serving members of the Australian Regular Army, the Citizen Military Forces, National Servicemen, and civilians between the ages of 18 and 23 years are eligible to apply for entrance. A special entry provides for candidates up to 25 years. The course is of 44 weeks' duration, and on graduation cadets are appointed second-lieutenants in the Australian Regular Army. Graduates normally proceed to further training at the Army School of the Arm and Service to which they have been allotted, before being posted to regimental duties.

(d) *The Women's Royal Australian Army Corps School.* The W.R.A.A.C. School, established in 1952 at Mildura, Victoria, moved to Mosman, New South Wales, in 1958. It has three wings, one whose primary task is the training of officer cadets for the W.R.A.A.C., one for the training of non-commissioned officers at all levels and for other special courses, and one which is a basic training wing. The officer cadets are selected from eligible applicants, who may be serving members between 21 and 32 years of age, or civilians between 21 and 30 years of age. The course is of six months' duration and, on graduation, cadets are appointed lieutenants in the Women's Royal Australian Army Corps.

(e) *The Army Apprentices' School.* The Army Apprentices' School was opened in 1948 at Balcombe, Victoria, with the aim of training youths as skilled tradesmen for the Australian Regular Army, and to form a background for an Army career with prospects of promotion. The course is open to boys between the ages of 15 and 17 years and provides training in a number of highly skilled trades. A three-year course of intensive theoretical and practical work at the Apprentices' School is followed by one year in an appropriate Army workshop or technical unit. At the end of their third year, boys are given their

Army trade test and also take the Victorian Apprenticeship Commission's final grade public examinations, which ensures that they will be accepted as qualified tradesmen in civil life when they eventually leave the Army. In addition to trade training, the Apprentices' School provides general educational facilities up to the School Leaving Standard.

(f) *Other Schools.* Army Schools have been established for the major Arms and Services for the purpose of training officers and other ranks in the up-to-date techniques of their own Arm or Service, to qualify them for promotion requirements, and to produce trained instructors. Courses at Army Schools are conducted for members of both the Australian Regular Army and the Citizen Military Forces.

The following Army Schools have been established:—

Jungle Training Centre.	Royal Australian Army Service Corps School.
Armoured School.	Royal Australian Army Medical Corps School of Army Health.
School of Artillery.	Royal Australian Army Ordnance Corps School.
School of Military Engineering.	Royal Australian Electrical and Mechanical Engineers' Training Centre.
Transportation Training Centre.	School of Music.
School of Military Survey.	Air Support Unit (Army Component).
School of Signals.	
Infantry Centre.	
Army Intelligence Centre.	

(v) *Women's Services.* In July, 1950, approval was given for the enlistment of women into the Australian Regular Army on a limited scale. Enlistment into the Royal Australian Army Nursing Service commenced in November, 1950, and into the Australian Women's Army Corps early in 1951. In February, 1951, the Royal Australian Army Nursing Service became a Corps and was designated the Royal Australian Army Nursing Corps (R.A.A.N.C.). During June, 1951, the Australian Women's Army Corps was redesignated the Women's Royal Australian Army Corps (W.R.A.A.C.). The Women's Services in the Australian Regular Army now comprise two Corps only—

- (a) Royal Australian Army Nursing Corps,
- (b) Women's Royal Australian Army Corps.

Women's Services are incorporated in the Citizen Military Forces and one company of the Women's Royal Australian Army Corps is located in each Command excluding Northern Territory Command. Companies of the Royal Australian Nursing Corps are located in each Command excluding Northern Territory Command.

(vi) *Forces Overseas.* At 30th April, 1961, 1,317 members of the Australian Military Forces were serving in Malaya and Singapore as part of the British Commonwealth Far East Strategic Reserve.

(vii) *History of the Australian Military Forces in War.* Members of the Commonwealth Military Forces have taken part in the following campaigns:—the South African War, 1902; the First World War, 1914–1918; the Second World War, 1939–1945; Korea, 1950–1954; Malaya, 1955–1960.

(viii) *The Australian Cadet Corps.* The Australian Cadet Corps is a voluntary organization. It serves as a training ground to provide, to some extent, the future officers and non-commissioned officers of the Australian Military Forces, and, as such, occupies a foremost position in the scheme of national defence. The Australian Cadet Corps, however, does not form part of the Australian Military Forces. School Cadet units are raised at educational establishments throughout the Commonwealth, except in the Northern Territory. The minimum age for enrolment is the year in which the applicant reaches the age of 14 years, and cadets, who in the large majority of schools receive a free issue of A.M.F. pattern uniform, may remain in the Cadet Corps until they cease to be pupils of the educational establishments concerned. A few units retain their own pattern school uniform and are not issued with A.M.F. pattern uniforms. Provision is made for the appointment of officers, cadet under-officers, warrant and non-commissioned officers on an authorized establishment scale from within school units. School Cadet units may be, and in many cases are, affiliated with Citizen Military Force units.

The establishment of the Corps is 35,500 all ranks, and at 31st March, 1961, comprised 299 School Cadet units with a posted strength of 34,953, all ranks.

§ 4. Air Defence.

1. **General.**—A statement regarding the preliminary steps taken in connexion with the development of air defence appears in Official Year Book No. 18, page 610, and one on the expansion and development and zones and operations of the Royal Australian Air Force during the 1939–45 War, in Official Year Book No. 36, page 1027.

2. **Administration and Organization.**—The Department of Air is responsible for policy for the organization and control of the Royal Australian Air Force. The Air Board is responsible, subject to approved policy, for the control and administration of the Royal Australian Air Force, and is constituted as follows:—Chief of the Air Staff, Air Member for Technical Services, Air Member for Personnel, Air Member for Supply and Equipment, Citizen Air Force Member, and the Secretary, Department of Air.

Headquarters of the Royal Australian Air Force is in Canberra. A R.A.A.F. representative is located in London and Air Attachés at Paris and Washington.

The units of the Royal Australian Air Force are organized into the following two functional Commands throughout Australia and its Territories.

Operational Command. Operational Command is responsible for the command of operational units and the conduct of their operations within Australia and its territories.

Support Command. Support Command is responsible for the command of training units, supply and servicing units; recruitment and individual training in the R.A.A.F.; and supply and servicing, including technical servicing of the R.A.A.F., in Australia.

The organization of the Royal Australian Air Force includes the following types of formations and units.—

Formations. These comprise a headquarters unit to control the activities of a number of units at one location. Each formation has a base squadron which provides common services to all units at the location.

Flying Squadrons. These bomber, fighter, transport and maritime reconnaissance squadrons undertake the operational and, in conjunction with operational conversion units, the operational training flying commitments of the R.A.A.F.

Operational Conversion Units. These units specialize in operational conversion training of aircrew for the bomber and fighter squadrons.

Aircraft Depots. These units specialize in major overhauls, etc., of aircraft and equipment and relieve flying unit ground staff of these commitments.

Stores Depots. Stores and equipment ordered by the R.A.A.F. are delivered to these centrally located depots for distribution to units.

Flying Training, Ground Training, Navigation, Radio and Air Armament Training Units. These units specialize in the aircrew and ground staff training required by the R.A.A.F.

Airfield Construction Squadrons. These units specialize in the construction of R.A.A.F. aerodromes and associated buildings and works services.

Royal Australian Air Force Academy. This unit is the training college for officer cadet entrants to the R.A.A.F.

Telecommunications Units. These units are responsible for the communications services of the R.A.A.F.

R.A.A.F. Staff College. This college trains specially selected R.A.A.F. officers for higher staff and command posts.

3. **Aircraft.**—Some of the aircraft which are at present being used in the Royal Australian Air Force are: bomber squadrons—Canberra; fighter squadrons—Avon Sabre; transport squadrons—Dakota, Hercules and Metropolitan; maritime reconnaissance squadrons—Neptune; Army liaison squadron—Bell Helicopter and Cessna; training—Avon Sabre, Canberra, Dakota, Meteor, Vampire and Winjeel.

4. **Establishment.**—The Royal Australian Air Force establishment comprises an operational element and a support element consisting of 16,597 personnel. The support element includes headquarters and administrative staffs and the organization for training, supply and maintenance.

5. **Strength of Royal Australian Air Force.**—At 1st March, 1961, the strength of the Royal Australian Air Force was as follows:—Permanent Air Force, 14,680; Citizen Air Force, 613; and General Reserve, 14,427.

6. **Women's Royal Australian Air Force.**—At 1st March, 1961, the Women's Royal Australian Air Force had an establishment of 842 and an enlisted strength of 665 (not included in the R.A.A.F. strength in para. 5, above). Details of enlistment and service in the W.R.A.A.F. are given in Official Year Book No. 44, page 1058.

7. **Operations in Korea and Malaya.**—Reference to R.A.A.F. participation in operations in Korea and Malaya is contained in Official Year Book No. 39, pages 1251–2 and in subsequent issues.

§ 5. War Gratuities.

Reference is made in earlier issues of the Official Year Book to the payments made under the provisions of the War Gratuity Acts 1920 (*see* No. 15, p. 930) and the War Gratuity Act 1945–1947 (*see* No. 41, p. 999).

§ 6. Department of Supply.

1. **General.**—Reference to the creation of the Department of Supply is contained in Official Year Book No. 39, page 1257. On 24th April, 1958, the Department of Defence Production was abolished and the functions previously undertaken by that Department were transferred to the Department of Supply. References to those functions and to the activities of the various branches and establishments of the former Department of Defence Production are contained in Official Year Book No. 44, pages 1059–61.

The Minister for Supply administers the Supply and Development Act 1939–1948, except insofar as it concerns the building, repair and maintenance of merchant ships and the building, extension, operation, repair and maintenance of shipyards, drydocking and repair facilities for merchant ships.

2. **Functions of the Department.**—The Department of Supply is responsible for the following functions.

Defence research and development, including the operation of the Joint United Kingdom—Australia Long Range Weapons Project, and Australian research and development through the Weapons Research Establishment, the Aeronautical Research Laboratories, the Defence Standards Laboratories and associated establishments.

Manufacture, acquisition, provision and supply of munitions (including aircraft) and miscellaneous goods and services required by the defence forces.

Arrangement of contracts for the supply of goods and the performance of services.

Operation and management of factories, workshops and undertakings concerned in the production of munitions (including aircraft), clothing, canvasware and other defence goods.

Acquisition, maintenance and disposal of strategic materials.

Planning and establishment of manufacturing facilities for the production of munitions and other defence goods.

Investigation and development of Australian sources of supply in connexion with defence.

Sale or disposal of surplus Commonwealth property other than land or buildings.

Provision of Commonwealth transport facilities outside the Australian Capital Territory.

Provision and control of stores required for or in connexion with matters administered by the Department of Supply, and general storage for other Departments as required.

Provision of security services within the Department.

Arrangements for ascertaining costs and the control and limitation of profits in connexion with the production of munitions and other defence goods.

3. Research and Development Branch.—(i) *General.* The Research and Development Branch, which is under the control of the Chief Scientist, is responsible for research and scientific development in relation to war *matériel* including the operation of the Joint United Kingdom—Australia Long Range Weapons Organization. The Chief Scientist is also the Chairman of the Board of Management for Research and Development, which is responsible for the efficient and economical conduct of research and development undertakings. The headquarters of the Branch is situated at 339 Swanston-street, Melbourne, and the following establishments are included in the Branch:—Weapons Research Establishment, Salisbury, South Australia; Defence Standards Laboratories at Maribyrnong, Victoria. Finsbury, South Australia, and Alexandria, New South Wales; Aeronautical Research Laboratories, Fishermen's Bend, Victoria.

(ii) *Weapons Research Establishment, Salisbury, South Australia.* This Establishment has three main sections, namely, the Trials and Instrumentation Wing, the Weapons Research and Development Wing and the Engineering Wing.

The Trials and Instrumentation Wing is concerned with the Joint United Kingdom—Australia Long Range Weapons Project and is responsible for the testing of guided missiles developed in the United Kingdom. The Weapons Research and Development Wing is engaged chiefly on Australian-initiated research but also provides a supporting research service for the Joint Project. The Engineering Wing designs the technical features of new installations on the range and operates the engineering facilities of the Establishment.

The headquarters of Weapons Research Establishment, consisting of the main laboratory, workshop, and administrative services, is located at Salisbury.

Accommodation has been provided in the area for a number of United Kingdom firms which are developing guided weapons under contract to the British Ministry of Supply.

A modern airfield (Edinburgh Field) has been established adjacent to the Headquarters at Salisbury to meet the flying requirements of the establishment, the flying effort being provided by the R.A.A.F.

Testing ranges have been established in South Australia at Woomera, which is approximately 280 miles north-west of Adelaide and 9 miles north of Pimba, a settlement on the Trans-continental railway line. Agreements have been signed by the Australian and United States Governments for a co-operative programme for the establishment and operation in Australia, for scientific purposes, of facilities for space vehicle tracking and communications.

A Space Research Station has been established at Island Lagoon, south of Woomera, for optical and telemetry tracking and recording of information from satellite and deep space probe vehicles. The station carries out this work with a Baker Nunn camera, Mini-track radio tracking equipment and an 85 ft. diameter dish radio telescope.

Tracking stations have been set up at Red Lake, north of Woomera, and at Muchea in Western Australia, in connexion with "Project Mercury", the "Man in Space" project of the United States National Aeronautics and Space Administration.

A modern township of 660 family houses and flats and 1,100 single quarters, together with modern amenities such as hospital, school, kindergartens, community store, swimming pool, and all sporting facilities, has been built at Woomera to accommodate the range and allied services personnel and their families.

(iii) *Defence Standards Laboratories.* The Defence Standards Laboratories at Maribyrnong, Victoria, Finsbury, South Australia, and Alexandria, New South Wales, continue to give comprehensive service to industry, the armed services and to other Commonwealth and State Departments.

The broad function of these laboratories is the application of scientific knowledge and research to the problems arising in design, development, manufacture, inspection, storage, and use of war *matériel*. Research is also carried out in connexion with the development of new and improved materials, methods and equipment of known or potential interest.

(iv) *Aeronautical Research Laboratories.* The broad function of the Aeronautical Research Laboratories is the application of scientific knowledge in the field of aeronautics to the operational and technical problems of the armed Services and industry, and to the development of new weapons and military equipment. More specifically, the Laboratories conduct investigations in aerodynamics, structures, materials, and power plants, with particular attention to aeronautical defence problems, especially those of missile design and operational effectiveness. These Laboratories also collaborate with the United Kingdom on aeronautical research matters of mutual interest.

4. *Production.*—(i) *Munitions.* The Department is responsible for the production in Australia of munitions (other than specialized Navy requirements) for the Australian Services. Production is carried out substantially in government factories but large orders are also placed with private industry.

The following government factories are currently in operation:—Ammunition—Footscray, Victoria; Explosives and Filling—Albion and Maribyrnong, Victoria; Mulwala and St. Mary's, New South Wales; Ordnance—Maribyrnong, Bendigo and Port Melbourne, all in Victoria; Small Arms—Lithgow, New South Wales; Clothing—Victoria.

With the exception of the Clothing Factory, these factories are largely complementary to each other in the manufacture of a range of basic munitions. The Ammunition Factory makes the brass and non-ferrous components of gun ammunition, including melting and rolling, and these components are then passed to the filling factories for filling and assembly. However, the Factory makes the complete round for small arms ammunition, the propellant being supplied by the Explosives Factories. Electronic fuses are also being developed and produced with this factory as the co-ordinating establishment. The private radio industry is producing the electronic components required for these fuses.

The Ordnance Factories have produced armament and propulsion units for the Naval building programme of Daring class destroyers and frigates. Heavy forgings are produced at Maribyrnong and heavy plate fabrications are produced at both Maribyrnong and Bendigo. At Maribyrnong, production capacity exists for fire control equipment. Steel shell bodies are produced at Maribyrnong and passed to Explosives Filling Factories to be filled with explosives and assembled with other components produced at Ammunition Factories.

At Port Melbourne, production capacity exists for large marine diesel engines up to 20,000 b.h.p. At present, two 5,500 b.h.p. "Doxford" engines are in production for the Australian Shipbuilding Board and two 10,500 b.h.p. Sulzer engines are in production for the Broken Hill Proprietary Company Limited, the major components of which are forged or fabricated at Maribyrnong.

The Lithgow Factory is equipped to make the rifles and other small arms for which the Ammunition Factory produces the ammunition. The Factory is currently producing the F.N. 7.62 mm. automatic rifle for the Australian Army to replace the .303 Lee Enfield rifle. Orders for the new rifle have also been received from the New Zealand, Ghana and Malayan Governments. The stocks required for these rifles are produced from Australian-grown timber and fabricated by private industry.

The Clothing Factory makes uniforms and items involving canvas materials for the three services as well as for the Postmaster-General's Department.

(ii) *Aircraft.* (a) *General.* Production of military types of aircraft and aero engines and of other aircraft components required by the Royal Australian Air Force is also administered by the Department of Supply. Planning of capacity and the negotiation of contractual arrangements in connexion with aircraft modification, repair and overhaul, and for the supply of certain aircraft and engine spare parts and airborne equipment are also functions of the Department.

The following government factories are operated:—Aircraft Factory, Fishermen's Bend, and Test Field, Avalon, Victoria; and Airframe Repair Workshops, Parafield and Northfield, South Australia.

(b) *Aircraft, Engine and Other Production.* The approved production programmes for the major aircraft manufacturing organizations comprise the French Mirage supersonic fighter, the Jindivik radio-controlled jet-propelled target aircraft, and the Malkara guided missile at the Government Aircraft Factory, Melbourne; Avon-Sabre jet-engined fighters and Rolls-Royce Avon turbo-jet engines at Commonwealth Aircraft Corporation Pty. Ltd., Melbourne; and Vampire jet-trainers at De Havilland Aircraft Pty. Ltd., Sydney.

The Mirage project is being undertaken on the basis of the Government Aircraft Factory acting as the prime contractor, with the Commonwealth Aircraft Corporation manufacturing the engine, wing and fin.

Jindiviks are being produced for the Weapons Research Establishment at Woomera and for the United Kingdom Government and the Royal Swedish Air Board. The Malkara missile is being developed in accordance with British Army needs.

Production activities included the manufacture of engine parts at the De Havilland Aircraft Engine Factory, Sydney, of aircraft pressed metal parts at Chrysler Australia Ltd., Adelaide, and of turbine and compressor blades for jet engines at National Forge Pty. Ltd., Melbourne.

(c) *Repair and Overhaul.* During the year, the R.A.A.F. continued the broad policy of returning to the factories in which they were produced all Australian-made aircraft and aero engines requiring major overhaul or the incorporation of modifications. Repair and overhaul of R.A.A.F. aircraft of certain other types and of carrier-based aircraft operated by the R.A.N. were undertaken by civilian personnel in the aircraft factories or in the works of contractors specially equipped for the purpose.

Canberra bomber and Jindivik target aircraft were repaired and modified at the Government Aircraft Factories.

Dakota transport and other miscellaneous aircraft were reconditioned and serviced at the Government workshops at Parafield, South Australia.

Vampire fighters and trainers and carrier-based Sea Venom aircraft were modified, repaired and overhauled at De Havilland Aircraft Pty. Ltd., Bankstown, New South Wales. Engines from Sea Venom, Vampire and Gannet aircraft, as well as from Centurion tanks were modified, repaired, and overhauled at the Engine Factory, Lidcombe. Propellers from the R.A.A.F. and the R.A.N. were also overhauled there.

Wright turbo-compound engines from Neptune aircraft and Allison T.56 engines from Hercules transports were overhauled at Qantas Empire Airways Ltd., Sydney, for the R.A.A.F.

The repair and overhaul of carrier-based Fairey "Gannet" aircraft for the R.A.N. and the erection of "Meteor" target aircraft for the Woomera Rocket Range were handled by the Fairey Aviation Company of Australasia Ltd., Sydney.

Sycamore helicopter aircraft, Bristol freighter aircraft, Alvis Leonides and Bristol Hercules engines were repaired and overhauled by Bristol Aviation Services, also in Sydney.

The reconditioning and servicing of aircraft instruments, electrical, electronic and other ancillary equipment and airframe components were carried out by various contractors.

(d) *Telecommunications.* Developmental and production orders were placed with industry for new and improved types of Service telecommunications equipment.

5. *Contract Board.*—(i) *General.* Under the Supply and Development Act 1939–1948, the Contract Board is the authority responsible for purchasing supplies and arranging services for the Naval, Military and Air Forces of the Commonwealth, as well as for the Department of Supply. It is also responsible for the sale or disposal of all surplus or unserviceable war matériel and other goods approved for disposal. In addition, the Board arranges purchases and disposals on behalf of other Commonwealth departments and authorities which have no public contract organization of their own, e.g., Immigration, National Development and External Affairs (Colombo Plan supplies).

(ii) *The Board and its Administrative Organization.* The Contract Board meets in Melbourne, and comprises representatives of the Departments of Supply, Navy, Army and Air. The Board's administrative organization is the Directorate of Contracts. In each

State other than Victoria, there is a District Contract Board with an administrative organization similar to the Directorate of Contracts. The table following shows, in respect of the Contract Board organization, the purchases and realizations from disposals for the years 1958-59 and 1959-60.

CONTRACT BOARD ORGANIZATION : PURCHASES AND REALIZATIONS FROM DISPOSALS.

(£.)

State.	Purchases.		Realizations from Disposals.	
	1958-59.	1959-60.	1958-59.	1959-60.
Contract Board, Victoria	31,756,415	20,870,475	1,343,623	2,566,171
District Contract Board—				
New South Wales	4,906,385	4,632,332	1,432,395	1,518,981
Queensland	868,149	1,095,748	458,951	564,946
South Australia	1,242,548	2,301,840	382,450	644,545
Western Australia	363,775	417,070	224,761	243,696
Tasmania	91,339	89,025	35,673	64,399
Total	39,228,611	29,406,490	3,877,853	5,602,738

6. **Defence Supply Planning.**—The central planning authority of the Department is the Planning Branch, the principal functions of which are:—

- (i) to plan for and to assist in the development of additional production capacity to meet the Services' munitions requirements for mobilization and war;
- (ii) to provide and administer stockpiles of relevant materials and reserve pools of plant and equipment considered essential for expansion of production in the event of war;
- (iii) to prepare and advance co-ordinated production programmes against Service orders and to analyse and interpret achievement against these programmes for the information of the Department and the Services;
- (iv) to provide advisory service in the field of instrumentation and inspection to Government factories and contractors engaged in the production of munitions requirements; and
- (v) to carry out surveys of production capacity and to indicate steps necessary to augment capacity in the event of war.

A series of Industry Advisory Committees has been established to advise the Minister and the Department in the development of industrial mobilization plans to meet the Services *matériel* requirements for mobilization and war. The Committees are: Ammunition; Electrical; Explosives and Chemicals; Machine Tools and Gauges and Munitions Factory Equipment; Materials; Military Vehicles; Radar and Telecommunications; Weapons and their Equipment; Hard Fibres; Raw Cotton; and Rubber and Allied Materials.

Members of the Committees include industrialists of wide experience and the highest ability in their chosen fields.

7. **Stores and Transport Branch.**—This Branch, administered by a Board of Management and working under the direction of a General Manager, functions as the Central Storage Authority and the Central Transport Authority for all Commonwealth Departments. It is the authority for the arrangement of furniture removals at departmental expense in all States, but not in the Australian Capital Territory or the Northern Territory. It has agents in Canberra and Darwin. It also operates a Shipping and Customs Section and the England-Australia Bulk Air Freight Scheme for Commonwealth Departments.

On 30th June, 1960, the Branch had under its control land, buildings and works, vehicles, plant and equipment valued at £9,469,026 and 3,462,861 sq. ft. of storage space as well as storage facilities for large quantities of chemicals, bulk liquids and explosives.

8. Finance Branch.—The expenditure on Department of Supply activities during the year 1959-60 is shown in the following table:—

SUPPLY: TOTAL EXPENDITURE, 1959-60.
(£'000.)

Particulars.	Expenditure.
Parliamentary Appropriations	20,800
<i>Trust Fund Accounts—</i>	
Stores and Transport	5,462
Government Factories and Establishments	15,828
Munitions Production	8,153
Defence Production Materials	171
<i>Total Trust Fund Accounts</i>	<i>29,614</i>
Total Expenditure	50,414

CHAPTER XXIX.

REPATRIATION.

§ 1. General.

The Repatriation Commission, established under the Repatriation Act 1920-1960, is a body corporate consisting of three full-time members. The head office is in Melbourne, but there is a branch office in each State under the control of a Deputy Commissioner.

Its principal functions are—

- (i) the payment of war and service pensions to ex-service men and women and their dependants;
- (ii) the provision of medical treatment to ex-service men and women for injuries and illnesses caused or aggravated by their war service;
- (iii) the provision of medical treatment in certain circumstances to ex-service men and women, who are suffering from injuries and illnesses not caused or aggravated by war service;
- (iv) the provision of medical treatment to widows and dependants of deceased ex-servicemen whose deaths are due to war service.

Other functions of the Repatriation Commission are outlined in a later section of this chapter (*see* § 5, General Benefits and Miscellaneous, page 1115).

The Repatriation (Far East Strategic Reserve) Act 1956, which provided benefits for members of the defence forces who served with the British Commonwealth Far East Strategic Reserve in Malaya, came into force on 1st September, 1957. Particulars of pensions under this Act are excluded from the following tables, such information as is available being shown in footnotes.

§ 2. War Pensions.

1. **General.**—The first provision for the payment of war pensions to ex-servicemen and their dependants was made by the Commonwealth Parliament in the War Pensions Act 1914, which came into operation on 21st December, 1914. This Act was repealed in 1920 by the Australian Soldiers' Repatriation Act (amended from 31st December, 1950, to the Repatriation Act). Owing to limitations of space, only some of the main features relating to war pensions under the Repatriation Act 1920-1960 are set out in the following paragraphs.

(i) *Eligibility for Pension.* The 1943 amendments to the Repatriation Act considerably widened the provisions in this respect, to the benefit, mainly, of members of the Citizen Military Forces who had not served outside Australia. These provisions are summarized as follows:—

- (a) A member of the forces who served (1) outside Australia, (2) in the Territories of Australia, such as Papua and New Guinea, or (3) within Australia in

circumstances which can be regarded as combat against the enemy, is covered for war pension purposes in respect of incapacity or death which may result from any occurrence that happened during the period from the date of his enlistment to the date of the termination of his service in respect of that enlistment.

(b) In other cases where a member served only in Australia, incapacity or death to be pensionable must have been attributable to service.

(c) There is a third ground applicable to all in (a) and those in (b) who had at least six months' camp service. This provides that, where a condition existed at enlistment, a pension may accrue if it is considered that the condition was aggravated by service.

(ii) *Pensions for Incapacity.* From 1st October, 1959, the 100 per cent. pension rate for an ex-serviceman's incapacity was increased from £5 2s. 6d. to £5 10s. 0d. a week (higher rates were payable in respect of certain commissioned ranks). The rates for wives and children of incapacitated ex-servicemen are £1 15s. 6d. and 13s. 9d. a week, respectively.

(iii) *Supplementation of Pensions.* Where an ex-serviceman is, because of his war disability, temporarily (for at least three months) precluded from earning other than a negligible percentage of a living wage, an additional pension may be granted to bring the total pension to the ex-serviceman up to £12 15s. a week, an increase of 10s. from 29th September, 1960.

(iv) *Women's Nursing and Auxiliary Services.* Members of Women's Services are eligible for pensions and other benefits as prescribed in the Act on the same basis as male members of the Forces.

(v) *Pulmonary Tuberculosis.* If at any time after discharge, an ex-serviceman who served in a theatre of war became or becomes incapacitated, or died or dies, from pulmonary tuberculosis, war pension is payable as if the incapacity or death resulted from an occurrence on service. (See also § 3. Service Pensions.) Medical treatment may also be provided on application.

(vi) *Special Rates.* Those who have been totally blinded as a result of war service and those who are permanently and totally incapacitated receive a special pension which was increased from £12 5s. to £12 15s. a week from 29th September, 1960. The rate for tuberculous patients, Class "B" (fit for light employment), was similarly increased from £8 12s. 6d. to £8 17s. 6d. a week. In addition to the special pension, an attendant's allowance of £2 15s. a week is granted to the war-blinded and to certain others who are deemed to be in need of an attendant. A war-blinded ex-serviceman who is also affected with total loss of speech or total deafness is entitled to an attendant's allowance of £4 10s. a week in lieu of that referred to above. The wife and any children under 16 years of age receive the same rates as shown in sub-para. (ii).

(vii) *Clothing Allowance.* As from 1st October, 1959, provision was made for ex-servicemen to receive a clothing allowance ranging from 3s. 9d. to 7s. 6d. weekly for damage to clothing caused by the use of an artificial limb or other appliance, where the incapacity is due to war service, or by the use of oils, ointments, or other substances used in the necessary treatment of accepted disabilities, e.g. skin diseases, suppurating wounds, etc.

(viii) *Specified Disabilities.* Where the disability is amputation of a limb or limbs or total loss of vision in one eye, amounts ranging from 13s. 6d. to £7 5s. a week in addition to the statutory rate of pension are payable as from 29th September, 1960. In addition, attendants' allowances of either £2 15s. or £4 10s. a week are payable in certain double amputation cases.

(ix) *Time Limit Removed for Wives and Children.* Prior to the 1950 amending Act, wives who were married and children who were born after specified dates, were ineligible to receive a war pension. This time limit was removed as from 2nd November, 1950.

(x) *Rates of Pension for Death.* (a) *Widows.* From 1st October, 1960, the rates of pension were increased by 5s. a week, the minimum rate being increased from £5 5s. to £5 10s. a week (higher rates are payable in respect of certain commissioned ranks).

In addition to pension, a widow receives an allowance if she has a dependent child or children under the age of 16 years, or if she is over 50 years of age, or is permanently unemployable, or has a child over 16 years who is undertaking education or training and who is, in the opinion of the Commission, not receiving an adequate living wage.

(b) *Children.* From 2nd October, 1958, the rate of pension for the eldest child (under 16 years of age) was increased from £1 6s. 6d. a week to £1 11s. 6d. a week, and that for each younger child from 18s. 6d. a week to £1 2s. 6d. a week. Additional pension of 6s. a week may be paid in certain circumstances. Where both parents are dead, pension payable to each child was increased from £2 8s. a week to £3 3s. a week.

(xi) *Widowed Mother on Death of Member.* A pension ranging from £2 5s. to £4 3s. a week, according to the rank of the ex-serviceman, may be granted to the widowed mother of a deceased unmarried son, provided widowhood occurred either prior to or within three years after the death of the member. The pension may be supplemented by payment of an additional amount (not exceeding £5 a week as from 29th September, 1960) according to the extent of other income of the pensioner. The value of property owned does not affect the pension.

2. *Appeals Tribunals.*—The principal Act was amended, as from 1st June, 1929, to create tribunals to hear appeals in respect of war pensions. The War Pensions Entitlement Appeal Tribunal is empowered to hear and decide any appeal by or on behalf of ex-servicemen or their dependants against a decision of a Repatriation Board or the Repatriation Commission that the incapacity or death of an ex-serviceman did not arise out of war service. Assessment Appeal Tribunals were created to hear and decide any appeal against a current assessment or a "Nil" assessment of war pension made by the Repatriation Commission in respect of the incapacity of an ex-serviceman which had been accepted as arising out of war service. Provision was made by subsequent legislation to enable the Tribunals to hear appeals by certain members whose application for a service pension had been refused on the grounds that they were not suffering from pulmonary tuberculosis or were permanently unemployable.

3. *Summary of War Pensions, 1959-60.*—The following table provides a summary of war pensions for the 1914-18 War, the 1939-45 War, and the Korea and Malaya operations:—

WAR PENSIONS: SUMMARY, AUSTRALIA, 1959-60.

Particulars.	1914-18 War.	1939-45 War.	Korea and Malaya Operations.	Total. (a)
New claims granted	2,343	28,397	908	31,648
Restorations	421	1,159	4	1,584
Claims rejected (gross)	2,638	17,852	1,174	21,664
Pensions cancelled or discontinued	1,017	12,605	80	13,702
Deaths of pensioners	4,465	2,681	18	7,164
Number of pensions in force at 30th June, 1960	124,713	523,846	5,712	654,271
Annual pension liability at 30th June, 1960	22,428,690	33,056,692	311,195	55,796,577
Amount paid in pensions during the year 1959-60	(b)	(b)	(b)	54,361,865

(a) Excludes 65 Far East Strategic Reserve pensioners with annual liability of £3,733. (b) Not available.

4. *Classes of War Pensions, Australia, 1959-60.*—(a) *New Claims Granted.* The following is an analysis of the total number of new claims granted during 1959-60:—

WAR PENSIONS: NEW CLAIMS GRANTED, AUSTRALIA, 1959-60.

Class.	1914-18 War.	1939-45 War.	Korea and Malaya Operations.	Total. (a)
Ex-servicemen	916	5,922	202	7,040
Wives of ex-servicemen	1,101	6,010	192	7,303
Children	199	15,871	508	16,578
Other dependants	127	594	6	727
Total(a)	2,343	28,397	908	31,648

(a) Excludes 55 Far East Strategic Reserve pensioners.

(b) *Pensions in Force.* The following table shows the number of pensions in force at 30th June, 1960, for each war and for each class of pensioner:—

WAR PENSIONS IN FORCE: AUSTRALIA, 30th JUNE, 1960.

Class.	Number of Pensioners at 30th June, 1960.			
	1914-18 War.	1939-45 War.	Korea and Malaya Operations.	Total. (a)
Ex-servicemen	52,324	155,534	1,864	209,722
Wives	47,221	130,350	1,279	178,850
Children	2,251	211,039	2,311	215,601
War widows	21,319	12,899	66	34,284
Children of deceased ex-servicemen	290	6,673	106	7,069
Orphans	26	114	..	140
Parents	1,004	6,991	83	8,078
Brothers and sisters	60	100	3	163
Others	218	146	..	364
Total(a)	124,713	523,846	5,712	654,271

(a) Excludes 65 Far East Strategic Reserve pensioners.

(c) *Special Rate Pensions.* At 30th June, 1960, special rate pensions were being paid to the following classes of ex-servicemen:—

WAR PENSIONS: MEMBERS ON SPECIAL RATES, AUSTRALIA, 30th JUNE, 1960.

Class.	1914-18 War.	1939-45 War.	Korea and Malaya Operations.	Total.
Blinded ex-servicemen	254	219	3	476
Tuberculous ex-servicemen	521	459	6	986
Totally and permanently incapacitated ex-servicemen	12,048	5,892	19	17,959
Tuberculous, Class " B "	129	247	1	377

5. *Number of War Pensioners and Annual Liability, States, etc., 30th June, 1960.*—The following table shows the number of pensions in force and annual liability for each war at 30th June, 1960, according to place of payment. (The amount paid is shown on p. 1112.)

WAR PENSIONS: NUMBER OF PENSIONERS AND ANNUAL LIABILITY, 30th JUNE, 1960.

Where Paid.	Number of War Pensions in Force at 30th June, 1960.				Annual Pension Liability (£.) (a)

§ 3. Service Pensions.

1. **General.**—The Repatriation Act 1920–1960, administered by the Repatriation Department, provides for a service pension to be paid, subject to a means test of income and property, to the following persons:—

- (i) A male ex-serviceman who is sixty years of age and who served in a theatre of war, or to an ex-servicewoman who is 55 years of age and who served abroad. No pension is payable to the wife or children under 16 years of age of an ex-serviceman granted a service pension on account of age.
- (ii) An ex-serviceman who is permanently unemployable and who served in a theatre of war (or in the case of an ex-servicewoman, who served abroad). Service pensions are also payable to a pensioner's wife and up to four children under 16 years of age.
- (iii) An ex-serviceman suffering incapacity from pulmonary tuberculosis whether or not the person served in a theatre of war. Service pensions are also payable to a pensioner's wife and up to four children under 16 years of age.

Only those persons who qualify under (iii) are entitled to receive both service and invalid pensions at the same time.

2. **Rate of Pension.**—The maximum rate of service pension is the same as that for age and invalid pensions paid by the Department of Social Services, namely, £5 a week. A member service pensioner with two or more children under 16 years of age in his care, custody and control, is eligible for a further 10s. a week for each child except the first, if he receives a service pension on the ground of being permanently unemployable, or suffering from pulmonary tuberculosis. In addition, a service pensioner in receipt of service pension at the maximum rate may also receive supplementary assistance of 10s. a week if he pays rent and is entirely dependent upon his service pension.

The maximum rate for a member's wife is £1 15s. a week; the rate for the first child under sixteen years of age is 11s. 6d. a week and for each other child (not exceeding three) 2s. 6d. a week.

The means test sets limits to the amount of income or property which a pensioner may have for the purpose of service pension. The amount of service pension payable will depend upon the claimant's "means as assessed", which consists of his annual rate of income plus a property component equal to 9d. per fortnight for each complete unit of £10 of net value of property above £200. For married couples, except where they are separated or in other special circumstances, the income and property of each for purposes of applying the means test is taken to be half the total income and property of both, even if only one is a pensioner or claimant. A person's "means as assessed" may consist entirely of income, entirely of property component, or of both income and property components. If his "means as assessed" do not exceed £182 a year (£3 10s. a week), the claimant will receive the full pension of £5 a week. If his "means as assessed" exceed £182 (£3 10s. a week) and are less than £442 a year (£8 10s. a week), a reduced pension will be payable. The rate payable will be the maximum rate of £5 a week less the amount by which "means as assessed" exceed £182 a year (£3 10s. a week). If his "means as assessed" are £442 a year (£8 10s. a week), or in the case of a married couple £884 a year (£17 a week), no service pension is payable.

A pensioner with no income may receive a full pension if the value of his property (apart from his home and personal effects) does not exceed £2,060. His pension will be reduced by 9d. per fortnight for each complete £10 of property over £2,060, but he will be eligible for some pension unless he has property (apart from his home and personal effects) worth more than £4,709, or in the case of a married couple £9,419.

Income means earnings and other forms of income derived from any source, with certain exceptions, of which the principal are—certain income derived from property, gifts or allowances from children, parents, brothers or sisters, benefits from friendly societies, child endowment, Commonwealth Health Benefits. The value of board and lodgings received by a pensioner is assessed as income at 12s. 6d. a week. Property includes all real and personal property, such as houses, land, money in hand, in a bank or on loan, shares, investments or legacies, vehicles used for business purposes, livestock. Property does not include an applicant's home, furniture or personal effects, the surrender value of life assurance policies (up to £750), value of any reversionary interest, the capital value of any life interest, annuity or contingent interest, vehicles maintained only for personal use.

Eligibility for service pensions was extended on 1st November, 1941, to veterans of the South African War 1899–1902, and in 1943 to members of the Forces of the 1939–45 War. Members who served in Korea, and those who served in Malaya prior to the commencement of the Repatriation (Far East Strategic Reserve) Act 1956, are also eligible.

An ex-serviceman or ex-servicewoman in receipt of a service pension is entitled, with certain exceptions, to free medical benefits for disabilities not caused by war. These benefits include general practitioner service, specialist service where necessary, full pharmaceutical benefits, surgical aids and appliances (including spectacles), dental treatment and treatment in Repatriation General Hospitals.

3. Operations, 1959–60.—The following table gives a summary of service pensions during 1959–60:—

Claims granted during year—

Ex-servicemen	4,395
Wives	1,531
Children	872
<i>Total</i>	<u>6,798</u>

Claims rejected during year—

Ex-servicemen	1,040
Wives	552
Children	483
<i>Total</i>	<u>2,075</u>

Service pensions cancelled or discontinued during year ..	3,890
Deaths of pensioners during year	2,161
Pensions in force at 30th June, 1960	45,818
Annual pension liability at 30th June, 1960	£6,924,312

4. Number of Service Pensioners and Amount Paid.—(i) *Summary, Australia.* The following table shows the number of service pensions in force and the amount paid in pensions for the five years 1955–56 to 1959–60.

SERVICE PENSIONS : SUMMARY, AUSTRALIA.

(a) Includes the Australian Capital Territory.

(b) Includes the Northern Territory.

§ 4. Medical Treatment of Ex-Servicemen Suffering from War Service Disabilities.

At 30th June, 1960, there were 4,437 in-patients in Repatriation medical institutions and State mental hospitals, including a number whose care was undertaken by the Repatriation Commission on behalf of other countries or Commonwealth departments. There were 419,618 out-patient attendances for treatment during the year, excluding approximately 1,580,140 treatments by local medical officers resident in metropolitan and country areas and in New Guinea. The expenditure for the year ended 30th June, 1960, was £13,609,746.

§ 5. General Benefits and Miscellaneous.

1. *Other Departmental Activities.*—(i) *General.* During the 1939–45 War, the ordinary activities of the Department in the way of general benefits for the welfare of ex-servicemen and dependants were carried on without interruption. They were mainly education and training of children under the Soldiers' Children Education Scheme, medical benefits for widows and children of deceased ex-servicemen and for widowed mothers of deceased unmarried ex-servicemen, funeral expenses for certain classes of ex-servicemen and dependants, and allowances to certain classes of dependants.

By legislation passed in June, 1940, these benefits were extended to servicemen engaged in the 1939–45 War, and in November, 1950, to those engaged in the Korea and Malaya Operations, and new benefits designed for the re-establishment of servicemen after discharge from the Forces were made available. The re-establishment benefits administered by the Repatriation Commission are:—payment of re-employment allowance while awaiting employment; provision of tools of trade and equipment where such are necessary to employment; transportation expenses to meet the cost of fares and removal of household belongings, where an ex-serviceman takes up training, employment, or a business, or settles on the land; supplementing of wages of apprentices whose apprenticeships were interrupted by war service; re-establishment loans to enable ex-servicemen and widows to establish themselves in business, practices or other occupations, including (until the Division of War Service Land Settlement began operations early in 1946) agricultural occupations; payment of re-establishment allowance during the early stages of establishment in business; gifts up to £75 for furniture to ex-servicemen who are blind or totally and permanently incapacitated, also to widows with children under 16 years of age; and free passages to Australia for wives, widows and children of ex-servicemen who married abroad (and passages outward from Australia in certain cases of ex-servicemen and dependants).

In 1949, the Commission took over the functions of the Re-establishment Division of the former Department of Post-War Reconstruction, and was responsible for the co-ordination of all matters relating to training under the Commonwealth Reconstruction Training Scheme. This scheme is now virtually concluded, because the prescribed time limits for eligibility have expired. Re-establishment of the more seriously disabled, where ordinary training is not sufficient, continues to be a function of the Commission, and special means have to be found to overcome each problem.

(ii) *General Repatriation Benefits.* The following table gives a summary of expenditure during the five years 1955–56 to 1959–60 on the more important general repatriation benefits for all wars.

EXPENDITURE ON GENERAL REPATRIATION BENEFITS: SUMMARY.

(£.)

Year ended 30th June.	Medical Treatment.	Employment and Vocational Training.	Business Loans and Furniture.	Soldiers' Children Education Scheme.	Living Allowances.	Other Benefits.	Total.
1956..	9,559,880	221,711	145,453	348,282	2,357,660	206,615	12,839,601
1957..	10,288,344	253,665	91,380	427,546	2,447,443	234,797	13,743,175
1958..	10,979,925	340,004	56,492	593,097	2,906,870	228,136	15,104,524
1959..	12,173,009	368,441	36,799	608,442	3,531,840	239,167	16,957,698
1960..	13,609,746	294,967	23,516	646,224	4,210,731	268,129	19,053,313

Included in the expenditure on medical treatment for the year 1959–60 were the following items:—*Ex-servicemen*—Operation of Institutions, £7,182,318; dispensing prescriptions, £2,119,351; fees to consultants, etc., £1,283,549; maintenance of patients in other than Repatriation Institutions, £936,001; sustenance allowance, £737,501; other, £547,193. *Dependants*—£803,833.

2. *Expenditure by the Repatriation Commission, 1959–60.*—The gross expenditure by the Repatriation Commission for the year ended 30th June, 1960, was £85,078,813, distributed as follows:—

<i>Repatriation Benefits—</i>	£	£
War and Service Pensions and Widows' Allowances ..	65,680,359	
Operation of Medical Institutions, Medical Treatment, etc.	13,906,708	
Soldiers' Children Education Scheme	646,224	
		80,233,291
<i>Other Benefits—Seamen's War Pensions, etc.</i>		141,303
<i>Administration</i>		3,659,075
<i>Capital Works and Services</i>		1,045,144
Total..		85,078,813

3. *Settlement of Returned Service Personnel on the Land.*—Reference to the settlement of returned service personnel on the land will be found in Chapter IV.—Land Tenure and Settlement, pages 102–8, of this Year Book.

4. *The Services Canteens Trust Fund.*—(i) *Introduction.* The Services Canteens Trust Fund was established under the Services Trust Funds Act 1947. This Act transferred to the Fund the profits and assets of the Army, Navy and Air Force canteens, the mess and regimental funds of disbanded wartime units, money derived from the sale of amenities supplied to the defence forces between 3rd September, 1939, and 30th June, 1947, and funds held by the A.M.F. Special Benefits Committee, the trustees of the R.A.N. Relief Fund and the trustees of the R.A.A.F. Welfare Fund.

(ii) *Establishment and Administration of the Fund.* The total amount transferred to the Fund to 31st December, 1960 was £5,526,750. The Act prescribed that, of this, £2,500,000 and such further amounts as the trustees of the Fund might from time to time decide, should be devoted to the provision of education facilities for the children of eligible ex-servicemen and women, and that the balance of the fund should be used to provide relief for ex-servicemen and women and their dependants in necessitous circumstances.

The Fund is administered by ten honorary trustees, appointed by the Governor-General. The trustees have power to determine the persons or groups of persons to benefit from the Fund and the extent of benefits to be granted within the provisions of the Act, and to appoint regional committees to assist with the administration.

Regional committees have been established in all Australian States, the Australian Capital Territory, the Northern Territory (Darwin and Alice Springs), New Zealand and London. All Australian diplomatic and consular posts also act as local representatives of the trustees. They have delegated to them by the trustees specific powers to deal with applications for assistance from the Fund.

Members of regional committees are all persons who served in the 1939-45 War or are widows of men who served during the war, and, with the exception of regional chairmen and deputy chairmen, have been selected by the trustees from nominees of the major ex-service organizations. They also serve in an honorary capacity.

(iii) *Assistance from the Fund.* (a) *General.* Persons eligible for assistance from the Fund are those who, between 30th September, 1939, and 30th June, 1947, served in the Australian Naval, Military or Air Forces, including members of the Canteens Staff of any ship of the Royal Australian Navy, persons duly accredited to any part of the Defence Force who served in an official capacity on full-time paid duty, and their dependants.

The trustees are charged under the Services Trust Funds Act with providing educational assistance, including professional and trade training, for the children of deceased or incapacitated eligible servicemen or of eligible servicemen who are in needy circumstances, and for the children of other eligible servicemen in exceptional circumstances, and with providing benefits or other relief for eligible servicemen and their dependants in necessitous or deserving circumstances.

The trustees have introduced schemes for providing welfare relief for ex-service men and women who are eligible for benefits, and for their dependants; benefits for children of eligible ex-service men and women who are suffering from serious and incapacitating afflictions; and education benefits for the children of eligible ex-service men and women. From its inauguration in 1947, the Fund is to be available for 40 years for welfare relief and for 30 years for educational benefits.

(b) *Welfare Relief.* More than one million men and women and all their dependants are eligible for benefits, and the trustees have therefore prescribed a policy for welfare relief which makes assistance available only to those who are in genuine distress from which they cannot extricate themselves by their own efforts.

Applications are carefully investigated to determine the bona fides of the applicant and of the case presented, and to help regional committees in deciding the kind of assistance if any, to be given. Where possible, investigations are made by trained social workers on the staff either of the Fund or of recognized agencies.

To 31st December, 1960, £1,146,824 had been granted as welfare relief from the fund, £804,763 to ex-servicemen and their dependants, and £342,061 to widows and orphans. The amount granted during 1960 was £51,882. A total of 26,478 ex-service men and women, and 10,341 widows and orphans were granted welfare assistance from the Fund to 31st December, 1960.

Of all persons eligible for assistance from the Fund, widows and orphans are considered likely to be in greatest need, especially in the period immediately following the death of an ex-serviceman. Consequently, every effort is made to locate these widows and orphans and their degree of need is interpreted more liberally than is that of ex-servicemen.

(c) *Assistance under Afflicted Children's Scheme.* Also considered particularly deserving of assistance are dependent children suffering from afflictions which permanently disable or seriously retard their progress, or prevent the enjoyment of normal health and strength, who face a prospect of complete or partial dependence on others for all or part of their

lives. The trustees introduced a plan to ensure that any eligible child suffering from a serious affliction may be assisted as necessary to have access to whatever treatment or facilities are available to help the child to lead as normal a life as possible, despite his or her handicap. The extent to which assistance will be granted in a particular case depends largely on the nature of the child's affliction, the facilities available, the family circumstances, and the funds that can be made available. Up to 31st December, 1960, 2,136 afflicted children had been assisted under the Afflicted Children's Scheme, involving an expenditure of £102,630.

(d) *Educational Assistance Scheme.* Educational assistance is restricted to children who are 15 years of age and over, except in exceptional circumstances, when it may be granted from the age of 13, and, in the case of orphans, when assistance may commence from the age of 12 years. The object of the trustees is to assist eligible children to obtain the highest education within their capacity. Educational assistance from the Fund is in the form of awards ranging from £5 to £200 a year depending on the cost of the course undertaken and the family circumstances. These awards are granted for practically every type of course of education, whether secondary, tertiary or commercial. They are designed to cover, or contribute towards, the cost of essential books, fees in cases where government school courses are not available, fares between the child's home and school, essential equipment and material, a uniform allowance in certain years, and a maintenance allowance for the child while at school. Provision exists for one post-graduate scholarship each year for study overseas, valued at £1,000 per annum for three years. Higher training education awards are also provided for selected students for post-graduate study in such fields as physiotherapy, speech therapy, occupational therapy, orthoptic therapy, laboratory technique, etc.

The number of children assisted under the educational scheme to 31st December, 1960, was 33,156, and the expenditure on educational awards, post-graduate scholarships and higher training education awards to 31st December, 1960, was £1,587,678.

§ 6. Seamen's War Pensions and Allowances.

The Seamen's War Pensions and Allowances Act 1940 provided for the grant of pensions to Australian mariners (defined in the Act to cover *inter alia* persons employed in sea-going service on ships registered in Australia and engaged in trading, or on certain other ships owned in Australia and operating from Australian ports) who sustained injury through enemy action, and their dependants, and to the dependants of those who were killed by enemy action. Detention allowances were provided for Australian mariners who were captured, and their dependants, during the period of detention. Compensation to Australian mariners was provided for in respect of personal effects lost or damaged through enemy action. Regulations passed in 1942 provided also for the continuance of wages for those captured by the enemy.

Amendments to the original Act and regulations raised pensions to rates corresponding to those payable under the Repatriation Act, and made mariners eligible for general benefits on the same scale as those available under that Act.

Pensions payable at 30th June, 1960, numbered 246, comprising 56 to incapacitated mariners, 100 to their dependants, and 90 to the dependants of deceased mariners, and the total expenditure during the year 1959-60 was £38,677, compared with amounts ranging between £30,000 and £35,000 in the previous four years.

CHAPTER XXX.

MISCELLANEOUS.

This chapter comprises miscellaneous statistics and other descriptive information not directly related to the subjects of the preceding chapters, arranged in sections as follows:—

1. Valuation of Australian Production; 2. Indexes of Production; 3. Consumption of Foodstuffs and Beverages; 4. Patents, Trade Marks and Designs; 5. Copyright; 6. Australian Shipbuilding Board; 7. Commonwealth Scientific and Industrial Research Organization; 8. Mount Stromlo Observatory; 9. Standards Association of Australia; 10. Industrial Design Council of Australia; 11. Film Censorship Board; 12. Australian National Film Board and the Film Division; 13. National Safety Council of Australia; 14. Australian Road Safety Council; 15. Australian Atomic Energy Commission; 16. The United Nations; 17. Australian Representation Abroad: Oversea Representation in Australia; 18. Retail Trade.

§ 1. Valuation of Australian Production.

1. General.—The value of production for Australia is computed in accordance with the decisions reached at the Conferences of Australian Statisticians and principally at the Conference held in 1935. The figures published below have been compiled by the Statisticians in the various States from the latest data available, and relate to 1959–60. The adoption of substantially uniform methods of valuing production and of estimating elements of costs of production and marketing renders the results comparable as between States.

Attention is directed to the fact that the values shown in the tables herein refer only to the production of primary industries and factories, and exclude the building and construction industry, those industrial establishments not classified as factories, and certain agricultural and farmyard produce obtained from areas of less than one acre.

The following is a brief explanation of the terms used:—

- (a) *Gross Value of Production* is the value placed on recorded production at the wholesale price realized at the principal markets. In cases where primary products are consumed at the place of production or where they become raw material for a secondary industry, these points of consumption are presumed to be the principal markets.
- (b) *Local Value* (i.e., the gross production valued at the place of production) is ascertained by deducting marketing costs from the gross value. Marketing costs include freight, cost of containers, commission, and other charges incidental thereto.
- (c) *Net Value of Production* represents local value less value of materials used in the process of production. Materials used in the process of production include seed, power, power kerosene, petrol and other oils, fodder consumed by farm stock, manures, dips, sprays and other costs. No deductions have been made for depreciation or certain maintenance costs as particulars are not available for all States. The Net Value of Production is the only satisfactory measure to use when comparing or combining the value of primary industries with those of other industries.

For the years shown in the following tables, no allowance for power, power kerosene, petrol and other oils has been made in New South Wales; and in the case of Tasmania, allowance for these items has been made in 1958–59 and 1959–60 only. In the case of the mining and quarrying industry, however, this allowance has been made throughout. Costs of materials used in the process of production are not available for all States in respect of Bee-farming, Trapping, Forestry and Fisheries, and local values have been used for these industries with consequent overstatement in net values.

2. Value of Production, Australia, 1959-60.—The following table shows particulars of the gross, local and net values of production in Australia by industries during the year 1959-60.

GROSS, LOCAL AND NET VALUE OF PRODUCTION OF PRIMARY INDUSTRIES AND FACTORIES : AUSTRALIA, 1959-60.

(b) Local value.

In the chapters dealing with the respective industries tables will be found showing the total value of production and the value per head of population for the industry by States for a series of years up to 1959-60.

§ 2. Indexes of Production.

In the first two tables in this section, indexes of price and quantum (i.e. value at constant prices) of production are given for the following industrial groups:—Agriculture, Pastoral, Farmyard and Dairying, and All Farming combined (including separate indexes for Wool and Products other than Wool). In the third table, indexes of quantum (i.e., value at constant prices) of production, exports and consumption of farm products for food use are shown.

1. **Farm Production Prices Indexes.**—The Farm Production Price Indexes shown in the following table relate to average “prices” of agricultural, pastoral, farmyard and dairying products realized at the principal markets of Australia. The “price” data used are average unit values for the total quantities of the relevant commodities produced or marketed in each year and the index numbers therefore measure both the effects of changes in prices (as such) and of variations in the quality, type, usage, etc., of products marketed. The index numbers for any year relate to the average values of products produced or marketed in that year, irrespective of the periods in which payment is received by producers.

The indexes have been calculated by the fixed-base weighted aggregative method. “Prices” for each commodity in any year are obtained by dividing gross value of production by the quantity produced in that year. In the original published series of Production Price Index Numbers, the average quantities of the relevant commodities *produced* in the period 1923–24 to 1927–28 were used as fixed weights. This series, re-computed to the base, average 1936–37 to 1938–39 = 100, was published in earlier issues of the Official Year Book (see No. 43, p. 1050). For 1936–37 and later years, the original series was replaced in December, 1952, by a revised series in which average quantities of each product *marketed* during the period 1946–47 to 1950–51 were used as fixed weights. In the revised series, the regimen was extended and modified to include farm products (as defined by Australian Statisticians) in all cases. Certain other refinements were also incorporated in the revised indexes, the principal of which was the omission from the weights used for the All Farming Index of quantities of crops marketed for livestock feeding in Australia.

**FARM PRODUCTION : INDEXES OF PRICES AT PRINCIPAL MARKETS,
AUSTRALIA.**

(Base: Average 1936–37 to 1938–39 = 100.)

Year.	Agri- culture.	Pastoral.	Farm- yard and Dairying.	All Farming.	Wool (Shorn and Dead).	Products other than Wool.

1955–56	330	451	392	397	468	373
1956–57	336	536	386	432	607	374
1957–58	336	435	382	388	473	359
1958–59	322	396	386	369	370	369
1959–60	329	464	402	403	440	391

2. **Indexes of Quantum (i.e. Value at Constant Prices) of Farm Production.**—The indexes shown in the following table relate to gross output of farm products valued at constant prices. They have been calculated by revaluing quantities of each farm product included in the indexes at the average unit gross value of each product for the base years.

In the original published series, the period 1923–24 to 1927–28 was adopted as the base for revaluing each farm product. This series, re-computed to the base, average 1936–37 to 1938–39 = 100, was published in earlier issues of the Official Year Book (see No. 43, p. 1051). For 1936–37 and later years, the original series was replaced in December, 1952, by a revised series in which average unit values for the period 1936–37 to 1938–39 were used. The regimen used for the revised series was extended and modified to include farm products (as defined by Australian Statisticians) in all cases. Certain other refinements were incorporated in the revised indexes, the principal of which was the omission, in calculating the All Farming Index, of quantities of crops fed to livestock in Australia.

INDEXES OF QUANTUM^(a) OF FARM PRODUCTION, AUSTRALIA.

(Base: Average 1936–37 to 1938–39 = 100.)

Year.	Agri- culture.	Pastoral.	Farm- yard and Dairying.	All Farming.	Wool (Shorn and Dead).	Products other than Wool.

1959–60	140	163	123	144	172	136

(a) Indexes of value at constant prices, i.e., quantities revalued at average unit values for the base years (see text preceding table).

3. **Farm Products for Food Use: Indexes of Quantum (i.e. Value at Constant Prices) of Production, Exports and Consumption.**—The indexes shown in the following table have been calculated by revaluing quantities of each farm product included in the indexes at the average unit gross value of each product for the years 1936–37 to 1938–39. The items included comprise products in the form in which they are sold from farms in all cases except livestock sold for slaughter for meat, which are included in terms of dressed carcass weight of meat. Quantity data relating to exports include exports of processed food in terms of farm product equivalent. The indexes of production relate basically to gross output of farm products for food use, including crops exported for stock-feeding overseas. Particulars are not available prior to 1946–47 except for the base years.

**FARM PRODUCTS FOR FOOD USE: INDEXES OF QUANTUM^(a) OF
PRODUCTION, EXPORTS AND CONSUMPTION.**

(Base: Average 1936-37 to 1938-39 = 100.)

Year.	Production.		Exports.		Consumption in Australia.	
	Total.	Per Head of Total Population.	Total.	Per Head of Total Population.	Total.	Per Head of Total Population.
1946-47.. ..	90	82	73	66	107	98
1947-48.. ..	113	102	113	102	110	99

1959-60(b) ..	138	93	140	95	145	98

(a) Indexes of value at constant prices, i.e., quantities revalued at average unit values for the base years, 1936-37 to 1938-39. (b) Subject to revision.

§ 3. Consumption of Foodstuffs and Beverages.

1. **Quantities Consumed.**—The estimates of total consumption and consumption per head of population in Australia in the two tables which follow have been compiled by deducting net exports from the sum of production and imports and allowing for recorded movements in stocks of the respective commodities. While the estimates may be generally accepted as reasonably accurate, there are some deficiencies to which attention should be directed. These relate chiefly to the quantities of poultry, game and fish (fresh and shell) and the quantities of visible oils and other fats entering consumption. In addition, little information is available on the quantities of vegetables, fruit, eggs, etc., which householders produce for their own requirements and the extent of wastage occurring in the marketing of foodstuffs. In all these cases, careful estimates have been compiled from the best available data, and the quantities shown as entering consumption in Australia have been adjusted to allow for these circumstances. The absence of particulars for stocks of certain commodities has resulted in some inaccuracies in the estimates of annual consumption. Consumption of foodstuffs is measured in general at "producer" level. As a result, no allowance is made for wastage before the foodstuffs are consumed. In recent years, wastage of foodstuffs has possibly been less than hitherto because of more efficient distribution and storage methods. Furthermore, it is likely that the quantities of foodstuffs shown in the following pages as available for consumption have been supplemented by an increase in the aforesaid production by householders for their own requirements. Neither of these factors has been taken into account, and it is possible that, as a result, some understatement has occurred in the following consumption estimates. Except in a few special cases, no adjustment has been made for changes in stocks held by wholesalers and retailers. Where no allowance is made, it is considered unlikely that these stocks would make any appreciable difference to consumption estimates. Allowance has not been made for the purchase of foodstuffs for dispatch overseas as gifts in bulk and by parcel post. These deficiencies, however, do not seriously impair the accuracy of the estimates compiled.

The estimates of consumption per head of population shown in the second of the following tables have been derived by dividing the total apparent consumption of each commodity or commodity group in a given year by the mean population of Australia in the same period.

More detailed information on the consumption of foodstuffs and beverages is contained in the statistical bulletin: *Report on Food Production and the Apparent Consumption of Foodstuffs and Nutrients in Australia*, issued by this Bureau.

The following tables show the average annual consumption during the three year periods ended 1938-39, 1948-49, and 1958-59, together with the data for each of the years 1957-58, 1958-59 and 1959-60.

§ 4. Patents, Trade Marks and Designs.

1. *Patents.*—(i) *General.* Patents for inventions are granted under the Patents Act 1952-1960, which applies to the Commonwealth of Australia and the Territories of Norfolk Island, Papua and New Guinea. The Act is administered by a Commissioner of Patents. The principal fees payable up to and including the grant of a patent amount to £19 10s. Renewal fees are payable as follows:—£5 before the expiration of the fourth year, and an amount progressively increasing by £1 before the expiration of each succeeding year up to the final fee of £16, payable before the expiration of the fifteenth year. An extension of time for six months for payment of a renewal fee may be obtained.

(ii) *Summary.* The number of separate inventions in respect of which applications were filed and the number of letters patent sealed during the years 1956 to 1960 are shown in the following table.

PATENTS : AUSTRALIA.

Particulars.	1956.	1957.	1958.	1959.	1960.
Applications ..	9,396	9,899	10,511	11,430	11,828
Applications accompanied by provisional specifications ..	3,465	3,683	3,919	4,063	3,772
Letters patent sealed ..	6,056	6,407	6,093	5,488	4,857

2. *Trade Marks and Designs.*—(i) *Trade Marks.* Under the Trade Marks Act, 1955-1958 the Commissioner of Patents is also Registrar of Trade Marks. This Act has replaced the Trade Marks Act 1905-1948.

Provision is made for the registration of users of Trade Marks and for their assignment with or without the goodwill of the business concerned.

A new classification of goods has been adopted and Trade Marks registered under the repealed Acts are reclassified on renewal.

(ii) *Designs.* Under the Designs Act 1906–1950, the Commissioner of Patents is also Registrar of Designs.

(iii) *Summary.* The following table shows the applications for trade marks and designs received and registered during the years 1956 to 1960.

TRADE MARKS AND DESIGNS : AUSTRALIA.

Particulars.	1956.	1957.	1958.	1959.	1960.
Trade Marks—					
Received	4,402	4,589	5,331	5,436	6,083
Registered	5,360	3,569	4,219	3,792	3,203
Designs—					
Received	1,130	1,394	1,362	1,366	1,283
Registered	458	917	1,758	819	1,507

3. *Revenue.*—Revenue of the Commonwealth Patent, Trade Marks, Design and Copyright Offices for the years 1956 to 1960 was as follows:—1956, £293,918; 1957, £302,279; 1958, £347,659; 1959, £348,523; 1960, £417,047.

§ 5. Copyright.

1. *Legislation.*—Copyright is regulated by the Commonwealth Copyright Act 1912–1950 wherein, subject to modifications relating to procedure and remedies, the British Copyright Act of 1911 has been adopted and scheduled to the Australian Law. The Act is administered by the Commissioner of Patents.

Reciprocal protection of unpublished works was extended in 1918 to citizens of Australia and of the United States of America, under which copyright may be secured in the latter country by registration at the Library of Congress, Washington. The Commonwealth Government promulgated a further Order in Council which came into operation on 1st February, 1923, and extended the provisions of the Copyright Act to the foreign countries of the Copyright Union, subject to the observance of the conditions contained therein.

2. *Applications and Registrations.*—The following table shows under the various headings the number of applications for copyright lodged and registered for the years 1956 to 1960.

§ 6. Australian Shipbuilding Board.

1. *Constitution.*—Originally established in 1941 under National Security Regulations, the Board has been reconstituted a number of times since its inception and in 1948 was constituted on a permanent basis under the Supply and Development Act. At present, it operates under the control of the Minister for Shipping and Transport. The membership of the Board consists of a Chairman, a Deputy Chairman, a Finance Member and two other members, one of whom represents the Naval Board.

2. Functions.—The existing functions of the Board, which have been summarized in earlier issues of the *Official Year Book*, are set out in detail in regulation 22 (4) of the Supply and Development Regulations.

In April, 1960, the Government announced that legislation was to be introduced to re-define the Board's functions in the light of the acceptance by the Government of recommendations by the Tariff Board for continued Commonwealth assistance to the Australian shipbuilding industry. It is expected that the legislation will be introduced to Parliament at an early date.

At the same time, the Government decided that the present temporary staff organization, which has been carried on since establishment of the Board in 1941, would be replaced by a permanent organization. This would mean that superannuation and similar Public Service benefits would be available to members of the staff.

In the exercise of its functions, the Board is responsible for—(i) the design of vessels; (ii) the calling of tenders and placement of orders; (iii) co-ordination of the Board's supplies to shipbuilders, e.g., machinery and certain equipment; (iv) supervision of construction; (v) acceptance of vessels after sea trials; and (vi) administration associated with ship repairs, marine engines, spare parts, etc.

The Board is also responsible for recommending, within the limits prescribed by the Commonwealth Government, the amount of subsidy to be paid on merchant ships constructed in Australia. In April, 1956, the Government accepted a recommendation made by the Tariff Board that the maximum subsidy on ships built in Australia for the coastal trade should be increased from 25 per cent. to 33½ per cent. of the cost of construction. The method and level of assistance to the industry was again re-examined by the Tariff Board following the public hearings during November and December, 1958, and as a result of its examination, the Tariff Board recommended, and the Government accepted, that the present method of assistance to the shipbuilding industry be retained and the maximum rate of subsidy remain at 33½ per cent. of the cost of construction.

In order to take advantage of the subsidy, private shipowners are required to place their orders for vessels through the Board, which has thus become the ordering authority for all vessels built in Australian yards on which a subsidy is paid.

The Board has also undertaken the preparation of plans and drawings for most of the yards, as the level of ship construction in Australia does not warrant each yard employing specialists in naval architecture. In this way, the Board has assisted in raising the efficiency of the industry as a whole and also in the development of individual yards. (For a more detailed reference to the constitution and functions of the Board see *Official Year Book* No. 37, p. 1170).

In order to assist the shipbuilding industry further, the Board has also encouraged the construction of marine engines in Australia including steam engines and several well known types of diesel engines manufactured under licence. The larger marine diesel engines under construction at 1st May, 1961, were two "Sulzer" type of 10,500 b.h.p., three "Doxford" type, two of 5,500 b.h.p. and one of 4,640 b.h.p., and four "Polar" type of 1,310 b.h.p.

3. Construction Programme.—From its inception to 1st May, 1960, the Board had arranged for the construction of 68 vessels of over 300 gross tons and totalling 424,751 tons deadweight. During the war, the Board was also responsible for the construction of numerous small craft and a 1,000 ton floating dock.

Current orders at 1st May, 1961, placed by the Board, were for the construction of nine vessels totalling 131,400 deadweight tons. The vessels consisted of one 32,250 d.w.t. oil tanker on behalf of Ampol Petroleum Ltd., two bulk ore carriers of 21,000 d.w.t., and one of 19,000 d.w.t. on behalf of the Broken Hill Pty. Co. Ltd., two bulk ore carriers each of 16,400 d.w.t. on behalf of Bulkships Ltd., one 2,500 d.w.t. passenger/cargo vessel for the State Shipping Service of Western Australia, one 2,000 d.w.t. container vessel for Wm. Holyman & Sons Pty. Ltd., and one 850 d.w.t. roll-on roll-off passenger/cargo ferry for the Adelaide Steamship Co. Ltd.

In addition, orders have been placed by the Board for two 70-foot landing craft for the Department of the Army, and three new motor ships each of 1,700 tons for the Commonwealth Lighthouse Service.

§ 7. Commonwealth Scientific and Industrial Research Organization.

1. **General.**—By the Science and Industry Research Act 1949, the previously existing Commonwealth Council for Scientific and Industrial Research was re-organized under the title of the Commonwealth Scientific and Industrial Research Organization. An account of the organization and work of the former Council, and of the earlier Commonwealth Institute of Science and Industry from which the Council was formed, was given in earlier issues of the Official Year Book. (See No. 14, p. 1061 and No. 37, p. 1183.)

2. **Science and Industry Research Act 1949-1959.**—This Act provides for—

- (a) an Executive of the Organization consisting of nine members to be appointed by the Governor-General, at least five of whom shall be persons possessing scientific qualifications; and
- (b) an Advisory Council of the Organization, consisting of the members of the Executive, the Chairman of each State Committee constituted under the Act, and such other members as the Advisory Council, with the consent of the Minister, co-opts by reason of their scientific knowledge.

The powers and functions of the Organization are as follows:—(a) To initiate and carry out scientific research in connexion with primary or secondary industries in Australia; (b) to train research workers and to establish industrial research studentships and fellowships; (c) to make grants in aid of pure scientific research; (d) to establish and make grants to industrial research associations in any industry; (e) to test and standardize scientific apparatus and instruments; (f) to collect and disseminate scientific and technical information; (g) to publish scientific and technical reports and periodicals; and (h) to act as a means of liaison between Australia and other countries in matters of scientific research.

3. **Science and Industry Endowment Act 1926-1949.**—Under this Act, the Government established a fund of £100,000, the income from which is used to provide assistance (a) to persons engaged in scientific research; and (b) in the training of students in scientific research. Provision is made for gifts or bequests to the fund which is controlled by a trust consisting of the Executive of the Organization. In accordance with the Act, arrangements have been made to send a number of qualified graduates abroad for training in special fields of work.

4. **Work of the Organization.**—The activities of the Commonwealth Scientific and Industrial Research Organization have necessitated a widespread and adaptable arrangement of its research laboratories. Undesirable centralization has been avoided mainly in two ways. In the first place, the policy has been followed of establishing laboratories in different places in the Commonwealth wherever the necessary facilities, contacts and other suitable conditions could best be found. Secondly, the Act provides for the establishment of a State Committee in each of the six States. These Committees are widely representative of scientific and industrial interests, and advise the Executive or the Advisory Council on general matters and on particular questions of investigation and research.

For about twelve years after its establishment, the work of the previous Council was devoted mainly to the solution of problems affecting the agricultural and pastoral industries. Unlike manufacturing concerns, which often employ their own scientific staffs, the farmers and the pastoralists are dependent on outside help for the solution of their problems which require research. It was a recognition of the greater need of the primary producer which directed the Council's early policy. In 1937, however, the Commonwealth Government decided to extend the activities of the C.S.I.R. so as to provide assistance to secondary industries, and several laboratories have been established for work in that field; it was thus in the fortunate position of being able to render to these industries assistance of vital importance almost immediately after the outbreak of war. In fact, the remarkable technological advances and developments in secondary industrial production during the war would have been to a large extent impossible had it not been for the assistance rendered by scientific research, and this may well serve as a forceful illustration of what may be accomplished in times of peace.

For the purpose of carrying out its research work, there are established within the Organization a number of Divisions and Sections. The Divisions, of which there are now twenty-seven, comprise the major establishments for which special laboratory buildings have been erected and equipped; the Sections generally include establishments which have not reached a stage of development so far as the scope and magnitude of their operations are concerned, to justify their designation as Divisions. As the Organization's investigations

extend on a Commonwealth-wide basis, and as many of the investigations which are being conducted—particularly those concerned with problems affecting the agricultural and pastoral industries—necessitate experimental work in the field, a number of field stations are established in various parts of Australia.

The Divisions which have been established are as follows:—

Plant Industry, with main laboratories at Canberra and Brisbane and field stations.
 Entomology, with main laboratories at Canberra and field stations.
 Animal Health (main laboratory in Melbourne), Animal Genetics (main laboratory in Sydney) and Animal Physiology (main laboratory in Sydney) which together comprise the Animal Research Laboratories.
 Biochemistry and General Nutrition, with main laboratories at Adelaide and field stations.
 Soils, with main laboratories at Adelaide and extensive operations in the field.
 Forest Products, with main laboratories in Melbourne and field experiments.
 Food Preservation and Transport, with main laboratories at Homebush (New South Wales) and a subsidiary laboratory in Brisbane.
 Fisheries and Oceanography, with main laboratories at Cronulla (New South Wales), subsidiary laboratory at Thursday Island, and experimental work in coastal waters of Australia.
 Metrology, Physics and Electrotechnology, comprising the National Standards Laboratory at Sydney.
 Radiophysics, with main laboratory at Sydney.
 Physical Chemistry, Chemical Physics, Mineral Chemistry and Organic Chemistry, which together with the Sections of Cement and Refractories, and Chemical Engineering, comprise the Chemical Research Laboratories in Melbourne.
 Tribophysics, with laboratories in Melbourne.
 Building Research, with laboratories in Melbourne.
 Mathematical Statistics, with main laboratory in Adelaide.
 Meteorological Physics, with main laboratory and field station in Melbourne.
 Land Research and Regional Survey, with headquarters in Canberra, and field stations at Alice Springs and Katherine (Northern Territory) and Ivanhoe (Kimberley, Western Australia).
 Protein Chemistry (Melbourne), Textile Industry (Geelong, Victoria) and Textile Physics (Sydney), which together comprise the Wool Research Laboratories.
 Coal Research, Sydney.

The following are the Sections:—

Commonwealth Research Station, Murray Irrigation Area, Merbein (Victoria).
 Irrigation Research Station, Griffith (New South Wales).
 Upper Atmosphere, with laboratory at Camden (New South Wales).
 Dairy Research, Melbourne.
 Mineragraphic Investigations, Melbourne.
 Ore-dressing Investigations, Melbourne and Kalgoorlie.
 Fodder Conservation, Melbourne.
 Physical Metallurgy, Melbourne.
 Wildlife Survey, with main laboratory in Canberra, subsidiary laboratory at Albury and field experiments.
 Soil Mechanics, Melbourne.
 Engineering, Melbourne.
 Agricultural Research Liaison, Melbourne.
 Industrial Research Liaison, Melbourne.
 Editorial and Publications, Melbourne.

In addition to its investigational work, the Organization deals with inquiries covering a wide range of scientific and technical subjects and maintains Scientific Liaison Offices in London and Washington.

An Agricultural Research Liaison Section established at the Organization's Head Office assists in making results in agricultural research speedily available to State Departments of Agriculture for use in their extension work.

An Industrial Research Liaison Section has also been established at Head Office to foster liaison in the secondary and manufacturing fields.

The Organization's Head Office, with administrative and executive staff, is in Melbourne, and associated with it are the Organization's Central Library, Agricultural Research Liaison Section, Industrial Research Liaison Section and Editorial and Publications Section. The funds for the Organization are provided from two main sources, namely, from Commonwealth revenue by Parliamentary appropriation, and from industry directly or indirectly by way of contributions and special grants. The fact that contributions and grants account for over one-fifth of the total annual expenditure indicates that the C.S.I.R.O. has succeeded in a very large measure in gaining the confidence of the public.

The activities of the C.S.I.R.O. are now so comprehensive in their scope and so widely distributed that it is not an easy matter to present an adequate picture of them in a concise form. For details of the investigations in progress, reference should be made to the Annual Report of the Organization.

§ 8. Mount Stromlo Observatory.

Mount Stromlo Observatory—since 1957 incorporated into the Australian National University—is the largest observatory in the southern hemisphere. It is in effect the Department of Astronomy of the Australian National University, and its staff members assist in the training of the future astronomers of Australia. In its instrumental resources, it is second only to some of the great observatories of America. Since it is located south of the Equator, it is placed especially advantageously for the conduct of research into the structure of the Milky Way System and of the Star Clouds of Magellan. The telescopes and auxiliary equipment at the Observatory provide access to parts of the sky that are forever hidden from the view of northern hemisphere astronomers. Mount Stromlo astronomers have therefore a special responsibility to do research on stars and other celestial objects at far southern declinations.

Mount Stromlo itself is a ridge of hills, approximately one mile long, situated at $35^{\circ} 19' 16''$ South Latitude and $149^{\circ} 0' 20''$ East Longitude, seven miles west of the city of Canberra. Its highest point is about 2,560 feet above sea level, and telescopes can be situated so as to be well screened from the lights of the city.

The first permanent installation on the site was established in 1911, but, because of the war and other circumstances, the development of the Observatory was delayed. It was not until 1925 that regular astronomical work could be undertaken. Since then, the Observatory has developed steadily, and now, under its third Director, Professor Bart J. Bok, the scientific staff consists of twelve astronomers. This does not include six scholars and a number of overseas astronomers visiting Mount Stromlo for periods of a year or so. With technical, clerical and maintenance personnel, the total staff amounts to about 60 persons.

Mount Stromlo Observatory possesses eight mounted telescopes with apertures ranging from five inches to 74 inches. The 74-inch reflector is the largest telescope in the southern hemisphere. There are also special telescopes for the Time Service and two overseas groups have major telescopes on the Observatory grounds. These telescopes are a 26-inch refractor from the Universities of Yale and Columbia, U.S.A., and a 26-inch Schmidt Telescope from the University of Uppsala, Sweden.

The principal areas of research at Mount Stromlo are:—

- (i) Studies of the structure and dynamics of the Milky Way system.
- (ii) Investigation of the Large and Small Magellanic Clouds.
- (iii) Studies of the physical properties of the interstellar medium of gas and dust, and its relation to the spiral structure of our galaxy.
- (iv) Studies of the physics of the stars of the southern hemisphere by spectrographic means and by photoelectric techniques.
- (v) Maintenance of the National Time Service leading to studies of the variable rotation of the earth and polar motion.

Published accounts of the researches have a world-wide distribution.

The Observatory is at present engaged in a major expansion of equipment and staff. A search is being made for an area, more cloud-free than Mount Stromlo, where a permanent Field Station may be established. A preliminary installation of a 26-inch reflector has been made at Mount Bingar near Griffith, New South Wales. Other sites are being examined for the future development of astronomy in Australia.

At certain times, Mount Stromlo is open for inspection by members of the public when arrangements can be made so that the scientific work of the Observatory is not interrupted. A more detailed description of the Observatory's work is given in Official Year Book No. 46, pages 1142-1144.

§ 9. Standards Association of Australia.

The Standards Association of Australia is the national standardizing organization of Australia, and issues Australian standard specifications for materials and codes of practice.

The Association was established in July, 1929, by the amalgamation of the Australian Commonwealth Engineering Standards Association and the Australian Commonwealth Association of Simplified Practice. It is an independent body in close touch with modern industrial requirements and has the full recognition and support of the Commonwealth and State Governments and industry. It was incorporated by Royal Charter in 1950.

The sole executive authority of the Association is vested in the Council, on which industry is fully represented, together with official representatives of the Commonwealth and State Governments and their technical departments, and of scientific, professional and commercial organizations. Voluntary assistance is rendered in the drafting of specifications and codes by several thousand individuals who are experts in their particular fields, and are organized into some hundreds of committees. These committees are grouped under broad industry headings including civil engineering and building construction, mechanical engineering, electrical engineering, chemicals, timber, transportation, aircraft materials, ferrous and non-ferrous metallurgy, plastics, textiles, mining, ceramics, medical and dental materials, household and domestic economy, agricultural and dairying, safety, packaging, and water supply and sewerage.

These committees are composed of nominated representatives of manufacturing, distributing and purchasing organizations, and of scientific and other expert authorities in the particular field of the project being dealt with. The operations of these committees are co-ordinated and supervised by committees broadly representative of the whole industry within which the respective projects are included.

The specifications of the Association provide a suitable standard of performance, quality, and dimension, and an equitable basis for tendering. They help to eliminate redundant qualities and sizes. They enable purchasers to obtain their requirements with greater assurance of satisfaction, with more rapid delivery and without the necessity of drafting individual specifications.

The underlying principles covering the preparation of the specifications and codes are that they shall be in accordance with the needs of industry; that the common interests of producer and consumer be maintained; that periodical revision should keep the work abreast with progress; and that standardization be arrived at by general consent without coercion.

Organizations, companies, firms and individuals interested in the work of the Association are eligible for subscription membership. Members are entitled to free copies of the publications of the Association and to the use of the library and its Special Information Service. Bibliographical research is undertaken for committees, members of the Association, and industry in general. Many hundreds of inquiries are answered each year.

The Association has international affiliations, and the standards of all British and foreign countries are filed in the library and are accessible to members. It is a member, representing Australia, of the International Organization for Standardization (ISO). The Association also administers the Australian National Committee of the International Electrotechnical Commission.

The Association is also the representative of the British Standards Institution, and all British standards may be purchased from headquarters and branch offices in the various States.

The headquarters of the Association are at Science House, Gloucester Street, Sydney, and branches of the Association are situated at Temple Court, 422 Collins Street, Melbourne; School of Arts Building, 166 Ann Street, Brisbane; 11 Bagot Street, North Adelaide; 101 Hooper Street, West Perth; c/o Engineering School, University of Tasmania, Sandy Bay; and Howard Smith Chambers, Watt Street, Newcastle.

§ 10. Industrial Design Council of Australia.

The Industrial Design Council of Australia was established in June, 1958, for the purpose of encouraging better design in Australian-made goods and fostering an appreciation of good design throughout the community. The decision to set up the Council arose from a realization on the part of representatives of industry and government, designers and educationists, that there was a pressing need in Australia for an independent and authoritative body to promote better design in the interests of trade development.

The Council has a membership fully representative of industry, commerce and government, together with designers and educationists. Initial finance has been raised by donations from industry and commerce; and a grant of £10,000 has been made by the Commonwealth Government for establishment purposes.

As part of its programme of assisting industry, the Council has conducted several lecture series in Sydney and Melbourne, dealing with various aspects of product design. Design counselling is available to manufacturing companies on request; and manufacturers seeking the services of designers are put in touch with qualified people.

Other projects include the setting-up of a Design Index, providing a photographic catalogue of well-designed Australian goods, for reference by manufacturers, retailers, architects, designers and the public; a Register of Designers, providing a comprehensive reference to Australian designers to assist those seeking their services; Displays and exhibitions of well-designed goods, both local and overseas; Design Training—the council is aware of the urgent need to raise the standard of training in industrial design and will co-operate with education authorities to this end; Information Services—it is intended to establish information offices in both Sydney and Melbourne, and later in other States, to provide information on all matters concerned with design.

The offices of the Council are in ICI House, 1 Nicholson Street, Melbourne, C.2.

§ 11. Film Censorship Board.

1. Legislation.—The Commonwealth Government's powers over censorship of films extend only to imported films and imported advertising matter and stem from the Customs Act. Under that Act, the Customs (Cinematograph Films) Regulations provide for the appointment of a Film Censorship Board whose function is to ensure that films and related advertising material coming within certain defined categories are not admitted into Australia. Under those regulations, the Film Censorship Board may pass films in their original form, reject them, or pass them after eliminations have been made. The Commonwealth Regulations give the Board no power to classify films.

Legislation passed by the State Governments of Victoria, Queensland, Western Australia and Tasmania names the Commonwealth Film Censorship Board as the censorship authority and vests in it the power to classify films as suitable for general exhibition or otherwise.

The State Acts give the Commonwealth Board the authority to censor films made in Australia for commercial exhibition and advertising matter made in Australia.

The Censorship organization comprises a Censorship Board of seven persons and an Appeal Censor, the headquarters being in Sydney. Importers have a right of appeal to the Minister against decisions of the Board and the Appeal Censor.

2. *Import of Films.*—(i) *35 mm. Films for Exhibition in Motion Picture Theatres.* In 1960, 969 films comprising approximately four million feet were censored. This represents approximately 760 hours' screening time. 445 of these films originated in the United States of America, 274 in the United Kingdom and 250 in other countries. Of the last-mentioned, U.S.S.R. 67, France 31, Italy 26, Germany 23, Greece 15, and Poland and Yugoslavia nine each, were the principal suppliers.

Included above were 401 full-length feature films which constitute the main theatrical attractions. This was a decrease of 56 compared with the imports for 1959. Feature films came from:—the United States of America 204, the United Kingdom 75, France and Russia 21 each, Greece 16, Germany 14, Italy 11, Czechoslovakia six, Sweden five, and other countries 28.

Seven feature films were rejected and cuts were made from 179.

Feature films classified as suitable for general exhibition numbered 181 and 210 were not suitable for children. Of the latter, 33 carry the special condition that all advertising shall indicate that they are suitable only for adults. These classifications are advisory only and are designed to enable picture-goers and particularly parents to obtain a general idea of the nature of any particular film.

In addition to these imported films, 157 35mm. films of 118,279 feet produced in Australia were cleared. These were mainly newsreels and documentaries and concerned the Board only when intended for commercial exhibition or export. This figure does not represent the total production in Australia.

(ii) *16mm. Films.* The use of 16mm. films on television programmes has given this type of film a new and significant importance from the censorship-standpoint.

In the past, 16mm. films were largely confined to those commercially produced for use in certain country picture theatres, in theatres used by business undertakings for advertising and instructional purposes, in churches, schools and universities, and on home movies. These are of all types—dramatic, scenic, topical, medical, advertising, educational, religious, etc.

Excluding those imported for television use, 5,259 16mm. films of approximately 34 million feet were examined. There were no rejections but eliminations were made from 34. 16mm. films imported for television are dealt with below (see (iv)).

(iii) *8mm. and 9.5mm. Films.* The Board's responsibilities in regard to these have been removed to a large extent, following the decision to discontinue the censorship of films brought in by travellers depicting incidents during their travels. Periodical checks are made and only commercially produced films are examined. Of these, approximately 18,000 feet were censored. No films were rejected.

(iv) *Television Films.* 9,921 films, predominantly 16mm., of approximately 11 million feet, for use on television, were censored.

The number of films is not a true indication of volume because many of these were of very short duration. The footage, however, transposed to a time factor, shows that the screening time of films censored for television amounted to approximately 5,074 hours.

On a footage basis, the United States of America supplied approximately 85 per cent. of the total imports and the United Kingdom 13 per cent.

Thirty-two television films were rejected outright and an additional nine were classified as unsuitable for televising. Eliminations were made from 1,563. There were no appeals.

(v) *Foreign Language Films.* Countries other than the United Kingdom and the United States of America supplied 250 of the 35mm. films imported for theatrical exhibition. Of these, 122 were feature films.

Generally, the dialogue is in a foreign language with explanatory English captions. A few have an English commentary, and in isolated cases the dialogue is turned into English by the process known as "dubbing". The main countries of origin are shown above (see (i)).

Of 5,259 16mm. commercial films censored, 846 originated from non-English-speaking countries. The chief supplying countries were Germany 128, France 129, U.S.S.R. 104, Switzerland 57, Japan 51, Italy 47, China 46, Czechoslovakia 42, India and Holland 36 each and Malaya 30.

An interpreter attends all censor-screenings of films in a foreign language.

3. *Export of Films.*—The quantity of films exported for the year was approximately 2,000,000 feet. This footage includes, in many cases, several prints of the one film.

§ 12. Australian National Film Board and the Film Division.

1. **The Australian National Film Board.**—The Australian National Film Board was inaugurated in April, 1945, on the recommendations of a Commonwealth Government inter-departmental committee which considered the suggestions of a conference of interested individuals and Commonwealth and State officials, including Directors of Education, called in November, 1944, by the Ministers for Information and Post-war Reconstruction. It was attached, for administrative purposes, to the Department of Information.

With the abolition of the Department of Information in March, 1950, administration of the Board was transferred to the News and Information Bureau, Department of the Interior.

In November, 1950, the Board was reconstituted as an advisory body to the Minister for the Interior on matters concerned with the production, acquisition and distribution of films required by Commonwealth departments for the following purposes:—

- (a) for use within Australia on important matters of national interest and welfare, such as school and adult education, rehabilitation, social development, international understanding, trade and tourist expansion, and immigration;
- (b) for dissemination abroad to expand trade and commerce with other countries, to encourage tourist traffic with Australia, to improve Australia's relations with other countries and, where necessary, to explain Australia's national policies and encourage immigration.

The constitution provides for a membership of ten, with the Secretary of the Department of the Interior, Chairman, the Director of the News and Information Bureau, Deputy Chairman, and the remainder representative of Commonwealth departments, State Government instrumentalities, and organizations interested in the production, distribution or utilization of films for national publicity.

2. **The Film Division of the News and Information Bureau.**—The first Australian Government organization for the production of motion pictures for national publicity purposes was the Cinema and Photographic Branch of the Department of Commerce, set up in Melbourne in 1920. Early in the 1939–45 War, the newly-established Department of Information was made responsible for the operation of the Cinema Branch and for an Official War Photography Unit. Production and distribution of all films required by Commonwealth Departments are now undertaken by the staff of the Film Division, News and Information Bureau, Department of the Interior, or by commercial enterprises under the supervision of officers of the Film Division. Theatrical and television distribution in Australia, and both theatrical and non-theatrical distribution overseas, of all Film Division productions are organized by the News and Information Bureau's home office or its overseas representatives. Non-theatrical distribution in Australia is organized through the National Library, Canberra, in co-operation with State film distribution agencies.

Since 1946, the Film Division has produced 387 films for general exhibition, as well as training and special purpose films. Prints are dispatched to 49 overseas centres, where distribution is arranged by News and Information Bureau officers or other Australian representatives. In Britain, there is regular distribution through more than a thousand theatres, and a large non-theatrical and educational series of circuits. By arrangement with the British Broadcasting Corporation, items of topical interest photographed by the Film Division are flown to London for television. In the United States of America, there is wide non-theatrical distribution and considerable use of the films by television networks. An exchange arrangement with the National Film Board of Canada secures extensive distribution in Canada. Selected films have been recorded in French, Dutch, German, Italian, Japanese, Hindustani, Tamil and other Indian dialects.

In addition to films made on the initiative of the News and Information Bureau, the Film Division produces films under the sponsorship of, or with the co-operation of, Commonwealth Departments and many other bodies such as the Commonwealth Bank of Australia, the Road Safety Council, Overseas Telecommunications Commission, Snowy Mountains Hydro-electric Authority, Australian Wine Board, the Australian National University and the Australian Broadcasting Commission.

The co-operation of the Australian motion picture industry with the Commonwealth, spontaneously offered at the outset of the 1939–45 War, continues. Special films for urgent national appeals are planned, produced and distributed, with the assistance of the National Films Council of the motion picture industry and its Film Production Advisory Committee.

§ 13. The National Safety Council of Australia.

The National Safety Council of Australia was founded in Melbourne in 1927 with the object of developing, mainly by education, safety in all spheres—on the road, in industry, in the home and on the farm. It is a non-profit making organization supported by Government grants, public subscriptions and payments for service. Its work is carried out by a small staff controlled by committees and governed by an executive.

In 1959, the Council's work in industrial safety was consolidated and expanded by the formation of an Advisory Committee composed of leading industrialists with Australia-wide associations, and the Council is now being reorganized on a national basis. A strong Advisory Committee has been established in New South Wales, and action is being taken to register the Council's national headquarters in Canberra. In addition to the Industrial Safety Service of posters, slips for pay envelopes and the bi-monthly journal "Safety News", available to industry by subscription, the Council's Industrial Safety Division also provides advice on setting up safety programmes, information on safety problems, safety surveys of plant and works, safety instruction for foremen, technical library facilities, and safety service to small factories.

In Victoria, the Road Safety Division undertakes campaigns, lectures and film screenings to schools and organizations. Posters and literature are distributed to schools in connexion with road safety lessons, and special films are available on loan for child and adult road safety instruction. With the co-operation of other interested organizations, the Road Safety Division undertakes School Driver Training courses in various Melbourne schools. This scheme is proving most successful and it is hoped to expand it greatly. A "Safe Driving" campaign for individual motor drivers and a "Freedom from Accidents" campaign for employee drivers are conducted, and those completing a year free from any accident for which they were responsible are given a certificate or award in recognition.

§ 14. Australian Road Safety Council.

1. Origin, Objectives and Organization.—The Australian Road Safety Council was formed in 1947 by the Australian Transport Advisory Council, which comprises Commonwealth and State transport ministers and Commonwealth ministers with associated interests, to conduct a nation-wide programme of public education. It was re-constituted in February, 1961, by the Australian Transport Advisory Council, in order to provide a smaller, more effective, organization.

The objectives of the reconstituted Council are—

- (a) To conduct a continuous programme of public education, aimed at improving the knowledge, skills, attitudes and practices of all classes of road users;
- (b) To encourage a better understanding and observance of State and Commonwealth traffic laws by road users;
- (c) To stimulate greater public interest, support and active participation in road accident prevention;
- (d) To co-ordinate, in a balanced programme, the Commonwealth and State public education campaigns, and to integrate with these campaigns the support accorded by non-governmental bodies and the general public;
- (e) To collect, collate, publish and distribute educational and informative data regarding road accidents; and
- (f) To advise on specific road safety matters referred to it by the Australian Transport Advisory Council.

The Australian Road Safety Council comprises 16 members, representing the Commonwealth and State Governments and the major categories of organized road users. It meets approximately three times each year and has established a number of temporary sub-committees to investigate and report upon particular aspects of its activities. Its first meeting was held in Hobart on April 10th and 11th, 1961.

The Department of Shipping and Transport provides the central executive for the Council. Each section represented on the Australian Road Safety Council—Commonwealth, State and community/commercial—exercises full control over its own activities. One of the Council's principal functions is to co-ordinate the Commonwealth and State public education campaigns and to integrate with these campaigns the support accorded by commerce, industry, and community service organizations.

A sum of £150,000 is provided annually by the Commonwealth Department of Shipping and Transport for the promotion of road safety practices; £50,000 is distributed to the State Governments for public education in road safety, and the remaining £100,000 is used for the national public education campaign. The £50,000 grant to the States is allocated in the following proportions:—New South Wales, £12,500; Victoria, £10,000; Queensland, £9,250; South Australia, £6,250; Western Australia, £8,250; Tasmania, £3,750; total £50,000.

2. *Mode of Operation.*—The media used by the Australian Road Safety Council in its national campaigns include metropolitan daily press and metropolitan radio and television, platform and pulpit, plus a wide variety of posters, pamphlets, booklets, publications and films. Close liaison is maintained with State and Commonwealth educationists in the preparation and distribution of road safety instructional material for schools.

The Council, through its Central Executive in the Department of Shipping and Transport, works in close collaboration with two companion Committees, established by the Australian Transport Advisory Council. These are the Australian Road Traffic Code Committee, which is charged with the responsibility of drafting recommendations for uniform road traffic laws throughout the Commonwealth in keeping with modern traffic requirements, and the drafting of a complete National Road Traffic Code suitable for adoption in all States and Territories; and the Australian Motor Vehicle Standards Committee, which devises national standards for the construction, equipment, and operational efficiency of all road vehicles.

Because of the great increases in population and vehicle numbers, the exposure to risk of road users is considerably greater today than ever before. This is the basic problem confronting the Australian Road Safety Council, and in its efforts to deal with it, the Council has recognized the consideration that notwithstanding advances in road and vehicle design and traffic laws, road safety still remains essentially a problem of human behaviour.

The primary aim of road accident prevention, as envisaged by the Council, is thus to create a state of mind under which all classes of road users realize the imminence and consequence of road accidents, and are willing to accept the restraints necessary to prevent them. It is the Council's belief that, for the most part, this can best and often only be done effectively through education in the broad and practical sense, by improving knowledge, skill, attitudes and habits of all classes of road users, and by creating a public conscience about road accidents.

§ 15. Australian Atomic Energy Commission.

1. *Establishment and Functions of the Commission.*—In November, 1952, a Commission of three members was appointed to control the Commonwealth's activities in relation to uranium and atomic energy, and in April, 1953, upon the enactment of the Atomic Energy Act 1953, the Commission was established as a statutory authority, with powers and functions as defined in the Act. Under amending legislation, the number of Commissioners was increased to five in April, 1958. The Commission is a corporate and autonomous body, controlling its own service. It functions under the direction of the Minister for National Development.

The functions of the Commission fall under two main headings. Firstly, it is responsible for undertaking and encouraging the search for and mining of uranium, and is empowered to co-operate with the appropriate authorities of the States in connexion with these and related matters. Secondly, it is authorized to develop the practical uses of atomic energy by constructing and operating plant for this purpose, carrying out research and generally fostering the advancement of atomic energy technology. These powers and functions are set out in detail in Part II. of the 1953 Act. In general, and subject to the Commonwealth's defence powers and particular provisions of the Act, they are exercisable only in or in relation to the Territories of the Commonwealth.

2. *Uranium Prospecting and Mining.*—Uranium prospecting and mining in the Territories of the Commonwealth are freely open to private enterprise, subject to the Atomic Energy Act 1953 and the Ordinances of the Territories. In the past, the Bureau of Mineral Resources, Geology and Geophysics, of the Department of National Development, has carried out on behalf of the Commission widespread aerial surveys aimed at ascertaining the uranium resources of the Territories and delineating areas in which further search for uranium by private prospectors was considered worthwhile. Although rewards are no longer paid for discoveries of uranium, tax concessions are still allowed in respect of income earned from uranium mining. The Bureau of Mineral Resources provides prospectors and mining companies in the Territories with a wide range of technical and advisory services.

The development of the uranium resources of the States is governed by the legislation and policies of the States. Commonwealth assistance, in the form of aerial, geological, and geophysical services, is available to the States, and the State Mines Departments carry out inspections of uranium prospects and test samples submitted by prospectors.

Uranium oxide is being produced in Australia from ore deposits at Rum Jungle and South Alligator River, in the Northern Territory, Radium Hill, in South Australia, and Mary Kathleen, in Queensland. The Rum Jungle deposits have been worked under arrangements between the Commonwealth and the Combined Development Agency, a joint procurement organization of the United States and United Kingdom Governments. The mining and treatment operations are conducted for the Commonwealth by an Australian mining company. The treatment plant began operations on the field in September, 1954, and the total production since that date has been sold to the Agency for defence purposes. No mining was carried out between November, 1958, and April, 1961, but mining was recommenced with the discovery of a new ore body. Treatment operations are continuing, with ore stockpiled from the previous mining. These stockpiles are more than sufficient to complete the contract with the Combined Development Agency which expires in January, 1963. Exploration is continuing to determine whether or not further ore bodies exist in the area.

The Radium Hill deposits are being worked by the South Australian Government, which has an ore concentration plant on the field and a plant for the treatment of the concentrates at Port Pirie. As at Rum Jungle, the operations at Radium Hill and Port Pirie are carried out under arrangements with the Combined Development Agency, and the output from the operations is sold to the Agency.

The Mary Kathleen ore body in the Mt. Isa-Cloncurry district in Queensland has proved to contain Australia's largest reserve of uranium ore. A mine and treatment plant which cost over £10 million has been established in the area by a large mining company. Production from the plant is being sold to the United Kingdom Atomic Energy Authority for the British nuclear power programme under arrangements approved by the Commonwealth Government. Two other companies in the South Alligator region in the Northern Territory also have contracts with the Authority for the British nuclear power programme. These contracts are for smaller tonnages. Both companies began production in 1959.

3. Research.—The Commission's Lucas Heights Establishment is the major Australian centre for atomic energy research and information. It has a programme of research in the development of nuclear power, the utilization of radio-isotopes, and in other associated fields, directed towards the long-term development of the resources of the country.

The main feature of this programme is the development of a type of nuclear power reactor suited to Australian needs. A high temperature gas cooled reactor has been selected for study. By comparison with the nuclear power stations in existence or being planned at the present day, this is an advanced system. It is expected to be capable of competing on a cost basis with new coal-burning stations in many parts of Australia.

Developing of this system is essentially a long-range project, and in the initial stages, an extremely precise and careful study must be made of the basic physics and engineering of the system, and of the materials involved in its construction. It is necessary to develop nuclear materials which can be fabricated to the required shape and form and can withstand the severe chemical and nuclear conditions within the proposed reactor. The Research Establishment is now doing considerable research into the properties of beryllium and its oxide, which have valuable nuclear qualities. It is already making significant contributions to the world's knowledge of the chemistry, physics and metallurgy of beryllium.

As the research programme goes forward, the way is being prepared for the introduction of nuclear power in Australia, not necessarily through the HTGC reactor alone, but also for other reactor systems and for other applications of atomic energy. These activities are building up a body of knowledge and local skill which will be needed when it is decided that nuclear power stations should be built in this country. On present indications, the Commission expects that the first such station may be in operation by about 1970.

The Commission is also seeking to extend the use of radio-isotopes in Australia in scientific research and development, in the treatment of disease, in raising production and lowering costs in agriculture and in manufacturing industry. There is a vast field of fruitful applications, and new ones are being continually devised. In Australia, these new processes are being used only in a small fraction of the possible fields. The use of isotopes is fostered by providing an advisory service which is a ready source of information on established uses,

and by investigation of other projected application. Isotopes, including short-lived isotopes which cannot be economically imported, are being produced in the high flux research reactor HIFAR.

Research and development work on technical and scientific applications of radiation is also being carried out. The possibilities of radiation for such purposes as industrial sterilization, food preservation, and the control of insect pests are being investigated. Scientists at Lucas Heights are also studying the biological effects and questions of health and safety involved in the use of radio-active materials.

Lucas Heights is a centre of specialised equipment and information. In addition to the high flux research reactor HIFAR, used for testing materials and producing radio isotopes, there is much other equipment unique in Australia. All these facilities are available to Universities and other institutions under suitable conditions. In these endeavours, the Atomic Energy Commission is working in close co-operation with the United Kingdom Atomic Energy Authority, under arrangements which give Australia access to results of United Kingdom research on peaceful atomic energy uses. Results of research in Australia are in like manner available to the United Kingdom. Work in Australia, though constituting a self-contained programme, is co-ordinated with the United Kingdom programme, to avoid overlapping of research objectives and duplication of investigations. Australia also has bilateral arrangements with the United States and Canada, and is taking part in the promotion of the peaceful uses of atomic energy through the International Atomic Energy Agency.

§ 16. The United Nations.

1. General.—The Moscow Declaration of 1943 concerning a new international organization for the maintenance of international peace and security marked the end of the League of Nations. The dissolution of the League and the transfer of certain of its functions to the new body, the United Nations, took place over subsequent years. Information concerning the League of Nations was given in No. 35 and earlier issues of the Official Year Book.

The Charter of the United Nations was drawn up by the delegates of 50 nations at the United Nations Conference on International Organization at San Francisco from 25th April to 26th June, 1945. Australia's ratification was deposited on 1st November, 1945.

The full record of the Conference is contained in the *Report by the Australian Delegates on the United Nations Conference on International Organization* held at San Francisco from 25th April to 26th June, 1945.

At San Francisco, an Executive Committee and a Preparatory Commission were established, and when these bodies had completed their work of preparation for the first meeting of the United Nations, the General Assembly met in London on 10th January, 1946.

There were 51 original members. By the end of the Fifteenth Session (1960), 49 new members had been admitted and Egypt and Syria had been replaced by the United Arab Republic. At the Sixteenth Session, Sierra Leone was admitted as the one hundredth member. The General Assembly also authorized Syria's resumption of separate representation in the Organization and took note, without objection, of a statement by the Government of the Syrian Arab Republic that the Syrian Republic was resuming its status as an independent State within the same territorial limits as it had before 1958. There are now* 103 member States, namely:—Afghanistan, Albania, Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Bulgaria, Burma, Byelorussia, Cambodia, Cameroun, Canada, Central African Republic, Ceylon, Chad, Chile, China, Colombia, Congo (Brazzaville), Congo (Leopoldville), Costa Rica, Cuba, Cyprus, Czechoslovakia, Dahomey, Denmark, the Dominican Republic, Ecuador, El Salvador, Ethiopia, Finland, France, Gabon, Ghana, Greece, Guatemala, Guinea, Haiti, Honduras, Hungary, Iceland, India, Indonesia, Iran, Iraq, the Republic of Ireland, Israel, Italy, Ivory Coast, Japan, Jordan, Laos, Lebanon, Liberia, Libya, Luxembourg, Malagasy, Malaya, Mali, Mauritania, Mexico, Mongolia, Morocco, Nepal, the Netherlands, New Zealand, Nicaragua, Niger, Nigeria, Norway, Pakistan, Panama, Paraguay, Peru, the Philippines, Poland, Portugal, Romania, Saudi Arabia, Senegal, Sierra Leone, Somalia, South Africa, Spain, Sudan, Sweden, Syrian Arab Republic, Thailand, Togo, Tunisia, Turkey, the Ukraine, the Union of Soviet Socialist Republics, the United Arab Republic, the United Kingdom, the United States of America, Upper Volta, Uruguay, Venezuela, Yemen, and Yugoslavia.

* November, 1961.

The principal organs of the United Nations are the General Assembly, the Security Council, the Economic and Social Council, the Trusteeship Council, the International Court of Justice, and the Secretariat.

2. **General Assembly.**—This is the forum of the United Nations. In it, each member State is represented and has one vote. It meets in regular annual sessions from the middle of September and has provision for special sessions. With the exception of disputes which are before the Security Council and matters essentially within the domestic jurisdiction of any State, it has power to discuss any matter within the scope of the Charter and to make recommendations upon it. The Assembly elects the non-permanent members of the other major organs and considers annual reports from them. Upon the recommendation of the Security Council, it may expel a member which has persistently violated the principles of the Charter.

3. **The Security Council.**—This has the primary responsibility for the maintenance of international peace and security. It is composed of five permanent members, namely China, France, the United Kingdom, the Union of Soviet Socialist Republics and the United States of America, and six non-permanent members with two-year periods of office, of whom three retire at the end of each year. At the initial election, three countries, including Australia, were elected for a term of two years and three others for a term of one year only. The following are the non-permanent members of the Security Council for the year beginning on 1st January, 1962; Chile, the Republic of Ireland, and the United Arab Republic (whose terms end on 31st December, 1962), Ghana, Venezuela and one to be elected (whose terms expire on 31st December, 1963). Following an agreement reached during the Fifteenth Session, Liberia retired from the Security Council after one year and the Republic of Ireland was elected for the remainder of the two year term. On procedural matters, decisions are taken by an affirmative vote of any seven members, but on all other matters, decisions can be made only on the affirmative vote of seven members, including the concurring votes of all the permanent members. However, the powers which are parties to a dispute for peaceful settlement do not vote.

The Security Council is assisted by a Military Staff Committee consisting of the Chiefs of Staff of the permanent members of the Council or their representatives.

4. **The Economic and Social Council.**—This body consists of eighteen members, each elected for a period of three years. Its main functions are to make, or initiate, studies and reports, and to make recommendations to the General Assembly or to members of the United Nations upon international, economic, social, cultural, educational, health and related matters. It may make recommendations for the purpose of promoting respect for, and observance of, human rights and fundamental freedoms for all.

The members of the Economic and Social Council for the year beginning on 1st January, 1962, are: Brazil, Denmark, Japan, Poland, the United Kingdom and the Union of Soviet Socialist Republics (retiring at the end of 1962); Ethiopia, El Salvador, France, Italy, Jordan and Uruguay (retiring at the end of 1963); and Australia, Colombia, Senegal, the United States of America, and two still to be elected (retiring at the end of 1964).

5. **The Trusteeship Council.**—The Charter declares the political, social, cultural and economic advancement of the Trust Territories to be a sacred trust. Under the Charter the Trusteeship Council should be composed of those members of the United Nations who are administering trust territories and an equal number of members who are not administering trust territories (including any permanent members of the Security Council who are not administering trust territories). Territories which may be placed under trusteeship in accord with individual trusteeship agreements are those previously held under mandate, those detached from enemy states as a result of the 1939–45 War, and those dependent territories placed under the system by the States responsible for their administration. Australia is automatically a member of the Trusteeship Council, as the power administering the Trust Territories of New Guinea and Nauru, the latter in joint administration with New Zealand and the United Kingdom. The present* members of the Trusteeship Council are: Australia, Belgium, New Zealand, the United Kingdom and the United States of America (administering States), and Bolivia, Burma, China, France, India, Paraguay, the United Arab Republic and the Union of Soviet Socialist Republics. China, France and the Union of Soviet Socialist Republics are members of the Trusteeship Council by virtue of their permanent membership of the Security Council.

* November, 1961.

The Council has among its duties the consideration of annual reports submitted by the trustee States, the carrying out of periodic inspections by agreement with them, and the formulation of questionnaires on the welfare and advancement of the dependent peoples.

6. **The International Court of Justice.**—This consists of fifteen judges, no two of whom may be nationals of the same State. Its jurisdiction comprises all cases which the parties refer to it, and all matters especially provided for in the Charter or in treaties and conventions in force. Provision exists in the Statute of the Court whereby States parties to the Statute, may accept the jurisdiction of the Court as compulsory, either conditionally or unconditionally in certain international disputes.

The present* members of the Court are: Judges Alfaro (Panama), Sir Gerald Fitzmaurice (United Kingdom), Basdevant (France), Cordova (Mexico), and Quintana (Argentina)—all retiring in 1964; Judges Badawi (United Arab Republic), Wellington Koo (China), Winiarski (Poland), Sir Percy Spender, (Australia) and Spiropoulos (Greece)—all retiring in 1967; and Judges Jessop (United States of America), Keretsky (U.S.S.R.), Tanaka (Japan), Morelli (Italy), Bustamante y Rivero (Peru), all retiring in 1970. Sir Gerald Fitzmaurice was elected at the Fifteenth Session (1960) to fill the casual vacancy caused by the death of Sir Hersch Lauterpacht.

7. **The Secretariat.**—The Secretary-General is the head of the Secretariat of the organization. He is appointed by the General Assembly upon the recommendation of the Security Council, and he appoints his staff in accordance with the rules approved by the General Assembly. Mr. Trygve Lie (Norway) was appointed first Secretary-General, and at the Sixth Session of the General Assembly in 1950 his appointment was extended for a further three years as from 1st February, 1951. In November, 1952, Mr. Lie announced his intention of retiring, and in April, 1953, Mr. Dag Hammarskjöld (Sweden) was appointed in his place. He was re-appointed for a further five years in September, 1957, but was killed on 18th September, 1961, in an aircraft crash. U Thant (Burma) was appointed on 3rd November, 1961, to act for the remainder of the term (until 10th April, 1963).

8. **Specialized Agencies.**—In addition to these organs of the United Nations, there are specialized agencies which co-operate closely with the United Nations in many fields on economic and social questions.

Those now* in operation are: International Labour Organization; Food and Agriculture Organization; United Nations Educational, Scientific and Cultural Organization; International Civil Aviation Organization; International Bank for Reconstruction and Development; International Monetary Fund; International Finance Corporation; International Development Association; Universal Postal Union; World Health Organization; International Telecommunications Union; World Meteorological Organization; Intergovernmental Maritime Consultative Organization.

To enable co-ordination of the work of the specialized agencies, arrangements have been made for them to submit reports on their activities and budgets to the United Nations where they are discussed by the Economic and Social Council and the General Assembly.

§ 17. Australian Representation Abroad :: Oversea Representation in Australia.

1. **General.**—The following statements show particulars of the various Australian diplomatic and other representatives overseas and of overseas representatives in Australia in November, 1961. Full details of Commonwealth and foreign representation in Australia—diplomatic and consular—and of permanent Australian missions overseas may be obtained from publications issued by the Department of External Affairs, Canberra. A statement is issued each quarter by the Department of Trade, showing the latest particulars of the Australian Trade Commissioner Service overseas.

2. Australian Representation Overseas.—

AUSTRALIAN DIPLOMATIC AND OTHER REPRESENTATIVES OVERSEAS.

Her Majesty's Australian Ambassador Extraordinary and Plenipotentiary to—

Belgium (Brussels)—Sir Edwin McCarthy, C.B.E.

Brazil (Rio de Janeiro)—S. Jamieson.

Burma (Rangoon)—(Vacant); F. T. Homer (Charge d'Affaires *ad interim*).

Cambodia (Phnom Penh)—F. H. Stuart.

* November, 1961.

France (Paris)—Dr. E. R. Walker, C.B.E.
Germany, Federal Republic of (Bonn)—Sir Alan Watt, C.B.E.
Indonesia (Djakarta)—P. Shaw, C.B.E.
Ireland (Dublin)—(Vacant); H. D. White (Charge d'Affaires *ad interim*).
Israel (Tel Aviv)—J. M. McMillan.
Italy (Rome)—(Vacant); K. H. Rogers (Charge d'Affaires *ad interim*).
Japan (Tokyo)—L. R. McIntyre, C.B.E.
Nepal—W. R. Crocker, C.B.E. (resident in New Delhi).
The Netherlands (The Hague)—Sir Edwin McCarthy, C.B.E.
The Philippines (Manilla)—A. T. Stirling, C.B.E.
South Africa (Pretoria)—O. L. Davis.
Thailand (Bangkok)—M. R. Booker.
Union of Soviet Socialist Republics (Moscow)—J. K. Walter, C.B.E.
United Arab Republic (Cairo)—(Vacant); T. V. Holland (Charge d'Affaires *ad interim*).
United States of America (Washington, D.C.)—The Hon. Sir Howard Beale, K.B.E., Q.C.
Vietnam (Saigon)—B. C. Hill (Ambassador designate).

High Commissioners for Australia in—

Canada (Ottawa)—D. O. Hay, D.S.O., M.B.E.
Ceylon (Colombo)—(Vacant); M. G. M. Bouchier (Acting).
Ghana (Accra)—B. C. Ballard.
India (New Delhi)—W. R. Crocker, C.B.E.
Malaya, Federation of (Kuala Lumpur)—T. K. Critchley.
New Zealand (Wellington)—Vice-Admiral Sir John Collins, K.B.E., C.B.
Nigeria (Lagos)—A. P. Renouf.
Pakistan (Karachi)—J. C. G. Kevin.
United Kingdom of Great Britain and Northern Ireland (London)—The Rt. Hon. Sir Eric Harrison, K.C.V.O.

Her Majesty's Australian Envoy Extraordinary and Minister Plenipotentiary to—

Laos (Vientiane)—A. M. Morris.
Sweden (Stockholm)—(Vacant); W. R. Carney (Charge d'Affaires).

Australian Military Mission—

Germany, Federal Republic of (Berlin)—Head, Sir Alan Watt, C.B.E.

Australian Mission—

United Nations (New York)—Ambassador, J. Plimsoll, C.B.E.
United Nations (Geneva)—Permanent Representative, L. J. Arnott.

Australian Commissioner in—

Singapore, Brunei, Sarawak and North Borneo (Singapore)—G. A. Jockel.

Consuls-General—

Greece (Athens)—G. V. Greenhalgh.
Switzerland (Geneva)—L. J. Arnott.
United States of America (New York)—A. R. Cutler, V.C., C.B.E.
United States of America (San Francisco)—T. W. Cutts.

Consuls—

Denmark (Copenhagen)—C. L. Waterman (Acting).
New Caledonia (Noumea)—K. R. Douglas-Scott.
Portugese Timor (Dili)—W. A. Luscombe.
United States of America (New York)—W. H. Bray.

Trade Commissioner Service of the Commonwealth of Australia—

Canada—R. R. Ellen, M.B.E., Trade Commissioner (Montreal); D. R. McPhee, O.B.E., E.D., Trade Commissioner (Vancouver); W. R. Hudspeth, Commercial Counsellor (Ottawa).
Ceylon—D. F. J. McSweeney, Trade Commissioner (Colombo).
France—A. P. Fleming, O.B.E., Commercial Counsellor and Trade Commissioner (Paris).
Germany, Federal Republic of—R. K. Scott, Commercial Counsellor and Trade Commissioner (Bonn).
Ghana—D. R. Cristofani, Commercial Counsellor and Trade Commissioner (Accra).

- Hong Kong*—G. R. B. Patterson, O.B.E., Senior Trade Commissioner; J. A. Ellis, Trade Commissioner (Victoria).
India—J. A. Back, Commercial Counsellor and Senior Trade Commissioner (New Delhi); G. M. Carr, Trade Commissioner (Bombay); N. S. Pantou, Trade Commissioner (Calcutta).
Indonesia—M. J. S. Knowles, Commercial Counsellor and Trade Commissioner (Djakarta).
Italy—P. F. Donovan, Commercial Counsellor and Trade Commissioner (Rome).
Japan—A. J. Day, M.B.E., Commercial Counsellor and Trade Commissioner (Tokyo).
Kenya—G. W. S. Temby, Trade Commissioner (Nairobi).
Lebanon—H. M. Le Marchand, Trade Commissioner (Beirut).
Malaya, Federation of—W. Cairns, Commercial Counsellor and Trade Commissioner (Kuala Lumpur).
New Zealand—C. A. Allen, M.V.O., Senior Trade Commissioner (Wellington); C. L. Steele, Trade Commissioner (Auckland); S. D. Shubart, Trade Commissioner (Christchurch).
Pakistan—A. R. Taysom, Commercial Counsellor and Trade Commissioner (Karachi).
Peru—M. F. Roberts, Trade Commissioner (Lima).
Philippines, The—P. G. Gilmour, Commercial Counsellor and Trade Commissioner (Manila).
Rhodesia and Nyasaland, Federation of—K. F. McKernan, Trade Commissioner (Salisbury).
Singapore—R. W. Holberton, Commercial Counsellor and Trade Commissioner (Singapore).
Sweden—W. R. Carney, Senior Trade Commissioner; A. C. Slater, Trade Commissioner (Stockholm).
Thailand—R. J. C. Schneeman, Commercial Counsellor and Trade Commissioner (Bangkok).
Union of South Africa—J. L. Chapman, Commercial Counsellor and Trade Commissioner (Johannesburg).
United Kingdom of Great Britain and Northern Ireland—P. R. Searcy, Senior Trade Commissioner (London).
United States of America—A. R. Callaghan, C.M.G., Commercial Counsellor and Trade Commissioner (Washington); H. C. Menzies, Senior Trade Commissioner (New York); B. T. Connolly, Trade Commissioner (San Francisco); E. E. Jarvis, Trade Commissioner (Chicago).
West Indies, Federation of—J. J. Molan (Port of Spain).

Australian Government Trade Correspondents—

- Fiji*—Capt. J. W. Solly (Nadi Airport).
Formosa—E. J. N. Mycock (Taipei).
Hawaii—Group Capt. R. E. Waddy (Honolulu).
Mauritius—J. L. B. Cowan (Curepipe).
Mexico—N. Pelham Wright (Mexico City).
South America—Captain H. Cross (Montevideo Ro Del Uruguay).

3. **Oversea Representation in Australia.**—Consular representatives are not included in the following statement. Particulars of these are contained in a publication *Consular Representatives and Trade Commissioners in Australia*, issued by the Department of External Affairs, Canberra. There are more than 180 such representatives in Australia, and 53 countries are represented.

DIPLOMATIC REPRESENTATIVES IN AUSTRALIA.

Ambassador Extraordinary and Plenipotentiary of—

- Belgium*—His Excellency Monsieur Willy Stevens (Canberra X 2687).
Brazil—(Vacant); Senhor Edmundo Radwanski (Charge d'Affaires) (Canberra X 2680).
Burma—His Excellency U Aung Shwe (Canberra U 1451).
Cambodia—His Excellency Mr. Poc Thieun (Canberra 7 2517).
China—His Excellency Dr. Chen Chih-Mai (Canberra X 4030).
France—His Excellency Monsieur Phillipe Monod (Canberra U 1454).
Germany, Federal Republic of—His Excellency Dr. Hans Mühlenfeld (Canberra U 1553).
Greece—His Excellency Monsieur P. Annino Cavalierato (Canberra 9 0144).

Indonesia—His Excellency Brigadier-General Suadi Suromihardjo (Canberra U 1221).

Ireland—(Vacant); Mr. Sean Kennan (Charge d'Affaires *ad interim*) (Canberra J 3251).

Israel—His Excellency Mr. Moshe Yuval (Canberra U 1309).

Italy—His Excellency Signor Eugenio Prato (Canberra 7 2529).

Japan—His Excellency Mr. Saburo Ohta (Canberra U 1251).

The Netherlands—His Excellency Dr. J. G. de Beus (Canberra U 1256).

The Philippines—His Excellency Mr. M. Ezpeleta (Sydney FL 3138).

South Africa—His Excellency Mr. H. H. Woodward (Canberra U 2370).

Switzerland—His Excellency Mr. F. Gyax (Sydney BL 1291).

Thailand—His Excellency Nai Vadhana Isarabhakdi (Canberra U 8101).

Union of Soviet Socialist Republics—His Excellency Mr. Ivan F. Kurdiukov (Canberra X 1033).

United Arab Republic—His Excellency Mr. M. Yusef (Canberra X 1717).

United States of America—(Vacant); Mr. W. Belton (Charge d'Affaires *ad interim*).

Vietnam—His Excellency Mr. Tran Van Lam (Canberra 7 7240).

High Commissioner for—

Canada—(Vacant); Mr. D. Stansfield (Acting High Commissioner) (Canberra U 2288).

Ceylon—His Excellency Mr. W. D. Gunaratna, O.B.E. (Canberra X 0121).

India—His Excellency Shri Samar Sen (Canberra J 3209).

Malaya, Federation of—His Excellency Dato Suleiman bin Dato Abdul Rahman, P.M.N. (Canberra U 1543).

New Zealand—His Excellency Mr. S. C. Johnston (Canberra U 1030).

Pakistan—His Excellency Mr. J. G. Kharas (Canberra X 0021).

United Kingdom of Great Britain and Northern Ireland—His Excellency Lieutenant-General Sir William Oliver, K.C.B., O.B.E. (Canberra U 2211).

Envoy Extraordinary and Minister Plenipotentiary—

Austria—(Vacant); Dr. W. de Comtes (Charge d'Affaires) (Canberra U 8167).

Chile—(Vacant); Senor Gino Bucchi-Cariola (Charge d'Affaires) (Sydney FM 7442).

Denmark—(Vacant); Mr. Nils C. Stenderup (Charge d'Affaires) (Sydney BW 3547).

Finland—(Vacant); Mr. T. I. Kala (Charge d'Affaires) (Sydney FM 1252).

Sweden—His Excellency M. Nils-Eric Ekblad (Canberra U 1421).

Commissioner for—

Malta—Captain George F. L. Stivala, O.B.E. (Melbourne MU 1291).

TRADE COMMISSIONERS OF OVERSEA GOVERNMENTS IN AUSTRALIA.

Canada—Canadian Government Trade Commissioners—Mr. S. V. Allen (Sydney BW 5696-7) and Mr. H. A. Gilbert (Melbourne MA 3473).

Ceylon—Ceylon Government Trade Commissioner—Mr. E. M. O. Martenstyn (Sydney BL 5039).

India—Indian Trade Commissioner—Shri G. L. Puri (Sydney BW 9518).

Malaya—Malayan Government Trade Commissioner—Inche Bahatun bin Haji Hassan (Sydney BU 5298-9).

New Zealand—Senior New Zealand Government Trade Commissioner—Mr. C. H. Fowler (Sydney BL 3941).

New Zealand Government Trade Commissioner—Mr. A. C. Davys (Melbourne MU 8111).

United Kingdom of Great Britain and Northern Ireland—United Kingdom Senior Trade Commissioner—Mr. F. B. Arnold, C.M.G., O.B.E. (Canberra U 2211).

United Kingdom Trade Commissioners—Messrs. P. B. Hunt and A. F. Collings (Canberra U 2211); Messrs. A. R. Bruce O.B.E., N. L. Hibbs and J. R. Morley (Sydney BU 7521); Messrs. J. W. Stoodley and G. J. Husted (Melbourne MU 5556); Mr. K. R. Allen (Brisbane B 2307); Mr. J. D. Leithead (Perth BA 2042); Mr. M. E. Browne (Adelaide LA 4011).

§ 18. Retail Trade.

1. **General.**—The statistics in this section relate to the number of retail establishments throughout Australia and the value of retail sales of goods by these establishments.

Information of this nature was first collected in respect of the year ended 30th June, 1948, by a full census of all retail establishments. As this was the first census of its type in Australia, its scope and the data sought were the minima consistent with the objective

of securing a record of the number of such establishments, their type, their geographical distribution, their aggregate sales of goods and a simple commodity dissection together with a record of the value of certain services provided. This census was followed by a second census of all retail establishments trading during the year ended 30th June, 1949.

A third census was taken for the year ended 30th June, 1953, in which retailers were asked to furnish more detailed information concerning the dissection of their turnover into commodity groups, and questions were asked about stocks of goods on hand, the number of persons engaged in the business and credit sales.

A further census was taken in respect of the year ended 30th June, 1957. The scope of this census followed the same general principles adopted for the previous census, but some additional questions were asked about type of organization, purchases and customers' indebtedness.

In general terms, the censuses covered the retail trading activities of establishments which normally sell goods by retail to the general public from fixed premises (i.e. shops, rooms, kiosks and yards). Certain types of "service" establishments were also included, e.g., boot repairers, hairdressers, motor garages and service stations and cafés. The censuses included the retail sales of those factories or wholesalers who conducted a regular retail business, but excluded those who only occasionally sold goods by retail. Both new and second-hand goods were included in sales recorded by relevant retail establishments.

During the period between censuses, variations in the value of retail sales have been measured by means of quarterly sample surveys. Annual totals derived from these surveys and some of the results of the 1956-57 census are contained in this section.

2. Value of Retail Sales in Each Commodity Group, Australia.—The following table shows the value of retail sales of goods in each of the commodity groups specified in the years 1954-55 to 1960-61 on a comparable basis throughout. The figures for the year 1956-57 were obtained from the census taken in respect of that year, whereas figures for the other years shown are estimates based on sample surveys.

VALUE OF RETAIL SALES: COMMODITY GROUPS, AUSTRALIA.(a)
(£ million.)

Commodity Group:	Year ended 30th June—						
	1955.	1956.	1957.	1958.	1959.	1960.(b)	1961.(b)
Groceries	302.0	328.7	343.9	358.3	377.3	403.9	434.6
Butchers' Meat	146.9	158.7	170.1	170.8	178.6	193.5	212.1
Other Food (c)	246.5	269.2	282.8	294.5	314.1	343.7	363.4
<i>Total Food and Groceries ..</i>	<i>695.4</i>	<i>756.6</i>	<i>796.8</i>	<i>823.6</i>	<i>870.0</i>	<i>941.1</i>	<i>1,010.1</i>
Beer, Wine and Spirits (d) ..	204.3	222.1	237.5	248.2	245.1	259.5	265.3
Clothing and Drapery	419.3	433.3	380.8	451.0	404.7	444.2	461.5
Footwear	135.6	143.9	59.3	145.0	64.9	72.6	76.8
Hardware(e)	99.0	104.6	144.2	137.7	157.5	169.2	173.8
Electrical Goods(f)	86.4	91.8	113.0	137.7	159.5	195.2	191.6
Furniture and Floor Coverings	86.4	91.8	92.5	97.6	99.8	116.9	119.5
Chemists' Goods	368.2	398.3	76.9	439.0	95.4	105.4	116.9
Newspapers, Books and Stationery	69.3	69.3	69.3	69.3	74.9	81.3	84.9
Other Goods(g)	277.5	277.5	277.5	277.5	281.7	306.1	326.3
<i>Total (excluding Motor Vehicles, etc.) ..</i>	<i>2,008.2</i>	<i>2,150.6</i>	<i>2,247.8</i>	<i>2,342.2</i>	<i>2,453.5</i>	<i>2,691.5</i>	<i>2,826.7</i>
Motor Vehicles, Parts, Petrol, etc.(h)	571.6	613.2	631.4	684.6	744.6	895.4	907.3

(a) Excludes Northern Territory and Australian Capital Territory. (b) Subject to revision.
(c) Includes fresh fruit and vegetables, confectionery, soft drinks, ice cream, cakes, pastry, cooked provisions, fish, etc., but excludes some delivered milk and bread. (d) Excludes sales made by licensed clubs, canteens, etc. (e) Excludes basic building materials (e.g. timber, building sheets, tiles, joinery, cement). (f) Includes radios, television and accessories, musical instruments, domestic refrigerators, etc. (g) Includes tobacco, cigarettes, etc., grain and produce, jewellery, office equipment, etc. (h) Includes tractors, new and used motor vehicles, parts, petrol, etc., but excludes farm machinery and implements, earth-moving equipment, etc.

3. Number of Retail Establishments which sold goods in each Commodity Group and Value of Retail Sales in each Commodity Group, 1956-57, States, etc.—The following tables show the number of establishments which sold goods in each commodity group and the value of retail sales during the year ended 30th June, 1957, for each State and Territory.

NUMBER OF RETAIL ESTABLISHMENTS WHICH SOLD GOODS IN EACH COMMODITY GROUP SPECIFIED, 1956-57.(a)

Commodity Group.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.

(a) All figures refer to establishments with total retail sales in 1956-57 of £500 or more. (b) Excludes sales made by licensed clubs, canteens, etc. (c) Excludes Basic Building Materials (e.g. Timber, Building Sheets, Tiles, Joinery, Cement). (d) Not available for publication. (e) Excludes Farm Machinery and Implements, Earth-moving Equipment, etc.

4. Number of Retail Establishments and Value of Retail Sales Classified According to Main Type of Business, 1956-57, States, etc.—The following tables show the number of establishments and the value of retail sales during the year ended 30th June, 1957, in each State and Territory, classified according to main type of business. In general, the classification of establishments according to main type of business was based on the predominant type of goods sold or service rendered, although the description given by the proprietor was used as a guide.

NUMBER OF RETAIL ESTABLISHMENTS CLASSIFIED ACCORDING TO MAIN TYPE OF BUSINESS, 1956-57.(a)

(a) All figures refer to establishments with total retail sales in 1956-57 of £500 or more, and are the total value of all commodities sold by the types of business shown. (b) Not available for publication.
(c) These figures differ from their counterparts in the table on p. 1150 because they include retail sales of motor vehicles, etc., made by establishments whose main type of business is other than motor vehicles, and exclude retail sales of goods other than motor vehicles, etc., made by establishments whose main type of business is motor vehicles.

CHAPTER XXXI.

STATISTICAL ORGANIZATION AND SOURCES OF INFORMATION.

§ 1. Statistical Organization in Australia.

1. **Early Development of Australian Statistics.**—(i) *Crown Colony "Blue Books."* Statistical organization in Australia was founded in the "Blue Books" which, in the Crown Colony days, were prepared annually for the information of the Colonial Office. Although primarily intended for administrative purposes, these documents have been important sources of statistical data, even though some important matters are not covered, and others only partially so. These "Blue Books" formed the basis from which later statistical publications were developed. This led to an element of uniformity in statistical compilation within the British Empire.

(ii) *Statistical Registers.* Following the advent of responsible government, which was granted during the period 1851-1860 to all Australian States except Western Australia—and to that State in 1890—the "Blue Book" was succeeded in all States by "Statistical Registers". These were in many respects the old "Blue Books" in a new form, and were largely confined to summaries of the "by-product" statistics of government administrative departments.

The first example of extensive government organization for purely statistical purposes was the taking of periodic population censuses, which were initiated in all States under the Crown Colony régime. The growing need for quantitative data concerning the progress of the several young communities of Australia eventually led to the appointment of official Statisticians commissioned to prepare and publish such data.

(iii) *Statistical Conferences.* To enable the interchange of ideas between States and to obtain uniform State statistics which could be aggregated to Australian totals, conferences were held in the several States from as early as 1861. Altogether, six conferences were held prior to the formation of the Commonwealth Bureau of Census and Statistics in 1906. These were held in 1861, 1875, 1890, 1900, 1902 and 1903. The holding of these conferences has been continued since the formation of the Commonwealth Bureau, and a representative from New Zealand attended up to 1928.

2. **Creation of the Commonwealth Bureau of Census and Statistics.**—Under the provisions of section 51 of the Commonwealth Constitution, power is conferred on the Commonwealth Parliament "to make laws for the peace, order and good government of the Commonwealth with respect to—" (*inter alia*) "(XI.) Census and statistics". In compliance with this provision, the Census and Statistics Act 1905 was passed, and in 1906 the Commonwealth Bureau of Census and Statistics was created. A conference of Statisticians in 1906 defined the relations between the Commonwealth and State Bureaux, and in each case the State Statistician became the representative in his own State of the Commonwealth Statistician for the purpose of administering the Commonwealth Act. In addition, each State has its own "Statistics Act", and although these are not identical in all States, they embody common principles. The Commonwealth Bureau did not attempt to duplicate the existing statistical organization, but endeavoured to use the services of the State statistical offices whenever possible, and to undertake the initial collection of statistics only in fields not already occupied by the States, or in which efficiency demanded complete centralization.

3. **Integration of Statistical Services.**—The creation and development of the Commonwealth Bureau of Census and Statistics, the frequent conferences of Commonwealth and State Statisticians, and the close and increasing liaison between officers dealing with the same subjects in the State and Commonwealth fields, did much to promote uniformity in the official statistical collections and methods employed throughout Australia. The complete realization of this aim could not, however, be achieved, even with the utmost co-operation of those concerned, while seven distinct statistical systems operated.

This became apparent after the 1914-18 War, when the economic problems that then arose drew attention to deficiencies in the Australian statistical data. With a view to overcoming these weaknesses, the Prime Minister of the day proposed to the Premiers' Conference that State statistical offices be transferred to the Commonwealth. Tasmania alone agreed to this, and the transfer was effected in 1924. Since then, an amalgamated office has functioned satisfactorily in that State as a Commonwealth office which also serves State statistical needs.

The boom of the 1920's, the depression of the 1930's, the 1939-45 War, and the post-war boom, each with its special economic problems, imposed a severe strain on the Commonwealth and State statistical systems. Moreover, the development during and since the 1939-45 War of a very considerable volume of new statistics added greatly to the complexities of the several administrations in their efforts to secure, and maintain, uniformity in statistical collections. The establishment of Commonwealth statistical offices in some State capitals ameliorated the situation to some extent—indeed, without their establishment the new and expanded statistical collections could not have been carried out at all. However, this did not solve the problem and constituted only one of a number of improvisations devised to obtain uniform data essential for national purposes, and to satisfy urgent demands for new series of statistics. Furthermore, the excessive amount of time and effort entailed in such improvisations made it impossible to devote the necessary time to the major question of meeting growing statistical needs promptly.

The emergence of the problem of providing uniform statistical services throughout Australia, adequate to meet present-day demands, was foreseen during the 1939-45 War, and in 1949 discussions with the Premiers were initiated by the Prime Minister, with the object of integrating the statistical services of the Commonwealth and the States by agreement. These negotiations were continued by correspondence, and subsequently all State Governments accepted the terms of draft agreements to integrate their respective statistical offices with that of the Commonwealth.

The Statistics (Arrangements with States) Bill was introduced into the Commonwealth Parliament on 17th April, 1956, its purpose being to seek parliamentary approval of the making of arrangements with individual States for, and the setting up of, integrated statistical services. This legislation, permissive in nature, was designed to enable the Commonwealth to enter into an agreement with any State to effect an amalgamation of Commonwealth and State statistical offices and services. The object of such an agreement was that, in each State accepting it, there would be an integrated statistical service operated by Commonwealth statistical officers under the immediate direction of a statistician in the State who would hold office under both the Commonwealth and State governments. Both Commonwealth and State were to be adequately served with statistics, and no State would be required to surrender its existing powers in the field of statistics. The rights of officers transferred under any agreement entered into were provided for. After passing through the usual stages of Parliament, the bill became law on 12th May, 1956.

Integration of the Commonwealth and State statistical services was finally accomplished when the integration arrangement with Victoria came into effect on 15th September, 1958.

4. Scope of the Commonwealth Bureau of Census and Statistics.—The scope of the Commonwealth Bureau of Census and Statistics has constantly been widened, more particularly during the 1939-45 War, when the Bureau responded to the urgent demands of administration for immediate and accurate statistical information in various fields. Since the War, requirements in the administrative, industrial, financial and scientific spheres have led to the development of many new statistical collections. All the activities of the Bureau are covered by the Census and Statistics Act, which confers authority to collect information and contains stringent provisions to ensure that the information obtained is treated in strictest secrecy.

The following sections of this paragraph relate specifically to the organization and operation of the Commonwealth Bureau of Census and Statistics in Canberra. In the State Offices, the pattern is broadly similar, although local requirements have naturally given rise to differences in detail.

For administrative purposes, the Commonwealth Bureau, Canberra, is divided into a number of Divisions. These are:—Census, Compiling, Development, Methodology and Sampling, Publications, Research and Social Accounts, Mechanical Tabulation and Administrative.

(a) *Census Division.* This Division of the Bureau is responsible for the taking of periodic population censuses, and the tabulation, summarization and preparation for publication of the results obtained.

(b) *Compiling Division.* The Compiling Division is divided into the following Branches which compile statistics dealing with specific fields of activity:—

Trade and Transport Branch—Responsible for the original compilation, tabulation and analysis of statistics relating to imports and exports, and for the compilation of statistics relating to road and rail transport, aviation, shipping, posts, telegraphs and telephones, and broadcasting and television.

Employment and Labour Branch—Compiles all employment estimates, wage and labour statistics.

Primary Production Branch—Deals with statistics relating to agricultural and pastoral activities, mining, forestry and fishing. Original data are supplied largely by State Statisticians.

Secondary Production Branch—Compiles all factory statistics both annual and monthly. Collates on a Commonwealth basis original data supplied by State Statisticians.

Finance and Taxation Branch—Compiles statistics of private finance (banking, insurance, exchange rates, etc.), public finance (Commonwealth, State, and Local and Semi-Governmental authorities), and statistics relating to all aspects of Commonwealth taxation.

Demography Branch—Concerned with statistics of births, deaths, marriages and migration, and the making of periodic estimates of population.

(c) *Development Division*. This Division was created in order to develop new statistical collections to meet post-war demands for more adequate and up-to-date statistics, and also to examine current collections in the light of such requirements. It is divided into three Branches, namely:—

Development Branch—Develops new statistical collections and examines current collections in the light of present-day requirements. Included in the latter are Social Statistics.

Prices Branch—Deals with the collection of retail and wholesale prices and the compilation of retail and wholesale price index numbers. A staff of trained field officers is maintained in the several States to facilitate the collection of accurate information.

Business Statistics Branch—Conducts censuses and surveys and analyses statistics relating to internal trade (retail), business and hire purchase activities, and company investments and profits.

(d) *Methodology and Sampling Division*. Undertakes the development of sampling procedures and their application to statistical collections and furnishes technical advice to other Divisions and Departments.

(e) *Publications Division*. This Division is responsible for the editing and graphical illustration of all Bureau publications, and, in collaboration with other Divisions, for the initiation, development and co-ordination of statistical publications. It also maintains a regular flow of statistical series to certain international organizations, and revises statistical material in certain overseas and local publications.

(f) *Research and Social Accounts Division*. This Division is responsible for the preparation of all estimates in the field of social accounts and for research into this and other fields of statistics. It is divided into four branches as follows:—

National Income and Expenditure Branch—Prepares and analyses estimates of national income and expenditure and tables of social accounts.

Balance of Payments Branch—Prepares and analyses estimates of Australia's balance of international payments.

Quantum Indexes Branch—Prepares indexes of quantum of imports, exports, etc., and undertakes research into quantum of production, national expenditure, etc.

Research Branch—Carries out research into specific fields of statistics.

(g) *Mechanical Tabulation Division*. This Division is equipped with modern tabulating equipment including three electronic units, and is responsible for all machine tabulating work required by other Divisions of the Bureau with the exception of the Census Division. It also carries out work for other Commonwealth Departments as capacity is available.

(h) *Administrative Division*. The Administrative Division is responsible for all aspects of staff recruitment and direction, supplies, payment of accounts, etc. The Reproduction Section of the Division is equipped with multilith and duplicating machines for processing statistical statements for more immediate requirements. In addition, a section of this Division is responsible for the co-ordination of statistics in Commonwealth Departments (see para. 5 below). The specialized library of official and unofficial publications on statistics and economics is controlled by the Administrative Division.

5. Relation of the Bureau to other Commonwealth Departments.—In October, 1950, the Commonwealth Public Service Board issued a circular relative to the compilation of statistics in other Commonwealth Departments, in which it stated that the Commonwealth Statistician should be the co-ordinating authority on all statistics in Commonwealth Departments, and that, as a general principle, where any new statistical field is to be established involving the regular collection of statistics, the Commonwealth Statistician should be consulted to ensure that they are necessary and that they are based on sound statistical methods; furthermore, that the Commonwealth Statistician should make a regular inspection, at least once every twelve months, of all statistical work done by Departments to ensure that their needs are met by the most economical means and without duplication of effort.

This project of co-ordination is being implemented as statistical developments require and as time and circumstances permit.

§ 2. Statistical Publications of Australia.

1. **General.**—The official statistical publications of Australia may be divided bibliographically into two main divisions, namely:—(i) Commonwealth publications dealing both individually and collectively with the several States of Australia; and (ii) State publications dealing with individual States only.

2. **Commonwealth Publications.**—Commonwealth publications containing statistics may be grouped under two heads, namely:—(i) Publications issued by the Commonwealth Statistician; and (ii) Parliamentary and Departmental Reports and Papers.

(i) *Publications issued by the Commonwealth Statistician.* The following is a list of the principal statistical publications issued from the Commonwealth Bureau of Census and Statistics since its inauguration to October, 1961:—

Australian Balance of Payments.—Statements Nos. 1 to 3, 1928–29 to 1951–52.

Australian Exports.—Annually, 1958–59 to 1960–61.

Australian Life Tables, 1901–1910. *Australian Joint Life Tables, 1901–1910.*

Australian Life Tables, 1920–1922.

Australian Life Tables, 1932–1934. *Australian Joint Life Tables, 1932–1934.*

Australian Life Tables, 1946–1948.

Australian Life Tables, 1953–1955.

Australian Mineral Industry Statistics (formerly *Minerals and Metals Bulletin*).—Part 2 of Quarterly Bulletin issued jointly with the Bureau of Mineral Resources.

Australian Primary Industries.—Report prepared for the Empire Producers Conference, Sydney, March, 1938.

Census (1911) Results.—Bulletins. Vols. I. (Statistician's Report), II., and III., with Appendix *Mathematical Theory of Population*.

Census (1921) Results.—Bulletins, Nos. 1 to 26. Parts I. to XVI., forming Vol. I., and Parts XVII. to XXIX., forming, with the Statistician's Report, Vol. II. NOTE.—Part XXVII., Life Tables.

Census (1933) Results.—Bulletins, Nos. 1 to 25. Parts I. to XIV., forming Vol. I., Parts XV. to XXVIII., forming Vol. II., and Parts XXIX. to XXXVII., forming, with the Statistician's Report and Australian Life Tables, 1932–1934, Vol. III.

Census (1947) Results.—Bulletins, Nos. 1 to 25. Parts I. to XVI., forming Vol. I., Parts XVII. to XIX., forming Vol. II., and Parts XX. to XXVIII., forming, with the Statistician's Report and Australian Life Tables, 1946–1948; Vol. III.

Census (1954) Results.—See Price List at end of this volume.

Census of Motor Vehicles, 1947–48 (see *Survey of Motor Vehicles, 1947–48*).

Census of Motor Vehicles, 31st December, 1955.—Bulletins, Nos. 1 to 8.

* *Census of Retail Establishments (1947–48) Results.*—Bulletins, Nos. 1 to 7.

* *Census of Retail Establishments (1948–49) Results.*—Bulletins, Nos. 1 to 7.

* *Census of Retail Establishments (1952–53) Results.*—Bulletins, Nos. 1 to 14.

Census of Retail Establishments (1956–57) Results.—Bulletins, Nos. 1 to 8 (mimeograph)* and 9 to 15 (printed).

* *Dairying Industry* (formerly *Summary of Dairying Industry*).—Statistical Bulletin, monthly; first issue, September, 1937.

Demography.—Bulletin, annually, 1911 to 1959.

* *Digest of Current Economic Statistics.*—Monthly, since August, 1959.

* *Factories, Principal Statistics, Summary.*—Annually, 1948–49 to 1958–59.

Finance.—Bulletin, 1907 to 1916–17 annually; 1917–18 and 1918–19 (one vol.); 1919–20 and 1920–21 (one vol); 1922–23 to 1958–59 annually. From 1955–56 issued in two parts; Part I., Public and Private Finance; Part II., Commonwealth Taxation.

* *Food Production and the Apparent Consumption of Foodstuffs and Nutrients in Australia, Report on.*—Statistical Bulletin, half-yearly, 1946–47 to 1947–48; annually, 1948–49 to 1959–60.

* *Fruit Growing Industry* (formerly *Summary of Fruit Growing Industry*).—Statistical Bulletin, annually, 1944–45 to 1959–60.

Imports Cleared for Home Consumption.—Annually, 1950–51 to 1960–61.

Labour and Industrial Statistics.—Memoranda and Reports, various, to 1913.

Labour Report.—Annually, 1913 to 1959.

* Distributed by the Commonwealth Statistician—for methods of obtaining other publications still in print see back page of this volume.

- * *Livestock Numbers* (formerly *Summary of Livestock Statistics*).—Statistical Bulletin, annually, 1943 to 1961.
- Local Government in Australia*.—July, 1919.
- * *Manufacturing Industries*.—Bulletins on Individual Industries, annually, 1936-37 to 1939-40, 1940-41 (issue incomplete), and 1944-45 to 1959-60.
- Monthly Review of Business Statistics*.—First issue, October, 1937.
- * *Occupation Survey (1945) Results*.—Detailed tables.
- Official Year Book of the Commonwealth of Australia*.—Annually, 1907 to present issue (No. 47). Issues Nos. 40 to 47 also published in parts.
- Oversea Trade*.—Bulletin, annually, 1906 to 1960-61.
- * *Oversea Trade*.—Preliminary Bulletin. Annually, 1952-53 to 1960-61.
(See also *Australian Exports and Imports Cleared for Home Consumption*).
- Pocket Compendium of Australian Statistics* (formerly *Statistical Digest*).—1913, 1914, 1916, and 1918 to 1961 annually.
- Population and Vital Statistics*.—Bulletins and Reports, various, 1906-1910.
- Primary Industries*.—Bulletins, annually, 1950-51 to 1958-59, in two parts—Part I. Rural Industries; Part II. Non-Rural Industries and Value of Production.
- Production*.—Bulletin, annually, 1906 to 1949-50. From 1936-37 to 1949-50 issued in two parts—Part I. Secondary Industries; Part II. Primary Industries (including Total Recorded Production); thereafter separate Bulletins (see *Primary Industries and Secondary Industries*).
- Professional Papers*.—Various. A full list appears in Official Year Book No. 13, page 3.
- Quarterly Summary of Australian Statistics*.—First issue, No. 70. December, 1917, replacing *Monthly Summary of Australian Statistics* (Bulletins Nos. 1 to 69).
- * *Report of Proceedings of the Conference of British Commonwealth Statisticians*, 1951.
- * *Rural Land Use and Crop Production* (formerly *Summary of Crop Statistics*).—Statistical Bulletin, annually, 1943-44 to 1959-60.
- Secondary Industries*.—Bulletin, annually, 1950-51 to 1958-59.
- * *Size Classification of Rural Holdings*, 1955-56.—Bulletins Nos. 1 to 7.
- Social Insurance*.—Report to the Hon. the Minister for Trade and Customs, 1910.
- Social Statistics*.—Bulletin, 1907 to 1915 annually, and 1918.
- Superannuation for the Commonwealth Public Service*.—Report to the Hon. the Minister for Home Affairs, 1910.
- * *Survey of Motor Vehicles (1947-48) Results*.—Bulletins Nos. 1 to 7.
- Transport and Communication*.—Bulletin, 1906, 1908 to 1916 annually, 1919 to 1930 annually, and 1932 to 1959-60 annually.
- Wealth*.—The Private Wealth of Australia and its Growth as ascertained by various methods, together with a Report on the War Census in 1915.
- * *Wheat Industry* (formerly *Summary of the Wheat Situation*).—Statistical Bulletin, periodically; first issue, July, 1936.
- * *Wool Production and Utilization*.—Bulletin, annually, 1952-53 to 1959-60.

The foregoing list includes all the printed publications issued from the Bureau, and certain more important mimeographed publications issued for the most part annually. Minor changes in the titles of several publications have not been referred to above. Copies of a number of these publications, particularly earlier issues, are not available. Other mimeographed statements are distributed by the Commonwealth Statistician and deal with a wide variety of subjects, as follows:—

Annually.—Bee Farming; Factory Products (Principal); Fire, Marine and General Insurance; Fishing and Whaling; Milking Machines on Rural Holdings; Mining and Quarrying; Oversea Investment; Registrations of New Motor Vehicles; Taxation Collections; Trade of Australia with Eastern Countries; Rural Statistics of the Australian Capital Territory; Tractors on Rural Holdings; University Statistics; Value of Production; Wheat Industry; Wine and Brandy Statistics; Wool Production.

Half-yearly.—Australian Balance of Payments; Capital and Maintenance Expenditure; Labour Turnover; Trade of Australia with the United Kingdom; Road Traffic Accidents.

Quarterly.—Building; Consumer Price Index; National Income and Expenditure; New Capital Raisings; New Tractor Statistics; Retail Sales of Goods.

* Distributed by the Commonwealth Statistician—for methods of obtaining other publications still in print see back page of this volume.

Monthly.—Banking (General); Building Approvals; Demographic Review; Employment; Exports of Wool; Export Prices Index; Gold Mining Industry; Life Assurance; Meat Industry; Oversea Trade; Production Statistics; Registrations of New Motor Vehicles; Retail Hire Purchase Operations of Finance Businesses; Retail Sales of Goods (Total); Savings Banks; Wholesale Price (Basic Materials and Foodstuffs) Index.

In addition to the above-mentioned publications, most of which are issued regularly, there have been a number of statements issued by this Bureau which contain the results of special surveys or new statistical series and descriptions thereof. The more important of these are listed below.

Occasional Publications.—Special Business Surveys—No. 1. Average Wage and Salary Earnings (1947); No. 2. Incidence of Industrial Awards (1948); No. 3. Part-time Employment (1948); No. 4. Methods of Payments to Employees (1949); No. 5. Receipts and Payments of Rent, Interest and Royalties, 1949–50; No. 6. Average wage and Salary Earnings (1952); No. 7. Private Superannuation Schemes, 1951–52 (reprinted in *Finance Bulletin* No. 44); No. 8. Incidence of Industrial Awards (1956); No. 9. Private Pension and Retiring Allowance Schemes, 1955–56 (reprinted in *Finance, Part I. Bulletin* No. 47); No. 10. Receipts and Payments of Interest, Rent and Royalties, 1956–57; No. 11. Private Pension and Retiring Allowance Schemes, 1955–56 to 1957–58; No. 12. Private Pension and Retiring Allowance Schemes, 1955–56 to 1958–59.

Survey of Wage Rates and Earnings, September, 1960; New Indexes of Minimum Weekly Wage Rates—Adult Males and Adult Females (1960); Minimum Weekly Wage Rate Index—Components of Total Wage Rate (1961); A Description of the Consumer Price Index (1961); Minimum Weekly Wage Rates, January, 1957, to June, 1961.

Further information on current publications of the Commonwealth Bureau of Census and Statistics is contained in a List of Publications available free, on request, from the Commonwealth Statistician, Canberra. This List contains also a subject index to show the Bureau publications in which information on the various subjects dealt with by the Bureau is to be found.

(ii) *Commonwealth Parliamentary and Departmental Reports and Papers.* Lists of the principal official reports and other documents containing statistical information issued from the inauguration of the Commonwealth appear in the Official Year Books up to No. 13, but it is not now practicable to undertake the preparation of such lists.

3. *State Publications.*—The chief statistical publications of each State are set out hereunder. As with the Commonwealth Parliamentary and Departmental Reports and Papers, it is not practicable to enumerate the various Departmental Reports, statements of accounts, etc., issued by officials, boards, local and semi-governmental authorities, etc., in each State.

- (a) *New South Wales.*—New South Wales Statistical Register (annually); Official Year Book of New South Wales (annually); Pocket Year Book of New South Wales (annually); New South Wales Statistical Bulletin (monthly to December, 1919, quarterly to June, 1943, then discontinued to September, 1948); New South Wales Monthly Summary of Business Statistics.
- (b) *Victoria.*—Statistical Register of Victoria (annually to 1916, then discontinued); Victorian Year-Book (annually); Victorian Pocket Year Book (annually); Victorian Statistical Abstract (quarterly to 1917, then discontinued to December, 1946, quarterly to March, 1958, then discontinued); Victorian Monthly Statistical Review.
- (c) *Queensland.*—Statistics of the State of Queensland (annually); Queensland Official Year Book, 1901; A.B.C. of Queensland Statistics (annually to 1936, then discontinued); Queensland Year Book (annually 1937 to 1941, then discontinued to 1945); Queensland Pocket Year Book (annually); Queensland Statistics, Monthly Summary.
- (d) *South Australia.*—Statistical Register of South Australia (annually); Official Year Book of South Australia, 1912 and 1913; Statesman's Pocket Year Book of South Australia (annually); Quarterly Abstract of South Australian Statistics; Monthly Summary of Statistics, South Australia.
- (e) *Western Australia.*—Statistical Register of Western Australia (annually); Western Australian Statistical Abstracts (quarterly, previously issued monthly to July, 1917); Pocket Year Book of Western Australia (annually); Official Year Book of Western Australia (new series) from 1957; Monthly Statistical Summary, Western Australia.

- (f) *Tasmania*.—Statistics of the State of Tasmania (annually); Pocket Year Book of Tasmania (annually); Tasmania, Monthly Review of Business Statistics.

Apart from these publications, the Deputy Commonwealth Statisticians also issue a number of mimeograph publications on particular subjects, similar in range to those of the Commonwealth Bureau.

The Commonwealth Bureau of Census and Statistics, commencing with the year 1960, has produced an annual publication on statistics of the Northern Territory, entitled the Northern Territory Statistical Summary.

§ 3. The Third Conference of British Commonwealth Statisticians, Canberra, 1951.

Conferences of the Government Statisticians of the British Commonwealth were held first in London in 1920 and then in Ottawa in 1935. The third Conference was held in Canberra, from 12th to 23rd November, 1951. Delegates were present from Australia, Canada, Ceylon, India, New Zealand and the United Kingdom (including a representative of the Colonial Office). Ireland, the Commonwealth Economic Committee and the United Nations were represented by observers, and the Australian State Government Statisticians were also present. A summary of the activities of the conference may be found in Official Year Book No. 39, page 1320. The fourth Conference was held in London in 1956 and the fifth was held in New Zealand in November, 1960.

§ 4. Select List of Australian Books.

(Compiled by the Librarian of the Commonwealth National Library.)

This list of *Australian Books* is designed to meet the growing need, in Australia as publishing develops, and overseas as interest in Australia widens, for an authoritative current reference and reading list of books dealing with Australia, or of Australian authorship, wherever published.

Australians will find these books in the National Library and in their State Libraries as well as in leading bookshops. Oversea readers may have access to them in the collections which the National Library maintains at 53 Australian posts in 39 countries, at places such as Australian Embassies, or Offices of the Australian High Commission, Consulate-General, Consulate or Trade Commissioners. They will be found also, increasingly, in leading libraries and bookshops in many countries. For example, they are supplied by the National Library to the National Library of Canada and the National Diet Library, Japan. In the United States, also, Australian books are included in the Farmington Plan in which 62 libraries and research institutions co-operate to ensure that at least one copy of all material published in any part of the world and likely to be required for a serious purpose will be available promptly somewhere in the country.

The list is classified broadly by subject, and under each heading there is first a list of the principal standard books still in print, then a list of selected books and official publications (excluding annual reports) published in the last few years. To ensure that, so far as is possible, an evenness of standard is maintained in the compilation of the list, the advice of a representative range of experts in the various subject fields has been sought. Where known, the retail price in the country of publication is given, but this is subject to fluctuation.

The Library also issues a series of select lists which include:—*Australian Public Affairs Information Service* (monthly and, since 1955, cumulated annually); a subject index of material in new books, pamphlets, current periodicals and government publications from English-speaking countries, with an important bearing on investigations into Australian political, economic, cultural and social affairs; and the following full bibliographies.

Australian National Bibliography, a monthly list of monographs (including government publications), maps, prints, sheet music and moving picture films, of Australian interest.

An annual cumulation of *Australian National Bibliography* and an annual publication entitled *Australian Government Publications*, listing Commonwealth and State government monographs and serials.

General and Descriptive.

DIARY OF PRINCIPAL ECONOMIC EVENTS, 1957 to 1960.

The principal economic events for the years 1931 to 1938 were shown on pages 968 to 977 of Official Year Book No. 33, those for the years 1939 to 1944 on pages 1129 to 1141 of Official Year Book No. 36, those for the years 1945 to 1948 on pages 1235 to 1245 of Official Year Book No. 37, those for the years 1949 to 1951 on pages 1331 to 1340 of Official Year Book No. 39, and those for the years 1952 to 1955 on pages 1149 to 1160 of Official Year Book No. 42, while those for the year 1956 were covered by Official Year Book No. 46. To conserve space, some of the items originally shown for the years 1957 and 1958 have been omitted from this issue. Previous issues should be consulted for additional information for these years.

1957.

Throughout 1957, exports of merchandise continued at a high level, and for 1956-57 reached a total of £973 million. During the second half of 1957, there was a tendency for the level to fall off in comparison with 1956. Imports during the early months of the year continued at the low level established following the restrictions imposed in 1956, but, in the later months of the year, rose considerably following an easing of restrictions in the second quarter. Australia's international reserves rose by £142 million to £567 million during the first six months of the year and by a further £23 million to £590 million during the remainder of the year. Internal trade was at a higher level than in 1956.

Drought conditions in the eastern States during 1957 considerably reduced the production of many primary products, the total gross value of primary production in 1957-58 being about 10 per cent. below the 1956-57 level.

During the year, secondary industries continued to expand. Employment in factories rose during the year and there were increases in output of most commodities for which information is available.

Employment in the building and construction, mining and quarrying, and transport industries fell during the year by 13,000, 3,700 and 2,600 respectively. These falls, however, were offset to some extent by increases in employment in factories and in the commercial and professional fields. Overall there was a small increase of 9,000 in the number of civil employees (excluding rural and household domestic employees).

Average nominal wage rates for adult males rose approximately 2 per cent. The main increase occurred in the second quarter following an increase of 10s. a week in the Commonwealth basic wage. Average earnings for employees (male units) rose by about 3 per cent. over the year.

1st February.—Shipping freights to the United Kingdom and European countries rose by 14 per cent.

7th February.—Consolidated Zinc Corporation Ltd. announced £8 million construction programme for a zinc smelter and production of sulphuric acid and superphosphate at Cockle Creek (New South Wales).

1st March.—Commonwealth Savings Bank increased its maximum housing loan from £1,750 to £2,500.

2nd April.—Details of easing of import restrictions released. The ceiling for imports in 1957-58 was raised to £775 million but the modified restrictions operated from 1st April, the start of the quota year.

29th April.—Commonwealth Conciliation and Arbitration Commission announced 10s. increase in Commonwealth Basic Wage to operate from 15th May.

New South Wales Government declared eight districts of the State drought areas.

23rd May.—Duties reduced on over 800 items imported from foreign countries.

24th May.—Australian Loan Council approved a government borrowing programme of £200 million for financial year 1957-58. This included £166,840,000 for State Works and £33,160,000 for housing under agreement between the Commonwealth and States. In addition, borrowing programmes of £89,000,000 were approved for semi-governmental and local authorities.

30th May.—Commonwealth Government passed legislation imposing a levy on wheat-growers to finance more wheat research.

4th June.—Consolidated Zinc Corporation announced a major undertaking in the development of Weipa Bauxite on Cape York peninsula.

22nd June.—Acting Prime Minister officially closed Adaminaby Dam outlet gates and water started filling the Adaminaby Reservoir.

26th June.—Commonwealth Government decided to grant United States additional air traffic rights from Australia to Antarctica, South Africa, and South-east Asia for reciprocal rights across the United States for Australian airlines flying to Europe.

2nd July.—High Court ruled that interstate commercial vehicles could not be compelled to register in New South Wales.

6th July.—Agreement on Commerce between Japan and Australia signed in Tokyo by Japanese Prime Minister and Minister for Foreign Affairs and Australian Minister for Trade, on "most favoured nation" basis.

5th August.—First plant in Australia to produce tinplate, built for flat products division of B.H.P. Co. Ltd. at Port Kembla, was officially opened.

15th August.—British migrants enabled to claim pensions as soon as they arrive in Australia. Previously they had waiting period of 5 years for invalid pensions and 20 years for age pensions.

23rd August.—Full High Court upheld validity of Uniform Taxation Legislation but declared invalid the section giving priority to the Commonwealth.

24th August.—Ansett Transport Industries Ltd. purchased A.N.A. as a going concern for £3.3 million.

25th August.—Of growers who exercised their rights to vote, four out of five voted in favour of the Commonwealth Government's stabilization offer for currants and sultanas.

31st August.—Full High Court upheld the validity of a Victorian tax on commercial vehicles, including those engaged in interstate trade, imposed solely for the maintenance of roads.

3rd–26th September.—Commonwealth and State Budgets for 1957–58 introduced. (For details, see pp. 1142–3 of Official Year Book No. 45.)

14th September.—New South Wales Government gazetted maximum interest rates and minimum deposits applicable under hire purchase and credit sales agreements prescribed in the Hire Purchase (Amendment) Act.

30th September.—Conference of British Commonwealth Finance ministers opened at Mount Tremblant, Canada.

1st October.—Australia entered into double-tax agreement with Canada similar to those existing between Australia and the United Kingdom, and Australia and the United States of America.

17th October.—Applications invited for grant of licences for commercial television stations in the Brisbane, Adelaide, Perth and Hobart areas.

24th October.—Treasurer introduced new banking legislation in House of Representatives. Bills later defeated in Senate (27th November).

4th November.—First shipment of drought-relief wheat left Western Australia for New South Wales and Queensland.

20th November.—Wheat Industry Research Council and Wheat Industry Research Committees appointed.

10th December.—Commonwealth Bank advises trading banks to increase advances.

12th December.—Bill introduced in Victoria to allow cheque facilities to depositors with State Savings Bank of Victoria.

13th December.—Minister for Trade announced that Commonwealth Government had decided to import 1½ million bushels of wheat from Canada into New South Wales.

17th December.—Commonwealth ammunition filling and assembly factory opened at St. Marys, near Sydney.

1958.

Towards the end of 1957, the Australian economy started to feel the effect of the decline in economic activity overseas. Conditions overseas throughout 1958 were such that the prices received for exports, particularly wool and metals, were considerably below those received in 1956 and 1957. Export income was further reduced by the small quantities of wheat and other grains available for export as a result of the drought conditions in the eastern States during 1957.

To help offset the effect of the fall in export income, the Commonwealth Bank, in April, advised banks that there was a need to increase advances, especially in the rural and building industries, and reduced the amount of the special deposits of the trading banks progressively from £340,300,000 in December, 1957, to £265,100,000 in December, 1958. In addition, the Commonwealth Government took action to increase public expenditure, the States were offered an additional £5 million revenue grant, and the 1957-58 borrowing programmes for local authorities were increased by £3 million.

During the year, exports of merchandise were only £738 million compared with £983 million in the same period of 1957. Imports of merchandise in 1958 were £793 million, £41 million greater than in 1957. During the year, international reserves fell by £90 million to £500 million.

A high level of internal trade continued throughout 1958 and increases in sales of most types of commodities were recorded. The small wheat harvest in 1957-58 (97,600,000 bushels) following the 1957 drought and low prices for wool and other primary products considerably reduced the value of primary production. Wool production (1,433,800,000 lb.) in 1957-58 was 130 million lb. lower than in the previous year.

The number of persons in civilian employment (excluding rural and household domestic employees) increased by 29,100 during the year. The average nominal wage rates for adult males rose by approximately 1.7 per cent. during the year. The main increase occurred in the second quarter following an increase of 5s. a week in the Commonwealth basic wage. The interim index of retail prices was 3 per cent. higher in the December quarter of 1958 than a year earlier.

2nd January.—New Zealand imposed import restrictions resulting in temporary setback to expansion of Australia's exports to New Zealand.

14th January.—Qantas commenced first regular round the world air service via San Francisco and New York.

6th February.—Wheat Industry Research Council inaugurated to study soil fertility and problems of production and marketing of wheat.

9th February.—Commonwealth Government sold two coal mines to State Electricity Commission of New South Wales for £1,800,000.

13th February.—Commonwealth Government made special grant of £5 million to States to assist their general financial position and to counter unemployment.

30th March.—Ceiling for import licences to remain fixed at £800 million per annum with some basic raw materials (e.g. petroleum) to be exempted from licensing.

1st April.—New reciprocal Social Services agreement made with United Kingdom came into operation (*see* p. 704).

18th April.—Australia's first nuclear reactor opened at Lucas Heights, near Sydney, by Prime Minister.

22nd April.—Loan of \$25 million at 4½ per cent. was raised in New York.

12th May.—Conciliation and Arbitration Commission announced a Commonwealth Basic Wage increase of 5s.

14th May.—Commonwealth Government undertook to assist the copper industry to maintain Australian price at £330 a ton, partly by duty, partly by bounty.

5th June.—Australian Loan Council approved of a borrowing programme for the financial year 1958-59 of £210,000,000, including £35,810,000 for housing under Commonwealth-State Housing Agreement and £174,190,000 for State Works. Borrowing programmes for semi-governmental bodies and local authorities amounting to £95,000,000 were also approved.

1st July.—Commonwealth Bank at request of Commonwealth Government made available £10 million credit to New Zealand at 4½ per cent.

4th July.—Netherlands Government raised loan of £1,354,000 from United States Government to help support co-operative housing project for Dutch migrants to Australia. Additional finance to be raised in Australia and Holland to total of £8 to £12 million in next ten years.

17th July.—Agreement reached between New South Wales, Victoria, South Australia and Commonwealth on Snowy Mountains and Murray Waters.

31st July.—Minister for Trade announced easing of restrictions on imports of capital equipment from dollar areas and exemption from licensing on other items.

5th August–2nd October.—Commonwealth and State Budgets for 1958–59 introduced. (For details, see pp. 1191–2 of Official Year Book No. 46.)

13th September.—Prime Minister opened Tumut Ponds dam on the Snowy River Scheme.

8th October.—First issue of new "Special" Bonds of £10 units, with a limit of £5,000, bearing variable rates of interest and redemption bonuses according to the period held.

High Court ruled Queensland road transport levies valid.

9th October.—Victorian State Electricity Commission $5\frac{1}{2}$ per cent. loan for 7, 10, or 25 years undersubscribed by £800,000 and Queensland S.E.C. loan of $5\frac{3}{4}$ per cent. undersubscribed by £115,000.

15th October.—£Stg.15,000,000 Loan floated in London, the first Australian loan floated in London for 19 years. At $5\frac{1}{2}$ per cent., issued at £98 Stg., this loan was oversubscribed.

1st November.—Savings Bank interest raised $\frac{1}{4}$ per cent. to 3 per cent. on balances up to £2,000.

7th November.—Work commenced on new £30,000,000 power station at Wangi, N.S.W. with a planned capacity of 60,000 kW.

10th November.—The full bench of the Industrial Commission granted marginal increases of 15–25 per cent. to steel workers.

1959.

Early in 1959, it was evident that the recession overseas in 1958 had not seriously affected the Australian economy. The prices received for wool, which had been falling during 1958, commenced to rise again. Production and building activity were still expanding. There were also indications of an improvement in the employment position. In the course of the year there was an increase of more than £150 million in exports over the previous year. During the year, international reserves increased by £47 million. The 1958–59 wheat harvest of 215 million bushels was more than double that of the previous year which had been seriously affected by drought conditions.

The expansion of internal trade was maintained. Retail sales of motor vehicles, petrol, etc., were 11 per cent. higher than in 1958 and other commodities over 5 per cent. higher. Sales under hire purchase agreements again increased and the balances outstanding under agreements increased by £62 million compared with an increase of £72,700,000 in 1958.

The number of persons in civilian employment increased by 73,800 during the year compared with an increase of 36,400 in 1958. Increased employment was recorded in all major industries except the mining and quarrying industry where the fall of recent years was continued. The number of persons in receipt of unemployment benefit fell by 5,000 during the year.

Throughout the year industrial production continued to expand. The lower level of production of clothing and textiles in 1958 continued into the early months of 1959, but during the later months of the year there was a considerable improvement in the output of the clothing industry. Building activity was rising rapidly during the year.

In June, the Commonwealth Basic Wage was increased by 15s. a week for males and 11s. 3d. a week for females. This was followed by an increase in margins for skill (28 per cent. in most industries) in December. As a result the minimum weekly wage rate index increased by 7 per cent. during the year and average weekly earnings increased by 5 per cent. Retail prices, measured by the Consumer Price Index, rose by 2 per cent.

1st January.—New South Wales Acts, Industrial Arbitration (Female Rates) Amendment Act 1958, providing for equal pay for male and female employees performing work of same or like nature, and Annual Holidays Act 1944–1958, providing for three weeks annual holidays for all New South Wales workers under State awards, became operative.

19th January.—Australian Exchange Control Regulations eased to allow of payment for imports in convertible sterling or any major non-sterling currencies instead of dollars and sterling, and other adjustments removing differences between remittances to dollar area and other non-sterling countries.

24th January.—Contracts let by Electricity Commission of New South Wales for construction of new £14,500,000 power station at Vales Point, Lake Macquarie.

29th January.—Export controls lifted on 25 items, including newsprint, copra, margarine and iron and steel products.

7th February.—Queensland Government lifted price controls on all items other than basic foods and groceries.

15th February.—Seven-man committee set up to examine the case for the introduction of decimal currency into Australia.

18th February.—Commonwealth Government maintained allocation for grants to States for works and housing (*see* 5th June, 1958) at £210,000,000 but raised local government ceiling for borrowing from £16,500,000 to £20,500,000.

25th February.—Australia's first government-sponsored trade mission to North America left to examine and develop export markets.

4th March.—Premiers' Conference opened. Conference accepted Commonwealth plan for roads and bridges involving an expenditure of £720,000,000 over next five years, of which Commonwealth was to contribute £250,000,000.

23rd March.—Republic of China sent first trade mission to Australia led by Chairman of Bank of Taiwan.

2nd April.—Licensing restrictions on dollar imports removed from 330 items. Minister for Trade left for trade talks in Washington.

6th April.—First government-sponsored New Zealand trade mission to visit Australia arrived in Sydney.

16th April.—High Court of Australia ruled that provisions of Commonwealth Re-establishment and Employment Act giving priority in employment to ex-servicemen were invalid because of lapse of time since end of 1939–45 War.

23rd April.—Royal assent given to Reserve Bank Act, Commonwealth Banks Act, Banking Act and Banking (Transitional Provisions) Act. (*See* p. 755.)

Production of lead at Mt. Isa reduced by 25 per cent. to help world lead position. Corresponding increase in copper production.

1st May.—Commonwealth government decided to increase subsidy on oil search by £1,000,000 a year for each of next three years.

4th May.—T.1 underground power station, first major station of Snowy Mountains Scheme, commenced operation with output capacity of 160,000 kW.

16th May.—Indian railways mission visited Australia as guest of Commonwealth Government to arrange for purchase of wide range of railway equipment.

20th May.—New Zealand eased import restrictions (*see* 2nd January, 1958). Market for Australian canned and dried fruits in New Zealand expected to increase by 16 per cent. as a result.

1st June.—Migration Act 1958, providing *inter alia* for abolition of Dictation Test, and adoption of entry permit system (*see* p. 325), became operative.

5th June.—Commonwealth Conciliation and Arbitration Commission, in majority decision on Basic Wage Inquiry, increased Federal basic wage by 15s. for males and 11s. 3d. for females from first pay period after 11th June. Federal awards higher than State awards for first time in 20 years.

8th June.—£10,000,000 blast furnace began production at Port Kembla with a capacity of 600,000 tons of pig iron a year, making a total of 3,000,000 tons for Australia.

9th June.—Working hours in State-owned coal mines in New South Wales reduced from 40 to 37½ a week.

24th June.—Premiers' Conference accepted Commonwealth proposal for new plan of tax reimbursements based on population and wage levels, grants to be increased from £225,750,000 to £244,500,000 for 1959–60.

Loan Council approved of borrowing programme for 1959-60 of £220,000,000 (£183,900,000 for States, £36,100,000 for Commonwealth-State Housing). Local and semi-governmental borrowing ceiling fixed at £100,000,000.

26th June.—Expert committee on coal formed to advise Government on all aspects of uses of coal.

29th June.—Australia's quota to International Monetary Fund increased from \$200,000,000 to \$300,000,000.

30th June.—Fourteen mile, £19,000,000, Eucumbene-Tumut tunnel in Snowy Mountains Hydro-electric Scheme completed four months ahead of schedule.

2nd July.—S.S. *Delfino* left Sydney with 30,000 live sheep for export to United States of America, the first significant shipment of this kind ever made.

First 707 jet-liner arrived in Sydney for Qantas, part of major re-equipment programme on overseas services and conversion to jet-planes of major internal air-lines in Australia.

19th July.—Remaining undistributed profits of Joint Organization marketing of wool (about £2,400,000) transferred to Wool Research Fund.

1st August.—Import restrictions further eased by about £50,000,000 annually (*see also* 2nd April) and licensing discrimination removed from almost all imports from dollar areas.

11th August.—Commonwealth Budget for 1959-60 introduced into House of Representatives.

In 1958-59, receipts of the Consolidated Revenue Fund (excluding self-balancing items) were £1,287,882,000. The expenditure (excluding self balancing items and the payment to the Loan Consolidation and Investment Reserve) amounted to £1,259,935,000. There was thus £27,947,000 available for payment to the Loan Consolidation and Investment Reserve. The main items of revenue were (1957-58 receipts shown in parentheses):—Income taxes, £608,700,000 (£650,400,000); Excise Duties, £237,200,000 (£232,600,000); Customs Duties, £71,700,000 (£71,700,000); and Sales Tax, £143,600,000 (£137,800,000). The main items of expenditure were Payments to or for the States, £286,600,000 (£270,600,000); Social and Health Services, £278,200,000 (£247,500,000); Defence Services, £152,000,000, excluding £37,300,000 provided from Loan Fund, (£185,100,000); War and Repatriation Services, £128,200,000 (£127,900,000); and Capital Works and Services, £132,400,000 (£123,500,000).

The Budget for 1959-60 provided for an estimated expenditure of £1,645,300,000, of which £1,348,300,000 would be provided from the Consolidated Revenue Fund and £297,000,000 from the Loan Fund. In addition it was expected that £37,000,000 would be available for payment to the Loan Consolidation and Investment Reserve.

8th September.—1959-60 Budget introduced into Victorian Legislative Assembly. In 1958-59, expenditure exceeded revenue by £2,500,000. The deficit on the Railways was £3,900,000 and on the State Coal Mines £200,000. There was a surplus of £1,600,000 on General Account. The Budget for 1959-60 provided for a total expenditure of £165,100,000. It was estimated that revenue would be £163,900,000 leaving a deficit of £1,200,000. It was estimated that the deficit on the Railways would be £5,200,000 after providing for debt charges.

16th September.—1959-60 Budget introduced into New South Wales Legislative Assembly. During 1958-59, the transactions of the Consolidated Revenue Fund, Railways, Metropolitan and Newcastle Transport Services and Sydney Harbour Services resulted in a surplus of £43,000. After providing for debt charges, there were deficits of £6,400,000 on the Railways and £1,800,000 on the Metropolitan and Newcastle Transport Services. The 1959-60 Budget provided for an overall surplus of £58,000. After meeting debt charges, it was estimated that there would be deficits of £6,000,000 on the Railways and £2,300,000 on the Metropolitan and Newcastle Transport Services.

22nd September.—1959-60 Budget introduced into Western Australian Legislative Assembly. Financial transactions for the year 1958-59 resulted in a deficit of £1,700,000. For 1959-60, it was estimated that expenditure would be £64,800,000 and revenue £63,300,000 resulting in a deficit of £1,500,000.

24th September.—1959-60 Budget introduced into South Australian House of Assembly. In 1958-59, revenue amounted to £72,700,000 and expenditure to £73,700,000 leaving a deficit of £1,000,000. For 1959-60, it was estimated that expenditure would be £80,300,000 and revenue £79,500,000 thus leaving a deficit of £800,000.

29th September.—1959–60 Budget introduced into Queensland Legislative Assembly. In 1958–59, receipts of the Consolidated Revenue Fund were £93,800,000. Expenditure was £95,000,000 leaving a deficit of £1,200,000. For 1959–60, it was estimated that the Budget would be approximately balanced with revenue and expenditure both amounting to £101,900,000.

1959–60 Budget introduced into Tasmanian House of Assembly. The transactions of the Consolidated Revenue Fund in 1958–59 resulted in a deficit of £900,000. Receipts of the Consolidated Revenue Fund totalled £21,900,000 and expenditure £22,800,000. For 1959–60 it was estimated that expenditure would be £24,700,000 and revenue £24,100,000 leaving a deficit of £600,000.

15th October.—Approval of new import levels by Japanese government expected to increase Australia's wool exports substantially.

16th October.—New trade agreement with Germany provided for increases in exports of meat, grain, fruit, and wine.

30th October.—£15,000,000 special deposits (first for 2½ years) called in from Trading Banks by Commonwealth Bank; (further £20,000,000 called in 30th November, and more calls anticipated next year).

16th November.—Currency restrictions for Australians travelling abroad relaxed substantially. Limit £2,000 a year to any part of the world, an increase of 25 per cent. for sterling areas and 150 per cent. for all other areas.

25th November.—First issue of 3 per cent. seasonal Treasury Notes, totalling £12,100,000. Further issues to be made fortnightly until March, 1960.

26th November.—Full Bench of New South Wales State Industrial Commission, interpreting Industrial Arbitration (Female Rates) Amendment Act, 1958 (assented to 31st December, 1958), provided for 5 per cent. annual increase in female wages from 1st January, 1960, to 1st January, 1963.

27th November.—Commonwealth Conciliation and Arbitration Commission in judgment on Metal Trades case, granted increase of 28 per cent. in margins to fitters and other skilled metal trades employees. Followed by similar awards by other tribunals.

9th December.—Contracts let for construction of new £120,000,000 power station at Hazlewood (Vic.) planned to double amount of electricity available in Victoria.

1960.

The year 1960 opened in a period of rapidly increasing demand. This became stronger during the early months of 1960, when the increases in wage margins granted towards the end of 1959 became effective. Retail sales of motor vehicles, petrol, etc., were at a level of 20 to 25 per cent. above the previous year, and sales of other commodities at about 10 per cent. higher. In addition, expenditure on capital equipment was at a high level.

This high level of internal demand continued throughout the first three quarters, but slackened during the last quarter, after action had been taken by the Commonwealth Government and the Reserve Bank to restrict credit.

Accompanying these conditions, there were increases in prices, shortages of labour in many industries, and, after the lifting of restrictions in February, increased imports. During the year, the Consumer Price Index increased by 4.5 per cent. compared with an increase of 1.8 per cent. in 1959. At the end of June, the number of persons in civilian employment was 106,700 greater than in June, 1959. The increases over the same period in the main industrial groups were: Factories 56,800, Retail Trade 10,300, Other Commerce and Finance 15,800, and Public Authority (n.e.i.) and Professional 17,500. Up till October, too, the number of persons on unemployment benefit was falling steadily, and the number of vacancies registered with the Department of Labour and National Service was rising. Imports of merchandise increased from £429,000,000 in the six months ended December, 1959, to £495,600,000 in the next six months, and to £561,200,000 in the six months ended December, 1960.

The Commonwealth Government in February removed practically all the remaining restrictions on imports, and intervened in the basic wage case to counsel against granting further general wage increases. The Reserve Bank made a further call up of deposits to the Statutory Reserve Accounts to reduce excessive monetary liquidity in the economic system.

With the stated object of curbing demand and preventing further increases in prices and costs, the Commonwealth Budget in August provided for an increase in income taxes and a cash surplus of £15,500,000 for the 1960-61 financial year. The Reserve Bank also asked banks to make immediate and significant reductions in the rate of new lending and to guard against providing finance for "speculative activities".

Later, in November, the Commonwealth Government in conjunction with the Reserve Bank introduced a further series of economic measures. These provided for a further tightening of the credit restrictions, an increase in the sales tax rate on motor cars from 30 per cent. to 40 per cent., and an increase in the maximum interest rate on bank overdrafts to 7 per cent.

Following the lifting of restrictions in February, imports had increased at a rapid rate. During the year, imports amounted to £1,056,800,000 compared with £826,300,000 in 1959. Exports, however, declined, partly as a result of lower prices being received for wool, butter and some other export commodities. Exports of merchandise during the year were £874,900,000 compared with £892,500,000 in 1959. During 1960, international reserves fell by £170,900,000 to £376,300,000.

Weather conditions throughout the year were generally favourable for primary production. The wheat harvest of 199 million bushels in 1959-60 was 16 million bushels less than the near record harvest of the previous year, and the 1960-61 wheat crop (estimated at 270 million bushels) exceeded the previous record by more than 50 million bushels. Wool production in 1960-61 was second only to that of the previous year—1,632 million lb. compared with 1,680 million lb.

During the first three quarters of the year, industrial production continued to expand—very rapidly in some instances. There were significant increases in the production of iron and steel and some building materials, and in the generation of electricity. However, during the last quarter of the year, there was evidence of a fall in the output of many industries. Building activity was at a higher level than in the previous year, but in December there were signs of slackening and approvals for new building fell considerably.

14th January.—New exchange regulations placed dollar currencies on same basis as other non-sterling currencies. Money orders now able to be sent to dollar areas. Dollar earnings by Australians no longer subject to compulsory repatriation.

16th January.—Commonwealth Banks Act 1959 establishing Commonwealth Banking Corporation, Banking Act 1959 regulating banking in Australia, and Reserve Bank Act 1959 replacing Commonwealth Bank of Australia by Reserve Bank of Australia, proclaimed.

19th January.—New £17,000,000 catalytic cracking plant, primarily for the production of motor spirit, to be built at Clyde by group of oil companies as part of projects totalling £22,000,000.

2nd February.—Commonwealth Cash Loan of £45,000,000 opened, issued at £99½ to par, interest at from 4 to 5 per cent. Closed 17th February, undersubscribed by £4.7 million.

10th February.—Australian loan of £12,000,000 sterling opened in London, issued at £99, interest at 5½ per cent.; amount raised in full.

13th February.—Statutory reserve deposit ratio raised by Reserve Bank from 16½ to 17½ per cent. Australia and Canada signed a new trade Agreement replacing the 1931 agreement. The new agreement would give both countries additional concessions and the right to invoke anti-dumping legislation; a wide variety of Australian exports would receive increased preference.

23rd February.—Items comprising 90 per cent. of Australia's present imports exempted from import licensing provisions.

9th March.—New Zealand relaxed import restrictions affecting some 300 items of Australian exports to that country, making an increase of 15 to 20 per cent. in licences for Australian goods.

14th March.—Reserve Bank made a further call up of £5,300,000 of trading bank special accounts, making a total of £59,400,000, since call-ups began in October.

16th March.—Commonwealth negotiated loan in Switzerland of 60,000,000 Swiss francs (about £A.6,000,000) issued at 99 francs per 100, with interest at 4½ per cent.; fully subscribed.

1st April.—Three oil companies announced plans for the joint building of Australia's first major lubricating oil refinery at Kurnell, New South Wales, at a cost of about £13,000,000. Another company on 3rd May, announced plans for a similar plant at Kwinana, Western Australia to cost £10,000,000.

7th April.—Broken Hill Pty. Ltd. announced the opening of new cold-rolling stainless steel mill at Unanderra, with a capacity of 15,000 tons a year.

Japanese import controls eased to allow of 50 per cent. increase in exports of wool, wheat and coal to Japan.

8th April.—Australia's subscription to the International Bank for Reconstruction and Development increased from \$400,000,000 to \$533,000,000, and to the International Monetary Fund from \$300,000,000 to \$400,000,000.

12th April.—Commonwealth Arbitration Commission decided not to increase basic wage, the first time since September, 1953, that it had not been raised following an inquiry.

19th April.—Commonwealth floated \$25,000,000 loan in New York, issued at \$97½ with interest at 5½ per cent., fully subscribed.

22nd April.—Trade mission, consisting of 39 members, led by Sir Douglas Copland, the largest mission to leave Australia, left for Canada and the United States.

24th April.—Government asked for parliamentary approval for Australia to become a foundation member of the International Development Association, an affiliate of the International Bank for Reconstruction and Development designed to assist industrial development of "less developed" countries. (Approving Act assented to 31st May.)

4th May.—Commonwealth Cash and Conversion loan opened, issued at £99½ to £100, with interest at from 4 to 5 per cent.; closed 24th May, with £25,000,000 cash portion under-subscribed by £4,400,000.

17th May.—First National Export Convention opened at Canberra as part of National Export Drive.

1st June.—All Trading Banks increased service and miscellaneous charges from to-day.

24th June.—Loan Council met in Canberra and approved of borrowing programme for 1960–61 of £230,000,000 (£192,800,000 for States, £37,200,000 for Commonwealth State Housing). Local and semi-governmental borrowing ceiling fixed at £106,000,000. In addition, it approved borrowings by the Commonwealth in the United States of America of \$30,000,000 on behalf of Qantas Empire Airways Limited and of \$2,000,000 on behalf of Trans-Australia Airlines.

3rd July.—Following the joining by the United Kingdom of the European Free Trade Association, United Kingdom preference guarantees to be waived on nine products, including lead and zinc.

22nd July.—Oversea shipping rates on exports increased by 6 per cent. Import rates to rise by 7½ per cent. from 1st October.

8th August.—Reserve Bank asked banks to make immediate and significant cut in rate of new lending and guard against providing finance for "speculative activities".

11th August.—Oil refinery planned for Port Alma, Queensland, at cost of £15,000,000.

13th August.—Commonwealth Statistician issued new Consumer Price Index.

16th August.—Commonwealth Budget for 1960–61 introduced into House of Representatives.

In 1959–60, receipts of the Consolidated Revenue Fund (excluding self-balancing items) were £1,431,800,000. The expenditure (excluding self-balancing items and the payment of £41,400,000 to the Loan Consolidation and Industrial Reserve) amounted to £1,390,400,000. The main items of revenue (1958–59 receipts shown in parentheses) were: Income Taxes £671,300,000 (£608,700,000), Excise Duties £252,400,000 (£237,200,000); Customs Duties £84,400,000 (£71,700,000); and Sales Tax £164,200,000 (£143,600,000). The main items of expenditure were: Payments to or for the States £321,400,000 (£286,600,000); Social and Health Services £299,400,000 (£278,200,000); Defence Services (excluding £12,000,000 and £37,300,000 provided from Loan Fund in 1959–60 and 1958–59 respectively) £181,600,000 (£152,000,000); War and Repatriation Services £137,500,000 (£128,500,000) and Capital Works and Services £142,100,000 (£132,400,000).

The Budget for 1960-61 provided for an estimated expenditure of £1,670,800,000 of which £1,358,100,000 would be provided from the Consolidated Revenue Fund and £312,700,000 from the Loan Fund. In addition, it was expected that £125,700,000 would be available for payment to the Loan Consolidation and Investment Reserve.

17th August.—New Tariff Bills introduced in House of Representatives to give short-term assistance to industries by imposing temporary tariffs in an emergency. (Assented to 5th September.)

19th August.—Report of Committee on Decimal Coinage tabled in House of Representatives. Committee unanimously in favour of decimal system.

26th August.—Five-man delegation left for South America to survey trade prospects in eight American countries.

1st September.—Commonwealth Government accepted offer from Consolidated Zinc of £10,900,000 for Bell Bay aluminium works.

6th September.—1960-61 Budget introduced into South Australian House of Assembly. In 1959-60, revenue amounted to £80,300,000 and expenditure to £80,600,000, leaving a deficit of £300,000. For 1960-61, it was estimated that expenditure would be £85,500,000 and revenue £85,800,000, thus leaving a surplus of £300,000.

7th September.—Commonwealth £30,000,000 Cash Loan opened, issued at £98½ to par, with interest at from 4½ to 5 per cent. Closed 22nd September, oversubscribed by £3,000,000.

14th September.—1960-61 Budget introduced into New South Wales Legislative Assembly. During 1959-60, the transactions of the Consolidated Revenue Fund, Railways, Metropolitan and Newcastle Transport Services and Sydney Harbour Services resulted in a surplus of £70,000. After providing for debt charges, there were deficits of £4,100,000 on the Railways and £2,300,000 on the Metropolitan and Newcastle Transport Services. The 1960-61 Budget provided for an overall surplus of £22,000. After meeting debt charges, it was estimated that there would be a deficit of £1,900,000 on the Railways and £3,000,000 on the Metropolitan and Newcastle Transport Services.

15th September.—1960-61 Budget introduced into Victorian Legislative Assembly. In 1959-60, Revenue exceeded expenditure by £300,000. The deficit on the Railways was £4,600,000 and on the State Coal Mines £200,000. There was a surplus of £5,100,000 on General Account. The budget for 1960-61 provided for a total expenditure of £181,400,000. It was estimated that revenue would be £181,500,000 leaving a surplus of £100,000. It was estimated that the deficit on the railways would be £4,200,000 after providing for debt charges.

20th September.—1960-61 Budget introduced into Tasmanian House of Assembly. The transactions of the Consolidated Revenue Fund in 1959-60 resulted in a deficit of £1,000,000. Receipts of the Consolidated Revenue Fund totalled £24,300,000 and expenditure £25,300,000. For 1960-61, it was estimated that expenditure would be £27,200,000 and revenue £26,800,000 leaving a deficit of £400,000.

22nd September.—1960-61 Budget introduced into Western Australian Legislative Assembly. Financial transactions for the year 1959-60 resulted in a deficit of £1,400,000. For 1960-61, it was estimated that expenditure would be £69,800,000 and revenue £69,000,000 resulting in a deficit of £800,000.

27th September.—Commonwealth floated \$25,000,000 (about £A.11,000,000) loan in New York, issued at 98, with interest at 5½ per cent.,; fully subscribed.

29th September.—1960-61 Budget introduced into Queensland Legislative Assembly. In 1959-60, receipts of the Consolidated Revenue Fund were £103,100,000. Expenditure was £103,300,000 leaving a deficit of £200,000. For 1960-61, it was estimated that expenditure would amount to £110,100,000 and revenue to £109,900,000 leaving a deficit of £200,000.

7th October.—Navigation charges to airlines for use of airport facilities raised.

29th October.—Commonwealth appointed committee to enquire into wool marketing methods (see also 12th December).

10th November.—New South Wales Government introduced Company Law Amendment Bill, the first of a series to provide for a uniform Company Law throughout Australia.

16th November.—New economic measures introduced, designed to reduce excessive internal demand and safeguard Australia's overseas funds position. Credit restrictions were tightened, sales tax on cars raised to 40 per cent., bank overdraft rate raised to 7 per cent., and tax deductions of interest paid on borrowed money abolished. It was also proposed that life assurance companies, superannuation funds, etc., should be required to have at least 30 per cent. of their investments in government securities.

24th November.—Reserve Bank issued a statement on policy of bank and advice to trading Banks on selective restriction of advances.

5th December.—Japanese trade ship berthed in Sydney.

10th December.—Rise to $3\frac{1}{2}$ per cent. in Savings Bank interest rates announced.

12th December.—Graziers supported proposal to introduce reserve price for wool at auction sales.

20th December.—New South Wales Industrial Commission granted industry allowance of 15s. a week to building workers.

CHRONOLOGICAL TABLE.

CHRONOLOGICAL TABLE OF CHIEF EVENTS SINCE THE ESTABLISHMENT OF SETTLEMENT IN AUSTRALIA.

NOTES.—For each earlier year, this Table rarely contains more than two or three items; for recent years, however, in order to provide a wide cover of events, etc., it includes a much greater number. Both the nature of the Table and considerations of space render necessary a continual reduction in these items, and for more information the reader should therefore consult earlier issues.

The Government was centralized in Sydney, New South Wales, up to 1825, when Tasmania (Van Diemen's Land) was made a separate colony. In the Table, the names now borne by the States serve to indicate the localities.

Year.

- 1788 N.S.W.—Arrival of "First Fleet", under Captain Arthur Phillip, at Botany Bay. Land in vicinity being found unsuitable for settlement, the expedition moved to Sydney Cove, and formal possession of the colony was taken on 26th January. Formal proclamation of colony and establishment of regular government on 7th February.
- 1789 N.S.W.—First wheat harvested at Parramatta, near Sydney. Discovery of Hawkesbury River.
- 1790 N.S.W.—"Second Fleet" reached Port Jackson. Landing of the New South Wales Corps.
- 1791 N.S.W.—Arrival of "Third Fleet". Territorial seal brought by Governor King.
- 1792 N.S.W.—Visit of *Philadelphia*, first foreign trading vessel.
- 1793 N.S.W.—First free immigrants arrived in *Bellona*. First Australian church opened at Sydney. Tas.—D'Entrecasteaux discovered the Derwent River.
- 1794 N.S.W.—Establishment of settlement at Hawkesbury River.
- 1795 N.S.W.—Erection of the first printing press at Sydney. Descendants of strayed cattle discovered at Cowpastures, Nepean River, a locality destined to become an important centre of the dairying industry.
- 1796 N.S.W.—First Australian theatre opened at Sydney. Coal discovered by fishermen at Newcastle.
- 1797 N.S.W.—Introduction of merino sheep from Cape of Good Hope.
- 1798 Tas.—Insularity of Tasmania proved by voyage of Bass and Flinders.
- 1800 N.S.W.—Hunter River coal-mines worked. First customs house in Australia established at Sydney.
- 1802 Vic.—Discovery of Port Phillip by Lieut. Murray. Qld.—Discovery of Port Curtis and Port Bowen by Flinders. S.A.—Discovery of Spencer and St. Vincent Gulfs by Flinders.
- 1803 N.S.W.—First Australian wool taken to England by Captain Macarthur. Issue of *The Sydney Gazette*, first Australian newspaper. Vic.—Attempted settlement at Port Phillip by Collins. Discovery of Yarra by Grimes. Tas.—First settlement formed at Risdon by Lieut. Bowen.
- 1804 Vic.—Abandonment of settlement at Port Phillip. Tas.—Foundation of settlement at Hobart by Collins.
- 1805 N.S.W.—First extensive sheep farm established at Camden by Captain Macarthur.
- 1806 Tas.—Settlement at Launceston.
- 1807 N.S.W.—First shipment of merchantable wool (245 lb.) to England.
- 1808 N.S.W.—Deposition of Governor Bligh.
- 1809 N.S.W.—Free school established.
- 1810 N.S.W.—Post Office officially established at Sydney.
- 1813 N.S.W.—Passage across Blue Mountains discovered by Blaxland, Lawson and Wentworth. Macquarie River discovered by Evans.

Year.

- 1814 N.S.W.—Flinders suggested the name “Australia” instead of “New Holland”.
Creation of Civil Courts.
- 1815 N.S.W.—Lachlan River discovered by Evans. Tas.—Arrival of first immigrant ship
with free settlers.
- 1816 N.S.W.—Sydney Hospital opened.
- 1817 N.S.W.—Oxley’s first exploration inland. Discovery of Lakes George and Bathurst
and the Goulburn Plains by Meehan and Hume. First bank in Australia—
Bank of New South Wales—opened at Sydney.
- 1818 N.S.W.—Liverpool Plains and the Peel, Hastings and Manning Rivers discovered
by Oxley, and Port Essington (N.T.) by Captain King.
- 1819 N.S.W.—First savings bank in Australia opened at Sydney.
- 1821 Tas.—Establishment of penal settlement at Macquarie Harbour.
- 1822 N.S.W.—Formation of Agricultural Society of New South Wales.
- 1823 N.S.W.—New South Wales Judicature Act passed. Discovery of gold at Fish
River by Assistant Surveyor McBrien. Qld.—Brisbane River discovered by
Oxley.
- 1824 N.S.W.—Constituted a Crown colony. Executive Council formed. Establishment
of Supreme Court at Sydney, and introduction of trial by jury. First Australian
Enactment (Currency Bill) passed by the Legislative Council. First manufacture
of sugar. Vic.—Hume and Hovell, journeying overland from Sydney, arrived
at Corio Bay. Qld.—Penal settlement founded at Moreton Bay (Brisbane).
Port Dundas settlement formed at Melville Island, N.T.
- 1825 Tas.—Van Diemen’s Land (Tasmania) proclaimed a separate colony. Qld.—Major
Lockyer explored Brisbane River to its source and discovered coal.
- 1826 N.S.W.—Settlement in Illawarra district. Vic.—Settlement at Corinella, Western
Port, formed by Captain Wright.
- 1827 Qld.—Darling Downs and the Condamine River discovered by Allan Cunningham.
W.A.—Military settlement founded at King George Sound by Major Lockyer.
First official claim of British sovereignty over all Australia.
- 1828 N.S.W.—Second Constitution. First census. Sturt’s expedition down Darling
River. Richmond and Clarence Rivers discovered by Captain Rous. Vic.—
Abandonment of settlement at Western Port. Qld.—Cunningham discovered
a route from Brisbane to the Darling Downs and explored Brisbane River.
- 1829 N.S.W.—Sturt’s expedition down Murrumbidgee River. W.A.—Foundation of
settlement at Swan River. Foundation of Perth.
- 1830 N.S.W.—Sturt, voyaging down Murrumbidgee and Murray Rivers, arrived at Lake
Alexandrina. Tas.—Black line organized to force aborigines into Tasman’s
Peninsula but failed. Small remnant subsequently (1830 to 1835) persuaded
to settle on Flinders Island.
- 1831 N.S.W.—Mitchell’s explorations north of Liverpool Plains. SS. *Surprise*, first
steamship built in Australia, launched at Sydney. First coal shipped from
Australian Agricultural Company’s workings at Newcastle, N.S.W. First
assisted immigration to N.S.W. S.A.—Wakefield’s first colonization com-
mittee. W.A.—Appointment of Executive and Legislative Councils.
- 1832 N.S.W.—State Savings Bank established.
- 1833 N.S.W.—First school of arts established at Sydney.
- 1834 N.S.W.—First settlement at Twofold Bay. Vic.—Settlement formed at Portland Bay
by Henty Brothers. S.A.—Formation of the South Australian Association.
W.A.—Severe reprisals against Murray River natives at Pinjarra for continued
attacks on settlers.
- 1835 Vic.—John Batman arrived at Port Phillip; foundation of Melbourne.

Year.

- 1836 N.S.W.—Mitchell's overland journey from Sydney to Cape Northumberland (S.A.). Vic.—Proclamation of Port Phillip district as open for settlement. S.A.—Settlement founded at Adelaide under Governor Hindmarsh.
- 1837 N.S.W.—Appointment in London of Select Committee on Transportation. Vic.—First overlanders from Sydney arrived at Port Phillip.
- 1838 N.S.W.—Discontinuance of assignment of convicts. Qld.—Settlement of German missionaries at Brisbane—first free colonists. S.A.—“Overlanding” of cattle from Sydney to Adelaide along the Murray route by Hawden and Bonney. Settlement at Port Essington, Northern Territory, formed by Captain Bremer.
- 1839 N.S.W.—Gold found at Vale of Clwydd by Count Strzelecki. S.A.—Lake Torrens discovered by Eyre. Port Darwin discovered by Captain Stokes. W.A.—Murchison River discovered by Captain Grey.
- 1840 N.S.W.—Abolition of transportation to New South Wales. Vic.—Determination of northern boundary. Qld.—Penal settlement broken up and Moreton Bay district thrown open. S.A.—Eyre began his overland journey from Adelaide to King George Sound.
- 1841 N.S.W.—Gold found near Hartley. W.A.—Completion of Eyre's overland journey from Adelaide to King George Sound. New Zealand proclaimed a separate colony.
- 1842 N.S.W.—Incorporation of Sydney. Vic.—Incorporation of Melbourne. S.A.—Discovery of copper at Kapunda.
- 1843 N.S.W.—First Representative Constitution (under Act of 1842). Qld.—Moreton Bay granted legislative representation as a distinct electoral division.
- 1844 Qld.—Leichhardt's expedition to Port Essington (N.T.). S.A.—Sturt's last expedition inland.
- 1845 N.S.W.—Mitchell's explorations on the Barcoo. Qld.—Explorations by Mitchell and Kennedy. S.A.—Discovery of the Burra copper deposits. Sturt discovered Cooper's Creek.
- 1846 N.S.W.—Initiation of meat-preserving. Qld.—Foundation of settlement at Port Curtis. S.A.—Proclamation of North Australia.
- 1847 N.S.W.—Iron-smelting commenced near Berrima. Overland mail established between Sydney and Adelaide. Qld.—Explorations by Leichhardt, Burnett and Kennedy.
- 1848 N.S.W.—National and Denominational School Boards established. Qld.—Leichhardt's last journey. Chinese brought in as shepherds.
- 1849 N.S.W.—Indignation of colonists at arrival of convict ship *Hashemy*. Exodus of population to gold-fields of California. Vic.—*Randolph* prevented from landing convicts. Qld.—Assignment of *Hashemy* convicts to squatters on Darling Downs. W.A.—Commencement of transportation to Western Australia.
- 1850 N.S.W.—Final abolition of transportation. Sydney University founded. Vic.—Gold discovered at Clunes. Representative government granted. S.A.—Representative government granted. W.A.—Pearl oysters found by Lieut. Helpman at Saturday Island Shoal. Tas.—Representative government granted.
- 1851 N.S.W.—Payable gold discovered by Hargreaves at Lewis Ponds and Summerhill Creek. Vic.—Port Phillip created an independent colony under the name of Victoria. Discovery of gold in various localities. W.A.—Proclamation of Legislative Council Act.
- 1852 N.S.W.—Arrival of *Chusan*, first P. and O. mail steamer from England. Tas.—Meeting of first elective Council protested against transportation. Payable gold discovered at The Nook, near Fingal, and at Nine Mile Springs.
- 1853 Tas.—Abolition of transportation. Vic.—Melbourne University founded.
- 1854 Vic.—Opening of first Australian railway—Flinders Street to Port Melbourne. Riots on Ballarat gold-fields. Storming of the Eureka Stockade, 3rd Dec. Telegraph first used.

Year

- 1855 N.S.W.—Opening of railway—Sydney to Parramatta. Mint opened.
- 1856 N.S.W.—Pitcairn Islanders placed on Norfolk Island. W.A.—A. C. Gregory's expedition in search of Leichhardt.
Responsible Governments in N.S.W., Vic., S.A. and Tas. (Act of 1855).
- 1857 N.S.W.—Select Committee on Federation. Vic.—Manhood suffrage and vote by ballot. S.A.—Passage of Torrens' Real Property Act.
- 1858 N.S.W.—Establishment of manhood suffrage and vote by ballot. Telegraphic communication between Sydney, Melbourne and Adelaide. Qld.—Canoona gold rush.
Population of Australia reached 1,000,000.
- 1859 Qld.—Proclamation of Queensland as separate colony. Tas.—First submarine cable, via Circular Head and King Island to Cape Otway.
- 1860 Vic.—Burke and Wills left Melbourne and crossed to Gulf of Carpentaria. S.A.—Copper discoveries at Wallaroo and Moonta. McDouall Stuart reached centre of continent.
- 1861 N.S.W.—Anti-Chinese riots at Lambing Flat and Burrangong gold-fields. Opening of first tramway in Sydney. Regulation of Chinese immigration. Vic.—Burke and Wills perished at Cooper's Creek, near Innamincka, S.A.
- 1862 N.S.W.—Abolition of State aid to religion. Real Property (Torrens) Act passed. S.A.—Stuart crossed the Continent from south to north. W.A.—First export of pearl-shell.
- 1863 Vic.—Intercolonial Conference at Melbourne. S.A.—Northern Territory taken over. W.A.—Initiation of settlement in the north-west district. Henry Maxwell Lefroy discovered and traversed area now comprised in the Coolgardie-Kalgoorlie gold-field.
- 1864 Qld.—First sugar made from Queensland cane.
- 1866 N.S.W.—Passage of Public Schools Act of (Sir) Henry Parkes.
- 1867 Vic.—Imposition of protective tariff. Qld.—Discovery of gold at Gympie.
- 1868 W.A.—Arrival of *Hougomont*, last convict ship.
- 1869 Vic.—Record gold nugget "Welcome Stranger" 2,284 oz. found near Dunolly. W.A.—First telegraph line opened from Perth to Fremantle.
- 1870 N.S.W.—Intercolonial Exhibition opened at Sydney. Imperial troops withdrawn. Vic.—Intercolonial Congress at Melbourne. S.A.—Commencement of trans-continental telegraph.
- 1871 N.S.W.—Permanent military force raised. W.A.—Forrest's explorations. Tas.—Discovery of tin at Mount Bischoff.
- 1872 Vic.—Mint opened. S.A.—Cable from Java to Port Darwin. Completion of transcontinental telegraph line.
- 1873 N.S.W.—Intercolonial Conference at Sydney. First volunteer encampment. Inauguration of mail service with San Francisco.
- 1874 N.S.W.—Triennial Parliaments Act passed. Intercolonial Conference. S.A.—University of Adelaide founded. W.A.—John and Alexander Forrest arrived at Overland Telegraph from Murchison.
- 1875 Qld.—Transfer of Port Albany Settlement to Thursday Island.
- 1876 N.S.W.—Completion of cable—Sydney to Wellington. W.A.—Giles crossed colony from east to west.
- 1877 W.A.—Opening of telegraphic communication with South Australia.
Population of Australia reached 2,000,000.
- 1878 Qld.—Restriction of Chinese immigration.
Introduction of telephone into Australia.
- 1879 N.S.W.—First artesian bore at Kallara Station, near Bourke. First steam tramway. W.A.—A. Forrest's explorations in the Kimberley district, and discovery of the Fitzroy pastoral country.

Year.

- 1880 N.S.W.—Public Instruction Act passed. Vic.—First Australian Telephone Exchange opened in Melbourne.
Federal Conference at Melbourne and Sydney.
- 1881 N.S.W.—Further restrictions on Chinese immigration.
First Australia-wide censuses on same date taken.

APPENDIX.

(Some recent information which has come to hand since the various chapters were sent to press is given hereunder in summarized form. For further or more detailed information, and for the latest available statistics, reference should be made to other publications issued by this Bureau (see p. 1156), notably the *Monthly Review of Business Statistics* and the *Quarterly Summary of Australian Statistics*.)

CHAPTER II.—PHYSIOGRAPHY.

§ 2. Climate and Meteorology of Australia.

Rainfall: Australian Capital Cities, p. 48.—Rainfall recorded in Australian capital cities during 1960 was as follows:—Perth, 28.21 ins.; Darwin, 69.09 ins.; Adelaide, 23.07 ins.; Brisbane, 27.51 ins.; Sydney, 51.01 ins.; Canberra, 30.99 ins.; Melbourne, 33.50 ins.; Hobart, 29.35 ins.

CHAPTER III.—GENERAL GOVERNMENT.

§ 2. Parliaments and Elections.

State Elections, p. 68.—Elections were held in Victoria during 1961. Particulars of the voting for the Legislative Assembly were as follows:—

Electors enrolled	Males	..	758,029
					Females	..	796,827
					Total	..	1,554,856
Electors who voted, Contested Electorates	Males	..	717,755
					Females	..	750,107
					Total	..	1,467,862

The Parliament of New South Wales, p. 69.—A referendum was held on 29th April, 1961, on a proposal to abolish the Legislative Council. Of the 2,104,811 electors enrolled, 1,941,199 recorded their votes, 49,364 of which were informal. Of the 1,891,835 formal votes, 802,530 were in favour of abolition and 1,089,305 against.

§ 3. Administration and Legislation.

Governors-General, p. 73.—Governor-General, from 3rd August, 1961:—The Rt. Hon. William Philip, Viscount De L'Isle, V.C., P.C., G.C.M.G., K.St.J.

Governors and State Ministers, pp. 76–78.—(i) *Victoria*—

Ministry (from 26th July, 1961).

Premier and Treasurer— THE HON. H. E. BOLTE, M.P.	Commissioner of Crown Lands and Survey, Minister of Soldier Settlement, Minister for Conservation and President of the Board of Land and Works— THE HON. K. H. TURNBULL, M.P.
Chief Secretary and Attorney-General— THE HON. A. G. RYLAH, E.D., M.P.	Minister of Labour and Industry and Minister of Electrical Undertakings— THE HON. G. O. REID, M.P.
Minister of Transport and a Vice-President of the Board of Land and Works— THE HON. SIR ARTHUR WARNER, M.L.C.	Minister for Local Government— THE HON. M. V. PORTER, M.P.
Minister of Agriculture and a Vice-President of the Board of Land and Works— THE HON. G. L. CHANDLER, C.M.G., M.L.C.	Minister of State Development— THE HON. A. J. FRASER, M.C., M.P.
Minister of Water Supply and Minister of Mines— THE HON. W. J. MIBUS, M.P.	Minister of Housing and Minister of Forests— THE HON. L. H. S. THOMPSON, M.L.C.
Minister of Education— THE HON. J. S. BLOOMFIELD, M.P.	Minister of Health— THE HON. R. W. MACK, M.L.C.
Commissioner of Public Works, Minister of Immigration and a Vice-President of the Board of Land and Works— THE HON. H. R. PETTY, M.P.	Minister without Portfolio— THE HON. E. R. MEAGHER, M.B.E., E.D., M.P.

(ii) *Queensland*—On 4th May, 1961, the Hon. H. Richter was appointed as Minister for Public Works and Local Government following on the death of the Hon. L. H. S. Roberts.

§ 5. Cost of Parliamentary Government, p. 93.

The cost of Parliamentary Government, Commonwealth and individual States, for the year 1959–60 was as follows:—

Commonwealth, £3,181,262 (6s. 3d. per head); New South Wales, £906,100 (4s. 9d.); Victoria, £695,399 (4s. 11d.); Queensland, £599,125 (8s. 3d.); South Australia, £390,741 (8s. 4d.); Western Australia, £479,357 (13s. 3d.); Tasmania, £279,896 (16s. 1d.); and total, £6,531,880 (12s. 10d.).

The amounts expended under the major headings for all Governments during 1959–60 were:—Governor-General or Governor, £449,384; Official Establishments, £15,896; Ministry, £451,648; Parliament, £4,524,150; Electoral, £1,045,833.

CHAPTER VI.—MANUFACTURING INDUSTRY.

Summary, p. 163.—The following table gives a summary of operations in manufacturing industries during 1959–60.

FACTORIES: 1959-60, SUMMARY.

Particulars.		N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
Factories	No.	23,274	16,979	5,758	4,684	4,279	1,683	56,657
Persons employed(a) ..		467,139	381,514	104,693	99,018	49,651	29,662	1,131,677
Salaries and wages paid (b) £'000		461,144	370,181	89,367	95,238	41,643	28,786	1,086,359
Value of power, fuel, light, etc., used		87,108	47,140	15,183	15,093	10,071	6,220	180,815
.. materials used		1,206,255	875,973	291,388	207,636	119,138	67,609	2,767,999
.. production(c)		916,446	686,501	162,392	162,973	86,374	60,196	2,074,882
.. output		2,209,809	1,609,614	468,963	385,702	215,583	134,025	5,023,696
.. land and buildings ..		440,548	353,735	76,352	77,632	43,573	72,012	1,063,852
.. plant and machinery ..		506,638	377,092	120,211	98,240	64,225	53,658	1,220,064

(a) Average over whole year; includes working proprietors. (b) Excludes amounts drawn by working proprietors. (c) Value added in process of manufacture (i.e., value of output less value of materials and fuel used).

Value of Production in Classes of Industry, p. 186.—The following table shows, for the year 1959–60, the value of production in Australia for the various classes of industry.

FACTORIES: VALUE OF PRODUCTION, AUSTRALIA, 1959-60.

(£'000.)

Class of Industry.	Value of Production. (a)
I. Treatment of Non-metalliferous Mine and Quarry Products ..	52,427
II. Bricks, Pottery, Glass, etc.	44,519
III. Chemicals, Dyes, Explosives, Paints, Oils, Grease	178,266
IV. Industrial Metals, Machines, Conveyances	849,092
V. Precious Metals, Jewellery, Plate	8,012
VI. Textiles and Textile Goods (not Dress)	108,344
VII. Skins and Leather (not Clothing or Footwear)	18,940
VIII. Clothing (except Knitted)	118,847
IX. Food, Drink and Tobacco	260,068
X. Sawmills, Joinery, Boxes, etc., Wood Turning and Carving ..	97,689
XI. Furniture of Wood, Bedding, etc.	33,762
XII. Paper, Stationery, Printing, Bookbinding, etc.	149,093
XIII. Rubber	32,138
XIV. Musical Instruments	1,926
XV. Miscellaneous Products	41,140
XVI. Heat, Light and Power	80,619
Total	2,074,882

(a) See footnote (c) to previous table.

CHAPTER IX.—POPULATION.

§ 2. The Census.

2. Population recorded at Censuses, p. 288.—Figures for the population in States and Territories as recorded at the Census of 31st June, 1961, are as follows. The figures are derived from the preliminary check of the Census Schedules and are subject to amendment on completion of tabulation.

POPULATION IN STATES AND TERRITORIES, CENSUS, 30th JUNE, 1961.
(EXCLUDING FULL-BLOOD ABORIGINALS.)

State or Territory.	Persons.
New South Wales	3,916,907
Victoria	2,930,244
Queensland	1,518,859
South Australia	969,258
Western Australia	736,624
Tasmania	350,332
Northern Territory	27,139
Australian Capital Territory	58,828
Australia	10,508,191

§ 3. Growth and Distribution of Population.

6. Principal Urban Areas, p. 294.—The following table shows the estimated population of the principal urban areas, comprising all incorporated cities and towns and non-municipal towns with a population of 7,000 persons or more, in each State and Territory of Australia at 30th June, 1961.

ESTIMATED POPULATION OF PRINCIPAL URBAN AREAS: AUSTRALIA.
(EXCLUDING FULL-BLOOD ABORIGINALS.)

City or Town.	Population.	City or Town.	Population.	City or Town.	Population.
New South Wales.		Victoria.		South Australia.	
		Melbourne and Suburbs(a)	1,907,366	Adelaide and Suburbs(a)	587,656
Sydney and Suburbs(a)	2,181,211	Geelong and Suburbs(b)	91,666	Elizabeth(c)	23,317
Newcastle and Suburbs(b)	208,905	Ballarat and Suburbs(b)	54,913	Mount Gambier	15,354
Greater Wollongong	131,758	Bendigo and Suburbs(b)	40,309	Port Pirie	14,190
Greater Cessnock	35,270	Warrnambool	15,697	Whyalla	14,076
Penrith	31,868	Moe	15,454	Port Augusta	9,705
Broken Hill	31,268	Morwell(c)	14,827	Salisbury(c)	9,356
Blue Mountains	28,070	Wangaratta	13,812	Port Lincoln	7,651
Maitland	27,344	Shepparton	13,574	Western Australia.	
Wagga Wagga	22,089	Traralgon	12,298	Perth and Suburbs(a)	419,755
Goulburn	20,550	Mildura	12,273	Kalgoorlie and Suburbs(b)	21,770
Tamworth	19,064	Hamilton	9,483	Bunbury	13,351
Orange	18,952	Colac	9,255	Geraldton	10,878
Lismore	18,927	Horsham	9,243	Albany	10,502
Campbelltown	18,649	Benalla	8,483	Collie(c)	7,545
Albury	18,617	Ararat	7,930	Northam	7,192
Bathurst	16,934	Sale	7,898	Tasmania.	
Grafton	15,533	Bairnsdale	7,418	Hobart and Suburbs(a)	115,887
Lithgow	14,222	Maryborough	7,237	Launceston and Suburbs(b)	56,837
Dubbo	14,130	Castlemaine	7,216	Burnie(c)	14,380
Shellharbour	13,370	Queensland.		Devonport(c)	13,053
Armidale	12,884	Brisbane and Suburbs(a)	620,121	Northern Territory.	
Woy Woy-Ettalong(c)	12,164	Townsville	51,224	Darwin	12,480
Windsor	12,015	Toowoomba	50,107	Australian Capital Territory.	
Taree	10,053	Ipswich	48,668	Canberra(a)	56,430
Queanbeyan	9,445	Rockhampton	44,102		
Cooma	8,722	Gold Coast	33,667		
Toronto(c)	8,510	Cairns	25,358		
Parkes	8,228	Bundaberg	22,791		
Inverell	8,202	Maryborough	19,136		
Casino	8,090	Mackay	16,795		
Kempsey	7,999	Mount Isa(c)	13,315		
Griffith(c)	7,709	Gympie	11,082

Coff's Harbour(c)	7,179	Ayr(c)	8,006		
		Charters Towers	7,621		
		Dalby	7,394		
		Gladstone	7,182		

(a) Metropolitan Area.

(b) Entire Urban Area.

(c) Non-municipal town.

CHAPTER X.—VITAL STATISTICS.

§ 2. Marriages.

Age and Conjugal Condition at Marriage, p. 335.—A summary of the previous conjugal condition of bridegrooms and brides in 1960 in relation to age at marriage is as follows:—

AGE AND CONJUGAL CONDITION OF BRIDEGROOMS AND BRIDES:
AUSTRALIA, 1960.

Age at Marriage (Years).	Bridegrooms.				Brides.			
	Bachelors.	Widowers.	Divorced.	Total.	Spinsters.	Widows.	Divorced.	Total.
Under 20 ..	3,911	3,911	19,902	7	8	19,917
20-24 ..	33,881	9	50	33,940	34,602	86	299	34,987
25-29 ..	18,015	57	462	18,534	7,342	157	855	8,354
30-34 ..	7,121	127	889	8,137	2,603	280	1,161	4,044
35-39 ..	2,579	194	951	3,724	1,218	354	1,056	2,628
40-44 ..	1,042	243	726	2,011	572	456	721	1,749
45-49 ..	650	349	636	1,635	355	507	493	1,355
50-54 ..	337	375	401	1,113	218	450	240	908
55-59 ..	185	452	210	847	120	362	111	593
60-64 ..	97	417	100	614	81	331	40	452
65 and over ..	96	792	74	962	64	353	24	441
Total ..	67,914	3,015	4,499	75,428	67,077	3,343	5,008	75,428

In 1960, the proportional distribution (per cent.) of bridegrooms and brides according to previous conjugal condition was—

Bridegrooms: Bachelors, 90.04; Widowers, 4.00; Divorced, 5.96.

Brides: Spinsters, 88.93; Widows, 4.43; Divorced, 6.64.

In 1960, the average age of bridegrooms was 28.15 years and of brides 24.84 years.

Celebration of Marriages, p. 337.—The number of marriages in 1960 celebrated by ministers of religion in the various denominations or by civil officers was as follows:—

MARRIAGES IN EACH DENOMINATION, 1960.

Denomination.	REPUBLIC OF SOUTH AFRICA, 1960.								Australia.	
	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	No	Pro- portion of Total.

		E964, E965			
		E980-E999			
All Causes	49,629	38,835	88,464

(a) No deaths were recorded in the following categories for 1960:—B4, Typhoid Fever (040); B5, Cholera (043); B7 Scarlet Fever and Streptococcal Sore Throat (050, 051); B11, Plague (058); B13, Smallpox (084); B16, Malaria (110-117). (b) 030-039, 041, 042, 044, 049, 052-054, 059-074, 081-083, 086-096, 120-138. (c) 140-148, 160, 161, 164, 165, 190-203, 205.

CHAPTER XI.—HOUSING, ETC.

§ 4. New Building.

New Houses, p. 399.—The number of new houses commenced, completed and under construction in each State and Territory during 1960–61 was as follows:—

NEW HOUSES: NUMBER, 1960–61.

(Including Owner-built Houses.)

Particulars.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.(a)	A.C.T.	Aust.
Approved ..	28,254	18,432	10,359	9,946	5,685	2,245	390	1,517	76,828
Commenced ..	27,654	18,517	9,198	9,268	5,693	2,248	415	1,177	74,170
Completed ..	29,778	22,094	9,391	9,376	5,973	2,487	403	1,273	80,775
Under construction at 30th June, 1961 ..	12,487	12,010	2,713	5,006	3,016	1,578	274	1,078	38,162

(a) Includes flats.

Of the 80,775 new houses completed during 1960–61, 35,789 had outerwalls of brick, brick veneer, concrete or stone, 24,764 of wood (weatherboard, etc.), 19,830 of fibro-cement and 395 of other materials.

New Flats, p. 402.—The following table shows the number of new flats commenced, completed and under construction in each State and the Australian Capital Territory during 1960–61.

NEW FLATS: NUMBER, 1960–61.

(Individual Flats.)

Particulars.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	A.C.T.	Aust.(a)
Approved ..	8,447	5,156	1,554	756	433	152	262	16,760
Commenced ..	7,578	4,672	1,153	571	358	129	258	14,719
Completed ..	6,619	4,183	1,212	887	440	175	174	13,690
Under construction at 30th June, 1961 ..	4,849	3,311	751	319	151	94	264	9,739

(a) Excludes figures for the Northern Territory, which are not available for publication.

Value of New Buildings, p. 403.—The values of all new buildings commenced, completed and under construction in each State and Territory are shown in the following table for the year 1960–61.

NEW BUILDINGS: VALUE, 1960–61.

(Including Estimated Value of Owner-built Houses.)

(£'000.)

Particulars.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Approved ..	225,275	165,902	73,413	66,821	36,067	15,177	2,980	16,414	602,049
Commenced ..	213,737	155,376	57,820	57,923	33,282	14,140	4,434	15,307	552,019
Completed ..	209,186	163,152	59,304	53,866	36,025	17,014	3,118	13,155	554,820
Under construction at 30th June, 1961 ..	157,932	122,187	29,961	41,727	20,922	12,964	3,410	18,080	407,183

The value of new buildings completed in Australia during 1960–61, according to kind of building, was as follows:—*Houses*—Brick, brick veneer, concrete and stone, £143,756,000; wood (weatherboard, etc.), £77,771,000; fibro-cement, £50,624,000; other, £1,243,000; Total, £273,394,000; *Other Buildings*—Flats, £40,322,000; hotels, guest-houses, etc. £14,580,000; shops, £23,145,000; factories, £64,788,000; offices, £32,344,000; other business

premises, £23,453,000; educational, £35,318,000; religious, £7,159,000; health, £14,072,000; entertainment and recreation, £9,749,000; miscellaneous, £16,496,000; Total Other Buildings, £281,426,000; Grand Total, New Buildings, £554,820,000.

Persons Engaged in New Building, p. 405.—The number of persons engaged on jobs carried out by builders of new buildings in Australia at 30th June, 1961, was as follows:—Carpenters, 44,403; bricklayers, 11,206; painters, 10,302; electricians, 6,052; plumbers, 9,849; builders' labourers, 19,746; other, 18,302; total, 119,860. Of this total, contractors actually working on jobs numbered 9,046, sub-contractors actually working on jobs 17,719 and wage earners 93,095.

CHAPTER XII.—LABOUR, WAGES AND PRICES.

A. RETAIL PRICES AND PRICE INDEXES.

§ 4. Tabular Statements of Retail Price Index Numbers.

The Consumer Price Index, p. 415.—The following table shows Consumer Price Index numbers for March and June quarters, 1961, for each capital city and the six capital cities combined for each Group and all Groups combined.

CONSUMER PRICE INDEX NUMBERS.(a)

(Base of each Index: Year 1952-53 = 100.0.)

Period.	Sydney.	Mel- bourne.	Brisbane.	Adelaide.	Perth.	Hobart.	Six Capital Cities.(b)
FOOD.							
March Quarter, 1961 ..	125.3	130.4	134.0	132.8	125.3	133.9	128.6

ALL GROUPS.							
March Quarter, 1961 ..	122.5	126.1	126.7	123.4	121.9	128.3	124.2
June " " ..	123.4	127.1	126.1	124.3	122.4	128.9	125.0

(a) The index numbers measure price movements in each city individually and for the weighted average of the six capitals. They do not measure differences in price levels as between cities.
(b) Weighted average.

B. WHOLESALE PRICES AND PRICE INDEXES.

§ 2. Wholesale Price (Basic Materials and Foodstuffs) Index.

Index Numbers, p. 421.—Index numbers for each group of commodities and for all groups combined for the index of wholesale prices of basic materials and foodstuffs are shown below for the year 1960-61 and for the months April to June, 1961.

WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX NUMBERS.

(Base of each Group: Average, 3 years ended June, 1939 = 100.)

Period.	Basic Materials.							Foodstuffs and Tobacco. (b)	Basic Materials and Foodstuffs.		
	Metals and Coal.	Oils, Fats and Waxes.	Textiles.	Chemicals.	Rubber and Hides.	Building Materials.	Total.		Goods principally Imported. (a)	Goods principally Home Produced. (b)	Total All Groups. (b)
1960-61	399	222	387	331	341	439	346	372	278	394	360
1961—											
April	395	221	413	332	325	439	346	371	277	394	359
May..	395	221	413	332	318	439	345	365	277	389	356
June	393	218	408	332	303	439	342	362	274	386	353

(a) Represents only such imported commodities as are included in the Wholesale Price Index and does not measure changes in prices of all imports. (b) The indexes for "Foodstuffs and Tobacco", "Goods Principally Home Produced" and "Total All Groups" have been reconstructed as from the base period by excluding potatoes and onions.

D. WAGES.

§ 2. Rates of Wage and Hours of Labour.

Weekly Rates of Wage, pp. 426-430.—The following table shows for each State and Australia the weighted average minimum weekly rates of wage payable, and the index numbers based thereon, for adult males and for adult females, at 31st March and 30th June, 1961, together with revised figures for 31st December, 1960. Revised particulars of minimum weekly wage rates for 1960 and earlier years were published in the Statistical Bulletin *Minimum Weekly Wage Rates, January, 1957 to June, 1961*, of 30th October, 1961.

§ 3. Average Weekly Earnings.

Average Weekly Total Wages and Salaries Paid and Average Earnings, All Industries, p. 433.—The following table shows for each State and Australia the average weekly total wages and salaries paid, and average weekly earnings per employed male unit, for the year ended June, 1961.

AVERAGE WEEKLY TOTAL WAGES AND SALARIES PAID AND AVERAGE EARNINGS(a), 1960-61.

N.S.W.(b)	Victoria.	Queensland.	S. Aust.(c)	W. Aust.	Tasmania.	Australia.
-----------	-----------	-------------	-------------	----------	-----------	------------

AVERAGE WEEKLY TOTAL WAGES AND SALARIES PAID. (£'000.)

26,884	19,198	7,853	5,670	3,891	1,952	65,448
--------	--------	-------	-------	-------	-------	--------

AVERAGE WEEKLY EARNINGS PER EMPLOYED MALE UNIT.(d) (£.)

24.04	23.34	21.02	21.39	20.59	21.32	22.89
-------	-------	-------	-------	-------	-------	-------

(a) Includes, in addition to wages at award rates, earnings of salaried employees, overtime earnings, over-award and bonus payments, etc. (b) Includes the Australian Capital Territory. (c) Includes the Northern Territory. (d) Total wages and salaries, etc., divided by total civilian employment expressed in male units. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. As it is not possible to estimate the ratio of female to male earnings in the several States, the same ratio has been used in each State. Because the actual ratio may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above.

Average Weekly Earnings Index Numbers, p. 433.—The average weekly wage earnings index numbers for Australia for All Industries and Manufacturing (Base of each series: 1953-54 = 100.0—seasonally adjusted series) for June quarter, 1961 and the year ended June, 1961, were respectively:—All Industries, 141.2, 140.6; Manufacturing, 140.1, 141.0. Revised figures for All Industries for 1958-59 and 1959-60, respectively, were 124.5 and 133.6. No changes were made to the quarterly figures shown.

§ 4. Survey of Wage Rates and Earnings, September, 1960, p. 434.

1. General.—A statistical survey of the wage structure of Australia was undertaken by this Bureau towards the end of 1960. The object of the survey was to obtain information as to marginal rates of wage and actual weekly earnings of adult male employees (excluding part-time and casual employees) for the last pay-period in September, 1960.

The survey was based on returns from a stratified sample of most of the private employers subject to Pay-roll Tax. It did not include governmental or semi-governmental employment. For various reasons (such as paucity of data, seasonal variations in employment, incidence of piece work, part-time and casual employment), it excluded the following:—rural industry; private domestic service; certain businesses such as accountants, trade associations, consultant engineers, etc.; the shipping and stevedoring industry; and the motion picture industry. Religious, benevolent and other similar bodies, exempt from Pay-roll Tax, were also excluded.

Employers were asked to show separate particulars in respect of employees covered by Commonwealth awards and by State awards, and of those not covered by any award. Completed returns were received from more than 3,000 employers, representing a response rate of about 90 per cent. of those approached. The sample, being stratified, provided a representative basis upon which to estimate marginal rates of wage and earnings by industrial groups for the (approximately) 1,105,000 adult male employees within the selected field. (*see above*). These were cross-classified to show the number of employees in size groups by industry and jurisdiction in respect of marginal rates and in size groups by industry in respect of earnings.

Definitions relevant to the survey are as follows:—

- (a) *Number of employees* refers to adult male employees on the pay-roll on the last pay-day in September, 1960, and includes employees who, although under 21 years of age, were paid at the adult rate prescribed in the appropriate award. Part-time and casual employees and those absent in the defence forces were excluded.
- (b) The term *awards*, as used herein, denotes awards or determinations of, or agreements registered with, Commonwealth or State industrial tribunals. Employees whose rates of pay and working conditions were not regulated by awards, and employees covered by formal, though unregistered, agreements between employee organizations and employers, are shown as "not covered by awards".
- (c) *Margins* are minimum amounts, in addition to the basic wage, awarded to particular classifications of employees for features attaching to their work, such as skill, experience, arduousness or other like factors. For the purposes of this survey the following were not included in margins:—special allowances prescribed in awards, such as shift, dirt, and height money, leading hand allowances, etc.; and other payments such as commission, payments above the minimum rate for contract and piece work, etc. (*see paragraphs 1 (e) and 1 (g) below and also § 6. Wage Margins, p. 454*). In the case of contract work, etc., the margin was determined by the minimum amount prescribed in the award for the class of work performed. Where the marginal rate of wage for an occupation was not specified in an award, the margin was assumed to be the difference between the total minimum prescribed rate of wage for the occupation and the appropriate Commonwealth or State basic wage. For employees not covered by awards, and whose margins were not specified in unregistered agreements, the margin was assumed to be the difference between the appropriate basic wage in the State jurisdiction and the agreed rate of pay for a standard working week (or the weekly equivalent of the agreed rate).
- (d) *Total Weekly Earnings* include ordinary time earnings at award rates (and, for employees not covered by awards, payments at agreed rates for a standard working week), overtime earnings and all other payments. Annual or other periodical bonuses were included only at the appropriate proportion for one week. For employees paid other than weekly, only the proportion of earnings for one week was included.
- (e) *Ordinary Time Earnings at Award Rates* represent the total weekly payment to adult male employees (excluding part-time and casual employees) for hours of work paid for up to the standard or award hours, calculated at award rates of pay. It includes payments for sick leave, proportion of annual leave, special allowances prescribed in awards, etc. (*see sub. para. (c) above*). For employees not covered by awards, it includes payments at agreed rates for a standard working week.
- (f) *Overtime Earnings* represent the total weekly payment to adult male employees (excluding part-time and casual employees) for time worked in excess of award or agreed hours.

(g) *Other Earnings* include all payments other than those in paragraphs (e) and (f) above, such as commission, payments above the minimum rate for contract work, incentive scheme, piece-work and profit-sharing scheme payments, proportion of annual or other periodical bonuses, points system payments, attendance or good time-keeping bonuses, etc. (see sub. para. (c) above).

2. *Marginal Rates of Wage.*—(i) *Industrial Groups.* In the following table, adult male employees in each of the main industrial groups are classified according to weekly margin above the basic wage.

(c) Inquiry indicated that many of the adult males in this group were absent for part of the week.

§ 5. Basic Wages in Australia.

Basic Wage Inquiry, 1961, p. 447.—In this case, two applications to vary the Metal Trades Award were before the Commission. In the first, the employers sought to increase the number of ordinary working hours per week from 40 to 42, with a concomitant increase in weekly wages by an amount equivalent to two hours pay at ordinary rates, and to effect certain other consequential variations. In the second, the unions applied for an increase in the basic wage on a six capital cities basis by the amount of 49s. (which was amended during the hearing to 52s.) and for the re-introduction of automatic quarterly adjustments based on the "C" Series Retail Price Index. The amount claimed represented 27s. (30s.) for cost of living increases since 1953 and 22s. to reflect increases in productivity since that time.

The inquiry opened on 14th February, 1961, before Kirby *C.J.*, Ashburner and Moore *JJ.*, and the judgment was delivered on 4th July, 1961.

The following is an extract from a statement made by Kirby *C.J.* on 4th July, 1961:—

"The members of the bench have reached unanimous decisions which, with the reasons for the decisions, are published in the judgment which is now handed down.
Decisions—

1. The employers' claim for an increase in the standard hours of work from forty to forty-two with a concomitant increase in the weekly wage equivalent to two hour's pay at ordinary rates is refused.
2. The unions' claim for restoration of automatic quarterly adjustments is refused.
3. The basic wages of adult male employees covered by federal awards will be increased by a uniform amount of 12s. per week.
4. The new rates will come into effect from the beginning of the first pay-period commencing on or after 7th July instant subject to special cases.
5. For the specific reasons set out in the judgment we consider that in February next the only issue in regard to the basic wage should be why the money wages fixed as a result of our decision should not be adjusted in accordance with any change in the Consumer Price Index, and for the purpose of deciding that issue the Order giving effect to the decisions hereby announced will also provide for the adjournment of the application of the unions for increase of the basic wages under the Metal Trades Award to Tuesday, 19th February, 1962, in Melbourne, when such submissions thereon as are desired to be made will be heard.
6. The decision regarding increases in basic wages is applicable to all the applications which have been ordered by the Commission to be joined for hearing and decision with the original application and those joined applications are stood over to a date after 19th February, 1962, to be fixed by the Commission."

In the Metal Trades Award and in federal awards generally, the basic wage for adult females was increased by 9s. a week. Proportionate increases for juniors and apprentices were also granted.

The effect of the decision in para. 5 above was set out in more detail in the reasons for judgment. After giving reasons why it was not prepared to restore the system of automatic quarterly adjustments and for its preference for the Consumer Price Index over the "C" Series Index, the Commission made the following statement:—

"We consider it desirable that the application of the Consumer Price Index should always be subject to control by the Commission and that the Commission should be able to decide whether a particular increase or decrease in the figures as disclosed in the Consumer Price Index should be applied to the basic wage. Our present opinion is

that this consideration of prices should take place annually. We will each year make the assumption that the effect of movements in the Consumer Price Index should be reflected in the basic wage unless we are persuaded to the contrary by those seeking to oppose the change. As the basis of our decision is the desirability of maintaining the value of the real wage based on the concept of national capacity, the appropriate matter for consideration would appear to be what should be the effect on the six capital cities basic wage of movements in the six capital cities index. The resulting figure will be applied to all federal basic wages.

Since such a consideration of price movements is to take place annually the question remains whether the Commission should at the annual hearing continue to review all factors in the economy to decide whether or not to change the level of the real basic wage. It seems to us that once the question of prices is dealt with otherwise a review of the economy generally and in particular of productivity increases could more properly take place at longer periods of time, say, every three or four years."

State Basic Wage Rates, p. 454.—The table below shows the "basic" weekly wage rates of State industrial tribunals, operative in August, 1961.

(a) From beginning of first pay-period commencing in August, 1961. (b) No basic wage declared. Rates shown are those adopted by most Wages Boards. (c) During July and August, 1961, Wages Boards varied determinations by adopting the Commonwealth basic wage rate. (d) The "living wage" declared for the metropolitan area is also adopted for country areas, except at Whyalla and Iron Knob, where a loading of 5s. a week is generally payable. (e) Most Wages Boards adopted the Commonwealth basic wage rate from July, 1961.

E. EMPLOYMENT AND UNEMPLOYMENT.

§ 1. Employment.

Wage and Salary Earners in Civilian Employment, pp. 462-4.—The following are particulars of wage and salary earners in civilian employment, excluding rural wage earners, female private domestics and defence forces, for the month of June, 1961.

(a) Silver, copper, tin, zinc, lead. (b) Beef, lamb, mutton, pork. Guaranteed minimum prices are used when operative. (c) Sultanas, raisins, currants. (d) Cattle hides, calfskins. (e) Actual price realized not yet fully known; provisional series are included in "All Groups" Indexes which are subject to revision. (f) Preliminary.

Revised figures for Dried Fruits for the year 1959-60 and the months July, 1960, to March, 1961, respectively, were:—349, 326, 329, 338, 341, 345, 348, 346, 346, 347. The All Groups figures remained unchanged except for a variation of one point in two months.

§ 21. The Australian Balance of Payments.

The tables in this section show revised balance of payments estimates for the years 1958-59, 1959-60, and preliminary estimates for 1960-61. Further details will be found in the mimeograph publication *The Australian Balance of Payments, 1956-57 to 1960-61*.

Current Account, p. 517.—Revised estimates of the balance of payments on current account for the years 1958-59, 1959-60 and preliminary estimates for 1960-61 are shown in the following table:—

Total Freight	1,301	18,197	8,276	5,887	3,091	3,465	904	41,121

(a) Excludes South Brisbane-Border section of the uniform gauge line (69 route miles).

(b) Financial details include road motors.

(c) Excludes Government Grants.

(e) Includes depreciation.

(d) Included with coaching.

Minus sign (—) denotes loss.

NOTE.—The foregoing table is prepared from quarterly statements supplied by each Government Railway, and figures therein are not completely comparable with those shown in Chapter XIV.—Transport and Communication, which are derived, in the main, from the Annual Reports of the Government Railways.

E. MOTOR VEHICLES.

Motor Vehicle Registrations, pp. 557-8.—Motor vehicles registered at 30th June, 1961, and new motor vehicles registered during 1960-61 were as follows:—

MOTOR VEHICLES: REGISTRATIONS, 1960-61.

State or Territory.	Number of Motor Vehicles Registered at 30th June, 1961.(a)				Number of New Motor Vehicles Registered, 1960-61.(a) (Revised Series.)(b)			
	Motor Cars.(c)	Commercial Vehicles.(d)	Motor Cycles.	Total.	Motor Cars.(c)	Other Vehicles.	Motor Cycles.	Total.
New South Wales	663,943	336,180	24,396	1,024,519	86,768	21,732	2,034	110,534
Victoria	695,921	176,892	19,331	892,144	66,931	14,873	1,356	83,160
Queensland	257,957	147,286	16,493	421,736	24,540	8,552	1,203	34,295
South Australia	220,221	75,774	16,780	312,775	20,346	5,535	2,062	27,943
Western Australia	138,187	72,145	12,689	223,021	15,159	5,549	1,094	21,802
Tasmania	69,088	26,358	2,622	98,068	6,724	2,056	61	8,841
Northern Territory	5,162	5,116	719	10,997	501	431	22	954
Aust. Capital Territory	14,392	3,899	352	18,643	2,173	441	47	2,661
Total	2,064,871	843,650	93,382	3,001,903	223,142	59,169	7,879	290,190

(a) Excludes Defence Service vehicles, trailers, road tractors, etc., and dealer's plates. (b) This series is not strictly comparable with the Number of Motor Vehicles Registered series, nor with the New Motor Vehicles Registered series on p. 558. It is a more accurate classification of types of vehicles. (c) Includes taxis, hire cars and station wagons. (d) Includes utilities, panel vans, lorries and omnibuses. (e) Registration in Victoria is according to purpose of use and not type of vehicle; consequently, motor car registrations in this series are overstated by the inclusion of commercial vehicles registered for private use.

H. CIVIL AVIATION.

Statistical Summaries, p. 565.—The following table shows particulars of the operations of regular internal services and oversea services during the nine months ended March, 1961.

CIVIL AVIATION: OPERATIONS OF REGULAR INTERNAL SERVICES AND OVERSEA SERVICES, NINE MONTHS ENDED MARCH, 1961.

Particulars.	Regular Internal Services.(a)	Oversea Services.(b)
Route miles (unduplicated)(c)	63,028	73,557
Hours flown	166,189	44,096
Miles flown	31,970	15,046
Paying passengers	1,999,303	222,965
Paying passenger-miles	843,705	642,680
Freight—		
Tons(d)	48,318	5,075
Ton-miles(d)	21,804	23,397
Mail—		
Tons(d)	4,496	1,796
Ton-miles(d)	2,327	8,632

(a) Includes only services operating within the Australian mainland and Tasmania. (b) Airlines wholly or partly owned by Australian interests. (c) At 31st March, 1961. (d) In terms of short tons (2,000 lb.).

J. BROADCASTING AND TELEVISION.

§ 4. Licences, etc.

Broadcast Listeners' and Television Viewers' Licences, p. 583.—Broadcast listeners' licences in force at 30th June, 1961, were as follows:—New South Wales, 825,528; Victoria, 589,437; Queensland, 341,101; South Australia, 249,475; Western Australia, 172,881; Tasmania, 77,420; Australia, 2,255,842. Figures for the Northern Territory and the Australian Capital Territory have been included with those for South Australia and New South Wales respectively.

Television viewers' licences in force at 30th June, 1960, were as follows:—New South Wales, 488,516; Victoria, 401,395; Queensland, 113,954; South Australia, 124,808; Western Australia, 69,628; Tasmania, 18,985; Australia, 1,217,286.

CHAPTER XVIII.—WELFARE SERVICES.

A. COMMONWEALTH EXPENDITURE ON SOCIAL AND HEALTH SERVICES.

§ 2. National Welfare Fund, p. 689.

The following table shows particulars of payments of social and health services in each State during 1960-61.

COMMONWEALTH EXPENDITURE FROM NATIONAL WELFARE FUND
ON SOCIAL AND HEALTH SERVICES, 1960-61.

CHAPTER XX.—PRIVATE FINANCE:

A. CURRENCY.

§ 2. Coinage.

Issues of Australian Coins, p. 752.—The net issues of Australian coins to 30th June, 1961, were:—silver, £41,224,000; bronze, £3,345,000; total, £44,569,000.

§ 3. Notes.

The Australian Note Issue, p. 754.—The average value of notes in circulation for the year 1960–61 was £430,237,000. This amount was distributed in denominations as follows:—10s., £12,236,000; £1, £69,983,000; £5, £192,789,000; £10, £152,302,000; £20, £2,000; £50, £32,000; £100, £37,000; and £1,000, £2,856,000. The amount held by the banks was £57,111,000 and by the public £373,126,000.

B. BANKING.

§ 1. Cheque-Paying Banks.

Reserve Bank, p. 758.—The average liabilities of the Central Banking Business (including Note Issue Department) of the Reserve Bank for the year ended June, 1961, amounted to £1,031,804,000. Capital and Reserve Funds amounted to £22,790,000; Notes on Issue to £427,710,000; Statutory Reserve Deposit Accounts of Trading Banks to £294,409,000; Other Deposits of Trading Banks to £18,478,000; Deposits of Savings Banks to £138,285,000; Other Liabilities to £130,132,000.

Particulars of the average assets were as follows:—Gold and Balances held abroad, £365,696,000; Australian Notes and Coin, £6,280,000; Cheques and Bills of other Banks, £1,956,000; Government and Other Securities (including Treasury Bills), £571,279,000; Bills Receivable and Remittances in Transit, £5,749,000; and Other Assets, £80,844,000.

Commonwealth Trading Bank, p. 764.—The average liabilities in Australia of the Commonwealth Trading Bank for the year ended June, 1961, were £274,825,000. Of this amount, Fixed Deposits amounted to £72,876,000 and Current Deposits (including Current Deposits bearing interest £14,423,000) to £198,280,000; Balances due to other Banks to £1,080,000; Other Liabilities to £2,589,000.

The average assets in Australia, £280,971,000, included Cash and Cash Balances £10,518,000; Treasury Bills and Seasonal Securities, £1,592,000; Other Commonwealth and State Government Securities, £54,007,000; Loans to Authorized Dealers in the Short Term Money Market, £4,640,000; Statutory Reserve Deposits with Reserve Bank, £45,835,000; Cheques, Bills and Balances with other Banks, £5,595,000; Loans (other than Loans to Authorized Dealers in the Short Term Money Market), Advances and Bills Discounted, £147,566,000; Other Assets, £11,218,000.

Private Trading Banks, p. 767.—Average liabilities in Australia of the Private Trading Banks for the year ended June, 1961, were £1,507,651,000. Fixed Deposits amounted to £333,886,000 and Current Deposits (including Current Deposits bearing interest, £88,307,000) to £1,123,599,000; Balances due to other Banks to £21,752,000; Other Liabilities to £28,414,000.

The average assets in Australia, £1,547,148,000, included Cash and Cash Balances, £61,913,000; Treasury Bills and Seasonal Securities, £20,733,000; Other Commonwealth and State Government Securities, £174,422,000; Loans to Authorized Dealers in the Short

Term Money Market, £18,971,000; Statutory Reserve Deposits with Reserve Bank, £248,038,000; Cheques, Bills and Balances with other Banks, £25,890,000; Loans (other than Loans to Authorized Dealers in the Short Term Money Market), Advances and Bills Discounted, £902,465,000; Other Assets, £94,716,000.

Classification of Advances within Australia—Commonwealth Trading Bank and Private Trading Banks, p. 771.—Advances within Australia at the end of June, 1961, dissected by industries were:—*Resident Borrowers*: Business Advances—Agriculture, Grazing and Dairying, £225,283,000; Manufacturing, £228,120,000; Transport, Storage and Communication, £14,338,000; Finance, £72,207,000; Commerce, £217,386,000; Building and Construction, £25,252,000; Other Business and Services, £72,104,000; Unclassified, £5,692,000; Total Business Advances, £860,382,000; Advances to Public Authorities, £14,066,000; Personal advances, £145,071,000; Advances to Non-Profit Organizations, £19,287,000; *Total Resident Borrowers*, £1,038,806,000; *Total Non-Resident Borrowers*, £287,000; *Total advances*, £1,039,093,000.

Clearing House Returns, p. 775.—The average weekly bank clearings in each capital city for the year ended June, 1961, were as follows:—Sydney, £190,929,000; Melbourne, £172,942,000; Brisbane, £40,263,000; Adelaide, £35,773,000; Perth, £23,255,000; Hobart, £7,122,000; Total, £470,284,000.

Debits to Customers' Accounts—All Cheque-paying Banks, p. 775.—The average weekly debits to customers' accounts in each State for the year 1960–61 for all cheque-paying banks (excluding debits to accounts of Australian Governments in capital cities) were as follows:—New South Wales, £322,214,000; Victoria, £297,670,000; Queensland, £85,430,000; South Australia, £55,645,000; Western Australia, £37,582,000; Tasmania, £16,449,000; Northern Territory, £1,124,000; Australian Capital Territory, £4,006,000; Total, £820,120,000.

§ 2. Savings Banks.

All Savings Banks, p. 777.—The numbers of operative accounts in the several States at end of June, 1961, were:—New South Wales, 3,151,000; Victoria, 2,822,000; Queensland, 1,187,000; South Australia, 963,000; Western Australia, 578,000; Tasmania, 317,000; Northern Territory, 17,000; and Australian Capital Territory, 39,000; Total, 9,074,000. The amounts on deposit in the several States at 30th June, 1961, were:—New South Wales, £569,151,000; Victoria, £517,468,000; Queensland, £187,131,000; South Australia, £166,743,000; Western Australia, £80,712,000; Tasmania, £47,388,000; Northern Territory, £2,726,000; and Australian Capital Territory, £6,132,000; Total, £1,577,451,000. Total excess of deposits over withdrawals during 1960–61 was £10,050,000 and interest added was £44,697,000.

D. INSURANCE.

§ 2. Life Assurance.

Life Assurance, p. 789.—The following is a summary of the life assurance business transacted in Australia during 1960 (figures for 1959 in parentheses) compiled from monthly returns collected from the 37 (30) companies registered under the Life Insurance Act 1945–1959, and excluding the Government Insurance Office of New South Wales and the Queensland State Government Insurance Office which operate only within their respective States. Particulars shown are therefore not entirely comparable with those in Chapter XX., which are derived from annual returns and include business of the State Government Offices.

Ordinary Department and Industrial Department, respectively:—New Policies issued in Australia—Number, 447,086 (347,707), 187,608 (189,282); Sum Assured, £799,641,000 (£609,669,000), £39,772,000 (£32,338,000); Policies Matured or Otherwise Discontinued in Australia—Number, 283,848 (199,633), 296,813 (273,916), Sum Assured, £245,691,000 (£182,464,000), £29,182,000 (£28,211,000). Particulars of annuities are excluded.

Premium receipts of Ordinary and Industrial Departments in Australia in 1960 amounted, respectively, to £112,152,000 (£100,465,000) and £15,562,000 (£15,412,000). Claims, etc., paid amounted to £46,315,000 (£38,884,000) and £12,351,000 (£10,695,000), respectively. Particulars of annuities are included.

CHAPTER XXI.—PUBLIC FINANCE.

A. COMMONWEALTH FINANCE.

Consolidated Revenue Fund, pp. 810 and 819.—The table below shows details of revenue and expenditure for the year 1960–61.

COMMONWEALTH CONSOLIDATED REVENUE FUND: REVENUE AND EXPENDITURE, 1960–61.

<i>Six States</i>	755,835	756,633	— 798	192,945
<i>Commonwealth</i>	1,638,279	1,638,279	..	41,640
Grand Total—Unadjusted	2,394,114	2,394,912	— 798	234,585
Adjusted(b)	2,084,959	2,085,757	— 798	234,585

(a) Represents the combined transactions of the Consolidated Revenue Fund and the Business Undertakings—Railways, Tramways and Omnibuses and Sydney Harbour Section of the Maritime Services Board—included in the annual Budget Papers. Adjustments have been made to exclude duplications.
(b) To avoid duplication in aggregating particulars for the Commonwealth and States, the grand totals have been adjusted to exclude State payments to the Commonwealth in respect of pay-roll tax and Commonwealth payments to the States included in State Consolidated Revenue Funds in respect of interest on State debts, special grants, uniform taxation, special financial assistance, grants to universities, tuberculosis, capital expenditure and National Welfare payments. There are other relatively minor payments for which adjustments have not been made and the adjusted figures are therefore still slightly overstated.

D. COMMONWEALTH AND STATE GOVERNMENT SECURITIES.

§ 3. Commonwealth and State Government Securities on Issue.

Securities on Issue and Annual Interest Payable, p. 856.—The following table shows details of the Commonwealth and State Government Securities on Issue and the annual interest payable thereon at 30th June, 1961.

Pigmeats ..	28,483	25,745	27,000	9,603	10,587	5,267	232	107,058

(a) Subject to revision.

(b) Includes Northern Territory.

(c) Factory and farm production.

CHAPTER XXVII.—MINERAL INDUSTRY.

§ 3. Mineral Production.

Quantity and Value of Production, pp. 1044-77.—In the table hereunder, particulars are given of the quantity and value of production in Australia of the principal minerals during the year 1960.

MINERAL PRODUCTION: QUANTITIES AND VALUES, AUSTRALIA, 1960.(a)

METALLIC MINERALS.

Year.	Principal Contents of Metallic Minerals Produced.							Total Value of Output of Metal Mining.
	Copper.	Gold.	Iron.	Lead.	Silver.	Tin.	Zinc.	
	Tons.	Fine oz.	'000 tons.	Tons.	'000 fine oz.	Tons.	Tons.	£'000.
1960 ..	109,767	1,086,317	2,814	308,165	15,175	2,282	290,225	84,518

(a) Subject to revision.

MINERAL PRODUCTION: QUANTITIES AND VALUES, AUSTRALIA, 1960.(a)
—continued.

NON-METALLIC AND FUEL MINERALS.

Year.	Quantities Produced.						Total Value of Output of Non-metal and Fuel Mining.
	Coal.		Gypsum.	Limestone. (b)	Mica.	Salt.	
	Black.	Brown.					
1960	'000 tons. 22,561	'000 tons. 14,967	Tons. 572,830	'000 tons. 5,713	lb. 656,412	Tons. 467,372	£'000. 72,441

(a) Subject to revision.

(b) Excludes limestone used as a construction material.

§ 4. Gold, § 5. Lead, Silver, Zinc, § 6. Copper, § 7. Tin,
pp. 1050, 1056, 1060 and 1062.

Smelter and refinery production of the principal metals treated in Australia during the year 1960 is shown below.

SMELTER AND REFINERY PRODUCTION OF PRINCIPAL METALS: AUSTRALIA, 1960.

Year.	Refined Gold.	Refined Silver. (a)	Refined Lead. (a)	Lead Content of Lead Bullion Produced for Export. (a)	Refined Zinc. (a)	Refined Copper. (a)	Refined Tin. (a)
1960	'000 fine oz. 1,188	'000 fine oz. 8,085	Tons. 189,823	Tons. 52,723	Tons. 120,230	Tons. 70,652	Tons. 2,271

(a) Source: Bureau of Mineral Resources.

CHAPTER XXIX.—REPATRIATION.

§ 2. War Pensions, § 3. Service Pensions, pp. 1109-1114.

The following table gives a summary of war and service pensions current at 30th June 1961, and of the amounts paid in pensions during the year 1960-61.

WAR AND SERVICE PENSIONS: SUMMARY, 1960-61.

Particulars.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	Over-seas.	Total.
<i>War Pensions—</i>								
Pensioners at end of year ..	220,773	190,111	92,648	67,484	57,123	28,305	4,846	661,290
Amount paid during year ..	£ 20,266,212	£ 18,321,956	£ 8,916,007	£ 5,686,305	£ 4,654,876	£ 2,582,986	£ 622,560	£ 61,050,902

Pensioners at end of year ..	16,292	11,902	8,490	5,211	6,101	2,306	..	50,302
Amount paid during year ..	£ 2,734,907	£ 1,730,645	£ 1,213,000	£ 762,677	£ 1,051,198	£ 290,311	..	£ 7,782,738

LIST OF SPECIAL ARTICLES AND MISCELLANEOUS MATTER CONTAINED IN PREVIOUS ISSUES.

This list refers to special articles and other more or less important miscellaneous matter which have appeared in previous issues of the Official Year Book, but which are not included, or are included in abbreviated form only, in the present issue. The list is, in the main, restricted to articles, etc., to which references are not given in the various chapters of this issue.

The figures below indicate, respectively, the number and page of the Official Year Book to which reference is made. In cases where matter was published in more than one previous issue, the volume and page for the last issue containing such matter are given. For possible revisions, however, issues immediately following the one referred to should also be consulted.

GENERAL INDEX.*

NOTE.—This index is preceded by a list of the special articles, etc., which have appeared in previous issues of the Official Year Book. A list of the maps and graphs contained in this issue will be found on page ix. Area, population, etc., of particular localities are indexed under the locality concerned. Subject matter extending continuously over more than one page is indexed according to the first page only. *Where more than one reference to a subject is given, the chief reference, wherever it has been possible to determine it, is indicated by italic type. Two references to a subject so indicated signify major, and approximately equal, importance.*
